This page helps you answer the following kinds of questions:

- What buildings are located on a specific campus or site?
- What buildings have a specific capacity?
- What buildings have a specific maximum capacity?

Information comes from the Building Definition (SLABLDG) page. Information is display-only and cannot be changed.

You cannot access SLABQRY directly. You can access it from the **Building** field on the following forms:

- Building Definition (SLABLDG) page
- Room Definition (SLARDEF) page
- Dorm Room and Meal Application (SLARMAP) page
- Event (SLAEVNT) page

The main window is composed of the following fields.

Fields	Descriptions
Campus	Code of the campus where the building is located. This value comes from the **Campus** field in the main window of the Building Definition (SLABLDG) page. For queries, select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)

Fields	Descriptions
Site	Code of the site location, within a campus, where the building is located. This value comes from the **Site** field in the main window of SLABLDG. For queries, select the **Search** button for this field to display the Site Validation (STVSITE) list. List Site Validation (STVSITE)
Building	Code of the building. This value comes from the **Building** field in the main window of SLABLDG. For queries, select the **Search** button for this field to display the Building Code Validation (STVBLDG) list. List Building Code Validation (STVBLDG)
Description (untitled)	Description associated with the building code, automatically displayed when a valid value is entered in the **Building** field. Display only.
Capacity	Normal capacity of the building. This value comes from the **Capacity** field in the main window of SLABLDG. In query mode, use the sign < to query capacities less than a specific value or the sign > to query capacities greater than a specific value. For example, enter `<100` to query capacities less than 100 or `>200` to query a capacities over 200.
Maximum	Maximum capacity of the building. If this value is greater than the normal capacity, extra people can be assigned to the building. This value comes from the **Maximum** field in the main window of

Fields	Descriptions
	SLABLDG. In query mode, use the sign < to query capacities less than a specific value or the sign > to query capacities greater than a specific value. For example, enter `<100` to query capacities less than 100 or `>200` to query a capacities over 200.

Event (SLAEVNT) page

Updated: August 27, 2020

Use this page to create, maintain, and schedule an event and any associated functions. An event is any occasion that your institution offers or sponsors. Examples include meetings, conferences, and graduation ceremonies.

An event can optionally have several functions scheduled for specific dates, times, and places. For example, an event such as an alumni weekend might have a reception, dinner, conference, and lecture scheduled at various times and locations.

You can also associate an Agency ID with an event. The agency can be created using the Identification (SPAIDEN) page accessed from the Options Menu from the Event Information section.

The buildings where the events are being scheduled must exist on the Building Definition (SLABLDG) page. The rooms being used in event scheduling must exist on the Room Definition (SLARDEF) page. Room conflicts are checked when a record is first created, and also if the record is later updated with a new date, time, or room assignment.

Note: For more information on Event Management forms, instructions, and usage, please refer to the *Event Management* chapter in the *Banner General Use* content.

Event Details section

Updated: August 27, 2020

Use the Event Information section to enter information about an event.

Fields	Descriptions
Event Title header	Free form title of the event.
Description	Free form description of the event. Markdown can be used for the description.
System type	Banner® system associated with the event. The system determines what forms and tables (for example, identification and address forms) are accessed from the other forms for the event. Choices come from the System Indicator Validation (GTVSYSI) list. System codes G, M, and T cannot be used. • The General System (code G) supports other Banner systems and cannot be directly associated with an event. • The MICRO-FAIDS Interface (code M) cannot be associated directly with an event. • Accounts Receivable (code T) is part of the Student System and the Finance System.
Event Type	Type of event. Examples include conference, presentation, and reception. Choices come from the Event/Function Type Validation (STVETYP) list.
Agency or Commercial ID	ID and name of the agency sponsoring the event. Choices come from the Person Search (SOAIDEN) page or Non-Person Search (SOACOMP) page.
Contact ID	ID and name of the contact within the sponsoring agency. If the contact is set up in Banner, choices come from the Person Search (SOAIDEN) page or Non-Person Search (SOACOMP) page. If the contact is not set up in Banner, skip the Contact ID field and enter the contact name in the adjacent field.
Address Type	Address type code for the contact assigned to the event. This field is used only if the contact ID is set up in Banner. Examples include

Fields	Descriptions
	business, mailing, and billing. Choices come from the address page for the associated Banner system.
Phone	Address type code for the contact assigned to the event. This field is used only if the contact ID is set up in Banner. Examples include business, mailing, and billing. Choices come from the address page for the associated Banner system.
Email	Email address of the contact assigned to the event.
Campus	Campus that is sponsoring the event. If you identify the campus for an event, you can query by campus on the Available Event Room Filter (SLQEVNT) page. Choices come from the Campus Validation (STVCAMP) list.
Site	Site location, within a campus, that is sponsoring the event. If you identify the site for an event, you can query by site on the Available Event Room Filter (SLQEVNT) page. Choices come from the Site Validation (STVSITE) list.
District or Division	District/division that is sponsoring the event. Choices come from the District Division Code Validation (GTVDICD) list.
College	College that is sponsoring the event. If you identify the college for an event, you can query by college on the Available Event Room Filter (SLQEVNT) page. Choices come from the College Validation (STVCOLL) list.
Department	Department, within a college, that is sponsoring the event. If you identify the department for an event, you can query by department on the Available Event Room Filter (SLQEVNT) page. Choices come from the Department Validation (STVDEPT) list.
Show on Web	If checked, the event and any applicable functions will be available in Event Management Self-service.
Restricted	If checked, registration through Event Management Self-service will be restricted to individuals with PIDM records.
Restrict Registration to a Single Function	If checked, users will be able to register for at most a single function within this event using self-service.

Event Comments section

Use this window to enter comments about the event.

Fields	Descriptions
Comments	Free form comment about the event.

Function Schedule Summary section

Updated: August 27, 2020

This section provides a summary of the functions of this event. This information is read-only.

Fields	Descriptions
Start Date	Start date of the function.
End Date	End date of the event or function. The end date must be the same as or later than the start date.
Monday	Check box that indicates whether the function is scheduled for Mondays. Choices are: • Checked-The function is scheduled for Mondays. This value is stored in the database as M. • Unchecked-The function is not scheduled for Mondays. If the start and end dates are the same, the system automatically determines the day of week.
Tuesday	Check box that indicates whether the function is scheduled for Tuesdays. Choices are: • Checked-The function is scheduled for Tuesdays. This value is stored in the database as T.

Fields	Descriptions
	• Unchecked-The function is not scheduled for Tuesdays. If the start and end dates are the same, the system automatically determines the day of week.
Wednesday	Check box that indicates whether the function is scheduled for Wednesdays. Choices are: • Checked-The function is scheduled for Wednesdays. This value is stored in the database as W. • Unchecked-The function is not scheduled for Wednesdays. If the start and end dates are the same, the system automatically determines the day of week.
Thursday	Check box that indicates whether the function is scheduled for Thursdays. Choices are: • Checked-The function is scheduled for Thursdays. This value is stored in the database as R. • Unchecked-The function is not scheduled for Thursdays. If the start and end dates are the same, the system automatically determines the day of week.
Friday	Check box that indicates whether the function is scheduled for Fridays. Choices are: • Checked-The function is scheduled for Fridays. This value is stored in the database as F. • Unchecked-The function is not scheduled for Fridays. If the start and end dates are the same, the system automatically

Fields	Descriptions
	determines the day of week.
Saturday	Check box that indicates whether the function is scheduled for Saturdays. Choices are: • Checked-The function is scheduled for Saturdays. This value is stored in the database as S. • Unchecked-The function is not scheduled for Saturdays. If the start and end dates are the same, the system automatically determines the day of week.
Sunday	Check box that indicates whether the function is scheduled for Sundays. Choices are: • Checked-The function is scheduled for Sundays. This value is stored in the database as U. • Unchecked-The function is not scheduled for Sundays. If the start and end dates are the same, the system automatically determines the day of week.
Begin Time	Time when the function begins. Format is HHMM in 24-hour time.
End Time	Time when the function ends. Format is HHMM in 24-hour time.
Building	Building where the function is being held. Choices come from the Building Filter (SLABQRY) page or Event Available Room Filter (SLIAEVN) page.
Building Description	Description of the building.
Room	Room where the function is being held. Choices come from the Room Filter (SLQROOM) page.
Conflict Override	If checked, an override was requested as the building and room are already booked for another use.

Function Information window

Updated: August 27, 2020

Use this window to enter function information details.

Function Information section

Updated: August 27, 2020

Use this section to enter the function information details.

Field	Description
Function	Function code from GTVFUNC.
Function Description	Description of the function from GTVFUNC.
Type	Type of function, from STVETYP. Defaults from the type associated with the function code, but can be updated.
Type Description	Description of the function type, from STVETYP.
Status	Status of the function, from GTVFSTA
Status Description	Description of the status, from GTVFSTA
Guest Allowed	Maximum number of guests for each registrant
Publish From	Start date for publishing the function on Event Management self-service.
Publish To	End date for publishing the function on Event Management self-service.
Capacity	Maximum number of people registering for the function. May also include guests of registrants.
Override	Override capacity available for administrators doing registration on behalf of registrants.
Include Guest for Capacity	If checked, the number of guests accompanying a registrant will be included in the check for room capacity.
Rules	GORRSQL rule to be used to restrict registration. Details are available in the *Event Management Self-Service Configure* content in the Ellucian Documentation site.
Break Even	Amount of revenue needed to break even for the function.
Purpose	Purpose of the function: examples include morale-builder, community service, and fund raiser. Valid values come from

Field	Description
	GTVPURP.
Purpose Description	Description of the purpose.
Emphasis	Emphasis of the function: examples include recruiting and building fund. Valid values come from GTVEMPH.
Emphasis Description	Description of the emphasis.
Sponsor	ID of the sponsor of the function.
Sponsor Description	Name/description of the sponsor.
Invitation	Invitation letter to be sent to invitees using the Letter Generation module. Choices come from the Letter Code Validation (GTVLETR) list.
Invitation Date	Date when invitation letters for the function will be sent.
Response Date	Deadline date when RSVP's must be received.
Committee	Free form name of the committee associated with the function.
Location Contact	Free form text for the contact for the location.
Primary Contact	Free form text for the primary contact for the function
Location	Free form text for the location of the function. This could be a generic location (for example, "Engineering Campus"). Specific locations will be specified in the function schedule summary.
Comments	Will be checked if there are any comments for the function.
Participants	Will be checked if there are any participants identified for the function.
Registrants	Will be checked if there are any registrants for the function.

Function Schedule Summary window

Updated: August 27, 2020

Use this section to enter the function schedule summary details.

Field	Description
Start Date	Start date of the function.
End Date	End date of the function. The end date must be the same as or later than the start date.

Field	Description
Monday	Check box that indicates whether the function is scheduled for Mondays. Choices are: • Checked-The function is scheduled for Mondays. This value is stored in the database as M. • Unchecked-The function is not scheduled for Mondays. If the start and end dates are the same, the system automatically determines the day of week. If the start and end dates are the same, the system automatically determines the day of week.
Tuesday	Check box that indicates whether the function is scheduled for Tuesdays. Choices are: • Checked-The function is scheduled for Tuesdays. This value is stored in the database as T. • Unchecked-The function is not scheduled for Tuesdays. If the start and end dates are the same, the system automatically determines the day of week.
Wednesday	Check box that indicates whether the function is scheduled for Wednesdays. Choices are: • Checked-The function is scheduled for Wednesdays. This value is stored in the database as W. • Unchecked-The function is not scheduled for Wednesdays. If the start and end dates are the same, the system automatically determines the day of week.
Thursday	Check box that indicates whether the function is scheduled for Thursdays.

Field	Description
	Choices are: • Checked-The function is scheduled for Thursdays. This value is stored in the database as R. • Unchecked-The function is not scheduled for Thursdays. If the start and end dates are the same, the system automatically determines the day of week.
Friday	Check box that indicates whether the function is scheduled for Fridays. Choices are: • Checked-The function is scheduled for Fridays. This value is stored in the database as F. • Unchecked-The function is not scheduled for Fridays. If the start and end dates are the same, the system automatically determines the day of week.
Saturday	Check box that indicates whether the function is scheduled for Saturdays. Choices are: • Checked-The function is scheduled for Saturdays. This value is stored in the database as S. • Unchecked-The function is not scheduled for Saturdays. If the start and end dates are the same, the system automatically determines the day of week.
Sunday	Check box that indicates whether the function is scheduled for Sundays. Choices are:If the start and end dates are the same, the system automatically determines the day of week.

Field	Description
	• Checked-The function is scheduled for Sundays. This value is stored in the database as U. • Unchecked-The function is not scheduled for Sundays. If the start and end dates are the same, the system automatically determines the day of week.
Begin Time	Time when the event or function begins. Format is HHMM in 24-hour time.
End Time	Time when the event or function ends. Format is HHMM in 24-hour time.
Building	Building where the event or function is being held. Choices come from the Building Filter (SLABQRY) page or Event Available Room Filter (SLIAEVN) page.
Building Description	Description of the building.
Room	Room where the event or function is being held. Choices come from the Room Filter (SLQROOM) page.
Conflict Override	If checked, an override was requested as the building and room are already booked for another use.

Revenue window

Updated: August 27, 2020

Use this window to track budgeted and actual revenues for a function.

Field	Description
Revenue Code	Type of revenue this function generates. Examples include sponsor subsidies, donations, and fund-raisers. You can enter information for a revenue type more than once. Choices: Choices come from the Function Revenue Validation (GTVREVN) list.
Revenue Code Description	Descriptions associated with the revenue code.

Field	Description
Budget Amount	Amount budgeted for the revenue code.
Actual Amount	Amount received for the revenue code.
Difference	Calculated difference between budget and actual.
Revenue Date	Date when the revenue was received for the revenue code. Source: This value comes from the date when the revenue was entered on the page. It can be changed.
Total Budget Amount	Total amount budgeted for the revenue type.
Total Actual Amount	Total amount actually received for the revenue type.
Total Difference	Total difference between the total actual amount received for the revenue type and the amount budgeted for the function: Actual Amount - Budget Amount This value appears only if you enter both the **Actual Amount** and **Budget Amount**. A positive value means you are doing better than expected. A negative value means you are doing worse than expected.

Expenses window

Updated: August 27, 2020

Use this window to track budgeted and actual expenses for a function.

Field	Description
Expense Code	Type of expense the function incurs. Examples include consulting, equipment, facilities, and publicity. You can enter information for an expense type more than once. Choices: Choices come from the Expense Code Validation (GTVEXPN) list.
Expense Code Description	Description of the expense code.

Field	Description
Budget Amount	Amount budgeted for the expense type.
Actual Amount	Amount actually incurred for the expense type.
Difference	Difference between the amount budgeted for the expense type and the actual amount incurred for the expense type: Budget Amount - Actual Amount This value appears only if you enter both the **Actual Amount** and **Budget Amount**. A positive value means you are doing better than expected. A negative value means you are doing worse than expected.
Expense Date	Date when the expense was incurred. Source: This value comes from the date when the expense was entered on the page. It can be changed.
Total Budget Amount	Total expenses budgeted for the function.
Total Actual Amount	Total expenses actually incurred for the function.
Total Difference	Difference between the total expenses budgeted and the total expenses incurred for the function: Total Budget Amount - Total Expense Amount A positive value means you are doing better than expected. A negative value means you are doing worse than expected.

Fee Structure window

Updated: August 27, 2020

Use this window to define the fees associated with a function.

A fee has three components:

- Fee type code identifies the fee.

- Fee rate code identifies the different kinds of rates the fee can have. For example a registration fee might have a regular rate (REG) page and a senior discount rate (SRDIS) page.
- Fee amount specifies the amount charged for the fee type and fee rate.

Information in this window is informational only and is not used in any processing.

Field	Description
Type	Type of fee associated with the function. Examples include registration, dinner, and charitable donation. Choices: Choices come from the Fee Type Code Validation (GTVFTYP) list.
Type Description	Description of the fee type.
Rate	Type of rate associated with the fee. A fee can have more than one rate. For example, a registration fee might have a regular rate (REG) and a senior discount rate (SRDIS). Choices: Choices come from the Rate Code Validation (GTVRATE) list.
Rate Description	Description of the rate.
Amount	Amount of the fee associated with the fee type and fee rate.

Target Audience window

Updated: August 27, 2020

Use this window to identify the target audiences for a function.

A target audience is a group for which a function is targeted.

Field	Description
Target Code	Type of audience for which the function is targeted. Examples include current undergraduates, high school seniors, and loan recipients.

Field	Description
	Choices: Choices come from the Target Audience Validation (GTVTARG) list.
Target Code Description	Description of the target.

Mailings window

Updated: August 27, 2020

Use this window to track the various mailings for a function.

A function can have an unlimited number of mailings.

Field	Description
Code	Mailing associated with the function. Examples include invitations and tickets. Choices: Choices come from the Mail Code Validation (GTVMAIL) list.
Mail code Description	Description of the mail code.
Mailing Date	Date when the mailing is scheduled to be sent or date it was sent.
Piece Count	Number of items mailed.
Audience	Audience targeted to receive the mailing. This audience must have been previously associated with the function in the Target Audience window. Choices: Choices come from the Target Audience list of audiences defined for the function.
Audience Description	Description of the audience.
Letter Code	Letter to be sent using the Letter Generation module.

Field	Description
	Choices: Choices come from the Letter Code Validation (GTVLETR) list.
Letter Code Description	Description of the letter code.

Meal Menu window

Updated: August 27, 2020

Use this window to identify the various food and beverage choices for a function.

A function can have an unlimited number of meal menu choices.

When you enter a menu choice for an attendee or guest on the Event Registration (GEAATID) page or Attendance (GEAATTD) page, a warning appears if the menu choice has not been set up for the function in this window. You can override the warning if the attendee or guest has special dietary needs. Also, Event Management self-service can be configured so that attendees can select their own meal choice.

Field	Description
Code	Menu choice associated with the function. Examples include baked ham, breakfast buffet, and kosher dinner. Choices: Choices come from the Menu Code Validation (GTVMENU) list.
Menu Description	Description of the menu.

Room/Meal/Phone Rate Code Rules (SLALMFE) page

Updated: August 27, 2020

The intent of this page is to provide the rules to be used in the assessment of dorms, meals, and phones. These rules provide the user with the ability to apply different assessment rules by term.

Before entering data on this page, the Room Rate Code Validation (STVRRCD) page, the

Meal Rate Code Validation (STVMRCD) page, and the Phone Rate Code Validation (STVPRCD) page must be created with the valid rate codes for assessment. The data on this page is necessary for processing the assessment of room, meal, and phone charges.

Meal Rate Code Rules window

Updated: August 27, 2020

This window provides a place to enter the rules for meal rates.

Phone Rate Code Rules window

Updated: August 27, 2020

This window provides a place to create the rules for phone rates.

Meal Assignment (SLAMASG) page

Updated: August 27, 2020

The purpose of the Meal Assignment Page is to create and maintain the information pertaining to the applicant's meal assignments for a specific range of terms. Assignments can be made for students and non-students.

All meal assignments for the range of terms indicated on the applications are displayed and are available for update.

Before assignments are made, an application must have been created on the Dorm Room and Meal Application (SLARMAP) page, or an application which includes the assignment term must exist. In either case, the application must be active and the application's status code must be one that allows meal assignments to be made. Additionally, an entry must exist on the Housing Term Control (SLATERM) page for the assignment term, and the **Permit On-Line Assignments** box must be checked.

The TBRACCD Original Charge Indicator for room charges and the online fee assessment process sets the `TBRACCD_ORIG_CHG_IND` to Y in assessment if applicable. The TBRACCD Source Code (`TBRACCD_SRCE_CODE`) value of V will be passed to Banner® Accounts Receivable.

Use a List function from the **Status** field to access the Meal Assignment Status Filter (SLQMSCD) page.

Assessment Information window

Updated: August 27, 2020

This window is used to display a listing of all meal assessments currently on the system for the selected student. Access this window by using a Scroll Down function from the main window or by selecting Meal Assessments from the Options Menu.

Fields	Descriptions
Process Assessments	Check the **Process Assessments** box to process assessments.
Review Assessments	Check the **Review Assessments** box to review assessments.

Meal Assignment Status (SLAMSCD) page

Updated: August 27, 2020

The intent of the Meal Assignment Status Page is to provide the rules associated with a student's meal status. Statuses are user-defined.

Before entering data on this page, the status codes must have been defined on the Meal Assignment Status Code Validation (STVMSCD) page. While the validation page spans time, the Meal Assignment Status Page is specific for a term. This allows the user to modify status information from one term to the next.

Phone Assignment (SLAPASG) page

Updated: August 27, 2020

The purpose of the Phone Assignment Page is to create and maintain the information pertaining to the applicant's phone assignments.

Assignments can be made for students and non-students. All phone assignments which are associated to the application start and end terms are displayed. The phone number consists of the country code, area code, phone number, and extension, if applicable.

Before assignments are made, an application must have been created on the Dorm Room and Meal Application (SLARMAP) page, or an application which includes the assignment term must exist. In either event, the status of the application must be active. Additionally, an entry on the Housing Term Control (SLATERM) page must exist, and the **Permit On-Line Assignments** box must be checked.

The TBRACCD Original Charge Indicator for room charges and the online fee assessment process sets the `TBRACCD_ORIG_CHG_IND` to Y in assessment if applicable. The TBRACCD Source Code (`TBRACCD_SRCE_CODE`) value of U will be passed to Banner® Accounts Receivable.

Use a List function from the **Status** field to access the Phone Assignment Status Filter (SLQPSCD) page.

Use a List function from the **Telephone** field to access the Room Assignment Filter (SLQRASG) page.

Assessment Information window

Updated: August 27, 2020

This window is used to display a listing of all the existing phone assessments against a student. Access this window by using a Scroll Down function from the main window or by selecting Phone Assessments from the Options Menu.

Fields	Descriptions
Process Assessments	Check the **Process Assessments** box to process assessments.
Review Assessments	Check the **Review Assessments** box to review assessments.

Phone Assignment Status (SLAPSCD) page

Updated: August 27, 2020

The intent of the Phone Assignment Status Page is to provide the rules associated with a student's phone status. Statuses are user-defined.

Before entering data on this page, the status codes must have been defined on the Phone Assignment Status Code Validation (STVPSCD) page. While the validation page spans time, the Phone Assignment Status Page is specific for a term. This allows the user to modify status information from one term to the next.

Room Assignment (SLARASG) page

Updated: August 27, 2020

The purpose of the Room Assignment Page is to create and maintain the information pertaining to the applicants dorm room assignments.

Dorm room assignments can be made for students and non-students. All of the dorm room assignments which fall within the user specified term in addition to all of the assignments within the starting and ending terms of the corresponding application are displayed. The phone number for the room assignment consists of the country code, area code, phone number, and extension, if applicable.

Before assignments are made, an application must have been created on the Dorm Room and Meal Application (SLARMAP) page, or an application which includes the assignment term must exist. In either event, the status of the application must be active and the application status must be one which permits room assignments to be made. Additionally, an entry must exist on the Housing Term Control (SLATERM) page for the assignment term, and the **Permit On-Line Assignments** box must be checked.

Capacity checking on the page functions so that room capacity and room maximum cannot be exceeded. Capacity checking functions as follows:

- If an assignment is attempted and the room is not yet at its capacity, the assignment is made.
- If an assignment is attempted and the room is at its capacity, an error is given which indicates that an overload is required. If the room capacity and maximum are the same and the **Overload (Indicator)** is checked, a capacity error will be given.
- If an assignment is attempted and the room is at its capacity, an error is given which indicates that an overload is required. If the maximum is greater than the capacity, and the **Overload (Indicator)** is checked, and the room is not yet at its maximum capacity, the assignment will be made. If the **Overload (Indicator)** is checked and the room is at its maximum capacity, the assignment will not be allowed.

Capacity checking checks all data elements which affect capacity checked: the building/room, the assignment start and end dates, and the assignment status code (to determine whether an assignment is “active” or not for a specific time period. Capacity checking also checks to insure that active assignments for any given date period do not exceed the room's capacity or maximum available spaces, whether a new assignment is attempted or an existing inactive assignment is re-activated.

The TBRACCD Original Charge Indicator for room charges and the online fee assessment process sets the `TBRACCD_ORIG_CHG_IND` to Y in assessment if applicable. The TBRACCD Source Code (`TBRACCD_SRCE_CODE`) value of B will be passed to Banner® Accounts Receivable.

Use a List function from the **Building** field to access the Available Dorm Room Filter (SLASGNQ) page.

Use a List function from the **Room** field to access the Available Dorm Room Filter (SLASGNQ) page.

Use a List function from the **Status** field to access the Room Assignment Status Filter (SLQASCD) page.

Assessment Information window

Updated: August 27, 2020

You use this window to display a list of all the housing assessments currently held against the student. Access this window by using a Scroll Down function from the main window or by selecting Room Assessments from the Options Menu.

Fields	Descriptions
Process Assessment	Check the **Process Assessment** box to process assessments.
Review Assessment	Check the **Review Assessment** box to review assessments.

Room Definition (SLARDEF) page

Updated: August 27, 2020

Use this page to enter and update information about the rooms in your institution's buildings.

Three Banner® modules use this room information:

- Location Management (Student System) assigns student housing in rooms.
- Class Schedule (Student System) schedules classes in rooms.

- Event Management (General System) schedules events and functions in rooms.

Room information is defined by term. You can change room information for a term at any time. You do not have to wait until the end of the term. You can copy room information from one term to another using the **Copy** button or a Duplicate Record function.

You can identify the attributes of a room. Attributes are special features and equipment such as handicapped-accessible, air-conditioned, and nonsmoking.

Note: The building in which the room is located must exist before entering information for the room. You can create the building on the Building Definition (SLABLDG) page.

Main window

Updated: August 27, 2020

Use this window to enter and update room information by term and building.

Key block

Updated: August 27, 2020

Use the key block to identify the room and the term when the room information is effective.

Fields	Descriptions
Building	Building used at your institution for student housing, classes, events, and functions. Choices come from the Building Filter (SLABQRY) page or Room Filter (SLQROOM) page.
Room	Room used at your institution for student housing, classes, events, and functions. You can enter any user-defined code. Choices come from the Room Filter (SLQROOM) page.
Term	Term when the room information is effective. Use this field to display or change room information for a specific term. Choices come from the Term Code Validation (STVTERM) list.

Room Definition section

Updated: August 27, 2020

Use the Room Definition section to enter and update information about a room in one of your institution's buildings.

Fields	Descriptions
New Term	Term for which new or copied room information applies. Use this field when you create a new room or copy existing room information to a new term. Choices come from the Term Code Validation (STVTERM) list. Use a Duplicate Record function to copy existing room information to a new term. Enter the new term for which the copied room information applies. You do not have to have a term in the **Term** field in the Key section to copy information to a new effective term in the Room Definition section.
From Term	Term when the currently displayed room information becomes effective. This value is automatically updated when room information is created for a new effective term. It cannot be changed.
To Term	Term when the currently displayed room information is no longer effective. The range of effective terms is up to this term, not including the **To Term**. This value is automatically updated when room information is created for a new effective term. It cannot be changed.

Fields	Descriptions
Description	Free form description of the room.
Capacity	Normal capacity of the room. Banner uses this value as follows: • Location Management (Student System) uses this value to assign the correct number of students to a dormitory room. • Class Schedule (Student System) uses this value to schedule a class in a properly sized room. • Event Management (General System) uses this value to schedule an event or function in a properly sized room.
Maximum	Absolute maximum capacity of the room. Enter this value if extra people, over the normal capacity, can be assigned to the room. The Room Assignment (SLARASG) page uses this value if you want to assign extra people to a room. This value comes from the **Capacity** field in this window. It can be changed.
Gender	Radio group that indicates any gender restrictions for the room. The Room Assignment (SLARASG) page and Batch Scheduler Report (SLRSHCD) use this information to assign student housing. The following forms identify a person's gender: • Dorm Room and Meal Application (SLARMAP) page • General Person (SPAPERS) page

Fields	Descriptions
	This value comes from the **Gender** field in the main window on the Building Definition (SLABLDG) page. If the building is available to one gender only (male or female), you cannot change the restriction for an individual room. If the building is available to both genders, you can change the restriction for an individual room. Choices are: Male-The room is available to males only. Females and persons of unknown gender cannot be assigned to the room. This value is stored in the database as M. Female-The room is available to females only. Males and persons of unknown gender cannot be assigned to the room. This value is stored in the database as F. Not Available (default)-The room is available to both males and females. Rooms are assigned as follows: If you are using the Room Assignment (SLARASG) page, you can assign both males and females to the room. This method is useful for married couples and co-ed housing. If you are using the Batch Scheduler Report (SLRSHCD), the gender of the first person assigned to the room determines the gender of the room. If the first person assigned has an unknown gender, no one else is assigned to the room. The gender restriction on the Room Definition

Fields	Descriptions
	(SLARDEF) page does not change.
Room Type	Radio group that indicates the room type. Choices are: Residence Hall (default)-The Room Assignment (SLARASG) page and Batch Scheduler Report (SLRSHCD) can assign IDs to this room. This value is stored in the database as D. Classroom-The Schedule (SSASECT) page can schedule classes in this room, the Event (SLAEVNT) page can schedule events and functions in this room, and the Event Function (GEAFUNC) page can schedule functions in this room. This value is stored in the database as C. Other-SLAEVNT can schedule events and functions in this room, and GEAFUNC can schedule functions in this room. This value is stored in the database as O.
College	College that has primary responsibility for operating and maintaining the room. If you identify the college for a room, you can query by college on the Room Filter (SLQROOM) page. This value comes from the **College** field in the main window on the Building Definition (SLABLDG) page. It can be changed. Choices come from the College Validation (STVCOLL) list.

Fields	Descriptions
Department	Department, within the college, that has primary responsibility for operating and maintaining the room. If you identify the department for a room, you can query by department on the Room Filter (SLQROOM) page. This value comes from the **Department** field in the main window on the Building Definition (SLABLDG) page. It can be changed. Choices come from the Department Validation (STVDEPT) list.
Status	Status of the room. Examples include active and being renovated. If you identify the status of a room, you can query by status on the Room Filter (SLQROOM) page. A room cannot be used for a class, dormitory assignment, event, or function if its status code is flagged inactive on the Room Status Code Validation (STVRMST) page. Choices come from the Room Status Code Validation (STVRMST) list.
Category	Physical area of the building where the room is located. Examples include specific floors and wings. The Location Management module uses categories to assign students to preferred areas of a building. If you identify the category of a room, you can query by category on the Room Filter (SLQROOM) page.

Fields	Descriptions
	Choices come from the Building Category Filter (SLQBCAT) page.
Partition	Defines an appropriate partition code for the room and provides a means to group rooms for scheduling purposes. Valid values come from the Scheduling Partition Validation (GTVPARS) page. If a partition code has been defined for the corresponding building record, the building partition code will default into this field. You may change the partition code that has been established for the building. The extract process will first read the partition from the room definition. If a partition code is not established on the room record, the partition code defined for the building will be retrieved.
Room Rate	Rate charged for the room. The Room Assignment (SLARASG) page uses this rate as the default room rate. It can be changed on SLARASG. This value comes from the **Room Rate** field in the main window on the Building Definition (SLABLDG) page. It can be changed. Choices come from the Room Rate Code Validation (STVRRCD) list.
Phone Rate	Telephone rate charged for the room. The Phone Assignment (SLAPASG) page uses this rate as the default phone rate. It can be changed on SLAPASG. This value comes from the **Phone Rate** field in the main window on the Building Definition

Fields	Descriptions
	(SLABLDG) page. It can be changed. Choices come from the Phone Rate Code Validation (STVPRCD) list.
Phone	Country code, area code, main telephone number (without a hyphen), and extension for the room. The area code is optional. The Phone Assignment (SLAPASG) page uses this as the default telephone number. It can be changed on SLAPASG.
Utility Rate	Utility rate associated with the room for the time period indicated in the **Period** field. This rate is informational only and is not used in any processing. The value can be 0.00 through 99999.99.
Period	Pulldown list that indicates the time period associated with the utility rate. This value is informational only and is not used in any processing. Choices are: None (default)-No rate period is entered. Month-The rate period is monthly. This value is stored in the database as MO. Term-The rate period is term. This value is stored in the database as TR. Year-The rate period is yearly. This value is stored in the database as YR. Day-The rate period is daily. This value is

Fields	Descriptions
	stored in the database as DY.
Priority	Number that indicates the order in which the Batch Scheduler Report (SLRSHCD) schedules the room. Rooms are scheduled in ascending order, starting with 99999999. The default value is 9999999. It can be changed.
Key Number	Free form number of the key associated with the room.
Dimensions - Width (feet)	Width (in feet) of the room. The value can be 0.00 through 9999.99.
Dimensions - Length (feet)	Length (in feet) of the room. The value can be 0.00 through 9999.99.
Dimensions - Area (square feet)	Area (in square feet) of the room. This value is automatically calculated when the width and length are saved.

Attributes, Inactive Dates, and Comments window

Updated: August 27, 2020

This section is used to define room information.

Use this window to enter the following room information:

- Attributes. These are special features and equipment of the room such as handicapped-accessible, air-conditioned, and nonsmoking.
- Inactive dates. These are dates the room is unavailable.
- Comments. This is miscellaneous information for the room.

Room Attributes section

Updated: August 27, 2020

Use the Room Attributes section to enter information about the special features and equipment that apply a room and to identify the range of terms when the room attributes are effective. Examples include handicapped-accessible, air-conditioned, and nonsmoking.

Fields	**Descriptions**
From Term	Term when the currently displayed room attributes become effective. This value comes from the **From Term** field in the main window. It cannot be changed.
To Term	Term when the currently displayed room attributes are no longer effective. The range of effective terms is up to this term, not including the **To Term**. This value comes from the **To Term** field in the main window. It cannot be changed.
Attribute	Special features and equipment that apply to the room. A room can have an unlimited number of attributes. Examples include handicapped-accessible, air-conditioned, and nonsmoking. These values come from the **Attribute** fields in the Building Attributes, Category, and Comments window on the Building Definition (SLABLDG) page. They can be changed or deleted. Choices come from the Building/Room Attributes Validation (STVRDEF) list.
Must Match	Check box that indicates whether the attribute is critical and must be matched when the Batch Scheduler Report

Fields	Descriptions
	(SLRSHCD) assigns dormitory rooms. Choices are: checked-The attribute must be matched when SLRSHCD assigns dormitory rooms. This value is stored in the database as Y. unchecked-The attribute does not have to be matched when SLRSHCD assigns dormitory rooms.

Room Inactivation section

Updated: August 27, 2020

Use the Room Inactivation section to identify dates when the room is unavailable.

Fields	Descriptions
Start Date	Start date of the time period when the room is unavailable for scheduling. Inactive records only require that a start date be entered. A start time is not required.
Begin Time	Time on the start date when the room starts being unavailable for scheduling. Format is HHMM in 24-hour military time.
Mon	Check box that indicates whether the room is available for scheduling on Mondays during the specified time period. Choices are: • checked-Room is unavailable on Mondays. • unchecked-Room is available on Mondays.
Tue	Check box that indicates whether the room is available for scheduling on Tuesdays during the specified time period. Choices are: • checked-Room is unavailable on Tuesdays.

Fields	Descriptions
	• unchecked-Room is available on Tuesdays.
Wed	Check box that indicates whether the room is available for scheduling on Wednesdays during the specified time period. Choices are: • checked-Room is unavailable on Wednesdays. • unchecked-Room is available on Wednesdays.
Thu	Check box that indicates whether the room is available for scheduling on Thursdays during the specified time period. Choices are: • checked-Room is unavailable on Thursdays. • unchecked-Room is available on Thursdays.
Fri	Check box that indicates whether the room is available for scheduling on Fridays during the specified time period. Choices are: • checked-Room is unavailable on Fridays. • unchecked-Room is available on Fridays.
Sat	Check box that indicates whether the room is available for scheduling on Saturdays during the specified time period. Choices are: • checked-Room is unavailable on Saturdays. • unchecked-Room is available on Saturdays.
Sun	Check box that indicates whether the room is available for scheduling on Sundays during the specified time period. Choices are:

Fields	Descriptions
	• checked-Room is unavailable on Sundays. • unchecked-Room is available on Sundays.
End Date	End date of the time period when the room is unavailable for scheduling. The start date and the end date can be equal, or the end date can be greater than the start date.
End Time	Time on the end date when the room stops being unavailable for scheduling. Format is HHMM in 24-hour military time. If you enter an end time, then you need to also enter an end date.

Room Comments section

Updated: August 27, 2020

Use the Room Comments section to enter miscellaneous information for the room.

Fields	Descriptions
From Term	Term when the currently displayed room comments become effective. This value comes from the **From Term** field in the main window. It cannot be changed.
To Term	Term when the currently displayed room comments are no longer effective. The range of effective terms is up to this term, not including the To Term. This value comes from the **To Term** field in the main window. It cannot be changed.
Comments (untitled)	Free form comments about the room.

Create a room

Updated: August 27, 2020

You can create a room and provide the required values.

About this task

Note: The building in which the room is located must exist before entering information for the room. You can create the building on the Building Definition (SLABLDG) page.

Procedure

1. Access the Room Definition (SLARDEF) page.
2. Enter the building code in the **Building** field.
3. Enter the room code.
4. Go to the Room Definition section.
5. Enter the effective term in the **New Term** field.
6. Enter the room capacity.
7. Select a value for the **Maximum** field from the Lookup button, and verify the value. Change if necessary.
8. Verify the setting of the **Gender** radio group. Change if necessary.
9. Verify the setting of the radio group. Change if necessary.
10. Verify any displayed room information. Change if necessary.
11. **Optional:** Enter any other room information in the Room Definition section.
12. **Optional:** Go to the Room Attributes section, and enter each room attribute on a blank line.
13. **Optional:** Go to the Room Inactivation section, and inactivate rooms by start and end date and time and day of the week if the room will not be in use at certain times or days.
14. **Optional:** Go to the Room Comments section, and enter comments.
15. Save.

Copy room information to a new term

Updated: August 27, 2020

You can copy the room information to a new term.

About this task

Procedure

1. Access the Room Definition (SLARDEF) page.
2. Enter the building code in the **Building** field.
3. Enter the room code.
4. **Optional:** Enter the term of the room information to be copied.
5. Go to the Room Definition section.
6. Perform a Duplicate Record function in the **New Term** field.
7. Enter the new term to which room information is being copied.
8. **Optional:** Enter any changes to the displayed room information.
9. Save.

Make a room not active

Updated: August 27, 2020

You can deactivate a room.

About this task

Procedure

1. Access the Room Definition (SLARDEF) page.
2. Enter the building code in the **Building** field.
3. Enter the room code.
4. Go to the Room Definition section.

5. Go to the Room Inactivation section.
6. Enter the start date of the inactive period.
7. Enter the start time of the inactive period.
8. Enter the end date of the inactive period.
9. Enter the end time of the inactive period.
10. Check the check boxes for the days of the week the room should be inactive.
11. Save.

Dorm Room and Meal Application (SLARMAP) page

Updated: August 27, 2020

The Dorm Room and Meal Application Page is where all housing application information originates.

The room and meal application information entered and maintained here is the basis for all room and meal plan assignments made within the Location Management and Housing Module. Room and meal applications may be made for a specific term or span a range of terms. Applications may be entered for students and non-students.

The Dorm Room and Meal Application Page must be created for a person before any room or meal assignments being entered for that person. The person must have been added to the system using the General Person Identification (SPAIDEN) page before this page being created.

Use a Count Filter Hits function from the **Term** field to access the Application Filter (SLQRMAP) page and view applications for the ID.

If a room assignment exists on SLARASG, you can change the **To Term** and **From Term** values on SLARMAP to shorten or extend the range, under the following conditions:

- You may change the **To Term** value, as long as no overlapping applications currently exist, or no room, meal, or phone assignments exist for a term in which you attempt to shorten or extend the to term.
- You are unable to update the **From Term** value when room, meal, or phone assignments exist in the current from term.

- If no room, meal, or phone assignments exist in the from term, the **From Term** value can be changed, as long as the rules for overlapping applications and room, meal, or phone assignments apply.
- If no assignment exists on SLARASG, you can change both **From Term** and **To Term** values, as long as there are no existing room, meal, or phone assignments.

Special Attributes window

Updated: August 27, 2020

You use this window to enter special dorm room attributes for the applicant. If the **Must Match** box is checked, the applicant can only be put in a room with that attribute attached to it.

Roommate Application (SLARMAT) page

Updated: August 27, 2020

You use this page to create and maintain roommate applications by term which will be used in the batch scheduling process. Only one roommate application record needs to exist for the group of individuals requesting to be scheduled together.

You can enter the IDs of the individuals who want to share a dorm room in the Roommate Application section. Also, you can indicate preference for campus, building, category and room in the Roommates Room Preference section. Finally, you can indicate special room attributes as desired or required in the Roommate Room Attribute section. Roommates must, ultimately, have individual applications filed through the Dorm Room and Meal Application (SLARMAP) page to be considered for scheduling.

To add an application, enter ADD in the **Roommate Sequence Number** field or select Add Application from the Options Menu.

Data must be created on these forms, before using this page:

- Campus Code Validation (STVCAMP) page
- Building Code Validation (STVBLDG) page
- Building Definition (SLABLDG) page
- Room Definition (SLARDEF) page, and

- Building/Room Attribute Code Validation (STVRDEF) page

Dorm Room Filter (SLARUSE) page

Updated: August 27, 2020

This page is used to display information for all dorm rooms in the system which have been assigned. It may be used to identify persons assigned to a dorm room. This page is query-only; no changes may be made to any field.

Buildings must be defined on the Building Definition (SLABLDG) page; rooms must be defined on the Room Definition (SLARDEF) page; and rooms must have been assigned to persons on the Room Assignment (SLARASG) page.

You may access the Dorm Room Filter (SLARUSE) page several different ways.

- Use the Location Management and Housing Menu (*LOCATION).
- Use the Available Dorm Rooms item in the Options Menu on SLASGNQ to open the Dorm Rooms window, and then select the Filter Dorm Room item in the Options Menu to access SLARUSE.
- Use a Count Filter Hits function from the **Building** field in the Available Dorm Rooms window of SLASGNQ.

Available Dorm Room Filter (SLASGNQ) page

Updated: August 27, 2020

The Available Dorm Room Filter Page allows users to query available dorm rooms based on the fields in the Key block, such as start and end dates, building, campus, site, gender, category, status, rate, and minimum remaining beds.

You can also define up to six specific room attributes (such as non-smoking, handicap accessible, private room, and so on). Select the **Must Match** indicator when an attribute must match the entered code from the Building/Room Attributes Validation (STVRDEF) page.

Perform a Go button function from the Key block to access the Available Rooms information and view all available dorm rooms that match the specified selection criteria. You can position the cursor on the dorm room you want to assign and bring that record into the Dorm Room Assignment (SLARASG) page by performing a Select function.

Before accessing this page, data must be defined on the Building Definition (SLABLDG) page and the Room Definition (SLARDEF) page.

The Available Dorm Room Filter (SLASGNQ) page is accessed by using a List function from the **Building** or **Room** fields in the Room Assignments section of the Room Assignment (SLARASG) page.

Housing Term Control (SLATERM) page

Updated: August 27, 2020

The intent of the Housing Term Control Page is to allow for the control of certain housing assignment and assessment attributes.

These attributes include the ability to permit assignments, the ability to assess housing, meal plan, and phone assessments, the effective date to be used for the assessments, and the roommate sequence number.

An entry must be made on the Term Code Validation (STVTERM) page before creating information on this page. This data must be entered before creating housing assignments and assessing fees.

Main window

Updated: August 27, 2020

Use this window to enter and update housing information by term.

Key block

Updated: August 27, 2020

Use the key block to define the term for which the rules will be effective.

Fields	Descriptions
Term	Term when the housing information is effective. List Term Code Validation (STVTERM)

Housing Term Control block

Updated: August 27, 2020

Use the Housing Term Control block to define the housing assignment and assessment attribute rules for the term in the key block.

Fields	Descriptions
Permit On-line Assignments	Check box used to indicate that on-line housing assignments are permitted for the term.
Allow On-line Fee Assessment	Check box used to indicate that on-line fee assessment is allowed for the term.
Fee Assessment Effective Date	Date charges are to be effective for fee assessment for the term.
Original Charge Cutoff Date	Date through which all assessments are considered original charges for the term. This is the last date (greater than or equal to) to set the **Original Charge Indicator** on all transactions. The fee assessment process checks this date to determine if the **Original Charge Indicator** should be set. This is a null field and is defaulted to the `STVTERM_HOUSING_START_DATE` field when a new record is created. This field can be updated. This information is used in Title IV processing.
Roommate Sequence Number	Oneup sequence number for a roommate. This number cannot be lower than the number on file.

Event Available Room Filter (SLIAEVN) page

Updated: August 27, 2020

Use this page to display a list of rooms available in a specified date and time range. You can query all available rooms in a range, or you can limit the query by entering selection criteria.

This page help you answer the following kinds of questions:

- What rooms are available in a specified date and time range?
- What rooms are available for a specified meeting pattern?
- What rooms are available in a specified building, campus, or site?
- What available rooms have a specified capacity?
- What available rooms have a specified room type?
- What available rooms have specified attributes (features)?

Information comes from the Room Definition (SLARDEF) page. Information is display-only and cannot be changed.

Main window

Updated: August 27, 2020

Use this window to enter the search criteria for displaying a list of rooms available in a specified date and time range with specific attributes.

Key block

Updated: August 27, 2020

Use the key block to enter the search criteria for displaying a list of rooms available in a specified date and time range. You can also specify the days of the week, building, campus, site, capacity, and room type.

You can enter up to six room attributes as search criteria. Room attributes are special features and equipment that apply a room such as auditorium, computer lab, library, multimedia room, and so on.

Fields	Descriptions
Start Date	Start date of the period you want to query.
End Date	End date of the period you want to query.
Mon	Check box that indicates whether Monday is in the meeting

Fields	Descriptions
	pattern you want to query. Choices are: checked-Include Monday in the meeting pattern. This value is stored in the database as M. unchecked-Do not include Monday in the meeting pattern.
Tue	Check box that indicates whether Tuesday is in the meeting pattern you want to query. Choices are: checked-Include Tuesday in the meeting pattern. This value is stored in the database as T. unchecked-Do not include Tuesday in the meeting pattern.
Wed	Check box that indicates whether Wednesday is in the meeting pattern you want to query. Choices are: checked-Include Wednesday in the meeting pattern. This value is stored in the database as W. unchecked-Do not include Wednesday in the meeting pattern.
Thu	Check box that indicates whether Thursday is in the meeting pattern you want to query. Choices are: checked-Include Thursday in the meeting pattern. This value is stored in the database as R. unchecked-Do not include Thursday in the meeting pattern.
Fri	Check box that indicates whether Friday is in the meeting pattern

Fields	Descriptions
	you want to query. Choices are: checked-Include Friday in the meeting pattern. This value is stored in the database as F. unchecked-Do not include Friday in the meeting pattern.
Sat	Check box that indicates whether Saturday is in the meeting pattern you want to query. Choices are: checked-Include Saturday in the meeting pattern. This value is stored in the database as S. unchecked-Do not include Saturday in the meeting pattern.
Sun	Check box that indicates whether Sunday is in the meeting pattern you want to query. Choices are: checked-Include Sunday in the meeting pattern. This value is stored in the database as U. unchecked-Do not include Sunday in the meeting pattern.
Begin Time	Start time of the period you want to query. Format is HHMM in 24-hour military time.
End Time	End time of the period you want to query. Format is HHMM in 24-hour military time.
Building	Building you want to query. Buildings are used at your institution for student housing, classes, events, and functions. Choices come from the Building Code Validation (STVBLDG) list.
Campus	Campus you want to query. This code identifies the campus where

Fields	Descriptions
	the building is located. Choices come from the Campus Validation (STVCAMP) list.
Site	Site you want to query. This code identifies the site location within the campus where the building is located. Choices come from the Site Validation (STVSITE) list.
Capacity	Minimum capacity you want to query. A room that has this capacity or greater is a match.
Room Type	Radio group that indicates the room type you want to query. Choices are: Classroom-These rooms can be used for classes, events, and functions. This value is stored in the database as C. Other-These rooms can be used for events and functions. This value is stored in the database as O. All-These rooms can be used for classes, events, and functions.
Attribute 1 through Attribute 6	Attributes you want to query. Attributes are special features and equipment that apply a room. Choices come from the Building/Room Attributes Validation (STVRDEF) list.

Available Rooms section

Updated: August 27, 2020

Use this section to display a list of available rooms that meet your selection criteria.

Fields	Descriptions
Building	Building in which the available room is located. This value comes from the

Fields	Descriptions
	Building field in the main window on the Room Definition (SLARDEF) page. It cannot be changed.
Room	Room used at your institution for student housing, classes, events, and functions. These values come from the **Room** and **Description** fields in the main window on the Room Definition (SLARDEF) page. They cannot be changed.
Campus	Campus where the building is located. This value comes from the **Campus** field in the main window on the Building Definition (SLABLDG) page. It cannot be changed.
Site	Site location within the campus where the building is located. This value comes from the **Site** field in the main window on the Building Definition (SLABLDG) page. It cannot be changed.
Capacity	Normal capacity of the room. This value comes from the **Capacity** field in the main window on the Room Definition (SLARDEF) page. It cannot be changed.
Room Type	Type of room. This value comes from the **Room Type** field in the main window on the Room Definition (SLARDEF) page. It cannot be changed. Choices are: C-The room can be used for classes, events, and functions. O-The room can be used for events and functions.

Filter available rooms

Updated: August 27, 2020

You can filter the available rooms based on the criteria.

About this task

Procedure

1. Access the Event Available Room Filter (SLIAEVN) page.
2. Enter the start and end dates of the period you want to query.
3. Enter the meeting pattern you want to query in the **Mon**, **Tue**, **Wed**, **Thu**, **Fri**, **Sat**, and **Sun** checkboxes.
4. Enter the begin and end times of the period you want to query.
5. **Optional:** To refine your query, enter additional selection criteria for building, campus, room type, and so on.
6. **Optional:** Enter the attributes you want to query.
7. Go to the Available Rooms section.
8. View information for the matching rooms.

Room Assignment Status Filter (SLQASCD) page

Updated: August 27, 2020

The intent of the Room Assignment Status Filter Page is to provide the user with a list of statuses that may be used at a specific point in time.

If a status code has a date range that does not include the status date from the Room Assignment (SLARASG) page, the status will not appear on the page. Before viewing data on this page, the status codes must be entered through the Room Assignment Status (SLAASCD) page.

This page cannot be accessed directly. The Room Assignment Status Filter (SLQASCD) page is accessed from SLARASG by using a List function from the **Status** field in the Room Assignments section.

Building Category Filter (SLQBCAT) page

Updated: August 27, 2020

Use this page to display a list of categories in a building. A category is a physical area in a building. Examples include specific wings and floors. You can query all categories in a building, or you can limit the query by entering selection criteria.

Information comes from the Building Definition (SLABLDG) page. Information is display-only and cannot be changed.

You cannot access SLQBCAT directly. You can only access it from the **Category** field on the following forms:

- Room Definition (SLARDEF) page
- Dorm Room and Meal Application (SLARMAP) page
- Available Dorm Room Filter (SLASGNQ) page

Main window

Updated: August 27, 2020

This section is used to define Category Code information.

The following fields are found in the main window:

Fields	Descriptions
Category Code	Physical area of the building. Examples include specific floors and wings. The Location Management module uses building categories to assign students to preferred areas of a building. These values come from the **Category** field in the main window on the Building Definition (SLABLDG) page. They cannot be changed.
Activity Date	Date when the category was created or last updated.

Filter building categories

Updated: August 27, 2020

You can filter the building categories.

About this task

Procedure

1. Access the Building Category Filter (SLQBCAT) page from the **Category** field on one of the following forms:
   - Room Definition (SLARDEF) page
   - Dorm Room and Meal Application (SLARMAP) page
   - Available Dorm Room Filter (SLASGNQ) page
2. View information for the building's categories.

Event Filter (SLQEVNT) page

Updated: August 27, 2020

Use this page to display summary information about the events at your institution. You can query all events, or you can limit the query by entering selection criteria.

This page helps you answer the following kinds of questions:

- What events are associated with a specific Banner® system?
- What events are planned for a specific campus, site, college, or department?
- What events are sponsored by a specific agency?

Information comes from the Event (SLAEVNT) page. Information is display-only and cannot be changed.

You cannot access SLQEVNT directly. You can access it only from the **Event** field on the following forms:

- Event (SLAEVNT) page
- Event Function (GEAFUNC) page
- Function Task (GEATASK) page
- Function Participant (GEAPART) page

- Function Comment (GEAFCOM) page
- Event Registration (GEAATID) page
- Attendance (GEAATTD) page
- Function Attendance Inquiry (GEIATTD) page
- Event Function Inquiry (GEIFUNC) page
- Individual Function Inquiry (GEIIDFN) page
- Function Subject Index Filter (GEISUBJ) page

Main window

Updated: August 27, 2020

This section is used to define event information.

The following fields are found in the main window:

Fields	Descriptions
Description	Free form description of the event. This value comes from the **Description** field in the main window on the Event (SLAEVNT) page. It cannot be changed.
System	Banner system associated with the event. This value comes from the **System** field in the main window on the Event (SLAEVNT) page. It cannot be changed. In query mode, choices come from the System Indicator Validation (GTVSYSI) list.
Type	Type of event. Examples include conference, presentation, and reception. This value comes from the **Event Type** field in the main window on the Event (SLAEVNT) page. It cannot be changed. In query mode, choices come from the Event/Function Type Validation (STVETYP) list.
Campus	Campus that is sponsoring the event. This value comes from the **Campus** field in the main window on the Event (SLAEVNT) page. It

Fields	Descriptions
	cannot be changed. In query mode, choices come from the Campus Validation (STVCAMP) list.
Site	Site location, within a campus, that is sponsoring the event. This value comes from the **Site** field in the main window on the Event (SLAEVNT) page. It cannot be changed. In query mode, choices come from the Site Validation (STVSITE) list.
College	College that is sponsoring the event. This value comes from the **College** field in the main window on the Event (SLAEVNT) page. It cannot be changed. In query mode, choices come from the College Validation (STVCOLL) list.
Department	Department, within a college, that is sponsoring the event. This value comes from the **Department** field in the main window on the Event (SLAEVNT) page. It cannot be changed. In query mode, choices come from the Department Validation (STVDEPT) list.
Agency ID	ID of the agency sponsoring the event. This value comes from the **Agency or Commercial ID** field in the main window on the Event (SLAEVNT) page. It cannot be changed.

Filter events procedure

Updated: August 27, 2020

You can filter the events on various forms.

About this task

Procedure

1. Access the Event Filter (SLQEVNT) page from the **Event** field on one of the following forms:
    - Event (SLAEVNT) page
    - Event Function (GEAFUNC) page
    - Function Task (GEATASK) page
    - Function Participant (GEAPART) page
    - Function Comment (GEAFCOM) page
    - Event Registration (GEAATID) page
    - Attendance (GEAATTD) page
    - Function Attendance Inquiry (GEIATTD) page
    - Event Function Inquiry (GEIFUNC) page
    - Individual Function Inquiry (GEIIDFN) page
    - Function Subject Index Filter (GEISUBJ) page
2. **Optional:** To refine your query, enter selection criteria.
3. Select Execute Filter.
4. View information for the matching events.

Available Class Room Filter (SLQMEET) page

Updated: August 27, 2020

Use the Available Class Room Filter (SLQMEET) page to enter the selection criteria needed to schedule a class section into an available classroom.

Selection criteria based on date, time, building, campus, site, capacity and room attributes may be used to select all available rooms that meet the criteria. The query returns a list of the available rooms from which you can select a room, and by using the Select function, schedule the class into that room for the specified days and times.

This page is dependent on the buildings and rooms being defined on the Building Definition (SLABLDG) page and the Room Definition (SLARDEF) page respectively. It is also dependent on the class section having been saved on the Schedule (SSASECT) page.

This page cannot be accessed directly. You must access it by using a Help function from the **Room** field in the Meeting Time window of the Schedule (SSASECT) page or by selecting Filter Available Class Room from the Options Menu in the Meeting Time window.

Main window

Updated: August 27, 2020

The main window is composed of the Available Class Room Search section, the Desired Room Attributes section, and the Classroom Filter Results Data section.

Available Class Room Search section

Updated: August 27, 2020

Use this section to specify the search criteria for your classroom query.

Fields	Descriptions
Meet	Code for the meeting type. For queries, select the **Search** button for this field to display the Meeting Time Code Validation (STVMEET) page. List Meeting Time Code Validation (STVMEET) page
Mon	Check box used to query on sections that meet on Mondays.
Tue	Check box used to query on sections that meet on Tuesdays.
Wed	Check box used to query on sections that meet on Wednesdays.

Fields	Descriptions
Thu	Check box used to query on sections that meet on Thursdays.
Fri	Check box used to query on sections that meet on Fridays.
Sat	Check box used to query on sections that meet on Saturdays.
Sun	Check box used to query on sections that meet on Sundays.
Start Time	Time of day on which to query. This must be entered in 24-hour time; for example, 10:30 AM would be entered as `1030`, and 7:00 PM would be entered as `1900`.
End Time	Time of day on which to query. This must be entered in 24-hour time; for example, 11:00 AM would be entered as `1100`, and 9:30 PM would be entered as `2130`.
Building	Code of the building on which to query. Select the **Search** button for this field to display the Building Filter (SLABQRY) page. List Building Filter (SLABQRY) page
Campus	Code of the campus on which to query. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
Site	Code of the site on which to query. Select the **Search** button for this field to display the Site Validation (STVSITE) list.

Fields	Descriptions
	List Site Validation (STVSITE)
Capacity	Minimum number of seats needed for the class being scheduled. The system will automatically select available rooms that have a capacity equal to or greater than the capacity entered in this field.

Desired Room Attributes section

Updated: August 27, 2020

Use this section to specify any room attributes needed for the section for which you are scheduling a room.

Fields	Descriptions
Attribute	Code of the room attribute on which to query. Select the **Search** button for this field to display the Building/Room Attributes Validation (STVRDEF) list. List Building/Room Attributes Validation (STVRDEF)

Classroom Filter Results Data section

Updated: August 27, 2020

Use this section to view the results of your query. Access this section of the page using a Scroll Down function from the Desired Room Attributes section or by selecting the Available Rooms item from the Options Menu.

The search results include all rooms whose capacity is equal to or greater than the value you enter in the **Capacity** field in the Key section.

You can also perform a query in this section to narrow the search results. This is helpful if you get a large number of records matching your original search criteria.

Fields	Descriptions
Building	Code of the building for a record that meets the search criteria. For queries, select the **Search** button for this field to display the Building Filter (SLABQRY) page. List Building Filter (SLABQRY) page
Room	Number of the room in the building.
Description	Description associated with the room.
Campus	Code of the campus where the building is located.
Site	Code of the site where the campus is located.
Capacity	Actual capacity of the room.

Meal Assignment Status Filter (SLQMSCD) page

Updated: August 27, 2020

The intent of the Meal Assignment Status Filter Page is to provide the user with a list of statuses that may be used at a specific point in time.

If a status code has a date range that does not include the status date on the Meal Assignment (SLAMASG) page, that status will not appear on the page.

Before viewing data on this page, the status codes must be entered through the Meal Assignment Status (SLAMSCD) page.

This page cannot be accessed directly. The Meal Assignment Status Filter (SLQMSCD) page is accessed from SLAMASG by using a List function from the **Status** field in the Meal Assignments section.

Phone Assignment Status Filter (SLQPSCD) page

Updated: August 27, 2020

The intent of the Phone Assignment Status Filter Page is to provide the user with a list of statuses that may be used at a specific point in time.

If a status code has a date range that does not include the status date on the Phone Assignment (SLAPASG) page, that status will not appear on the page.

Before viewing data on this page, the status codes must be entered through the Phone Assignment Status (SLAPSCD) page.

This page cannot be accessed directly. The Phone Assignment Status Filter (SLQPSCD) page is accessed from SLAPASG by using a List function from the **Status** field in the Phone Assignments section.

Room Assignment Filter (SLQRASG) page

Updated: August 27, 2020

The purpose of the Room Assignment Filter Page is to provide the user with the room assignment information when assigning phone information.

This page is accessed through the Phone Assignment (SLAPASG) page. The phone number for the room assignment consists of the country code, area code, phone number, and extension, if applicable.

Before viewing data on this page, the room assignment information must have been entered through the Room Assignment (SLARASG) page.

This page cannot be accessed directly. The Room Assignment Filter (SLQRASG) page is accessed from SLAPASG by using a List function from the **Telephone** field in the Phone Assignments section.

Application Filter (SLQRMAP) page

Updated: August 27, 2020

This page is used to display a list of all the applications on the system for a selected student. This page cannot be accessed directly.

You can access this page from SLARMAP. To do so, perform a Count Filter Hits function from the **Term** field in the Key block.

Roommate Application Filter (SLQRMAT) page

Updated: August 27, 2020

The Roommate Application Filter Page is used to display all the roommate application information currently on the system. This page cannot be accessed directly.

The Roommate Application Filter Page is run in query-only mode; no changes can be made to any field on the page.

You can access this page from SLARMAT. To do so, perform a Count Filter Hits function from the **Roommate Sequence Number** field in the Key block.

Room Filter (SLQROOM) page

Updated: August 27, 2020

Use the Room Filter (SLQROOM) page to display summary information about the rooms in your institution's buildings for an indicated term. You can query all rooms, or you can limit the query by entering selection criteria.

This page helps you answer the following kinds of questions:

- What rooms are located in a specific building?
- What rooms have a specific capacity?
- What rooms are active?
- What rooms are maintained by a specific college or department?
- What rooms are located in a specific area of the building?
- What rooms are restricted to a specific gender?

Information comes from the Room Definition (SLARDEF) page. Information is display-only and cannot be changed.

You cannot access SLQROOM directly. You can only access it from the **Room** field on the following forms:

- Room Definition (SLARDEF) page
- Dorm Room and Meal Application (SLARMAP) page
- Schedule (SSASECT) page
- Event (SLAEVNT) page
- Event Function (GEAFUNC) page

Main window

Updated: August 27, 2020

Use this window to display summary information about the rooms in your institution's buildings for an indicated term. This window is composed of the Attribute Control section and the Room Description section.

Attribute Control section

Updated: August 27, 2020

Use this section to identify the term and dates when the room information is effective.

Fields	Descriptions
Term	Term when the room information is effective. Display only. This term depends on the term in effect on the page that called SLQROOM. • If you access SLQROOM from the Room Definition (SLARDEF) page, Dorm Room and Meal Application (SLARMAP) page, or Schedule (SSASECT) page, this value comes from the **Term** field on the calling page. If the calling page does not have a term, `999999` is the default value.

Fields	Descriptions
	• If you access SLQROOM from the Event (SLAEVNT) page or Event Function (GEAFUNC) page, this value comes from the term on the Term Code Validation (STVTERM) page for the current date.
Start Date	Start date of the term. Display only. This value comes from the **Term Start Date** field on STVTERM for the term in the **Term** field.
End Date	End date of the term. Display only. This value comes from the **Term End Date** field on STVTERM for the term in the **Term** field.

Room Description section

Updated: August 27, 2020

Use this section to display summary information about the rooms in your institution's buildings for an indicated term.

Fields	Descriptions
Building	Code of the building. This value comes from the **Building** field in the main window of SLARDEF. For queries, select the **Search** button for this field to display the Building Code Validation (STVBLDG) list. List Building Code Validation (STVBLDG)
Room	Code of the room. This value comes from the **Room** field in the main window of SLARDEF.

Fields	Descriptions
	In query mode, use the sign < to query capacities less than a specific value or the sign > to query capacities greater than a specific value. For example, enter `<100` to query capacities less than 100 or `>200` to query a capacities over 200.
Description	Description associated with the room code, automatically displayed when a valid value is entered in the **Room** field. Display only.
Type	Code for the room type. Choices are: `D` Dorm - The Room Assignment (SLARASG) page and Batch Scheduler Report (SLRSHCD) can assign IDs to this room. `C` Classroom - The Schedule (SSASECT) page can schedule classes in this room, the Event (SLAEVNT) page can schedule events and functions in this room, and the Event Function (GEAFUNC) page can schedule functions in this room. `O` Other - SLAEVNT can schedule events and functions in this room, and GEAFUNC can schedule functions in this room. This value comes from the **Room Type** field in the main window of SLARDEF.
Capacity	Normal capacity of the room. This value comes from the **Capacity** field in the main window of SLARDEF. Banner® uses this value as follows: • Location Management (Student System) uses this value to assign the correct number of students to a dormitory room. • Class Schedule (Student System) uses this value to schedule a class in a properly sized room. • Event Management (General System) uses this value to

Fields	Descriptions
	schedule an event or function in a properly sized room. In query mode, use the sign < to query capacities less than a specific value or the sign > to query capacities greater than a specific value. For example, enter `<100` to query capacities less than 100 or `>200` to query a capacities over 200.
Max	Maximum capacity of the room. If this value is greater than the normal capacity, extra people can be assigned to the room. This value comes from the **Maximum** field in this main window of SLARDEF. In query mode, use the sign < to query capacities less than a specific value or the sign > to query capacities greater than a specific value. For example, enter `<100` to query capacities less than 100 or `>200` to query a capacities over 200.
Room Status	Status of the room, such as active, being renovated, and so on. A room cannot be used for a class, dormitory assignment, event, or function if its status code is flagged as inactive on the Room Status Code Validation (STVRMST) page. This value comes from the **Status** field in the main window of SLARDEF. For queries, select the **Search** button for this field to display the Room Status Code Validation (STVRMST) list. List Room Status Code Validation (STVRMST)
College	College that has primary responsibility for operating and maintaining the room. This value comes from the **College** field in the main window of SLARDEF.

Fields	Descriptions
	For queries, select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Department, within the college, that has primary responsibility for operating and maintaining the room. This value comes from the **Department** field in the main window of SLARDEF. For queries, select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Category	Code for the physical area of the building where the room is located, such as specific floors, wings, and so on. The Location Management module uses categories to assign students to preferred areas of a building. This value comes from the **Category** field in the main window of SLARDEF.
Gender	Code for the gender associated with the room. This is used to indicates any gender restrictions for the room. The Room Assignment (SLARASG) page and Batch Scheduler Report (SLRSHCD) use this information to assign student housing. This value comes from the **Gender** field in the main window of SLABLDG. The following forms identify a person's gender: • Dorm Room and Meal Application (SLARMAP) page • General Person (SPAPERS) page

Fields	Descriptions
	Choices are: `M` Male - The room is available to males only. Females and persons of unknown gender cannot be assigned to the room. `F` Female - The room is available to females only. Males and persons of unknown gender cannot be assigned to the room. `null` No gender - The room is available to both males and females. Rooms are assigned as follows: • If you are using the Room Assignment (SLARASG) page, you can assign both males and females to the room. This method is useful for married couples and co-ed housing. • If you are using the Batch Scheduler Report (SLRSHCD), the gender of the first person assigned to the room determines the gender of the room. If the first person assigned has an unknown gender, no one else is assigned to the room. The gender restriction on the Room Definition (SLARDEF) page does not change.

Area Library (SMAALIB) page

Updated: August 27, 2020

Use the Area Library (SMAALIB) page to add an area to the area library for use in CAPP and to enter or display the area's qualifiers.

An area must be added to the library before its requirements can be defined on the Area Requirement (SMAAREA) page and it can be attached to programs on the Program Requirements (SMAPROG) page.

In addition to the main window described below, this page includes the following windows:

- Main window.
- Area Library Qualifiers window.
- Area Campus Codes to Include/Exclude window.
- Area College Codes to Include/Exclude window.
- Area Degree Codes to Include/Exclude window.
- Area Department Codes to Include/Exclude window.
- Area Major Codes to Include/Exclude window.
- Area Concentration Codes to Include/Exclude window.
- Area Minor Codes to Include/Exclude window.
- Area Attribute Codes to Include/Exclude window.

Main window

Updated: August 27, 2020

The following fields are displayed in the main window.

Fields	Descriptions
Area	Code for the area. Required.
Description	Description of the area. Required.
Student Level	Student level associated with the area. Required. When an area whose student level does not match the program's student level is attached to a program, the system displays a warning message. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Course Level	'Native' course level of the area. Required. Native level identifies the level of courses that will always be

Fields	Descriptions
	eligible to satisfy the area's detail requirements. Other course levels can also be included or excluded, but native level courses will always be eligible. When an area whose course level does not match the program's course level is attached to a program, the system displays a warning message. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Compliance	Check box used to indicate whether the area can be attached to a program, or that compliance in a non-captive program can select the program. Select this check box if the area is to be used by the compliance process when performing a compliance evaluation.
Dynamic	Check box used to indicate whether the area can be processed dynamically. Only dynamic areas are processed based on qualifiers for non-captive programs. If an area is attached to a captive program, the dynamic indicator is ignored. Select this check box if the area can be selected dynamically.
Prerequisite	Check box used to indicate whether the area can be attached to a course or a section on the Catalog Prerequisite and Test Score Restrictions (SCAPREQ) page or the Schedule Prerequisite and Test Score Restrictions (SSAPREQ) page. Check box also works with the **Print Indicator** to control whether prerequisite details display in the Course Details and Class Details windows of the Registration Self-Service application. For prerequisite details to display, set the **Print Indicator** to Print Everything.
Print Indicator	Indicates which items are to be printed on hardcopy output. Values in the pull-down list are the following: • `Print Everything`

Fields	Descriptions
	• `Print Only Gen Reqs` • `Print Gen Reqs and Text` • `Print Text Only` • `Print Nothing` The option selected is used by the compliance Hardcopy Output (SMRCRLT) when printing hardcopy output which includes the area. The flags from the area library are used in conjunction with the rules for output defined on the Compliance Print Type Rules (SMACPRT) page. For example, if the print type rules specify to print area text, but the area library specifies `Print Nothing`, no area text is printed for the area. The print type rules control what area information is printed, subject to the additional control defined in the group library area.

Area Library Qualifiers window

Updated: August 27, 2020

Use the Area Library Qualifiers window to enter or display area qualifiers.

If a single code is entered in any of the fields, the item associated with that code (for example, a degree) is included in the area definition. You can define multiple qualifiers by entering `FEW` (for a set of inclusions--only the codes listed will qualify) or `ALL` (for a set of exclusions--all codes except those listed will qualify) in the applicable field, then going to the Area Include/Exclude window to define the set. If a set of qualifiers has been defined, an asterisk (*) is displayed next to the value in the field.

This window is composed of the Term section and the Qualifiers section.

Term section

Updated: August 27, 2020

Use this section to specify the term for which you want to view or maintain qualifiers for the area selected in the main window.

Fields	Descriptions
Area	Code of the area selected on the main window. Display only.
Description (untitled)	Description associated with the area code. Display only.
Qualifier Term	Code of the term for which you want to view or maintain area qualifiers. If you are creating qualifiers, the term should be the one in which the qualifiers become effective for the selected area. Select the **Search** button for this field to display the Option List. List Term Codes (STVTERM) Count Hits Existing Terms for Area Qualifiers List

Qualifiers section

Updated: August 27, 2020

Use this section to define the qualifiers for the area and term specified in the Term section.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only. If you are defining qualifiers for the first time, the value defaults to the term entered in the Key section.
To Term	Last term in which this set of qualifiers is in effect. Display only. If you are defining qualifiers for the first

Fields	Descriptions
	time, the value defaults to term code 999999 (the end of time).
Campus	Campus code of a single campus to include or the indicator (ALL or FEW) for a set of campus qualifiers. Select the **Search** button for this field to display the Option List. List Campus Codes (STVCAMP) Count Hits Area Include/Exclude for Campus Code window
College	College code of a single college to include or the indicator (ALL or FEW) for a set of college qualifiers. Select the **Search** button for this field to display the Option List. List College Codes (STVCOLL) Count Hits Area Include/Exclude for College Code window
Degree	Degree code of a single degree to include or the indicator (ALL or FEW) for a set of degree qualifiers. Select the **Search** button for this field to display the Option List. List Degree Codes (STVDEGC) Count Hits Area Include/Exclude for Degree

Fields	Descriptions
	Code window
Department	Department code of a single department to include or the indicator (`ALL` or `FEW`) for a set of department qualifiers. Select the **Search** button for this field to display the Option List. List Department Codes (STVDEPT) Count Hits Area Include/Exclude for Department Code window
Major	Major code of a single major to include or the indicator (`ALL` or `FEW`) for a set of major qualifiers. Select the **Search** button for this field to display the Option List. List All Major Codes List Count Hits Area Include/Exclude for Major Code window
Concentration	Concentration code of a single concentration to include or the indicator (`ALL` or `FEW`) for a set of concentration qualifiers. Select the **Search** button for this field to display the Option List. List All Concentration Codes List Count Hits Area Include/Exclude for Concentration Code window

Fields	Descriptions
Minor	Minor code of a single minor to include or the indicator (ALL or FEW) for a set of minor qualifiers. Select the **Search** button for this field to display the Option List. List All Minor Codes List Count Hits Area Include/Exclude for Minor Code window
Student Attribute	Student attribute code of a single student attribute to include or the indicator (ALL or FEW) for a set of student attribute qualifiers. Select the **Search** button for this field to display the Option List. List Student Attribute Codes (STVATTS) Count Hits Area Include/Exclude for Student Attribute Code window

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies area qualifiers from a prior term range to a new effective term range
Maintenance	Duplicate Field	Copies the term code in the Key section to the **To Term** field

Area Campus Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Campus Codes to Include/Exclude window to specify which campus codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Campus** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Campus Codes on the Option List. This option is available only if the value in the **Campus** field is `ALL` or `FEW`. The **Campus** field value also controls whether campus codes entered on this window will be included or excluded, as indicated in the following table.

Campus field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the Campus Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying campus codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **Campus** field in the Area Qualifiers window. Display only. • If the **Campus** field value is `FEW,` the value in this field is `INCLUDE.`

Fields	Descriptions
	• If the **Campus** field value is `ALL,` the value in this field is `EXLCUDE.`

Campus Codes section

Updated: August 27, 2020

Use this section to specify the campus code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Campus	Code of a campus for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
Description	Description associated with the campus code, automatically displayed when a valid value is entered in the **Campus** field. Display only.

Area College Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area College Codes to Include/Exclude window to specify which college codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **College** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude College Codes on the Option List. This option is available only if the value in the **College** field is `ALL` or `FEW`. The **College** field value also controls whether college codes entered on this window will be included or excluded, as indicated in the following table.

College field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the College Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying college codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **College** field in the Area Qualifiers window. Display only. • If the **College** field value is `FEW,` the value in this field is `INCLUDE.` • If the **College** field value is `ALL,` the value in this field is `EXLCUDE.`

College Codes section

Updated: August 27, 2020

Use this section to specify the college code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
College	Code of a college for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List College Validation (STVCOLL)
Description	Description associated with the college code, automatically displayed when a valid value is entered in the **College** field. Display only.

Area Degree Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Degree Codes to Include/Exclude window to specify which degree codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Degree** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Degree Codes on the Option List. This option is available only if the value in the **Degree** field is `ALL` or `FEW`. The **Degree** field value also controls whether degree codes entered on this window will be included or excluded, as indicated in the following table.

Degree field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the Degree Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying degree codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **Degree** field in the Area Qualifiers window. Display only. • If the **Degree** field value is `FEW,` the value in this field is `INCLUDE.` • If the **Degree** field value is `ALL,` the value in this field is `EXLCUDE.`

Degree Codes section

Updated: August 27, 2020

Use this section to specify the degree code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Degree	Code of a degree for which the area is qualified. Required.

Fields	Descriptions
	Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Degree Code Validation (STVDEGC)
Description	Description associated with the degree code, automatically displayed when a valid value is entered in the **Degree** field. Display only.

Area Department Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Department Codes to Include/Exclude window to specify which department codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Department** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Department Codes on the Option List. This option is available only if the value in the **Department** field is `ALL` or `FEW`. The **Department** field value also controls whether department codes entered on this window will be included or excluded, as indicated in the following table.

Department field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the Department Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying department codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **Department** field in the Area Qualifiers window. Display only. • If the **Department** field value is `FEW`, the value in this field is `INCLUDE`. • If the **Department** field value is `ALL`, the value in this field is `EXLCUDE`.

Department Codes section

Updated: August 27, 2020

Use this section to specify the department code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Department	Code of a department for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Department Validation (STVDEPT)
Description	Description associated with the

Fields	Descriptions
	department code, automatically displayed when a valid value is entered in the **Department** field. Display only.

Area Major Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Major Codes to Include/Exclude window to specify which major codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Major** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Major Codes on the Option List. This option is available only if the value in the **Major** field is `ALL` or `FEW`. The **Major** field value also controls whether major codes entered on this window will be included or excluded, as indicated in the following table.

Major field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the Major Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying major codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.

Fields	Descriptions
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **Major** field in the Area Qualifiers window. Display only. • If the **Major** field value is `FEW`, the value in this field is `INCLUDE`. • If the **Major** field value is `ALL`, the value in this field is `EXLCUDE`.

Major Codes section

Updated: August 27, 2020

Use this section to specify the major code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Major	Code of a major for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List All Major Codes (STVMAJR)
Description	Description associated with the major code, automatically displayed when a valid value is entered in the **Major** field. Display only.

Area Concentration Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Concentration Codes to Include/Exclude window to specify which concentration codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Concentration** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Concentration Codes on the Option List. This option is available only if the value in the **Concentration** field is `ALL` or `FEW`. The **Concentration** field value also controls whether concentration codes entered on this window will be included or excluded, as indicated in the following table.

Concentration field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the Concentration Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying concentration codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered

Fields	Descriptions
	in this window will be included or excluded, based on the value in the **Concentration** field in the Area Qualifiers window. Display only. • If the **Concentration** field value is `FEW`, the value in this field is `INCLUDE`. • If the **Concentration** field value is `ALL`, the value in this field is `EXLCUDE`.

Concentration Codes section

Updated: August 27, 2020

Use this section to specify the concentration code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Concentrations	Code of a concentration for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List All Concentration Codes (STVMAJR)
Description	Description associated with the concentration code, automatically displayed when a valid value is entered in the **Concentration** field. Display only.

Area Minor Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Minor Codes to Include/Exclude window to specify which minor codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Minor** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Minor Codes on the Option List. This option is available only if the value in the **Minor** field is `ALL` or `FEW`. The **Minor** field value also controls whether minor codes entered on this window will be included or excluded, as indicated in the following table.

Minor field value	Codes entered will be	
`ALL`	excluded	
`FEW`	included	

This window is composed of the Display-Only section and the Minor Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying minor codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **Minor** field in the Area Qualifiers window. Display only. • If the **Minor** field value is `FEW,` the value in this field is `INCLUDE.` • If the **Minor** field value is `ALL,` the value in this field is `EXLCUDE.`

Minor Codes section

Updated: August 27, 2020

Use this section to specify the minor code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Minor	Code of a minor for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List All Minor Codes (STVMAJR)
Description	Description associated with the minor code, automatically displayed when a valid value is entered in the **Minor** field. Display only.

Area Attribute Codes to Include/Exclude window

Updated: August 27, 2020

Use the Area Attribute Codes to Include/Exclude window to specify which student attribute codes are to be either included or excluded in the area selected in the main window.

This window is accessed by selecting the lookup button next to the **Student Attributes** field in the Area Library Qualifiers window of SMAALIB, then selecting Include/Exclude Attributes Codes on the Option List. This option is available only if the value in the **Student Attributes** field is `ALL` or `FEW`. The **Student Attributes** field value also controls whether student attribute codes entered on this window will be included or excluded, as indicated in the following table.

Student Attributes field value	Codes entered will be	
`ALL`	excluded	

Student Attributes field value	Codes entered will be	
FEW	included	

This window is composed of the Display-Only section and the Attribute Codes section.

Display-Only section

Updated: August 27, 2020

This section displays the record for which you are specifying attribute codes to be either included or excluded.

Fields	Descriptions
From Term	First term in which this set of qualifiers is in effect. Display only.
To Term	Last term in which this set of qualifiers is in effect. Display only.
Area	Code of the area for which qualifiers are being defined. Display only.
Description (untitled)	Description associated with the area code. Display only.
Include/Exclude	Indicator specifying whether codes entered in this window will be included or excluded, based on the value in the **Student Attributes** field in the Area Qualifiers window. Display only. • If the **Student Attributes** field value is `FEW`, the value in this field is `INCLUDE`. • If the **Student Attributes** field value is `ALL`, the value in this field is `EXLCUDE`.

Attribute Codes section

Updated: August 27, 2020

Use this section to specify the attribute code(s) to be included or excluded for the record specified in the Display-Only section.

Fields	Descriptions
Attributes	Code of a student attribute for which the area is qualified. Required. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Student Attribute Validation (STVATTS)
Description	Description associated with the attribute code, automatically displayed when a valid value is entered in the **Attributes** field. Display only.

Area Requirements (SMAAREA) page

Updated: August 27, 2020

Use the Area Requirements (SMAAREA) page to define requirements at the area level.

Area requirements include such items as:

- Minimum number of credits or courses
- Area minimum grade
- Default area reuse indicators

This page includes the following windows:

- Main window.
- Default All Area Detail Information.

- Default Area General Requirements window.
- Area Text window.
- Default Area Text window.
- Area Include/Exclude Course Levels window.
- Default Area Include/Exclude Course Levels window.
- Area Restricted Subjects/Attributes window.
- Default Area Restricted Subjects/Attributes window.
- Area Restricted Subject/Attribute Text window.
- Area Restricted Grades window.
- Default Area Restricted Grades window.
- Area Restricted Grade Text window.
- Area Course/Attribute Attachment window.
- Default Area Course/Attribute Attachment window.
- Area Include/Exclude Course Level in Requirement window.
- Area Course/Attribute Attachment Text window.
- Area Course/Attribute Exclusions window.
- Area Course/Attribute Attachment Rules window.
- Area Course/Attribute Attachment Rule Text window.
- Area Group Attachment window.
- Area Group Attachment Rules window.
- Area Group Attachment Rule Text window.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the General Requirements section.

Key block

Updated: August 27, 2020

Use this section to specify the area and term for which you want to enter or display area requirements.

Fields	Descriptions
Area	Code for the area. Required. If you enter an area code that is not defined on the Area Library (SMAALIB) page, the system displays a message with an option that opens SMAALIB so that the area can be added. When you enter a valid area code, the student level and course level associated with the area on SMAALIB are automatically displayed. Select the **Search** button for this field to display the Option List. List Area Library (SMAALIB) page Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a valid value is entered in the **Area** field. Display only.
Term	Effective term for which area requirements are to be viewed or maintained. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List
Catalog	Code of the academic year with which the term is associated. Display only.
Student Level	Student level associated with the area. Display only.
Course Level	Course level associated with the area. Display only.

General Requirements section

Updated: August 27, 2020

Use this section to enter or display general requirements for the area and term specified in the key block.

Fields	Descriptions
From Term	First term in which this set of area general requirements is in effect. Display only. If you are defining area general requirements for the first time, the value defaults to the term entered in the key block.
To Term	Last term in which this set of area general requirements is in effect. Display only. If you are defining area general requirements for the first time, the value defaults to term code `999999` (the end of time).
Active/Inactive	Option group to indicate whether the area is active or inactive for the term range. The default is `Inactive`. When an area is inactive, it cannot be used for compliance. If a user attempts to perform compliance for an inactive area, an error message is displayed.
Attached	Indicates whether groups or courses have been attached to the area. Display only.
Total Required Credits	Minimum total number of credits needed to satisfy the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)

Fields	Descriptions
	See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses	Minimum total number of courses needed to satisfy the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits	Minimum number of credits that must be earned at your institution to satisfy the area's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Courses	Minimum number of courses that must be earned at your institution to satisfy the area's requirements.
Required Institutional Traditional Credits	Minimum number of credits earned at the institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) needed to satisfy the area's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Traditional	Minimum number of credits/courses earned at the institution with a traditional grade (as defined on SHAGRDE) needed to satisfy the area's requirements.

Fields	Descriptions
Courses	
Maximum Institutional Non-Traditional Credits	Maximum number of credits earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the area's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses	Maximum number of courses earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the area's requirements.
Maximum Transfer Credits	Maximum number of transfer credits that can be used to satisfy the area's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy the area's requirements.
Compliance Credits	Number of credits to be applied towards the program's minimum credit requirement for the area. Use this field to override the actual number of credits that would normally be accumulated by the area to the program.

Fields	Descriptions
	For example, you might need to define an area to use within a graduate program to verify that a student has completed specific undergraduate requirements. To satisfy the program, the student must complete the undergraduate work, but the undergraduate credits/courses (which are entered in the **Compliance Courses** field) do not accumulate toward the graduate program's minimum required credits/courses. To achieve this, you could define the undergraduate requirements as an area with zero compliance credits/courses, and then the work would not accumulate toward the program.
Compliance Courses	Number of courses to be applied towards the program's minimum course requirement for the area. Use this field to override the actual number of courses that would normally be accumulated by the area to the program. An example is provided in the description of the **Compliance Credits** field.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the area's requirements. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Area GPA	Lowest acceptable area GPA a student can have to satisfy the area's requirements. This is calculated from the grades received in native-level courses used to satisfy the requirements of the area.
Default Within Indicator	Check box used to indicate whether the same course can be used to satisfy more than one detail requirement within the area.
Default Course	Default course reuse rule to be used by compliance.

Fields	Descriptions
Reuse	If a different reuse rule has been designated for a program to which this area is attached, the program-level rule overrides the area-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Default Attribute Reuse	Default attribute reuse rule to be used by compliance. If a different reuse rule has been designated for a program to which this area is attached, the program-level rule overrides the area-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default.
Default Priority	Default priority for the area when the area is attached to a program. If the area is dynamic and is not attached to a non-captive program, the default priority specifies the order in which the area is processed by compliance, unless dynamic area overrides are defined for the program.
Default Year Limit	Number of years old a course can be to satisfy the area's requirements. When a compliance request is processed, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses.

Fields	Descriptions
	CAPP checks the earliest term in the furthest year of the course year limit you set. Example: The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers courses back to 200110, which is the first term in the academic year five years back from 2006.

Default All Area Detail Information

Updated: August 27, 2020

Use the Default all Area Detail Information window to copy an existing area's requirements to the area specified in the key block of the main window.

Note: The new area must first be defined on the Area Library (SMAALIB) page and cannot have any requirements defined for it.

Fields	Descriptions
Default From Area	Area from which to copy details. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page.

Fields	Descriptions
	Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a valid value is entered in the **Default From Area** field. Display only.
Area Rules Term	Term from which to copy area details. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Area Inquiry (SMIAREA) page
General Requirements	Check box used to indicate whether general requirements exist for the area/term being copied. If you do not want to copy general requirements to the area, clear this check box.
Area Text	Check box used to indicate whether area text exists for the area/term being copied. If you do not want to copy area text to the area, clear this check box.
Additional Levels	Check box used to indicate whether additional levels exist for the area/term being copied. If you do not want to copy additional levels to the area, clear this check box.

Fields	Descriptions
Restricted Subjects and Attributes	Check box used to indicate whether restricted subjects and attributes exist for the area/term being copied. If you do not want to copy restricted subjects and attributes to the area, clear this check box.
Restricted Grades	Check box used to indicate whether restricted grades exist for the area/term being copied. If you do not want to copy restricted grades to the area, clear this check box.
Group Attachment	Check box used to indicate whether group attachments exist for the area/term being copied. If you do not want to copy group attachments to the area, clear this check box.
Course Attachment	Check box used to indicate whether course attachments exist for the area/term being copied. If you do not want to copy course attachments to the area, clear this check box.

Area Text window

Updated: August 27, 2020

Use the Area Text window to enter or display text that describes the area specified in the key block of the main window and to indicate a print code that specifies how the text is used in compliance output.

Fields	Descriptions
From Term	First term in which this text is in effect. Display only.
To Term	Last term in which this text is in effect. Display only.
Text	Text associated with the area. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Mouse	Keyboard	Result

Mouse	Keyboard	Result
Process Default	Duplicate Record	Copies text to the area

Area Include/Exclude Course Levels window

Updated: August 27, 2020

Use the Area Include/Exclude Course Levels window to enter or display which course level inclusions or exclusions for the area specified in the Key block of the main window.

CAPP uses these instructions during compliance to determine which levels to use (other than courses taken at the native course level of the area) to satisfy the area requirements.

For included levels, you can also define:

- A minimum grade
- Maximum credits and maximum number of courses

Courses at excluded levels are not considered toward satisfying an area's requirements. Courses at included levels can satisfy area requirements and count toward the area's minimum credit requirements, but they are not used to calculate grade point averages within the area.

Fields	Descriptions
From Term	First term in which this set of inclusions/exclusions is in effect. Display only.
To Term	Last term in which this set of inclusions/exclusions is in effect. Display only.
Include/Exclude	Option group to specify whether the course level is to be included or excluded. Required.
Level	Code of the course level to be included or excluded.Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description (untitled)	Description associated with the level code, automatically displayed when a valid value is entered in the **Level** field. Display

Fields	Descriptions
	only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the area's requirements. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits from an included course level that can be used to satisfy area requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses from an included course level that can be used to satisfy area requirements.

Area Restricted Subjects/Attributes window

Updated: August 27, 2020

Use the Area Restricted Subjects/Attributes window to enter or display subject or attribute restrictions for the area specified in the Key block of the main window.

These restrictions prevent the specified subjects or attributes from being used to satisfy area requirements. Restrictions can be absolute (that is, none of the subjects or attributes can be used), or you can limit the number of subjects or attributes that can be used.

A restriction must include at least one of the fields. If more than one restriction is specified (for example, **Subject**, **Course Number Low**, and **Course Attribute**), a course is restricted only if it meets all of the criteria.

Fields	Descriptions
From Term	First term in which this set of restrictions is in effect. Display only.

Fields	Descriptions
To Term	Last term in which this set of restrictions is in effect. Display only.
Campus	Code of the campus associated with the restriction. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college associated with the restriction. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the restriction. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Subject	Code of the subject associated with the restriction. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of restricted courses. A value can be entered in this field only if a value has been entered in the **Course**

Fields	Descriptions
	Number Low field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Attribute	Code of the course attribute associated with the restriction. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Maximum Credits	Maximum number of credits that can be taken within the restriction.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be taken within the restriction.
More Text	Check box used to indicate whether text has been associated with the selected restriction. Display only. Edit Area Restricted Subject/Attribute Text window

Area Restricted Subject/Attribute Text window

Updated: August 27, 2020

Use the Area Restricted Subject/Attribute Text window to enter or display descriptive information about the restriction selected in the Area Restricted Subjects/Attributes window.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which text is being entered.

Fields	Descriptions
From Term	First term in which this restriction is in effect.
To Term	Last term in which this restriction is in effect.
Campus	Code of the campus associated with the restriction.

Fields	Descriptions
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Course Attribute	Code of the attribute associated with the restriction.

Information/Entry section

Updated: August 27, 2020

Use this section to enter text for the record displayed in the Display-Only section.

Fields	Descriptions
Text	Text associated with the restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you

Fields	Descriptions
	query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Area Restricted Grades window

Updated: August 27, 2020

Use the Area Restricted Grades window to define acceptable grades for the area specified in the key block of the main window.

Grade restrictions defined in this window apply only to those grade codes that have the same course level defined the Grade Code Maintenance (SHAGRDE) page as the native course level for the area. Also, restrictions defined in this window apply only to the specific grade codes being restricted. The restrictions are not applied to grade codes that have a lower numeric value.

Fields	Descriptions
From Term	First term in which this set of restrictions is in effect. Display only.
To Term	Last term in which this set of restrictions is in effect. Display only.
Grade	Code of the grade associated with this restriction. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits with the restricted grade that can be used to satisfy area requirements.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses with the restricted grade that can be used to satisfy area requirements.
More Text	Check box used to indicate whether text has been associated with the selected grade restriction. Display only. Edit Area Restricted Grade Text window

Default Area Restricted Grades window

Updated: August 27, 2020

Use the Default Area Restricted Grades window to copy an existing area's restricted grades to the area specified in the key block of the main window.

Fields	Descriptions
Default From Area	Area from which to copy restricted grades. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a valid value is entered in the **Default From Area** field. Display only.
Area Rules Term	Term from which to copy restricted grades. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Area Inquiry (SMIAREA) page

Mouse	Keyboard	
Process Default	Duplicate Record	Copies restricted grades to the area

Area Restricted Grade Text window

Updated: August 27, 2020

Use the Area Restricted Grade Text window to enter or display descriptive comments for the grade restriction selected in the Area Restricted Grades window.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which text is being entered.

Fields	Descriptions
From Term	First term in which this restriction is in effect.
Restricted Grade	Code of the restricted grade associated with this text.
To Term	Last term in which this restriction is in effect.

Information/Entry section

Updated: August 27, 2020

Use this section to enter text for the record displayed in the Display-Only section.

Fields	Descriptions
Text	Text associated with the grade restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text.

Fields	Descriptions
	This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Area Course/Attribute Attachment window

Updated: August 27, 2020

Use the Area Course/Attribute Attachment window to enter or display course/attribute detail attachment to the area specified in the Key block of the main window.

You can attach either groups or course/attribute detail requirements to an area, but not both. If a group has been attached to an area, the Area Course/Attribute Attachment window cannot be accessed for the area.

Fields	Descriptions
From Term	First term in which this set of attachments is in effect. Display only.
To Term	Last term in which this set of attachments is in effect. Display only.
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Set	User-defined identifier for the set to which this requirement belongs, if applicable.

Fields	Descriptions
	The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)

Fields	Descriptions
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy this requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of courses that can satisfy this requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number Low** and **Course Number High** fields that are defined in your course catalog. If this check box is cleared, compliance attempts to meet this requirement using any course the student has completed (e.g., academic history or transfer), is in-progress, or has planned.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree

Fields	Descriptions
	Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken to satisfy this requirement. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course to satisfy this requirement. The restriction applies only to grade codes with levels that match the native course level for the area. Minimum grades can also be defined at the program, area, or

Fields	Descriptions
	group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Credits per Course Minimum	Minimum number of credits earned for the course to satisfy this requirement.
Credits per Course Maximum	Maximum number of credits for the course to satisfy this requirement.
Use Split Courses	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits.The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded. Example: A student who is an English major has taken ENGL 1050 (a literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy this requirement.
Connector None/	Option group to indicate which value(s) the system should use.

Fields	Descriptions
And/Or	You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses	The minimum number of courses required to satisfy this requirement.
Maximum Credits	Maximum number of credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list.

Fields	Descriptions
	List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Maximum Transfer Credits	Maximum number of transfer credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Transfer Credits** field or the **Maximum Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied.

Fields	Descriptions
	The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/ courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet this requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Test	Code of the test type associated with this requirement.

Fields	Descriptions
	This field is used to specify that the requirement can be satisfied with a satisfactory test score. If a test requirement is entered, the only other values for the requirement that can be defined are: • **Set** (optional) • **Subset** (optional) • **Test Score Minimum** (required) • **Test Score Maximum** (required) Select the **Search** button for this field to display the Test Code Validation (STVTESC) list. List Test Code Validation (STVTESC)
Test Score Minimum	Minimum test score that can satisfy this requirement. Required if a value is entered in the **Test** field. The value entered must fall within the valid range of scores for the test type defined on STVTESC.
Test Score Maximum	Maximum test score that can satisfy this requirement. Required if a value is entered in the **Test** field. The value entered must be greater than the value entered in the **Test Score Minimum** field and must fall within the valid range of scores for the test type defined on STVTESC.
Campus	Code of the campus associated with this requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work.

Fields	Descriptions
	Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the campus associated with this requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with this requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Default Area Course/Attribute Attachment window

Updated: August 27, 2020

Use the Default Area Course/Attribute Attachment window to copy an existing area's course attachments to the area specified in the key block of the main window.

Fields	Descriptions
Default From Area	Area from which to copy course attachments. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a valid value is entered in the **Default From Area** field. Display only.
Area Rule Term	Term from which to copy course attachments. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes Count Hits Existing Area Inquiry (SMIAREA) page

Mouse	Keyboard	
Process Default	Duplicate Record	Copies attachments to the area

Area Include/Exclude Course Level in Requirement window

Updated: August 27, 2020

Use the Area Include/Exclude Course Level in Requirement window to enter or display course level inclusions/exclusions that apply to a specific requirement for the area specified in the Key block of the main window.

Detail requirements are already controlled by any level inclusions/exclusions defined at the program or area level. You can be more restrictive than at a higher level, but you cannot override additional level rules defined at a higher level.

This window is composed of the Display-Only block and the Information/Entry block.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which levels are being included or excluded.

Fields	Descriptions
From Term	First term in which this set of additional levels is in effect.
To Term	Last term in which this set of additional levels is in effect.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Attribute Course	Code of the course attribute associated with the requirement, if any.
Attribute Student	Code of the student attribute associated with the requirement, if

Fields	Descriptions
	any.

Information/Entry section

Updated: August 27, 2020

Use this section to include or exclude levels for the record displayed in the Display-Only section.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded.
Level	Code of the level to be included or excluded. Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description (untitled)	Description associated with the level code, automatically displayed when a valid value is entered in the **Level** field. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the requirement. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits that can be considered from an included level.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the

Fields	Descriptions
	Maximum Courses field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be considered from an included level.

Area Course/Attribute Attachment Text window

Updated: August 27, 2020

Use the Area Course/Attribute Attachment Text window to enter or display text for a detail attachment.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which text is being entered.

Fields	Descriptions
From Term	First term in which this set of additional levels is in effect.
To Term	Last term in which this set of additional levels is in effect.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more

Fields	Descriptions
	information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Attribute Course	Code of the course attribute associated with the requirement, if any.
Attribute Student	Code of the student attribute associated with the requirement, if any.

Information/Entry section

Updated: August 27, 2020

Use this section to enter text for the record displayed in the Display-Only section.

Fields	Descriptions
Text	Text associated with the detail requirement. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are

Fields	Descriptions
	printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Area Course/Attribute Exclusions window

Updated: August 27, 2020

Use the Area Course/Attribute Exclusions window to enter or display exclude course or attribute exclusions from a detail requirement.

For example, if you have specified that a range of courses is included but need to exclude two courses within that range, you use this window to define the exclusions.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which courses or attributes are being excluded.

Fields	Descriptions
From Term	First term in which this set of exclusions is in effect.
To Term	Last term in which this set of exclusions is

Fields	Descriptions
	in effect.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Attribute Course	Code of the course attribute associated with the requirement, if any.
Attribute Student	Code of the student attribute associated with the requirement, if any.

Information/Entry section

Updated: August 27, 2020

Use this section to exclude courses or attributes for the record displayed in the Display-Only section.

Fields	Descriptions
Set	User-defined identifier for the set to which this requirement belongs, if applicable. Display only. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement

Fields	Descriptions
	belongs, if applicable. Display only.
Campus	Campus code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course taken on the specified campus. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	College code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified college. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
Department	Department code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified department. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Subject	Code of the subject being excluded from satisfying the detail requirement.

Fields	Descriptions
	Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is being excluded, or the lowest number in a range of excluded courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of excluded courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Attribute Course	Code of the course attribute excluded from satisfying the detail requirement. You can define a requirement as a single course attribute, so that any course with the attribute is excluded, or as a combination of values, so that a course must meet all of the specifications to be excluded. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Attribute Student	Code of the student attribute excluded from satisfying the detail requirement.

Fields	Descriptions
	If a requirement is for a student attribute, no other exclusions can be defined for this row. Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Must Take In or After Term	Earliest term in which a course can be taken for this exclusion to apply. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken for this exclusion to apply. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)

Area Course/Attribute Attachment Rules window

Updated: August 27, 2020

Use the Area Course/Attribute Attachment Rules window if you need to define very complicated requirements that cannot be easily configured using Boolean logic.

Attachment rules use the same variables as other attachments, but add the concept of conditions. Rules allow you to specify the number of conditions that must be satisfied and also allow you to place requirements and restrictions on conditions.

After you define the number of conditions in the upper portion of the window, you must save your changes before you can define the conditions in the lower portion of the window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella for the rule selected in the Area Course/ Attribute Attachment window.

Fields	Descriptions
From Term	First term in which this rule is in effect. Display only.
To Term	Last term in which this rule is in effect. Display only.
Rule	Rule code entered in **Rule** field in the Area Course/Attribute Attachment window. Display only.
Description	Description of the rule. Required.
Rule Text	Check box used to indicate whether text has been associated with this rule. Use the button to access the Detail Area Rule Text window.
Required Number of Conditions	Number of conditions required for this rule.
Required Credits Per Condition	Number of required credits for each condition, if appropriate.
Connector None/And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits Per Condition** field or the **Required Courses Per Condition** field, or both. Use the **Connector** option button group to

Fields	Descriptions
	indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Courses Per Condition	Number of required courses for each condition.
Maximum Credits Per Condition	Maximum number of credits that can be used per condition.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits Per Condition** field or the **Maximum Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses Per Condition	Maximum number of courses that can be used per condition.
Total Required Credits	Total number of credits required by the entire rule.
Connector None/And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Required Credits** field or the **Total Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value

Fields	Descriptions
	(**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Required Courses	Total number of courses required by the entire rule.
Total Maximum Credits	Maximum number of credits which may be used by the entire rule.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Maximum Credits** field or the **Total Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Maximum Courses	Maximum number of courses that can be used by the entire rule.

Rule Detail section

Updated: August 27, 2020

Use this section to define the detail for the rule umbrella.

Fields	Descriptions
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Condition	Condition defined on this row. Display only. The system determines conditions based on the way in which you define the detail lines. For example, all entries using the same set

Fields	Descriptions
	will have a single condition number, because all are part of one condition. Review the condition indicators to determine whether you have defined the detail requirements correctly and to understand how compliance interprets the required number of conditions specified in your rule umbrella.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts*, chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules.

Fields	Descriptions
	Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number Low** and **Course Number High** fields that are defined in your course catalog. If this check box is cleared, compliance attempts to meet this

Fields	Descriptions
	requirement using any course the student has completed (e.g., academic history or transfer), is in-progress, or has planned.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured.

Fields	Descriptions
	A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course that can satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the area. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Credits Per Course	Minimum number of credits earned for the course to satisfy the requirement.
Maximum Credits Per Course	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits.The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded. Example:

Fields	Descriptions
	A student who is an English major has taken ENGL 1050 (a literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)

Fields	Descriptions
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits	Maximum number of transfer credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Transfer Credits** field or the **Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value

Fields	Descriptions
	(**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet the requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example:

Fields	Descriptions
	You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.
Test	Code of the test type associated with the requirement. This field is used to specify that the requirement can be satisfied with a satisfactory test score. If a test requirement is entered, the only other values for the requirement that can be defined are: • **Set** (optional) • **Subset** (optional) • **Test Score Minimum** (required) • **Test Score Maximum** (required) Select the **Search** button for this field to display the Test Code Validation (STVTESC) list. List Test Code Validation (STVTESC)
Test Score Minimum	Minimum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must fall within the valid range of scores for the test type defined on STVTESC.
Test Score Maximum	Maximum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must be greater than the value entered in the **Test Score Minimum** field and must fall within the valid range of scores for the test type defined on STVTESC.

Fields	Descriptions
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the campus associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Area Course/Attribute Attachment Rule Text window

Updated: August 27, 2020

Use the Area Course/Attribute Attachment Rule Text window to enter text for the course attachment rule.

Fields	Descriptions
Text	Text associated with the course attachment rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Area Group Attachment window

Updated: August 27, 2020

Use the Area Group Attachment window to attach groups to the area specified in the Key block of the main window.

You can attach either groups or course/attribute detail requirements to an area, but not both. If course/attribute detail requirements have been attached to an area, the Area Group Attachment window cannot be accessed for the area.

Fields	Descriptions
From Term	First term in which this set of group attachments is in effect. Display only.
To Term	Last term in which this set of group attachments is in effect. Display only.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Area/Group Attachment Rules window. Edit Area/Group Attachment Rules window

Fields	Descriptions
Group	Code of the group being attached. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. List Existing Group Inquiry (SMIGROP) page
Course Re-Use	Specify the reuse rules for courses within the group. Valid options are None, In, Out and Both. None is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Attribute Re-Use	Specify the reuse rules for course attributes within the group. Valid options are None, In, Out and Both. None is the default.
Within Indicator	Check box used to indicate whether within reuse is allowed. When this check box is selected, different components of the same course (for example, the course itself and one of the course's attributes) can both be used within the same group.
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.

Area Group Attachment Rules window

Updated: August 27, 2020

Use the Area Group Attachment Rules window if you need to define very complicated requirements that cannot be easily configured using Boolean logic.

Attachment rules use the same variables as other attachments, but add the concept of conditions. Rules allow you to specify the number of conditions that must be satisfied and also allow you to place requirements and restrictions on conditions.

After you define the number of conditions in the upper portion of the window, you must save your changes before you can define the conditions in the lower portion of the window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella for the rule selected in the Area Group Attachment window.

Fields	Descriptions
From Term	First term in which this rule is in effect. Display only.
To Term	Last term in which this rule is in effect. Display only.
Rule	Set based on the rule code entered in the Area Group Attachment window. Display only.
Description	Description of the rule. Required.
Rule Text Indicator	Check box used to indicate whether text has been associated with this rule. Use the button to access the Area Group Attachment Rule Text window.
Required Number of Conditions	Number of conditions required for this rule.

Rule Detail section

Updated: August 27, 2020

Use this section to define the detail for the rule umbrella.

Fields	Descriptions
Condition	Condition defined on this row. Display only. The system determines conditions based on the way in which you define the detail lines. For example, all entries using the same set will have a single condition number, because all are part of one condition. Review the condition indicators to determine whether you have defined the detail requirements correctly and to understand how compliance interprets the required number of conditions specified in your rule umbrella.
Set	User-defined identifier for the set to which this requirement belongs, if applicable.

Fields	Descriptions
	The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts*, chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Rule within a Rule window. Edit Rule within a Rule window
Group	Code of the group being attached. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. List Existing Group Inquiry (SMIGROP) page

Fields	Descriptions
Course Re-Use	Specify the reuse rules for courses within the group. Valid options are None, In, Out and Both. None is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Attribute Re-Use	Specify the reuse rules for course attributes within the group. Valid options are None, In, Out and Both. None is the default.
Within Indicator	Check box used to indicate whether within reuse is allowed. When this check box is selected, different components of the same course (for example, the course itself and one of the course's attributes) can both be used within the same group.
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.

Area Group Attachment Rule Text window

Updated: August 27, 2020

Use the Area Group Attachment Rule Text window to enter or display text for a group attachment rule.

Fields	Descriptions
Text	Text associated with the group attachment

Fields	Descriptions
	rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Compliance Request Activity (SMACACT) page

Updated: August 27, 2020

Use the Compliance Request Activity (SMACACT) page to display a summary of existing compliance requests.

You can also use this page for the following:

- To perform queries to find specific compliance requests
- To purge the detail associated with a request (including XML output)

- To purge an entire request (including XML output)
- To create a new compliance evaluation

If the Student System Distribution Initialization (SOADEST) page is displayed when you access this page, you can specify a printer for output or, if you do not want output to be printed, you can close it without entering any values.

This page includes the following windows:

- Main window.
- Hardcopy Print Request window.
- Hardcopy Billing Information window.

Main window

Updated: August 27, 2020

This window contains the following fields.

Fields	Descriptions
Program	Program code associated with the compliance request. Display only.
ID	ID of the student for whom the compliance request was entered. Display only.
Name (untitled)	Name of the student for whom the compliance request was entered. Display only.
Mark Purge	Check box used to indicate whether the compliance request should be purged.
Request Number	Number of the compliance request. Display only.
Prog Met	Check box use to indicate whether the requirements for the program have been satisfied. Display only.
Required Credits	Number of credits required by the general requirements of the program. Display only.
Actual Credits	Actual number of credits used toward the

Fields	Descriptions
	program. Display only.
Connect	Connector between credit and course requirements for the program. Display only. N None A And O Or
Required Courses	Number of courses required by the general requirements of the program. Display only.
Actual Courses	Actual number of courses used toward the program. Display only.
Mark Recreate	Check box used to indicate whether you want a new compliance request to be created by copying this one. Multiple requests can be marked and all marked requests will be copied when you select Copy Marked Requests from the Options menu. When you process the copy you will have the option to create Hardcopy Output from the new request(s).
Changed Program	Check box used to indicate whether any program requirements have changed because the compliance evaluation was performed. Display only. If the requirements have changed, the results of the compliance may no longer be accurate.
Changed Area	Check box used to indicate whether any area requirements have changed because the compliance evaluation was performed. Display only.

Fields	Descriptions
	If the requirements have changed, then the results of the compliance may no longer be accurate.
Changed Group	Check box used to indicate whether any group requirements have changed because the compliance evaluation was performed. Display only. If the requirements have changed, then the results of the compliance may no longer be accurate.
Details Exist	Check box used to indicate whether detail output records exist for the compliance request. Display only. If this check box is selected, you can still produce detailed hardcopy output, and you can still view detailed output on the compliance output inquiry forms. Detail records will not exist for requests that have not yet been processed or for requests for which detail has been purged.
Curriculum Source	Source of the compliance curriculum data. Display only.
Originator Code	Code for the originator of the compliance request, if one was entered for the request. Display only.
Originator ID	Banner® ID of the user who originated the compliance request, if one was entered for the request. Display only.
Originator Name	Name associated with the originator ID. Display only.
Requestor	Banner ID of the user who created the

Fields	Descriptions
	compliance request. Display only.
Compliance Date	Date on which the compliance process for this request was run. Display only.

Hardcopy Print Request window

Updated: August 27, 2020

Use the Hardcopy Print Request window to enter details for hardcopy output to be produced for a new request being recreated by the main window.

This window is displayed if you have selected the **Mark Recreate** check box for at least one record and then select the option to copy marked requests. When the system displays an alert box with the message Would you like to create Hardcopy Output records for the ID's or continue, select **Yes** to access the Hardcopy Print Request window. (If you select **Continue**, the copy process continues without allowing you to create hardcopy requests. If you select **Cancel**, the copy function is terminated.)

Fields	Descriptions
Compliance Type	Code of the compliance print output type requested. Required. Select the **Search** button for this field to display the Existing Compliance Types List. List Existing Compliance Types List
Request Date	Date of the output request. Required. The system automatically enters the current date, but it can be changed. Requests with a future date are not processed until the specified date. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.

Fields	Descriptions
Copies	Number of hardcopy output copies to be produced. Required. The default is `1` but you can change it to any value up to `99`.
Internal College	Code of the internal college that is to receive the hardcopy output, if applicable. When a valid code is entered, the system automatically enters the college's name in the **Issued** field. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Outside Institution Code	Code of the outside institution that is to receive the hardcopy output, if applicable. When a valid code is entered, the system automatically enters the outside institution's name and address in the appropriate fields, although you can change any of the values. Select the **Search** button for this field to display the Source/Background Institution Filter-Only (SOISBGI) page. List Source/Background Institution Filter-Only (SOISBGI) page
Internal Department	Code of the internal college that is to receive the hardcopy output, if applicable.

Fields	Descriptions
	When a valid code is entered, the system automatically enters the college's name in the **Issued** field. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Student Address Type	Code of the student's address to which the hardcopy output is to be mailed, if applicable. When a valid code is entered, the system automatically enters the student's name and address in the appropriate fields, although you can change any of the values. Select the **Search** button for this field to display the Option List. List Address Type Validation (STVATYP) Count Hits Address Summary (SOADDRQ) page
Issued To	Name of the person or agency to whom the hardcopy output is to be mailed. If you used the **Internal College**, **Outside Institutional Code**, **Internal Department**, or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value.
House Number	Unique number assigned to each building on a street or in an area and used as part of

Fields	Descriptions
	the postal address in some countries.
Street Line 1 Street Line 2 Street Line 3 Street Line 4	Four lines on which to enter the address to which the hardcopy output is to be mailed. If you used the **Outside Institutional Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change any of the values.
City	City of the address to which the hardcopy output is to be mailed. If you used the **Outside Institutional Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value.
State or Province	Code of the state or province of the address to which the hardcopy output is to be mailed. If you used the **Outside Institutional Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value. Select the **Search** button for this field to display the State/Province Code Validation (STVSTAT) list. List State/Province Code Validation (STVSTAT)
ZIP or Postal code	ZIP or postal code of the address to which the hardcopy output is to be mailed. If you used the **Outside Institutional Code**

Fields	Descriptions
	or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value. Select the **Search** button for this field to display the ZIP/Postal Code Validation (GTVZIPC) page. List ZIP/Postal Code Validation (GTVZIPC) page
Nation	Code of the nation of the address to which the hardcopy output is to be mailed. If you used the **Outside Institutional Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value. Select the **Search** button for this field to display the Nation Validation (STVNATN) list. List Nation Validation (STVNATN)
User	Banner ID of the user who requested the hardcopy output. Display only. A value is displayed only after the record has been saved.

Hardcopy Billing Information window

Updated: August 27, 2020

Use the Hardcopy Billing Information window to create Accounts Receivable transactions associated with the hardcopy request specified in the main window.

You can send authorized charges directly to a person's account in the Accounts Receivable module and log those transactions to a cashiering session identified by the user ID displayed in the **Authorized** field.

When you add a fee, the transaction is immediately sent to Accounts Receivable when you save the transaction. You can review fees associated with compliance requests using the Accounts Receivable module forms.

Fields	Descriptions
Billing Term	Term associated with the charge. Required Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Fee Charged	Type of billing transaction to be created. `Y` Yes. Indicates that a transaction should be created. `N` No. Indicates that a transaction should not be created. If this indicator is set to N, no other entries can be made in this window, and no Accounts Receivable transaction will be created. `W` Waived. Indicates that a transaction should be created, but the transaction monetary amount should be `0.00`.
Detail Code	Detail code for the transaction to be created in Accounts Receivable. Detail codes are validated against the user if user security is enabled and the user is a 'secured user' as defined on the User Profile (TGAUPRF) page. Select the **Search** button for this field to display the Detail Code Validation (TSADETC/TFADETC) list. List Detail Code Validation (TSADETC/TFADETC)
Fee Amount	Monetary amount of the fee to be charged. Required.

Fields	Descriptions
	If a fee is associated with the detail code, the system automatically enters the amount in this field, but you can change it.
Fee Date	System date, which is used as the effective and transaction dates when the transaction is created in Accounts Receivable. Display only.
Authorized	Banner ID of the current user, which will be associated with the transaction when the transaction is created in Accounts Receivable. It is also the user ID of the cashier session in which the transaction will be recorded. Display only.

Compliance Print Type Rules (SMACPRT) page

Updated: August 27, 2020

Use the Compliance Print Type Rules (SMACPRT) page to define what information you want to appear in printed output. You must define each compliance print type separately.

This page includes the following windows:

- Main window.
- Program Print Information window.
- Program Restrictions window.
- Area Options Overview window.
- Area Print Information window.
- Area Restrictions window.
- Area Group Attachment window.
- Area Detail Attachment window.
- Area Detail Rule Attachments window.
- Area Rule Additional Information window.

- Group Print Information window.
- Group Restrictions window.
- Group Detail Attachment window.
- Group Detail Rule Attachments window.
- Group Rule Additional Information window.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the General Information block.

Key block

Updated: August 27, 2020

Use this section to specify the compliance type for which you want to define compliance output.

Fields	Descriptions
Compliance Type	Code of the compliance type. Select the **Search** button for this field to display the Option List. List Compliance Type Validation (STVCPRT) Count Hits Existing Compliance Types (STVCPRT)

General Information block

Updated: August 27, 2020

Use this section to define the general output information for the compliance type specified in the Key block.

Fields	Descriptions
Advisor	Specify whether the name of the student's current advisor is to be printed.

Fields	Descriptions
	Valid values are `Print Name` (default) and `Do Not Print`. The advisor name comes from the Multiple Advisors (SGAADVR) page. The advisor name, if printed, appears in the Compliance Summary section on the first physical page of each logical page.
Originator Code	Specify which originator code information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Originator code information comes from the **Origin Code** field on the Compliance Request Management (SMARQCM) page. If the originator code is printed, it appears in the Compliance Summary section on the first physical page of each logical page.
Originator ID	Specify whether the originator ID information is to be printed. Valid values are `Print Name` (default) and `Do Not Print`. Originator ID information comes from the **Origin ID** field on SMARQCM. If the originator ID is printed, it appears in the Compliance Summary section on the first physical page of each logical page.
Program	Specify which program information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Program information comes from the **Program** field in the Compliance Curriculum window on SMARQCM. If program information is printed, it appears in the Compliance

Fields	Descriptions
	Summary section on the first physical page of each logical page.
Level	Specify which level information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Level information comes from the **Level** field in the Compliance Curriculum window on SMARQCM. If level information is printed, it appears in the Compliance Summary section on the first physical page of each logical page.
Campus	Specify which campus information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Campus information comes from the **Campus** field in the Compliance Curriculum window on SMARQCM. If campus information is printed, it appears in the Compliance Summary section on the first physical page of each logical page.
College	Specify which college information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. College information comes from the **College** field in the Compliance Curriculum window on SMARQCM. If college information is printed, it appears in the Compliance Summary section on the first physical page of each logical page.
Degree	Specify which degree information is to be printed.

Fields	Descriptions
	Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Degree information comes from the **Degree** field in the Compliance Curriculum window on SMARQCM. If degree information is printed, it appears in the Compliance Summary section on the first physical page of each logical page.
Evaluation Term	Specify which evaluation term information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. The evaluation term information is specified in the **Evaluation Term** field on SMARQCM. If evaluation term is printed, it appears in the running, two-column information on the first physical page of each logical page.
Curriculum Source	Specify whether curriculum source information is to be printed. Valid values are `Print Source` (default) and `Do Not Print`. Curriculum source information comes from the **Source** field in the Compliance Curriculum window on SMARQCM. If the curriculum source is printed, it appears in the running two-column information on the first page of logical page 1.
Curriculum Details	Specify which curriculum detail information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Curriculum detail information comes from the **Major**, **Department**, **Concentration**, and **Minor** fields for the first major in the

Fields	Descriptions
	Compliance Curriculum window on SMARQCM. If curriculum detail information is printed, it appears in the running, two-column information on logical page 1.
Additional Curriculum Detail	Specify which additional curriculum detail information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Additional curriculum detail information comes from the **Major**, **Department**, **Concentration**, and **Minor** fields for the second major in the Additional Curriculum window on SMARQCM. If additional curriculum detail information is printed, it appears in the running, two-column information on logical page 1.
Admit Term	Specify whether admit term information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Admit term information comes from one of the following: • The intended entry term on the Recruit Prospect Information (SRARECR) page if the source of the curriculum information of the compliance request was a recruiting record • The entry term on the Admissions Application (SAADMS) page if the source of the curriculum information of the compliance request was an admissions application • The admit term on the General Student (SGASTDN) page for the matching curriculum if the source of the compliance request was a general student record If the source of a compliance request is `History` or `User`, no

Fields	Descriptions
	admit term is printed even if this option is selected because no admit term can be derived from these sources. If admit term information is printed, it appears in the running, two-column information on logical page 1.
Expected Graduation Date	Specify which expected graduation date detail information is to be printed. Valid values are `Print Date` (default) and `Do Not Print`. Expected graduation date information comes from the one of the following: • The **Expected Graduation Date** field in Academic and Graduation Status, Dual Degree window of the SGASTDN if the source of the compliance request was a student record • The **Graduation Date** field as displayed on the Degree and Formal Awards (SHADEGR) page if the source of the compliance request was a degree record If the source of the curriculum information was a recruiting or admissions record, if the curriculum information was another request, or if the curriculum information was directly entered, no expected graduation date is printed because no date can be derived from these sources. If expected graduation date information is printed, it appears in the running, two-column information on logical page 1.
Degree/Graduation Status	Specify which degree status information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. If the source of the compliance request was a degree record, degree status detail information comes from **Outcome Status**

Fields	Descriptions
	field on SHADEGR. If the source of the curriculum information was anything other than a degree record, no degree status is printed because no status can be derived from other sources. If degree status information is printed, it appears in the running, two-column information on logical page 1.
Current Class	Specify which student classification information is to be printed. Valid values are `Print Code/Desc` (default), `Print Code`, `Print Desc` and `Do Not Print`. Student classification information is calculated based on the student's completed work in academic history. If student classification information is printed, it appears in the running, two-column information on logical page 1.
Print General/ Summary Page	Check box used to indicate whether the General/Summary logical page is to be printed. The general/summary page includes program, area, and group general requirements, non-course requirements, restrictions, and so on. If the check box is cleared, the page is not printed regardless of the options selected for individual print items that can appear on the page.
Print In-Progress Course	Check box used to indicate whether in-progress course information is to be printed. Whether or not in-progress courses are used for a compliance evaluation is based on selections made when the compliance request is entered on SMARQCM. The source (`History`,

Fields	Descriptions
	Transfer, In-Progress, or Planned) is indicated in all compliance output (online and hardcopy). This check box does not control how in-progress courses are used in compliance evaluations. It only controls whether in-progress courses are printed in a separate section of the hardcopy output. If in-progress course information is printed, it appears in the running, two-column information on logical page 3.
Print Planned Course	Check box used to indicate whether planned course information is to be printed. Planned courses are maintained for a compliance request on SMARQCM. The source (History, Transfer, In-Progress, or Planned) is indicated in all compliance output (online and hardcopy). This check box does not control how planned courses are used in compliance evaluations. It only controls whether planned courses are printed in a separate section of the hardcopy output. If planned course information is printed, it appears in the running, two-column information on logical page 3.
Print Rejected Course	Check box used to indicate whether rejected course information is to be printed. This check box does not control how rejected courses are used in compliance evaluations. It only controls whether rejected courses are printed in a separate section of the hardcopy output. If rejected course information is printed, it appears in the running, two-column information on logical page 3.
Print Detail Attachment Page	Check box used to indicate whether the Detail Attachment logical page is to be printed. The Detail Attachment page includes:

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td></td><td>Selected area or group text
Information about area and group course/attribute detail attachments and any course/attribute detail rules
Courses that fulfill course/attribute detail requirements and rules
If the check box is cleared, the page is not printed regardless of the options selected for individual print items that can appear on the page.</td></tr>
<tr><td>Print Unused Course</td><td>Check box used to indicate whether unused course information is to be printed.

This check box does not control how courses can or cannot be used in compliance evaluations. It only controls whether unused courses are printed in a separate section of the hardcopy output.

If unused course information is printed, it appears in the running, two-column information on logical page 3.</td></tr>
<tr><td>Print Message/ Disclaimers</td><td>Check box used to indicate whether messages and disclaimers are to be printed.

If messages and disclaimers are printed, they appear in the running, two-column information on logical page 3.

No message/disclaimer tables or forms are delivered yet, and the functionality associated with this check box is not currently available.

You can build your rules as appropriate so that when messages and disclaimers are provided, the rules governing their use will be in place.</td></tr>
<tr><td>Print In-Progress, Planned, Rejected, Unused Courses and</td><td>Check box used to indicate whether the Other Information logical page is to be printed.</td></tr>
</table>

Fields	Descriptions
Disclaimers Page	The Other Information page includes the details of in-progress courses, planned courses, rejected courses, unused courses, and messages/disclaimers. Planned and in-progress courses also appear in the Course/ Attribute Detail page if they have been used to fulfill requirements. If the check box is cleared, the page is not printed regardless of the options selected for individual print items that can appear on the page.

Program Print Information window

Updated: August 27, 2020

Use the Program Print Information window to enter print rules for program information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Req Met/Not Met` – Always print regardless of whether the program's requirements are met or not met • `Print Req Met` – Print only when the program's requirements are met • `Print Req Not Met` – Print only when the program's requirements are not met • `Do Not Print` – Do not print	
Program Met General Requirements	Check box used to indicate whether program general requirements should be printed if all program requirements have been fulfilled. If program general requirements that have been met are printed, they appear in the

Fields	Descriptions
	running, two-column information on logical page 1.
Program Not Met General Requirements	Select the conditions under which program general requirements that have not been met should be printed. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.`
Program Met Non-Course Requirements	Check box used to indicate whether program non-course requirements should be printed if all program requirements have been fulfilled. If program non-course requirements are printed, they appear in the running, two-column information on logical page 1.
Program Not Met Non-Course Requirements	Select the conditions under which program non-course requirements should be printed. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.`
Program Met Required Attributes	Check box used to indicate whether program required attributes should be printed if all program requirements have been fulfilled. If program required attributes are printed, they appear in the running, two-column information on logical page 1.
Program Not Met Required Attributes	Select the conditions under which program

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td></td><td>required attributes should be printed.

Valid values are <code>Print Req Met/Not Met</code> (default), <code>Print Req Met, Print Req Not Met</code> and <code>Do Not Print.</code></td></tr>
<tr><td colspan="2">For the following fields, the values in the pull-down lists are defined as follows:
<code>Print Program Met/Not Met</code> – Always print regardless of whether the program's requirements are met or not met
<code>Print Program Met</code> – Print only when the program's requirements are met
<code>Print Program Not Met</code> – Print only when the program's requirements are not met
<code>Do Not Print</code> – Do not print</td></tr>
<tr><td>Additional Course Levels to Include/ Exclude</td><td>Specify the conditions under which program additional levels should be printed.

Valid values are <code>Print Program Met/ Not Met</code> (default), <code>Print Program Met, Print Program Not Met</code> and <code>Do Not Print.</code>

If program additional levels are printed, they appear in the running, two-column information on logical page 1.</td></tr>
<tr><td>Program Text</td><td>Specify the conditions under which program text should be printed.

Valid values are <code>Print Program Met/ Not Met</code> (default), <code>Print Program Met, Print Program Not Met</code> and <code>Do Not Print.</code></td></tr>
</table>

Fields	Descriptions
	If program text is printed, it appears in the running, two-column information on logical page 1.
Type Met	Compliance print type associated with program text for met program requirements. Any lines of program text entered on the Program Requirements (SMAPROG) page that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Type Not Met	Compliance print type associated with program text for unmet program requirements. Any lines of program text entered on SMAPROG that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Program Restrictions window

Updated: August 27, 2020

Use the Program Restrictions window to enter print rules for program restrictions for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Program Met/Not Met` – Always print regardless of whether the program's requirements are met or not met • `Print Program Met` – Print only when the program's requirements are met • `Print Program Not Met` – Print only when the program's requirements are not met • `Do Not Print` – Do not print	
Restricted Course/Attribute Detail	Select the conditions under which program restricted course/attribute detail should be printed. Valid values are `Print Program Met/Not Met` (default), `Print Program Met, Print Program Not Met` and `Do Not Print.` If program restricted course/attribute detail is printed, it appears in the running, two-column information on logical page 1.
Restricted Course/Attribute Text	Select the conditions under which program restricted course/attribute text should be printed. Valid values are `Print Program Met/Not Met` (default), `Print Program Met, Print Program Not Met` and `Do`

Fields	Descriptions
	`Not Print.` If program restricted course/attribute text is printed, it appears in the running, two-column information on logical page 1.
Type Met	Compliance print type associated with restricted course/attribute text for met program requirements. Any lines of restricted course/attribute text entered on the Program Requirements (SMAPROG) page that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Type Not Met	Compliance print type associated with restricted course/attribute text for unmet program requirements. Any lines of restricted course/attribute text entered on SMAPROG that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Restricted Grades Details	Select the conditions under which program

Fields	Descriptions
	restricted grade detail should be printed. Valid values are `Print Program Met/ Not Met` (default), `Print Program Met, Print Program Not Met` and `Do Not Print.` If program restricted grade detail is printed, it appears in the running, two-column information on logical page 1.
Restricted Grades Text	Select the conditions under which program restricted grade text should be printed. Valid values are `Print Program Met/ Not Met` (default), `Print Program Met, Print Program Not Met` and `Do Not Print.` If program restricted grade text is printed, it appears in the running, two-column information on logical page 1.
Type Met	Compliance print type associated with restricted grade text for met program requirements. Any lines of restricted grade text entered on SMAPROG that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Type Not Met	Compliance print type associated with

Fields	Descriptions
	restricted grade text for unmet program requirements. Any lines of restricted grade text entered on SMAPROG that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Area Options Overview window

Updated: August 27, 2020

Use the Area Options Overview window to enter print rules for program and area information for the compliance type entered in the key block of the main window.

Fields	Descriptions
Used Areas	Check box used to indicate that a summary of the program's used areas should be printed. If used area information is printed, it appears in the running, two-column information on logical page 1.
Eliminated Areas	Check box used to indicate that a summary of the program's eliminated areas should be printed. Areas are eliminated in the following circumstances: • Area's general requirements are

Fields	Descriptions
	inactive • A dynamic area is attached to a non-captive program and none of the area's qualifiers match the student's characteristics If eliminated area information is printed, it appears in the running, two-column information on logical page 3.

Area Print Information window

Updated: August 27, 2020

Use the Area Print Information window to enter print rules for area information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Req Met/Not Met` – Always print regardless of whether the area's requirements are met or not met • `Print Req Met` – Print only when the area's requirements are met • `Print Req Not Met` – Print only when the area's requirements are not met • `Do Not Print` – Do not print	
Area Met General Requirements	Check box used to indicate whether area general requirements should be printed if all area requirements have been fulfilled. If met area general requirements are printed, they appear in the running, two-column information on logical page 1.

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td>Area Not Met General Requirements</td><td>Select the conditions under which area general requirements should be printed.

	(STVPRNT)

Area Group Attachment window

Updated: August 27, 2020

Use the Area Group Attachment window to enter print rules for area group attachments for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Area Met/Not Met` – Always print regardless of whether the area's requirements are met or not met • `Print Area Met` – Print only when the area's requirements are met • `Print Area Not Met` – Print only when the area's requirements are not met • `Do Not Print` – Do not print	
Group	Select the conditions under which area group attachments should be printed. Valid values are `Print Area Met/Not Met` (default), `Print Area Met, Print Area Not Met` and `Do Not Print.` If area group attachments are printed, they appear in the running, two-column information on logical page 1.
Rule	Select the conditions under which area attachment rules should be printed. Valid values are `Print Area Met/Not Met` (default), `Print Area Met, Print`

Fields	Descriptions
	Area Not Met and Do Not Print. If area group attachment rules are printed, they appear in the running, two-column information on logical page 1.
Rule Text	Select the conditions under which group rule text should be printed. Valid values are Print Area Met/Not Met (default), Print Area Met, Print Area Not Met and Do Not Print. If group rule text is printed, it appears in the running, two-column information on logical page 1.
Text Type	Compliance print type associated with group rule text. Any lines of group rule text entered on the Area Requirements (SMAAREA) page that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Rule Conditions	Check box used to indicate that print rule condition for a group rule attachment should be printed. If group rule conditions are printed, they

Fields	Descriptions
	appear in the running, two-column information on logical page 1.

Area Detail Attachment window

Updated: August 27, 2020

Use the Area Detail Attachment window to enter print rules for area course/attribute detail attachment information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Area Met/Not Met` – Always print regardless of whether the area's requirements are met or not met • `Print Area Met` – Print only when the area's requirements are met • `Print Area Not Met` – Print only when the area's requirements are not met • `Do Not Print` – Do not print	
Requirement Met Detail Requirement	Check box used to indicate whether detail requirement information should be printed if all area requirements have been fulfilled. If met detail requirement information is printed, it appears in the running, two-column information on logical page 2.
Requirement Not Met Detail Requirement	Select the conditions under which detail requirement information should be printed. Valid values are `Print Area Met/Not Met` (default), `Print Area Met`, `Print Area Not Met` and `Do Not Print`.

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td colspan="2">For the following fields, the values in the pull-down lists are defined as follows:

• <code>Print Detail Met/Not Met</code> – Always print regardless of whether the detail requirements are met or not met

Area Rule Additional Information window

Updated: August 27, 2020

Use the Area Rule Additional Information window to enter print rules for area rule additional information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Detail Met/Not Met` – Always print regardless of whether the detail requirements are met or not met • `Print Detail Met` – Print only when the detail requirements are met • `Print Detail Not Met` – Print only when the detail requirements are not met • `Do Not Print` – Do not print	
Additional Levels	Select the conditions under which additional level information for area rule detail should be printed. Valid values are `Print Detail Met/Not Met` (default), `Print Detail Met`, `Print Detail Not Met` and `Do Not Print`. If additional level information is printed, it appears in the running, two-column information on logical page 2.
Exclusions	Select the conditions under which exclusions (that is, courses/attributes that cannot fulfill the detail rule requirement) should be printed. Valid values are `Print Detail Met/Not Met` (default), `Print Detail Met`, `Print Detail Not Met` and `Do Not Print`. If exclusions are printed, they appear in the running, two-column information on logical page 2.
Rule Detail Text	Select the conditions under which rule

Fields	Descriptions
	detail text should be printed for met detail requirements. Valid values are `Print Detail Met/Not Met` (default), `Print Detail Met`, `Print Detail Not Met` and `Do Not Print.` If rule detail text is printed, it appears in the running, two-column information on logical page 2.
Type Met	Compliance print type associated with rule detail text for met detail requirements. Any lines of rule detail text entered on the Area Requirements (SMAAREA) page that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Type Not Met	Compliance print type associated with rule detail text for unmet detail requirements. Any lines of rule detail text entered on SMAAREA that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list.

Fields	Descriptions
	List Compliance Print Code Validation (STVPRNT)
Satisfied by	Check box used to indicate whether the way in which area course rule conditions were satisfied should be printed.

Group Print Information window

Updated: August 27, 2020

Use the Group Print Information window to enter print rules for group information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Req Met/Not Met` – Always print regardless of whether the group's requirements are met or not met • `Print Req Met` – Print only when the group's requirements are met • `Print Req Not Met` – Print only when the group's requirements are not met • `Do Not Print` – Do not print	
Group Met General Requirements	Check box used to indicate whether group general requirements should be printed if all group requirements have been fulfilled. If met group general requirements are printed, they appear in the running, two-column information on logical page 1.
Group Not Met General Requirements	Select the conditions under which group general requirements should be printed. Valid values are `Print Req Met/Not`

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td></td><td><code>Met</code> (default), <code>Print Req Met, Print Req Not Met</code> and <code>Do Not Print.</code></td></tr>

Any lines of detail text entered on SMAGROP that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Exclusions	Select the conditions under which exclusions (that is, courses/attributes that cannot fulfill the detail requirement) should be printed. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.` If the **Group Met Detail Requirement** check

Fields	Descriptions
	box is cleared, no exclusions are printed even if this option is selected. If exclusions are printed, they appear in the running, two-column information on logical page 2.
Satisfied by	Select the conditions under which courses that satisfy group detail requirements should be printed. Valid values are `Print Req Met/Not Met` (default), `Print Req Met`, `Print Req Not Met` and `Do Not Print`. If the **Group Met Detail Requirement** check box is cleared, no information about courses that satisfy group detail requirements is printed even if this option is selected. If information about courses that satisfy group detail is printed, it appears in the running, two-column information on logical page 2.

Group Detail Rule Attachments window

Updated: August 27, 2020

Use the Group Detail Rule Attachments window to enter print rules for group detail rule attachment information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows:	

Fields	Descriptions
	• Print Rule Met/Not Met – Always print regardless of whether the rule requirements are met or not met • Print Rule Met – Print only when the rule requirements are met • Print Rule Not Met – Print only when the rule requirements are not met • Do Not Print – Do not print
Rule Met Rule Code/ Description	Select the conditions under which rule information should be printed for met rule requirements. Valid values are Print Rule Met/Not Met (default), Print Rule Met, Print Rule Not Met and Do Not Print. If rule information is printed, it appears in the running, two-column information on logical page 2.
Rule Not Met Rule Code/ Description	Select the conditions under which rule information should be printed for unmet rule requirements. Valid values are Print Rule Met/Not Met (default), Print Rule Met, Print Rule Not Met and Do Not Print. If rule information is printed, it appears in the running, two-column information on logical page 2.
For the following field, the values in the pull-down lists are defined as follows: • Print Req Met/Not Met – Always print regardless of whether the group's requirements are met or not met • Print Req Met – Print only when the group's requirements are met • Print Req Not Met – Print only when the group's requirements are not met • Do Not Print – Do not print	
Rule Umbrella	Select the conditions under which group detail rule umbrella

Fields	Descriptions
	information should be printed for unmet rule requirements. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.` If group detail rule umbrella information is printed, it appears in the running, two-column information on logical page 2.
Type Met	Compliance print type associated with rule text for met rule requirements. Any lines of rule text entered on the Group Requirements (SMAGROP) page that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT
Type Not Met	Compliance print type associated with rule text for unmet rule requirements. Any lines of rule text entered on SMAGROP that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT
Rule Conditions/ Detail	Select the conditions under which group detail rule condition and detail information should be printed. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.` If group detail rule condition and detail information is printed, it

Fields	Descriptions
	appears in the running, two-column information on logical page 2.

Group Rule Additional Information window

Updated: August 27, 2020

Use the Group Rule Additional Information window to enter print rules for group rule additional information for the compliance type entered in the key block of the main window.

Fields	Descriptions
For the following fields, the values in the pull-down lists are defined as follows: • `Print Req Met/Not Met` – Always print regardless of whether the detail requirements are met or not met • `Print Req Met` – Print only when the detail requirements are met • `Print Req Not Met` – Print only when the detail requirements are not met • `Do Not Print` – Do not print	
Additional Levels	Select the conditions under which additional level information for group rule detail should be printed. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.` If additional level information is printed, it appears in the running, two-column information on logical page 2.
Exclusions	Select the conditions under which exclusions (that is, courses/attributes that cannot fulfill the detail rule requirement) should be printed.

Fields	Descriptions
	Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.` If exclusions are printed, they appear in the running, two-column information on logical page 2.
Rule Detail Text	Select the conditions under which rule detail text should be printed for met detail requirements. Valid values are `Print Req Met/Not Met` (default), `Print Req Met, Print Req Not Met` and `Do Not Print.` If rule detail text is printed, it appears in the running, two-column information on logical page 2.
Type Met	Compliance print type associated with rule detail text for met detail requirements. Any lines of rule detail text entered on the Group Requirements (SMAGROP) page that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Type Not Met	Compliance print type associated with rule detail text for unmet detail requirements.

Fields	Descriptions
	Any lines of rule detail text entered on SMAGROP that have the print code specified in this field will be printed. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Satisfied by	Check box used to indicate whether the way in which group course rule conditions were satisfied should be printed.

Compliance Default Parameters (SMADFLT) page

Updated: August 27, 2020

Use the Compliance Default Parameters (SMADFLT) page to define default values to be used when compliance requests are created.

Compliance requests can be generated in the following ways:

- By staff using the Compliance Request Management (SMARQCM) page
- By staff using the Batch Compliance Process (SMRBCMP)
- By students, faculty members, or advisors using the Web

A system-required compliance default code is delivered for each of these, and you can define defaults that you want the system to automatically insert into pertinent fields. When a compliance request is generated using SMARQCM, the defaulted values can be changed as necessary.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Compliance Request Default Parameters block.

Key block

Updated: August 27, 2020

Use the key block to specify the default code for which you want to enter or display default values.

Fields	Descriptions
Default Code	Compliance default code associated with the defaults. Required. System-required values are `ONLINE`, `BATCH`, and `WEB`. Select the **Search** button for this field to display the Compliance Default Codes (STVDFLT) list. List Compliance Default Codes (STVDFLT)

Compliance Request Default Parameters block

Updated: August 27, 2020

Use this section to enter or display the default value definition of the default code specified in the key block.

Fields	Descriptions
Evaluation Term	Code of the evaluation term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Course Usage Order	Order in which courses/course attributes

Fields	Descriptions
	will be considered by the compliance process. `C` Chronological order by term, oldest first `T` Descending order by term (default) `G` Descending order by grade
Minimum Numeric Grade Value	Lowest numeric grade value allowed for courses/course attributes to be considered by the compliance process. The default value is `0`. List Numeric Value of Grades List
Apply Degree Courses Only	Check box used to indicate whether only courses and non-courses applied to a specific degree record should be considered by the compliance process. The default is cleared.
Update Applied Courses	Check box used to indicate whether courses and non-courses used by the compliance process to satisfy a requirement should be applied to the specific degree record associated with the compliance request. The default is cleared.
Use In-Progress Courses	Check box used to indicate whether the compliance process should select in-progress courses (ungraded courses in registration) and make them available to satisfy the requirements. If you want to use in-progress courses, the minimum and maximum in-progress terms must also be specified. The default is selected.
Create Unused Area Records	Check box used to indicate whether the compliance process should create output records for unused areas. The default is

Fields	Descriptions
	selected. Areas are unused by the compliance process if: • A dynamic area is attached to a non-captive program but discarded based on unmatched area qualifiers • The area is inactive • There are no requirements for an area
Create Unused Courses and Attributes	Check box used to indicate whether the compliance process should create output records for any unused courses or course attributes. The default is selected. Courses/attributes are unused by the compliance process if: • A course/attribute does not satisfy a detail requirement • The course/attribute is excluded or restricted by a restriction or specific exclusion
Create Rejection Records	Check box used to indicate whether the compliance process should create output records for any rejected courses or course attributes. The default is selected. Courses/attributes are rejected by the compliance process if they qualify under any kind of restriction or specific exclusion. A course/course attribute that is rejected will also be unused.
Create Course Select Report	Check box used to indicate whether the compliance process should create the Program Compliance Report (SMRCMPL)

Fields	Descriptions
	during compliance processing for this request. The default is cleared.
Advisor/Class Term	Code of the term to be used to select student classification and advisor information. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Minimum In-Progress Term	Code of the earliest term from which in-progress courses should be selected for consideration. The default is `000000` (beginning of time). Required. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Maximum In-Progress Term	Code of the latest term from which in-progress courses should be selected for consideration. The default is `999999` (end of time). Required. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Minimum Cutoff Term	Code of the earliest term from which any (in-progress, academic history, or transfer) courses should be selected for consideration. The default is `000000`

Fields	Descriptions
	(beginning of time). Required. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Maximum Cutoff Term	Code of the latest term from which any (in-progress, academic history, or transfer) courses should be selected for consideration. The default is `999999` (end of time). Required. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
User	Banner® ID of the user who created or modified the defaults. Display only.
Activity Date	Date the defaults were last modified. If the defaults have not been modified, the date on which the compliance default code was created is displayed. Display only.

Group Library (SMAGLIB) page

Updated: August 27, 2020

Use the Group Library (SMAGLIB) page to add a group to the group library for use in CAPP.

A group must be added to the library before its requirements can be defined on the Group Requirement (SMAGROP) page and it can be attached to areas on the Area Requirement (SMAAREA) page.

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td>Group</td><td>Code for the group. Required.</td></tr>
<tr><td>Description</td><td>Description of the group. Required.</td></tr>
<tr><td>Student Level</td><td>Student level associated with the group. Required.

Select the Search button for this field to display the Level Code Validation (STVLEVL) list.

List Level Code Validation (STVLEVL)</td></tr>
<tr><td>Course Level</td><td>'Native' course level of the group. Required.

Native level identifies the level of courses that will always be eligible to satisfy the group's detail requirements. Other course levels can also be included or excluded, but native level courses will always be eligible.

When a group whose course level does not match the program's course level is attached to a program, the system displays a warning message.

Select the Search button for this field to display the Level Code Validation (STVLEVL) list.

List Level Code Validation (STVLEVL)</td></tr>
<tr><td>Print Indicator</td><td>Indicates which items are to be printed on hardcopy output. Values in the pull-down list are the following:
<code>Print Everything</code>
<code>Print Only Gen Reqs</code>
<code>Print Gen Reqs and Text</code>
<code>Print Text Only</code>
<code>Print Nothing</code>
The option selected is used by the compliance Hardcopy Output</td></tr>
</table>

Fields	Descriptions
	(SMRCRLT) when printing hardcopy output which includes the area. The flags from the area library are used in conjunction with the rules for output defined on the Compliance Print Type Rules (SMACPRT) page. For example, if the print type rules specify to print area text, but the area library specifies `Print Nothing`, no area text is printed for the area. The print type rules control what area information is printed, subject to the additional control defined in the group library area.

Group Requirements (SMAGROP) page

Updated: August 27, 2020

Use the Group Requirements (SMAGROP) page to define a group's requirements.

Group general requirements apply only to the group. Many requirements and restrictions can be defined at the program, area, group, or detail level. A requirement or restriction placed at a higher level always controls everything below it. You can define a more restrictive rule at a lower level, but can never be less restrictive at a lower level.

This page includes the following windows:

- Main window.
- Default All Group Detail window.
- Default Group General Requirements window.
- Group Text window.
- Default Group Text window.
- Group Include/Exclude Course Levels window.
- Default Group Include/Exclude Course Levels window.
- Group Restricted Subjects/Attributes window.
- Default Group Restricted Subjects/Attributes window.

- Group Restricted Subject/Attribute Text window.
- Group Restricted Grades window.
- Default Group Restricted Grades window.
- Group Restricted Grade Text window.
- Group Course/Attribute Attachment window.
- Default Group Course/Attribute Attachment window.
- Group Course/Attribute Attachment Text window.
- Group Course/Attribute Attachment Exclusions window.
- Group Course/Attribute Attachment Levels to Include/Exclude window.
- Group Course/Attribute Attachment Rules window.
- Group Course/Attribute Attachment Rule Text window.

Main window

Updated: August 27, 2020

This window is composed of the key block and the General Requirements section.

Key block

Updated: August 27, 2020

Use this section to specify the group and term for which you want to enter or display group requirements.

Fields	Descriptions
Group	Code for the group. Required. If you enter an area code that is not defined on the Group Library (SMAGLIB) page, the system displays a message with an option that opens SMAGLIB so that the group can be added. When you enter a valid group code, the student level and course level associated with the area on SMAALIB are automatically

Fields	Descriptions
	displayed. Select the **Search** button for this field to display the Option List. List Group Library (SMAGLIB) page Count Hits Existing Group Inquiry (SMIGROP) page
Description (untitled)	Description associated with the group code, automatically displayed when a valid value is entered in the **Group** field. Display only.
Term	Effective term for which group requirements are to be viewed or maintained. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List
Catalog	Code of the academic year with which the term is associated. Display only.
Student Level	Student level associated with the group. Display only.
Course Level	Course level associated with the group. Display only.

General Requirements section

Updated: August 27, 2020

Use this section to enter or display general requirements for the program and term specified in the key block.

Fields	Descriptions
From Term	First term in which this set of group general requirements is in effect. Display only. If you are defining area general requirements for the first time, the value defaults to the term entered in the key block.

Fields	Descriptions
To Term	Last term in which this set of group general requirements is in effect. Display only. If you are defining area general requirements for the first time, the value defaults to term code `999999` (the end of time).
Active/Inactive	Option group to indicate whether the group is active or inactive for the term range. The default is `Inactive`. When a group is inactive, it cannot be used for compliance. If a user attempts to perform compliance for an inactive group, an error message is displayed.
Total Required Credits	Minimum total number of credits needed to satisfy the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses	Minimum total number of courses needed to satisfy the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits	Minimum number of credits that must be earned at your institution to satisfy the group's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system

Fields	Descriptions
	should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.).
Required Institutional Courses	Minimum number of courses that must be earned at your institution to satisfy the group's requirements.
Required Institutional Traditional Credits	Minimum number of credits earned at the institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) needed to satisfy the group's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Traditional Courses	Minimum number of credits/courses earned at the institution with a traditional grade (as defined on SHAGRDE) needed to satisfy the group's requirements.
Maximum Institutional Non-Traditional Credits	Maximum number of credits earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the group's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses	Maximum number of courses earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the group's requirements.
Maximum Transfer Credits	Maximum number of transfer credits that can be used to satisfy the group's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy the group's requirements.
Compliance Credits	Number of credits to be applied towards the program's minimum credit requirement for the area. Use this field to override the actual number of credits that would normally be accumulated by the area to the program. For example, you might need to define a group to use within a graduate program to verify that a student has completed specific undergraduate requirements. To satisfy the program, the student must complete the undergraduate work, but the undergraduate credits/courses (which are entered in the **Compliance Courses** field) do not accumulate toward the graduate program's minimum required credits/courses. To achieve this, you could define the undergraduate requirements as a group with zero compliance credits/courses, and then the work would not accumulate toward the program.
Compliance Courses	Number of courses to be applied towards the program's minimum course requirement for the area. Use this field to override the actual number of courses that would normally be accumulated by the area to the program. An example is provided in the description of the **Compliance Credits** field.
Default Within Indicator	Check box used to indicate whether the same course can be used to satisfy more than one detail requirement within the group.
Default Course Reuse	Default course reuse rule to be used by compliance. If a different reuse rule has been designated for a program to

Fields	Descriptions
	which this area is attached, the program-level rule overrides the area-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default.
Default Attribute Reuse	Default attribute reuse rule to be used by compliance. If a different reuse rule has been designated for a program to which this area is attached, the program-level rule overrides the area-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the group's requirements. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Default Year Limit	Number of years old a course can be to satisfy the group's requirements. When a compliance request is processed, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses. CAPP checks the earliest term in the furthest year of the course year limit you set. Example: The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers

Fields	Descriptions
	courses back to 200110, which is the first term in the academic year five years back from 2006.

Default All Group Detail window

Updated: August 27, 2020

Use the Default All Group Detail window to copy an existing group's requirements to the group specified in the key block of the main window.

Note: The new group must first be defined on the Group Library (SMAGLIB) page and cannot have any requirements defined for it.

Fields	Descriptions
Default From Group	Group from which to copy details. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page
Description (untitled)	Description associated with the group code, automatically displayed when a valid value is entered in the **Default From Group** field. Display only.

Fields	Descriptions
Group Rules Term	Term from which to copy group details. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Group Inquiry (SMIGROP) page
General Requirements	Check box used to indicate whether general requirements exist for the group/term being copied. If you do not want to copy general requirements to the group, clear this check box.
Group Text	Check box used to indicate whether group text exists for the group/term being copied. If you do not want to copy group text to the group, clear this check box.
Include/Exclude Additional Levels	Check box used to indicate whether additional levels exist for the group/term being copied. If you do not want to copy additional levels to the group, clear this check box.
Restricted Subjects/Attributes	Check box used to indicate whether restricted subjects and attributes exist for the group/term being copied. If you do not want to copy restricted subjects and attributes to the group, clear this check box.

Fields	Descriptions
Restricted Grades	Check box used to indicate whether restricted grades exist for the group/term being copied. If you do not want to copy restricted grades to the group, clear this check box.
Course Attachments	Check box used to indicate whether course attachments exist for the group/term being copied. If you do not want to copy course attachments to the group, clear this check box.

Mouse	Keyboard	Result
Process Default	Duplicate Record	Copies detail requirements to the group

Default Group General Requirements window

Updated: August 27, 2020

Use the Default Group General Requirements window to copy an existing group's general requirements to the group specified in the key block of the main window.

Fields	Descriptions
Default From Group	Group from which to copy general requirements. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page

Fields	Descriptions
Description (untitled)	Description associated with the group code, automatically displayed when a valid value is entered in the **Default From Group** field. Display only.
Group Rules Term	Term from which to copy general requirements. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Group Inquiry (SMIGROP) page

Mouse	Keyboard	Result
Process Default	Duplicate Record	Copies general requirements to the group

Group Text window

Updated: August 27, 2020

Use the Group Text window to enter or display text that describes the group specified in the key block of the main window and to indicate a print code that specifies how the text is used in compliance output.

Fields	Descriptions
From Term	First term in which this text is in effect. Display only.
To Term	Last term in which this text is in effect. Display only.
Text	Text associated with the group. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in

Fields	Descriptions
	the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies text from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the key block to the **To Term** field

Default Group Text window

Updated: August 27, 2020

Use the Default Group Text window to copy an existing group's text to the group specified in the key block of the main window.

Fields	Descriptions
Default From Group	Group from which to copy group text. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page
Description (untitled)	Description associated with the group code, automatically displayed when a valid value is entered in the **Default From Group** field. Display only.
Group Rules Term	Term from which to copy group text. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Group Inquiry (SMIGROP) page

Mouse	Keyboard	Result
Process Default	Duplicate Record	Copies text to the group

Group Include/Exclude Course Levels window

Updated: August 27, 2020

Use the Group Include/Exclude Course Levels window to enter or display course level inclusions or exclusion for the group specified in the Key block of the main window.

CAPP uses these instructions during compliance to determine which levels to use (other than courses taken at the native course level of the group) to satisfy the area requirements.

For included levels, you can also define:

- A minimum grade
- Maximum credits and maximum number of courses

Courses at excluded levels are not considered toward satisfying a group's requirements. Courses at included levels can satisfy group requirements and count toward the group's minimum credit requirements, but they are not used to calculate grade point averages within the group.

Fields	Descriptions
From Term	First term in which this set of inclusions/exclusions is in effect. Display only.
To Term	Last term in which this set of inclusions/exclusions is in effect. Display only.
Include/Exclude	Option group to specify whether the course level is to be included or excluded. Required.
Level	Code of the course level to be included or excluded. Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description (untitled)	Description associated with the level code, automatically displayed when a valid value is entered in the **Level** field. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the group's requirements. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits from an included course level that can be used to satisfy group requirements.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses from an included course level that can be used to satisfy group requirements.

Mouse	Keyboard	Result
Process Default	Duplicate Record	Copies additional course levels to the group

Group Restricted Subjects/Attributes window

Updated: March 20, 2025

Use the Group Restricted Subjects/Attributes window to enter or display subject or attribute restrictions for the group specified in the Key block of the main window.

These restriction prevent the subjects or attributes from being used to satisfy group requirements. Restrictions can be absolute (that is, none of the subjects or attributes can be used), or you can limit the number of subjects and attributes that can be used.

A restriction must include at least one of the fields. If more than one restriction is specified (for example, **Subject**, **Course Number Low**, and **Course Attribute**), a course is restricted only if it meets all of the criteria.

Fields	Descriptions
From Term	First term in which this set of restricted subjects/attributes is in effect. Display only.
To Term	Last term in which this set of restricted subjects/attributes is in effect. Display only.
Campus	Code of the campus associated with the restriction. Select the **Search** button for this field to display the Campus Code Validation (STVCAMP) list. List Campus Code Validation (STVCAMP)
College	Code of the college associated with the restriction. Select the **Search** button for this field to display the College Code Validation (STVCOLL) list. List College Code Validation (STVCOLL)
Department	Code of the department associated with the restriction. Select the **Search** button for this field to display the Department Code Validation (STVDEPT) list. List Department Code Validation (STVDEPT)

Fields	Descriptions
Subject	Code of the subject associated with the restriction. Select the **Search** button for this field to display the Subject Code Validation (STVSUBJ) list. List Subject Code Validation (STVSUBJ)
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias Low	The Course Alias Low is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Course Number High	Highest number in a range of restricted courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias High	The Course Alias High is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Attribute	Code of the course attribute associated with the restriction. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Maximum Credits	Maximum number of credits that can be taken within the restriction.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be taken within the restriction.
Text	Check box used to indicate whether text has been associated with the selected restriction. Display only. Edit Group Restricted Subject/Attribute Text window

Group Restricted Subject/Attribute Text window

Updated: August 27, 2020

Use the Group Restricted Subject/Attribute Text window to enter or display descriptive information about the restriction selected in the Group Restricted Subjects/Attributes window.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which text is being entered.

Fields	Descriptions
From Term	First term in which this text is in effect.
To Term	Last term in which this text is in effect.
Campus	Code of the campus associated with the restriction.
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Course Attribute	Code of the attribute associated with the restriction.

Information/Entry section

Updated: August 27, 2020

Use this section to enter text for the record displayed in the Display-Only section.

Fields	Descriptions
Text	Text associated with the restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Group Restricted Grades window

Updated: August 27, 2020

Use the Group Restricted Grades window to enter or display acceptable grades for the group specified in the key block of the main window.

Grade restrictions defined in this window apply only to those grade codes that have the same course level defined the Grade Code Maintenance (SHAGRDE) page as the native course level for the group. Also, restrictions defined in this window apply only to the specific grade codes being restricted. The restrictions are not applied to grade codes that have a lower numeric value.

Fields	Descriptions
From Term	First term in which this set of restricted grades is in effect. Display only.
To Term	Last term in which this set of restricted grades is in effect. Display only.
Grade	Code of the grade associated with this restriction. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits with the restricted grade that can be used to satisfy group requirements.
Connector	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses with the restricted grade that can be used to satisfy group requirements.
Text	Check box used to indicate whether text has been associated with the selected grade restriction. Display only. Edit Group Restricted Grade Text window

Process Default	Duplicate Record	Copies restricted grades to the group

Group Restricted Grade Text window

Updated: August 27, 2020

Use the Group Restricted Grade Text window to enter or display descriptive comments for the grade restriction selected in the Group Restricted Grades window.

Fields	Descriptions
From Term	First term in which this text is in effect. Display only.
Restricted Grade	Code of the restricted grade associated with this text. Display only.
To Term	Last term in which this text is in effect. Display only.
Text	Text associated with the grade restriction.

Fields	Descriptions
	There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Group Course/Attribute Attachment window

Updated: August 27, 2020

Use the Group Course/Attribute Attachment window to enter or display course/attribute detail attachments for the group specified in the key block of the main window.

Fields	Descriptions
From Term	First term in which this set of attachments is in effect. Display only.
To Term	Last term in which this set of attachments is in effect. Display only.
Data Exists Indicator	Indicator for whether data exists for the row. If so, an asterisk (*) is

Fields	Descriptions
(untitled)	displayed in this field. Display only.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Group Course/ Attribute Attachment Rules window. Edit Group Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject

Fields	Descriptions
	Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias Low	The Course Alias Low is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias High	The Course Alias High is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number Low** and **Course Number High** fields that are defined in your course catalog. If this check box is cleared, compliance attempts to meet this requirement using any course the student has completed (for example, academic history or transfer), is in-progress, or has planned.

Fields	Descriptions
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.

Fields	Descriptions
Minimum Grade	Minimum grade earned for the course to satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the group. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Credits Per Course Minimum	Minimum number of credits earned for the course to satisfy the requirement.
Credits Per Course Maximum	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits. The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded. Example: A student who is an English major has taken ENGL 1050 (a literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used,

Fields	Descriptions
	the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.

Fields	Descriptions
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Maximum Transfer Credits	Maximum number of transfer credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Transfer Credits** field or the **Maximum Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.

Fields	Descriptions
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet the requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one

Fields	Descriptions
	in which registration is attempted.
Test	Code of the test type associated with the requirement. This field is used to specify that the requirement can be satisfied with a satisfactory test score. If a test requirement is entered, the only other values for the requirement that can be defined are: • **Set** (optional) • **Subset** (optional) • **Test Score Minimum** (required) • **Test Score Maximum** (required) Select the **Search** button for this field to display the Test Code Validation (STVTESC) list. List Test Code Validation (STVTESC)
Test Score Minimum	Minimum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must fall within the valid range of scores for the test type defined on STVTESC.
Test Score Maximum	Maximum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must be greater than the value entered in the **Test Score Minimum** field and must fall within the valid range of scores for the test type defined on STVTESC.
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement.

Fields	Descriptions
	Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the campus associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Default Group Course/Attribute Attachment window

Updated: August 27, 2020

Use the Default Group Course/Attribute Attachment window to copy an existing group's course attachments to the group specified in the key block of the main window.

Fields	Descriptions
Default From Group	Group from which to copy course attachments. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page
Description (untitled)	Description associated with the group code, automatically displayed when a valid value is entered in the **Default From Group** field. Display only.
Group Rules Term	Term from which to copy course attachments. Select the **Search** button for this field to

Fields	Descriptions
	display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Group Inquiry (SMIGROP) page

Mouse	Keyboard	Result
Process Default	Duplicate Record	Copies attachments to the group

Group Course/Attribute Attachment Text window

Updated: August 27, 2020

Use the Group Course/Attribute Attachment Text window to enter or display text for a detail attachment. After text has been entered, asterisks (*) appear on both sides of Course/Attribute Text on the Options menu.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which text is being entered.

Fields	Descriptions
From Term	First term in which this set of additional levels is in effect.
To Term	Last term in which this set of additional levels is in effect.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more

Fields	Descriptions
	information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Attribute Course	Code of the course attribute associated with the requirement, if any.
Attribute Student	Code of the student attribute associated with the requirement, if any.

Information/Entry section

Updated: August 27, 2020

Use this section to enter text for the record displayed in the Display-Only section.

Fields	Descriptions
Text	Text associated with the requirement. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are

Fields	Descriptions
	printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Group Course/Attribute Attachment Exclusions window

Updated: August 27, 2020

Use the Group Course/Attribute Attachment Exclusions window to enter or display course or attribute exclusions for a detail requirement.

For example, if you have specified that a range of courses is included but need to exclude two courses within that range, you use this window to define the exclusions.

After exclusions have been entered, asterisks (*) appear on both sides of Course/ Attribute Exclusions on the Options menu.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which courses or attributes are being excluded.

Fields	Descriptions
From Term	First term in which this set of exclusions is in effect.
To Term	Last term in which this set of exclusions is in effect.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Attribute Course	Code of the course attribute associated with the requirement, if any.
Attribute Student	Code of the student attribute associated with the requirement, if any.

Information/Entry section

Updated: August 27, 2020

Use this section to exclude courses or attributes are for the record displayed in the Display-Only section.

Fields	Descriptions
Campus	Campus code associated with the course being excluded, indicating that the detail requirement cannot be satisfied by a

Fields	Descriptions
	course taken on the specified campus. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	College code associated with the course being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified college. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Department code associated with the course being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified department. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Fields	Descriptions
Subject	Code of the subject being excluded from satisfying the detail requirement. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is being excluded, or the lowest number in a range of excluded courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of excluded courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Attribute Course	Code of the course attribute excluded from satisfying the detail requirement. You can define a requirement as a single course attribute, so that any course with the attribute is excluded, or as a combination of values, so that a course must meet all of the specifications to be excluded.

Fields	Descriptions
	Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Attribute Student	Code of the student attribute excluded from satisfying the detail requirement. If a requirement is for a student attribute, no other exclusions can be defined for this row. Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Must Take In or After Term	Earliest term in which a course can be taken for this exclusion to apply. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken for this exclusion to apply. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list.

Fields	Descriptions
	List Term Code Validation (STVTERM)

Group Course/Attribute Attachment Levels to Include/Exclude window

Updated: August 27, 2020

Use the Group Course/Attribute Attachment Levels to Include/Exclude window to enter or display level inclusions/exclusions that apply to a specific rule requirement.

Rule detail requirements are already controlled by any level inclusions/exclusions you have defined at the program or area level. You can be more restrictive at a higher level, but you cannot override additional level rules defined at a higher level.

After additional levels to include or exclude have been entered, asterisks (*) appear on both sides of Course/Attribute Levels on the Options menu.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which levels are being included or excluded.

Fields	Descriptions
From Term	First term in which this set of additional levels is in effect.
To Term	Last term in which this set of additional levels is in effect.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation

Fields	Descriptions
	site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Attribute Course	Code of the course attribute associated with the requirement, if any.
Attribute Student	Code of the student attribute associated with the requirement, if any.

Information/Entry section

Updated: August 27, 2020

Use this section to include or exclude levels for the record displayed in the Display-Only section.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded.
Level	Code of the level to be included or excluded. Required.

Fields	Descriptions
	Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description (untitled)	Description associated with the level code, automatically displayed when a valid value is entered in the **Level** field. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the requirement. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits that can be considered from an included level.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be considered from an included level.

Group Course/Attribute Attachment Rules window

Updated: August 27, 2020

Use the Course/Attribute Attachment Rules window if you need to define very complicated requirements that cannot be easily configured using Boolean logic.

Attachment rules use the same variables as other attachments, but add the concept of conditions. Rules allow you to specify the number of conditions that must be satisfied and also allow you to place requirements and restrictions on conditions.

After you define the number of conditions in the upper portion of the window, you must save your changes before you can define the conditions in the lower portion of the window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella for the rule selected in the Area Course/ Attribute Attachment window.

Fields	Descriptions
From Term	First term in which this rule is in effect. Display only.
To Term	Last term in which this rule is in effect. Display only.
Rule	Rule code entered in **Rule** field in the Course/Attribute Attachment window. Display only.
Description	Description of the rule. Required.
Rule Text	Check box used to indicate whether text has been associated with this rule. Use the button to access the Rule Text window.
Required Number of Conditions	Number of conditions required for this rule.

Fields	Descriptions
Required Credits Per Condition	Number of required credits for each condition, if appropriate.
Connector None/And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits Per Condition** field or the **Required Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Courses Per Condition	Number of required courses for each condition.
Maximum Credits Per Condition	Maximum number of credits that can be used per condition.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits Per Condition** field or the **Maximum Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses Per Condition	Maximum number of courses that can be used per condition.
Total Required Credits	Total number of credits required by the entire rule.
Connector None/And/Or	Option group to indicate which value(s) the

Fields	Descriptions
	system should use. You can enter a value in either the **Total Required Credits** field or the **Total Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Required Courses	Total number of courses required by the entire rule.
Total Maximum Credits	Maximum number of credits which may be used by the entire rule.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Maximum Credits** field or the **Total Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Maximum Courses	Maximum number of courses that can be used by the entire rule.

Rule Detail section

Updated: August 27, 2020

Use this section to define the detail for the rule umbrella.

Fields	Descriptions
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Condition	Condition defined on this row. Display only. The system determines conditions based on the way in which you define the detail lines. For example, all entries using the same set will have a single condition number, because all are part of one condition. Review the condition indicators to determine whether you have defined the detail requirements correctly and to understand how compliance interprets the required number of conditions specified in your rule umbrella.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	*Banner Student Use*User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area.

Fields	Descriptions
	See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Rule within a Rule window. Edit Rule within a Rule window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number**

Fields	Descriptions
	Low and **Course Number High** fields that are defined in your course catalog. If this check box is cleared, compliance attempts to meet this requirement using any course the student has completed (e.g., academic history or transfer), is in-progress, or has planned.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken.

Fields	Descriptions
	When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course to satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the group. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Credits per Course Minimum	Minimum number of credits earned for the course to satisfy the requirement.
Credits per Course Maximum	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits. The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded.

Fields	Descriptions
	Example: A student who is an English major has taken ENGL 1050 (a literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value

Fields	Descriptions
	(**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits	Maximum number of transfer credits from a course or group of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Transfer Credits** field or the **Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet the requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses.

Fields	Descriptions
	Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.
Test Code	Code of the test type associated with the requirement. This field is used to specify that the requirement can be satisfied with a satisfactory test score. If a test requirement is entered, the only other values for the requirement that can be defined are: • **Set** (optional) • **Subset** (optional) • **Test Score Minimum** (required) • **Test Score Maximum** (required) Select the **Search** button for this field to display the Test Code Validation (STVTESC) list. List Test Code Validation (STVTESC)
Test Score Minimum	Minimum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must fall within the valid range of scores for the test type defined on STVTESC.
Test Score Maximum	Maximum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must be greater than the value entered in the

Fields	Descriptions
	Test Score Minimum field and must fall within the valid range of scores for the test type defined on STVTESC.
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the campus associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Group Course/Attribute Attachment Rule Text window

Updated: August 27, 2020

Use the Rule Text window to enter or display text for the course attachment rule.

Fields	Descriptions
Text	Text associated with the course attachment rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Program Details Information (SMAPFPA) page

Updated: April 20, 2023

Record information about the features of a program, including details about pathways to further study and any program accreditations. Institutions must define the program in the

Program Definition Rules (SMAPRLE) page to record details in the SMAPFPA page.

Key block

Updated: April 20, 2023

Enter the program and term for which you want to record the program details.

Fields	Description
Program	Program code.
Term	Term code.

Program Details section

Updated: April 20, 2023

Record program details information.

Field	Description
Program Details section	
From Term	The beginning period of the term from which the statements about the program are valid. If you are defining data for the first time, the value in this field defaults to the term that you enter in the Key block. If you are defining data for a term that is later than the term already defined, the value in this field defaults to the most recent term before the Key block term and for which data has been defined. You can change the code using the Maintenance button. If you are defining data for a term that is earlier than the term already defined, the value in this field defaults to the term entered in the Key block.
To Term	The ending term period until which the statements about the program are in effect.

Field	Description
	If you are defining data for the first time, the value in this field defaults to the maximum term code in STVTERM, typically term code 999999, the end of time. If you are defining data for a term that is earlier than the term already defined, the value in this field defaults to the most recent term for which data has been defined and is after the term entered in the Key block. If you are defining data for a term that is later than the term already defined, the value in this field defaults to the maximum term code in STVTERM.
Program Title	Name of the program.
Number of units in Program	Total number of units required for completion of the program.
Exclude from ARTS	Check box used to indicate whether you want to exclude this program from ARTS.
Bridging Study for Overseas-Trained Professionals	Check box used to indicate whether the program is classified as Bridging study for overseas-trained professionals (BOTP). The BOTP classification information is used in evaluating whether the holder of an Australian permanent resident visa is eligible for FEE-HELP.
Program Summary Statement	Summary details about the program such as: • typical duration when taken full-time • typical duration when part-time • number of subjects required for completion • admission requirements
Program Features Statement	Brief description of the distinguishing features of the program such as:

Field	Description
	• work placement requirements • special projects undertaken as part of the program
Pathway of Further Study Statement	Details on pathways to further study or advanced higher education programs.
Accreditation Statement	Relevant accreditation of the program by external organisations.
HELP Type Data section	
HELP Type	Code which identifies the HELP Type(s) for which the program is eligible.
Help Type Description	Description of the HELP type.
Indicative Fee Data section	
Fee Type	Fee type code.
Currency	Code which uniquely identifies a type of currency.
Program Fee	Fees of the selected program.
Program Loan Maximum	The maximum loan amount for the program.

Program Definitions Rules (SMAPRLE) page

Updated: August 27, 2020

Use the Program Definitions Rules (SMAPRLE) page to enter or display program rule definitions. Curriculum and field of study data is retrieved from the SORLCUR and SORLFOS tables for the two majors, two departments, two minors, six concentrations, level, degree, college, campus, catalog term, term, and curriculum rules.

Fields	Descriptions
Program	Code for the program. Required.
Description	Description of the program. Required.
Web	Check box used to indicate whether the program should be available for generating new compliances (or “degree evaluations”) through the Web.

Fields	Descriptions
	This indicator does not control whether evaluations are viewable on the Web. If this check box is cleared, existing degree evaluations for the program can be viewed through the Web.
Locked	This check box is not in use.
Curriculum Rules	Check box used to specify whether the program is attached to at least one curriculum rule. Display only.
Curriculum Dependent	Check box used to indicate whether the program is dependent on a curriculum combination. If this check box is selected, the **Student Level**, **Course Level**, **College** and **Degree** fields are required. If this check box is cleared, only the **Student Level** and **Course Level** fields are required. After an ID is assigned to a program rule, this check box cannot be changed from cleared to selected unless the values in the **College** and **Degree** fields are deleted first.
Student Level	Student level associated with the program. Required. When a program code is assigned to a curriculum rule, the student level of the program rule must match the student level of the curriculum rule. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Course Level	"Native" course level of the program. Required. Native level identifies the level of courses that will always be eligible to satisfy detail requirements. Other course levels may also be included or excluded, but native level courses will always be eligible. Native level also controls the courses that will be used in all GPA calculations. Only courses that match the native level of the program are used in GPA calculations.

Fields	Descriptions
	Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Campus	Campus associated with the program, if any. If a program is associated with a campus and the program code is assigned to a curriculum rule, the campus of the program rule must match the campus of the curriculum rule. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	College associated with the program. If the program code is assigned to a curriculum rule, the college of the program rule must match the college of the curriculum rule. Required if the program is curriculum-dependent. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Degree	Degree or award conferred after successful completion of the program. If the program code is assigned to a curriculum rule, the degree of the program rule must match the degree of the curriculum rule. Required if the program is curriculum dependent. Select the **Search** button for this field to display the Degree Code Validation (STVDEGC) list. List Degree Code Validation (STVDEGC)
ID	Student ID attached to the program. This field is enabled only when the program is curriculum independent. After an ID is attached to a program, the program cannot be used by any other

Fields	Descriptions
	student. Select the **Search** button for this field to display the Person Search (SOAIDEN) page. List Person Search (SOAIDEN) page
Name (untitled)	Name associated with the ID, automatically displayed when a valid value is entered in the **ID** field. Display only.

California Localization

The field and description in this section applies to California only.

Fields	Descriptions
Co-unique Code	Code of the co-unique program identifier or additional program identifiers. This field should be used to store the Student Program Co-Unique Code provided to each institution by the Chancellor's Office or the appropriate administrative office.

Program Requirements (SMAPROG) page

Updated: August 27, 2020

Use the Program Requirements (SMAPROG) page to define requirements at the program level. Program requirements may include minimum number of credits or courses, minimum grade point average required for completion of the program, program restrictions, and so on.

This page includes the following windows:

- Main window.
- Default All Program Detail window.
- Default Program General Requirements window.
- Program Text window.

- Default Program Text window.
- Program Non-Course Requirements window.
- Default Program Non-Course Requirements window.
- Program Additional Levels window.
- Default Program Include/Exclude Course Levels window.
- Program Required Attributes window.
- Default Program Required Attributes window.
- Program Restricted Subjects/Attributes window.
- Default Program Restricted Subjects/Attributes window.
- Program Restricted Subject/Attribute Text window.
- Program Restricted Grades window.
- Default Program Restricted Grades window.
- Program Restricted Grade Text window.
- Program Area Attachments window.
- Default Program Area Attachments window.
- Dynamically Selected Area Override window.
- Default Dynamically Selected Area Override window.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the General Requirements section.

Key block

Updated: August 27, 2020

Use this section to specify the program and term for which you want to enter or display program requirements.

Fields	Descriptions
Program	Code of the program for which requirements are being defined. Required. If you enter a program code that is not defined on the Program Definition Rules (SMAPRLE) page, the system displays a message with an option that opens SMAPRLE so that the program can be added. When you enter a valid program code, the student level and course level associated with the program on SMAPRLE are automatically displayed. Select the **Search** button for this field to display the Option List. Count Hits Program Definition Rules (SMAPRLE) page List Existing Program Inquiry (SMIPROG) page
Term	Term in which the program requirements began. Required. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes
Catalog	Academic year to which the term belongs. When you enter a valid term code, the academic year associated with the term code on the Term Code Validation (STVTERM) page is automatically displayed. Display only.
Student Level	Student level associated with the program. When you enter a valid program, the student level associated with the program on the SMAPRLE is automatically displayed. Display only.
Course Level	Course level associated with the program. When you enter a valid program, the course level associated with the program on the SMAPRLE displays. Display only.

General Requirements section

Updated: August 27, 2020

Use this section to enter or display general requirements for the program and term specified in the key block.

Fields	Descriptions
From Term	First term in which this set of general requirements is in effect. Display only. If you are defining general requirements for the first time, the value defaults to the term entered in the key block.
To Term	Last term in which this set of general requirements is in effect. Display only. If you are defining general requirements for the first time, the value defaults to term code `999999` (the end of time).
Active/Inactive	Option group to indicate whether the program is active or inactive for the term range. The default is `Inactive`. When a program is inactive, it cannot be used for compliance.
Captive	Check box used to indicate whether the program is captive.
Single Entity	Check box used to indicate whether the program should be evaluated for reuse using single-entity processing.
Registration Model Code	Radio group used to select the registration model to be used with the program in the key block. The values are `Basic`, `Structured`, and `Projected`. The default is `Basic`. Only one option can be selected, but you can set up different options by from and to term ranges for the program.
Prerequisite Restriction Level	You can select the prerequisite checking level. You can select prerequisite checking either by Catalog, Program or by Program and Course.
Prerequisite by Program Exists	A read-only indicator that shows whether Prerequisites by Program has been set on SOACTRL.
Total Required	Minimum total number of credits needed to satisfy the program's

Fields	Descriptions
Credits	requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses	Minimum total number of courses needed to satisfy the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits	Minimum number of credits that must be earned at your institution to satisfy the program's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Institutional Credits Courses	Minimum number of courses that must be earned at your institution to satisfy the program's requirements.
Required Institutional Traditional Credits	Minimum number of credits earned at the institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) needed to satisfy the program's requirements.

Fields	Descriptions
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Traditional Courses	Minimum number of credits/courses earned at the institution with a traditional grade (as defined on SHAGRDE) needed to satisfy the program's requirements.
Maximum Institutional Non-Traditional Credits	Maximum number of credits earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the program's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses	Maximum number of courses earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the program's requirements.
Maximum Transfer Credits	Maximum number of transfer credits that can be used to satisfy the program's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy the program's requirements.
Number Institutional Required... Credits	This field works with the **out of Last Number of Earned Credits** field to establish a minimum number of credits that must be completed at your institution out of a specified number of the most recent of credits earned. For example, if you require that students take at least 15 of their

Fields	Descriptions
	last 120 credits at your institution (meaning you allow them to transfer in no more than 15 out of their last 120 credits earned), you would enter `15` in the **Number Institutional Required Credits** field and `120` in the **out of Last Number of Earned Credits** field.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Number of Institutional Required... Courses	This field works with the **out of Last Number of Earned Courses** field to establish a minimum number of courses that must be completed at your institution out of a specified number of the most recent of courses earned. For example, if you require that students take at least 5 of their last 40 courses at your institution (meaning you allow them to transfer in no more than 5 out of their last 40 courses completed), you would enter `5` in the **Number Institutional Required Courses** field and `40` in the **out of Last Number of Earned Courses** field.
...out of Last Number of Earned Credits	This field works with the **Number Institutional Required Credits** field to establish a minimum number of credits that must be completed at your institution out of a specified number of the most recent of credits earned. For example, if you require that students take at least 15 of their last 120 credits at your institution (meaning you allow them to transfer in no more than 15 out of their last 120 credits earned), you would enter `15` in the **Number Institutional Required Credits** field and `120` in the **out of Last Number of Earned Credits** field.
Connector None/ And/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
...out of Last Number of Earned Courses	This field works with the **Number Institutional Required Courses** field to establish a minimum number of courses that must be completed at your institution out of a specified number of the most recent of courses earned. For example, if you require that students take at least 5 of their last 40 courses at your institution (meaning you allow them to transfer in no more than 5 out of their last 40 courses completed), you would enter `5` in the **Number Institutional Required Courses** field and `40` in the **out of Last Number of Earned Courses** field.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the program's requirements. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Course Year Limit	Number of years old a course can be to satisfy the program's requirements. When a compliance is run, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses. CAPP checks the earliest term in the furthest year of the course year limit you set. Example:

Fields	Descriptions
	The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers courses back to 200110, which is the first term in the academic year five years back from 2006.
Minimum Program GPA	Lowest acceptable program GPA a student can have to satisfy the program's requirements. This is calculated from the grades received in native-level courses used to satisfy the requirements of the program.
Minimum GPA	Minimum cumulative level GPA required to satisfy the program's requirements, for courses whose level matches the native course level of the program. The GPA is that which is stored in Banner® (not calculated on the fly).

Default All Program Detail window

Updated: August 27, 2020

Use the Default All Program Detail window to copy an existing program's requirements to the program specified in the key block of the main window.

Note: The new program must first be defined on the Program Definition Rules (SMAPRLE) page and cannot have any requirements defined for it.

Fields	Descriptions
Default From Program	Program from which to copy all requirements. Select the **Search** button for this field to display the Existing Program Inquiry

Fields	Descriptions
	(SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page
Description (untitled)	Description associated with the program code, automatically displayed when a valid value is entered in the **Default From Program** field. Display only.
Program Rules Term	Term from which to copy all requirements. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Program Inquiry (SMIPROG) page
General Requirements	Check box used to indicate whether general requirements exist for the program/term being copied. If you do not want to copy general requirements to the program, clear this check box.
Program Text	Check box used to indicate whether program text exists for the program/term being copied. If you do not want to copy program text to the program, clear this check box.
Non-Course Requirement	Check box used to indicate whether non-course requirements exist for the program/term being copied.

Fields	Descriptions
	If you do not want to copy non-course requirements to the program, clear this check box.
Additional Levels	Check box used to indicate whether additional levels exist for the program/term being copied. If you do not want to copy additional levels to the program, clear this check box.
Program Attributes	Check box used to indicate whether program attributes exist for the program/term being copied. If you do not want to copy program attributes to the program, clear this check box.
Restricted Subjects	Check box used to indicate whether restricted subjects exist for the program/term being copied. If you do not want to copy restricted subjects to the program, clear this check box.
Restricted Grades	Check box used to indicate whether restricted grades exist for the program/term being copied. If you do not want to copy restricted grades to the program, clear this check box.
Program Area Attachments	Check box used to indicate whether program area attachments exist for the program/term being copied.

Fields	Descriptions
	If you do not want to copy program area attachments to the program, clear this check box.
Select Area Overrides	Check box used to indicate whether select area overrides exist for the program/term being copied. If you do not want to copy area overrides to the program, clear this check box.

Program Text window

Updated: August 27, 2020

Use the Program Text window to enter or display text that describes the program specified in the key block of the main window and to indicate a print code that specifies how the text is used in compliance output.

Fields	Descriptions
From Term	First term in which this text is in effect. Display only.
To Term	Last term in which this text is in effect. Display only.
Text	Text associated with the program. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in

Fields	Descriptions
	the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Program Non-Course Requirements window

Updated: August 27, 2020

Use the Program Non-Course Requirements window to define non-course requirements for the program specified in the key block of the main window. Non-course requirements are those that must be satisfied but are not associated with a specific course, such as an oral exam or community service.

Fields	Descriptions
From Term	First term in which this set of non-course requirements is in effect. Display only.
To Term	Last term in which this set of non-course requirements is in effect. Display only.
Non-Course Code	Code of the non-course requirement. Required. Select the **Search** button for this field to display the Non-Course Requirements Code Validation (STVNCRQ) list.

Fields	Descriptions
	List Non-Course Requirements Code Validation (STVNCRQ)
Description	Description of the non-course requirement code, automatically displayed when a valid non-course code is entered in the **Non-Course Code** field. Display only.
Non-Course Year Limit	Number of years old a non-course item can be to satisfy the program's requirements. When compliance is run, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid non-course items. CAPP checks the earliest term in the furthest year of the non-course item year limit you set. Example: The non-course item year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers non-course items back to 200110, which is the first term in the academic year five years back from 2006.

Program Additional Levels window

Updated: August 27, 2020

Use the Program Additional Levels window to enter or display other course levels to be included in or excluded from the program specified in the key block of the main window.

You can specify that courses or course attributes taken at more than one course level can be used by a program, or you can exclude courses or course attributes taken at specific levels. CAPP uses these instructions during compliance to determine which levels (in addition to the native course level of the program) it can use to satisfy the program's requirements. If you do not specifically include other levels, only courses at the program's native level are used.

Course levels included in a program can be excluded by areas or groups, but course levels excluded from a program cannot be included by areas or groups.

Courses taken at excluded levels are not considered toward satisfying a program's requirements. Courses at included levels can satisfy program requirements and count toward the program's minimum credit requirements, but they are not used to calculate any grade point averages within the program.

Fields	Descriptions
From Term	First term in which this set of additional course levels is in effect. Display only.
To Term	Last term in which this set of additional course levels is in effect. Display only.
Include/Exclude	Option group to specify whether the course level is to be included or excluded.
Level	Code of the course level to be included or excluded. Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description	Description of the course level. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the program's requirements.

Fields	Descriptions
	If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits from an included course level that can be used to satisfy program requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of credits from an included course level that can be used to satisfy program requirements.

Program Required Attributes window

Updated: August 27, 2020

Use the Program Required Attributes window to enter or display required course or student attributes for the program specified in the Key block of the main window. For example, a course attribute could be a core requirement; a student attribute could be an honor program or senior standing.

Fields	Descriptions
From Term	First term in which this set of required course or student attributes is in effect. Display only.
To Term	Last term in which this set of required course or student attributes is in effect. Display only.
Course Attributes	Code of the required course attribute. After a value is entered in this field, the **Student Attributes** field becomes unavailable. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attributes	Code of the required student attribute. After a value is entered in this field, the **Course Attributes** field becomes unavailable. Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Description	Description of the attribute. Display only.
Required Credits	Number of required credits for a required course attribute. If a student attribute is being defined, this field is unavailable.
Connector None/	Select this option button if you do not want a set number of

Fields	Descriptions
And/Or	credits or courses. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**), both values (**And**), or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.

Program Restricted Subjects/Attributes window

Updated: August 27, 2020

Use the Program Restricted Subjects/Attributes window to enter or display subject or attribute restrictions for the program specified in the Key block of the main window.

These restrictions prevent the specified subjects or attributes from being used to satisfy program requirements. Restrictions can be absolute (that is, none of the subjects or attributes can be used), or you can limit the number of subjects or attributes that can be used.

A restriction must include at least one of the fields. If more than one restriction is specified (for example, **Subject**, **Course Number Low**, and **Course Attribute**), a course is restricted only if it meets all of the criteria.

Fields	Descriptions
From Term	First term in which this set of restricted subjects/attributes is in effect. Display only.
To Term	Last term in which this set of restricted subjects/attributes is in effect. Display only.
Campus	Code of the campus associated with the restriction.

Fields	Descriptions
	Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college associated with the restriction. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the restriction. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Subject	Code of the subject associated with the restriction. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses. Select the **Search** button for this field to display the Existing Courses List. This is a LOV fields linked to Existing Courses list. Count Hits Existing Courses List
Course Number High	Highest number in a range of restricted courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field.

Fields	Descriptions
	Select the **Search** button for this field to display the Existing Courses List. This is a LOV fields linked to Existing Courses list. Count Hits Existing Courses List
Course Attribute	Code of the attribute associated with the restriction. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Maximum Credits	Maximum number of credits that can be taken within the restriction.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be taken within the restriction.
Text	Check box used to indicate whether text has been associated with the selected restriction. Display only. Edit Program Restricted Subject/Attribute Text window

Program Restricted Subject/Attribute Text window

Updated: August 27, 2020

Use the Program Restricted Subject/Attribute Text window to enter or display descriptive information about the restriction selected in the Program Restricted Subjects/Attributes window.

This window is composed of the Display-Only section and the Information/Entry section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which text is being entered.

Fields	Descriptions
From Term	First term in which this restriction is in effect.
To Term	Last term in which this restriction is in effect.
Campus	Code of the campus associated with the restriction.

Fields	Descriptions
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Course Attribute	Code of the attribute associated with the restriction.

Information/Entry section

Updated: August 27, 2020

Use this section to enter text for the record displayed in the Display-Only section.

Fields	Descriptions
Text	Text associated with the restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you

Fields	Descriptions
	query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Program Restricted Grades window

Updated: August 27, 2020

Use the Program Restricted Grades window to enter or display acceptable grades for the program specified in the key block of the main window. You can use this, for example, to be specific about the grades that can be received for courses used to satisfy requirements.

Example

Updated: August 27, 2020

Let's say that you want to define a program for honors students and want to allow no more than five courses where the student receive a D to be counted towards the program. For this, you would take the following steps.

- Enter the code associated with the D grade in the **Grade** field.
- Select the **None Connector** option button.
- Enter `5` in the **Maximum Courses** field.
  When you restrict a grade, CAPP looks only at that value (in this example, the `D`) and not the numeric value. You can always exclude grades with numeric values less than a minimum when you create a compliance request. Use restricted grades only when you need to control the use of grades above the allowable minimum grade code for the program.

Grade restrictions defined in this window apply only to those grade codes that have the same course level defined the Grade Code Maintenance (SHAGRDE) page as the native course level for the program. Also, restrictions defined in this window apply only to the specific grade codes being restricted. The restrictions are not applied to grade codes that have a lower numeric value.

Fields	Descriptions
From Term	First term in which this set of restricted grades is in effect. Display only.
To Term	Last term in which this set of restricted grades is in effect. Display only.
Grade	Code of the grade associated with this restriction. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits with the restricted grade that can be used to satisfy program requirements.
Connector	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses with the restricted grade that can be used to satisfy program requirements.
Text	Check box used to indicate whether text has been associated with the selected grade restriction. Display only. Edit Program Restricted Grade Text window

Program Restricted Grade Text window

Updated: August 27, 2020

Use the Program Restricted Grade Text window to enter or display descriptive comments for the grade restriction selected in the Program Restricted Grades window.

Fields	Descriptions
From Term	First term in which this restriction is in

Fields	Descriptions
	effect. Display only.
Restricted Grade	Grade that is restricted. Display only.
To Term	Last term in which this restriction is in effect. Display only.
Text	Text associated with the grade restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)

Program Area Attachments window

Updated: August 27, 2020

Use the Program Area Attachments window to enter or display area attachments to the program specified in the key block of the main window.

To access this window using the Options menu, select Attach Areas to Programs.

Fields	Descriptions
From Term	First term in which this set of area attachments is in effect. Display only.
To Term	Last term in which this set of area attachments is in effect. Display only.
Area	Code of the area to be attached. Select the **Search** button for this field to display the Option List. List Existing Area Inquiry (SMIAREA) page Count Hits Area Library (SMAALIB) page
Priority	Area's priority within the program. The system considers lower number priorities before higher number priorities when running compliance. If two areas are assigned the same priority, the system considers them in alphabetical order. If a priority has been assigned to an area on the Area Definition (SMAAREA) page, that value defaults into this field when the area's code is entered in the **Area** field, although it can be changed.
Course Re-Use None	Option to indicate that courses applied to the area cannot have been applied to preceding areas and cannot be reused by later areas. When an area is attached to a program, the system automatically defaults the course reuse indicator from the area, but the value can be changed. (Course reuse is specified in the **Default Course Reuse** field of the General Requirements section of SMAAREA See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Course Re-Use In	Option to indicate courses that have been applied to requirements

Fields	Descriptions
	in preceding areas can also be considered for use in the current area, but if used in the current area, cannot be used again in later areas.
Course Re-Use Out	Option to indicate that courses cannot have been applied to any requirements in preceding areas, but if used in the current area, can be considered for use in later areas.
Course Re-Use Both	Option to indicate that courses that have been applied to requirements in preceding areas can also be considered for use in the current area and can be considered for use in later areas.
Attribute Re-Use None	Option to indicate that attributes cannot have been used in preceding areas and cannot be reused in later areas. When an area is attached to a program, the system automatically defaults the attribute reuse indicator from the area, but the value can be changed. (Attribute reuse is specified in the **Default Attribute Reuse** field of the General Requirements section of SMAAREA.
Attribute Re-Use In	Option to indicate that attributes that have been applied to requirements in preceding areas can also be considered for use in the current area, but if used in the current area, cannot be used again in later areas.
Attribute Re-Use Out	Option to indicate that attributes cannot have been applied to any requirements in preceding areas, but if used in the current area, can be considered for use in later areas.
Attribute Re-Use Both	Option to indicate that attributes that have been applied to requirements in preceding areas can also be considered for use in the current area and can be considered for use in later areas.
Within Indicator	Check box used to indicate whether both a course and its attributes can be used within the same area. In this case, the course's credits are used only one time toward the minimum credits required by the area or program. If this check box is cleared, either a course or its attributes can be used within the same area.
Year Rule	Number of years within which a course must be taken for it to be

Fields	Descriptions
	used by an area in the program. If a default year limit has been defined on SMAAREA, that value defaults into this field when the area's code is entered in the **Area** field, although you can change it.
Student Level	Student level associated with the area.
Course Level	Course level associated with the area.

Dynamically Selected Area Override window

Updated: August 27, 2020

Use the Dynamically Selected Area Override window to enter or display the ranking of qualifiers to the compliance process for the program specified in the Key block of the main window.

Qualifiers are the basic components of the program, such as the level, college, degree, campus, and major. There are nine qualifiers, and can be assigned priority levels from 1 to 999. If priority values are not assigned in this window, CAPP uses the default priority set on the area it dynamically selects.

Unless a program is defined as `Captive`, compliance dynamically selects all appropriate areas based on values assigned to each area's qualifiers. When selected, each area's default values for the following are used unless those values are overridden by information provided in this window:

- Priority
- Course reuse
- Attribute reuse
- Within reuse
- Year rules

To access this window using the Options menu, select Override Priorities for Dynamic Selection.

Fields	Descriptions
From Term	First term in which this set of area overrides is in effect. Display only.
To Term	Last term in which this set of area overrides is in effect. Display only.
Priority	Qualifier's priority within the program. When an area is selected dynamically based on the value in one of its qualifier fields, compliance determines whether there is an override priority associated with that qualifier and, if so, assigns it to the area in place of its default priority. Lower-numbered priorities are considered by compliance before higher-numbered priorities. If two areas have the same priority, the system evaluates the areas in alphabetical order.

Fields	Descriptions
Course Re-Use None	Option to indicate that courses applied to the area cannot have been applied to preceding areas and cannot be reused by later areas. When an area is attached to a program, the system automatically defaults the course reuse indicator from the area, but the value can be changed. (Course reuse is specified in the `Default Course Reuse` field of the General Requirements section of SMAAREA. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Course Re-Use In	Option to indicate courses that have been applied to requirements in preceding areas can also be considered for use in the current area, but if used in the current area, cannot be used again in later areas.
Course Re-Use Out	Option to indicate that courses cannot have been applied to any requirements in preceding areas, but if used in the current area, can be considered for use in later areas.
Course Re-Use Both	Option to indicate that courses that have been applied to requirements in preceding areas can also be considered for use in the current area and can be considered for use in later areas.
Attribute Re-Use None	Option to indicate that attributes cannot have been used in preceding areas and cannot be reused in later areas. When an area is attached to a program, the system automatically defaults the attribute reuse indicator from the area, but the value can be changed. (Attribute reuse is specified in the **Default Attribute Reuse** field of the General Requirements section of SMAAREA.
Attribute Re-Use In	Option to indicate that attributes that have been applied to requirements in preceding areas can also be considered for use in the current area, but if used in the current area, cannot be used again in later areas.

Fields	Descriptions
Attribute Re-Use Out	Option to indicate that attributes cannot have been applied to any requirements in preceding areas, but if used in the current area, can be considered for use in later areas.
Attribute Re-Use Both	Option to indicate that attributes that have been applied to requirements in preceding areas can also be considered for use in the current area and can be considered for use in later areas.
Within Indicator	Check box used to indicate whether both a course and its attributes can be used within the same area. In this case, the course's credits are used only one time toward the minimum credits required by the area or program. If this check box is cleared, either a course or its attributes, but not both, can be used within the same area.
Year Rule	Number of years within which a course must be taken for it to be used by an area in the program. If a default year limit has been defined on the Area Definition (SMAAREA) page, that value defaults into this field when the area's code is entered in the **Area** field, although it can be changed.

Compliance Request Management (SMARQCM) page

Updated: August 27, 2020

This page is used to mange compliance related processing.

Use the Compliance Request Management (SMARQCM) page to perform the following:

- Add a new request for a compliance evaluation
- Define 'planned courses' associated with the compliance request
- Create requests for hardcopy output
- Submit a request for processing

Processing a compliance request will generate output that can be viewed through the system forms, on a hardcopy report, or in XML format.

After a compliance request is run, no information for the compliance request can be changed. If a compliance evaluation with different request parameters is required, a new compliance request must be created.

If the Student System Distribution Initialization (SOADEST) page is displayed when you access this page, you can specify a printer for output or, if you do not want output to be printed, you can close it without entering any values.

Default values for this page can be defined in the Compliance Default Parameters (SMADFLT) page, but they can be changed.

This page includes the following windows:

- Main window.
- Copy Existing Request window.
- Compliance Curriculum window.
- Additional Curriculum Information window.
- Request Billing Information window.
- Planned Courses window.
- Request Summary window.

- Hardcopy Request window.
- Hardcopy Billing Information window.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Compliance Request block.

Key block

Updated: August 27, 2020

Use this section to specify the ID of the student for whom you want to create or display a compliance request.

Fields	Descriptions
ID	ID of the student for whom you want to create or display compliance requests. Required. Select the **Search** button for this field to display the Option List. List Person Search (SOAIDEN) page Count Hits Compliance Request Activity (SMACACT) page Duplicate Item SSN/SIN Alternate ID Search (GUIALTI) page
Name (untitled)	Name associated with the ID, automatically displayed when a value is entered in the **ID** field. Display only.
Holds	Indicates whether any compliance holds exist on the student's record. If so, the word `YES` is displayed. Display only.
Override Indicator (untitled)	Indicator used to override a compliance hold, if applicable. Required. Enter Y to override the compliance holds. Select the **Search** button for this field to display the Holds Filter-Only (SOQHOLD) page.

Fields	Descriptions
	List Holds Filter-Only (SOQHOLD) page

Compliance Request block

Updated: August 27, 2020

Use this section to create a new compliance request or display existing compliance requests for the ID specified in the Key block.

Fields	Descriptions
Evaluation Term	Code of the term in which the student expects to complete the program. Required. You can use this field with any year rule (for example, 'satisfy a non-course requirement within the last five years,' or 'take all courses within the last seven years') to determine whether the requirement was met within the specified time period. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation list (STVTERM)
Course Usage Order	Order in which courses/course attributes should be considered by the compliance process. Required. `C` Chronological order by term, oldest first `T` Descending order by term `G` Descending order by grade
Minimum Numeric Grade Value	Lowest numeric grade value allowed for courses/course attributes to be considered by the compliance process. Required. A higher value can be used to restrict undesired work from being considered, for example, to restrict withdrawals or courses taken

Fields	Descriptions
	for audit from being considered by the compliance process. Select the **Search** button for this field to display the Numeric Value of Grades List. List Numeric Value of Grades List
Apply Degree Courses Only	Check box used to indicate whether only courses and non-courses applied to a specific degree record should be considered by the compliance process. Select this check box only if the curriculum associated with the compliance request is to be retrieved from a degree already in academic history. If you select this check box but do not select the curriculum from an academic history degree, the system displays a warning message when you save the request, and the box defaults back to cleared.
Update Applied Courses	Check box used to indicate whether courses and non-courses used by the compliance process to satisfy a requirement should be applied to the specific degree record associated with the compliance request. Select the check box only when the curriculum associated with the compliance request is to be retrieved from a degree already in academic history. If you select this check box, but do not select the curriculum from an academic history degree, the system displays a warning message when you save the request, and the box defaults back to cleared. If courses and non-courses are to be applied to a degree, all existing applied-to records for the degree are deleted by the compliance process and only courses and non-courses used to satisfy requirements for that program are applied to the degree after the update.
Use In-Progress Courses	Check box used to indicate whether the compliance process should select in-progress courses (ungraded courses in

Fields	Descriptions
	registration) and make them available to satisfy the requirements. If you want to use in-progress courses, the minimum and maximum in-progress terms must also be specified. When in-progress courses are selected by the compliance process, they become available to satisfy any detail requirements, and they will accumulate to group, area, and program general requirements/ credit/course minimums. They do not accumulate to institutional traditional or institutional non-traditional, nor are they used to calculate any grade-point averages. This is because courses must be graded and rolled to academic history before they can be used toward these requirements.
Create Unused Area Records	Check box used to indicate whether the compliance process should create output records for unused areas. Areas are unused by the compliance process if: • A dynamic area is attached to a non-captive program but discarded based on unmatched area qualifiers • The area is inactive • There are no requirements for an area The advantages of each method are the following. • Creating unused area records enables you to: Display unused areas on the compliance output inquiry forms and in printed output Determine exactly why an expected area was not used. • Not creating unused area records reduces storage space for compliance output results.
Create Unused Course/Attributes	Check box used to indicate whether the compliance process should create output records for any unused courses or course attributes. Courses/attributes are unused by the compliance process if:

Fields	Descriptions
	• A course/attribute does not satisfy a detail requirement • The course/attribute is excluded or restricted by a restriction or specific exclusion The advantages of each method are the following. • Creating unused course/attribute records enables you to: Display unused courses/attributes on the compliance output inquiry forms and in printed output Determine exactly why a course/attribute was not used. • Not creating unused course/attribute records reduces storage space for compliance output results.
Create Rejection Records	Check box used to indicate whether the compliance process should create output records for any rejected courses or course attributes. Courses/attributes are rejected by the compliance process if they qualify under any kind of restriction or specific exclusion. A course/course attribute that is rejected will also be unused. The advantages of each method are the following. • Creating rejected course/attribute records enables you to: Display rejected courses/attributes on the compliance output inquiry forms and in printed output Determine exactly why a course/attribute was rejected. • Not creating rejected course/attribute records reduces storage space for compliance output results.
Create Course Select Report	Check box used to indicate whether the compliance process should create the Program Compliance Report (SMRCMPL) during compliance processing for this request. The SMRCMPL report displays the courses and course attributes, sorted chronologically by term or in descending grade order as specified in the **Course Usage Order** field, that were selected for processing based on the following:

Fields	Descriptions
	• Evaluation term • Minimum and maximum in-progress terms • Minimum and maximum overall terms • Minimum grade numeric value Creating this report enables you to determine which courses/ attributes were processed and the order in which the courses/ attributes were considered. Requesting the SMRCMPL report is extremely useful during testing, as it can help you discover flaws in your programs. After testing is completed, you will probably not want to request this output on a routine basis for each compliance request.
Request Number	Number assigned to a compliance request when it is saved. Display only. When a new compliance request for the student is saved, the next available one-up number is generated for the new request. Requests are displayed in descending order (most recent request first).
Origin Code	Code for the originator of the compliance request. When a code is entered, a truncated originator description displays. This field does not control any system processing, but indicates the source of the compliance request and can be included in the hardcopy output. Select the **Search** button for this field to display the Originator Validation (STVORIG) list. List Originator Validation (STVORIG)
Origin ID	Banner® ID of the user who originated the compliance request.

Fields	Descriptions
	This field does not control system processing, but indicates the source of the compliance request and can be included in the hardcopy output. Select the **Search** button for this field to display the Option List. List Person Search (SOAIDEN) page Count Hits Non-Person Search (SOACOMP) page Duplicate Rec Faculty/Advisor Filter (SIAIQRY) Duplicate Item Multiple Advisor (SGAADVR)
Origin Name (untitled)	Name associated with the ID, automatically displayed when a value is entered in the **Origin ID** field. Display only.
Advisor and Class Term	Code of the term to be used to select student classification and advisor information. This field is usually used only for hardcopy output. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Minimum In-Progress Term	Code of the earliest term from which in-progress courses should be selected for consideration. Required if the request specifies that in-progress courses should be used (that is, the **Use In-Progress Courses** check box is selected). The term must be less than or equal to the maximum in-progress term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)

Fields	Descriptions
Maximum In-Progress Term	Code of the latest term from which in-progress courses should be selected for consideration. Required if the request specifies that in-progress courses should be used (that is, the **Use In-Progress Courses** check box is selected). The term must be greater than or equal to the minimum in-progress term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Minimum Cutoff Term	Code of the earliest term from which any (in-progress, academic history, or transfer) courses should be selected for consideration. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Maximum Cutoff Term	Code of the latest term from which any (in-progress, academic history, or transfer) courses should be selected for consideration. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Requestor	Banner ID of the user who created the compliance request. Display only.
Compliance Request Date	Date on which the compliance request was saved. Display only. For a new compliance request, the system automatically inserts the system date.
Compliance Date	Date on which the compliance process was run for this request. Display only.

Copy Existing Request window

Updated: August 27, 2020

Use the Copy Existing Request window to copy values from an existing compliance request into a new one. To access this window, the cursor must be in the key block.

This window allows you to generate a new compliance request for a student for whom a similar request has previously been processed without having to enter all of the data. After the values have been copied into the new request, they can be changed, if desired.

Fields	Descriptions
Request Number to Copy From	Number of the existing request from which you want to copy values. Required.
Copy Planned Courses	Check box used to indicate whether the planned courses are to be copied from the original request.

Mouse	Keyboard	Result
Process Copy	Duplicate Record	Copies values from the specified compliance request to the new one

Compliance Curriculum window

Updated: August 27, 2020

Use the Compliance Curriculum window to enter the curriculum associated with the compliance request.

When creating a new compliance request, you can:

- Copy the curriculum information from data that already exists in the Recruiting, Admissions, General Student, or Academic History degree records (using the applicable selection on the Options menu)
- Copy curriculum information from other existing compliance requests (using the applicable selection on the Options menu)
- Enter all curriculum information manually

Note: Curriculum and field of study data is retrieved from the SORLCUR and SORLFOS tables for the two majors, two departments, two minors, six concentrations, level, degree, college, campus, catalog term, term, and curriculum rules.

The system validates data entered in the fields in this window based on how the program is defined and whether curriculum checking is performed or not. The following fields are always required:

- **Program**
- **Catalog Term**
- **Level**
- **College**
- **Degree**
- **Major 1**

When the program is curriculum-independent, no combined validation of these and other, optional curriculum fields is performed.

When the program is curriculum-dependent and curriculum checking is on, these fields and all other curriculum fields are validated in combination against curriculum rules in effect for the catalog term. If you enter the curriculum information directly (that is, do not copy it from another record in the system), the following fields are retrieved from the program's definition when the program is entered in the **Program** field:

- **Student Level**
- **College**
- **Campus**
- **College**
- **Degree**

When the program is curriculum-dependent and curriculum checking is off, no curriculum checking is performed.

Warning! This would allow you to create a compliance request with a combination of major/minor/concentration that your institution might not offer.

Curriculum information can be maintained in other areas of the system without programs, but when used for a request in CAPP, curriculum information must include a program.

When the request information is saved, the system uses curriculum rules to check that the combination of fields represents a valid curriculum for CAPP processing.

Fields	Descriptions
Source	Original source of the compliance curriculum data. Display only. If data is copied from an existing record, the value is added along with the copied data; if data is entered by a user, the value is added when the request is saved.
Sequence Number	Sequence number for the degree record from which compliance program information was retrieved, if information was copied from an existing degree record in academic history. Display only. This value, if it exists, works in conjunctions with the **Apply Degree Courses Only** and **Update Applied Courses** check boxes in the Compliance Request section of the main window.
Change	Check box used to indicate whether data in the curriculum portion of the request was modified from copied data, if applicable. Display only.

Additional Curriculum Information window

Updated: August 27, 2020

Use the Additional Curriculum window to specify curriculum elements included with this compliance request that might require evaluation under a different catalog term.

The compliance process is still governed by the program specified in the Compliance Curriculum window. The remaining fields in this window are an extension of the curriculum defined in the Compliance Curriculum window.

Note: Curriculum and field of study data is retrieved from the SORLCUR and SORLFOS tables for the two majors, two departments, two minors, six concentrations, level, degree, college, campus, catalog term, term, and curriculum rules.

Fields	Descriptions
Program	Program code for this compliance request. Display only.
Level	Code of the level associated with the program for this compliance request. Display only.
Campus	Code of the campus associated with the program for this compliance request. Display only.
College	Code of the college associated with the program for this compliance request. Display only.
Degree	Code of the degree associated with the program for this compliance request. Display only.
Catalog Term	Code for the catalog term for this set of additional requirements for the compliance request. Required. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Suspend Additional Curriculum Checking	Check box used to indicate whether curriculum checking should be suspended for the data entered in this window. Selecting this check box allows you to enter curricular elements that are not defined as valid for this program in the curriculum rules.

Fields	Descriptions
	For example, you should suspend curriculum checking (that is, select this check box) when the Additional Curriculum data is for a major that is not valid for the degree the student will be awarded, but is an additional major that will be certified within the student's overall program.
Major 1	Code of the first major associated with the additional curriculum information for this compliance request. Required for a curriculum-dependent program. The major is validated against majors attached to the base curriculum rule in curriculum-dependent programs when curriculum checking is on. For curriculum-independent programs or when curriculum checking is off, validation is performed only against the appropriate validation table values. Select the **Search** button for this field to display the Option List. List All Major Codes List Help Attached Major/Departments list

Request Billing Information window

Updated: August 27, 2020

Use the Request Billing Information window to submit charges to Accounts Receivable to recoup costs associated with the compliance request. It can be used at any time, not only at the time the request is generated.

When data is entered in this window, the system sends authorized charges directly to a person's account in the Accounts Receivable module and logs those transactions to a cashiering session identified by the user ID entered in the **Authorized** field of this window.

When you create a charge, the transaction is immediately sent to Accounts Receivable when the transaction is saved. You can review fees associated with compliance requests using the Accounts Receivable module forms.

To access this window using the Options menu, select Bill for Evaluation Services.

Fields	Descriptions
Billing Term	Term associated with the charge. Required Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Fee Charged	Type of billing transaction to be created. `Y` Yes. Indicates that a transaction should be created. `N` No. Indicates that a transaction should not be created. If this indicator is set to N, no other entries can be made in this window, and no Accounts Receivable transaction will be created. `W` Waived. Indicates that a transaction should be created, but the transaction monetary amount should be `0.00`.
Detail Code	Detail code for the transaction to be created in Accounts Receivable. Detail codes are validated against the user if user security is enabled and the user is a 'secured user' as defined on the User Profile (TGAUPRF) page. Select the **Search** button for this field to display the Detail Code Control (TSADETC) page.

Fields	Descriptions
	List Detail Code Control (TSADETC) page
Fee Amount	Monetary amount of the fee to be charged. Required. If a fee is associated with the detail code, the system automatically enters the amount in this field, but you can change it.
Fee Date	System date, which is used as the effective and transaction dates when the transaction is created in Accounts Receivable. Display only.
Fee Indicator	Indicator that shows whether fee processing has occurred. Display only. `Y` Yes. Indicates that fee processing has created a charge in Accounts Receivable. `N` No. Indicates that no fee processing has occurred. `W` Waived. Indicates that fee processing has created an entry in Accounts Receivable, but the monetary amount of the transaction was `0.00`.
Authorized	Banner ID of the current user, which will be associated with the transaction when the transaction is created in Accounts Receivable. It is also the user ID of the cashier session in which the transaction will be recorded. Display only.

Planned Courses window

Updated: August 27, 2020

Use the Planned Courses window to enter information on courses that the student plans to take and that you want to be considered by the compliance process.

Because planned courses are not yet graded, they do not accumulate toward any general requirements that use grades (for example, minimum institutional traditional), nor are they used to calculate GPA. The system does not check to determine whether a student has already registered or received transfer credit for a planned course.

The term specified for a planned course must be in the future (that is, the beginning date of the term must be greater than the system date on which the planned course is added). When an existing compliance request is copied into a new request, the system does not copy any courses whose start dates are no longer in the future.

If a planned course exists in the catalog, the catalog information is retrieved after the term, subject code, and course number are entered, but the values can be changed.

Note: If a course has a range of credit hours with it, the systems automatically enters the lowest value.

When the system builds the course list to be used by the compliance process, planned courses associated with the compliance request will not be selected if:

- The planned course is a planned institutional course and at least one active registration already exists for the term of the planned course
- The planned course is a planned transfer course and there is a transfer attendance period that equals the term of the planned course

Fields	Descriptions
Request Number	Number of the compliance request. Display only.
Term	Code of the term during which the student plans to take the course. Required. The begin date of the term must be greater than or equal to the current date. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Subject	Subject code of the planned course. Required. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list.

Fields	Descriptions
	List Subject Validation (STVSUBJ)
Course	Course number of the planned course. Required. Select the **Search** button for this field to display the Existing Courses List. The Course Alias is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page. This is a LOV field linked to Existing Courses list.
Attribute	Attribute associated with the planned course. This field should be used only if the student plans to earn a specific attribute in the course. • If an attribute code is specified for the planned course, the specified attribute is the only one that will be used by the compliance process. • If an attribute code is not specified for the planned course and the course exists in the catalog for the term planned, all of that course's attributes will be used by the compliance process. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Campus	Code of the campus of the planned course. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college of the planned course.

Fields	Descriptions
	Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department of the planned course. Select the **Search** button for this field to display the All Department Codes List. List All Department Codes List
Level	Code of the level of the planned course. Required. If a course has multiple levels associated with it, the system automatically enters the student's level. Select the **Search** button for this field to display the Option List. List Level Code Validation (STVLEVL) Count Hits Level Code for Subject, Course, and Eff Term List
Credit Hours	Number of credits the student plans to earn in the planned course. Required. If a course has a range of credit hours associated with it, the system automatically enters the lowest value.
Transfer	Check box used to indicate whether the planned course is a transfer course. Display only. This check box becomes selected when a record for which a value has been entered in the **Institution** field is saved.
Course Title	Title of the planned course. Required.
Institution	Code of the institution at which the planned course will be taken.

Fields	Descriptions
	This field is used only if the student plans to take the planned course at another institution. Planned transfer courses are counted by the compliance process as transfer courses. They accumulate toward all transfer, not institutional-only, totals. Select the **Search** button for this field to display the Source/ Background Inst Validation (STVSBGI) list. List Source/Background Inst Validation (STVSBGI)
Name (untitled)	Name of the transfer institution, automatically displayed when a valid value is entered in the **Institution** field. Display only.

Request Summary window

Updated: August 27, 2020

The Request Summary window displays a one-line summary of each compliance evaluation requested or performed for the student.

If the value in a field was changed from the defaulted value when a compliance request was created, the associated check box in the scroll box on the right side of the window is selected.

Fields	Descriptions
Request Number	Number of the compliance request. Display only.
Program	Program code for the compliance request. Display only.
Original Source	Original source of the compliance curriculum data. Display only.
Curriculum Source	Source of the curriculum data. Display only. The value in this field is the same as that in the **Original Source** field unless the request was copied from another request, in which case it is the request number of the original request.
Change Indicator	Check box used to indicate that at least one field in the

Fields	Descriptions
	compliance request was modified from the values retrieved when the compliance request was copied. Display only.
Used Credits	Number of credits used by the compliance process to satisfy requirements in the program. Display only.
Connector (untitled)	Abbreviation of the connector used to describe the credits/ courses used by the compliance process to satisfy requirements for the program. Display only. N None A And O Or
Used Courses	Number of courses used by the compliance process to satisfy requirements in the program. Display only.
Compliance Date	Date on which the compliance process was run. Display only.
The following checkboxes are used only if curriculum information was copied into the request.

Hardcopy Request window

Updated: August 27, 2020

Use the Hardcopy Request window to request printed compliance hardcopy output. When a hardcopy request is entered and saved, the compliance process is run for the compliance request, if necessary, and then prints the requested output for the request.

You can manually enter the name and address of the recipient of the hardcopy output, or you can specify the recipient by selecting the appropriate code from within the system. For the latter, you can specify one (and only one) of the following:

- Internal college
- Outside institution
- Internal department
- Student address

Rules for the content of the output are defined on the Compliance Print Type Rules

(SMACPRT) page.

Fields	Descriptions
Request Number	Number of the compliance request. Display only.
Compliance Type	Code of the compliance print output type requested. Required. Select the **Search** button for this field to display the Existing Compliance Types List. List Existing Compliance Types List
Request Date	Date of the output request. Required. The system automatically enters the current date, but it can be changed. Requests with a future date are not processed until the specified date. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
Print Immediately	Check box used to indicate whether the output should be printed immediately. If the check box is cleared, the request is held for batch processing.
Copies	Number of hardcopy output copies to be produced. Required. The default is `1` but you can change it to any value up to `99`.
Internal College	Code of the internal college that is to receive the hardcopy output, if applicable.

Fields	Descriptions
	When a valid code is entered, the system automatically enters the college's name in the **Issued To** field. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Internal Department	Code of the internal college that is to receive the hardcopy output, if applicable. When a valid code is entered, the system automatically enters the college's name in the **Issued To** field. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Outside Institution Code	Code of the outside institution that is to receive the hardcopy output, if applicable. When a valid code is entered, the system automatically enters the outside institution's name and address in the appropriate fields, although you can change any of the values. Select the **Search** button for this field to display the Source/Background Institution Filter-Only (SOISBGI) page. List Source/Background Institution Filter-Only (SOISBGI) page

Fields	Descriptions
Student Address Type	Code of the student's address to which the hardcopy output is to be mailed, if applicable. When a valid code is entered, the system automatically enters the student's name and address in the appropriate fields, although you can change any of the values. Select the **Search** button for this field to display the Option List. List Address Type Validation (STVATYP) Count Hits Address Summary (SOADDRQ) page
Issued To	Name of the person or agency to whom the hardcopy output is to be mailed. If you used the **Forward Internal College**, **Outside Institution Code**, **Forward Internal Department**, or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change any of the values.
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1 Street Line 2 Street Line 3 Street Line 4	Four lines on which to enter the address to which the hardcopy output is to be mailed. If you used the **Outside Institution Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change any of the values.

Fields	Descriptions
City	City of the address to which the hardcopy output is to be mailed. If you used the **Outside Institution Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value.
State or Province	Code of the state or province of the address to which the hardcopy output is to be mailed. If you used the **Outside Institution Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value. Select the **Search** button for this field to display the State/Province Code Validation (STVSTAT) list. List State/Province Code Validation (STVSTAT)
ZIP or Postal code	ZIP or postal code of the address to which the hardcopy output is to be mailed. If you used the **Outside Institution Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value. Select the **Search** button for this field to display the ZIP/Postal Code Validation (GTVZIPC) page. List ZIP/Postal Code Validation (GTVZIPC) page

Fields	Descriptions
Nation	Code of the nation of the address to which the hardcopy output is to be mailed. If you used the **Outside Institution Code** or **Student Address Type** field to specify the recipient, information defaults from your choice, but you can change the value. Select the **Search** button for this field to display the Nation Validation (STVNATN) list. List Nation Validation (STVNATN)
Compliance Print Date	Date on which the hardcopy output was printed. Display only.
User	Login ID of the user who requested the hardcopy output. Display only.
Printer	Code of the printer to which the output was sent, if any. Display only.

Hardcopy Billing Information window

Updated: August 27, 2020

Use the Hardcopy Billing Information window to create Accounts Receivable transactions associated with the hardcopy request.

You can send authorized charges directly to a person's account in the Accounts Receivable module and log those transactions to a cashiering session identified by the user ID displayed in the **Authorized** field.

When you add a fee, the transaction is immediately sent to Accounts Receivable when you save the transaction. You can review fees associated with compliance requests using the Accounts Receivable module forms.

Fields	Descriptions
Billing Term	Term associated with the charge. Required

Fields	Descriptions
	Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Fee Charged	Type of billing transaction to be created. `Y` Yes. Indicates that a transaction should be created. `N` No. Indicates that a transaction should not be created. If this indicator is set to N, no other entries can be made in this window, and no Accounts Receivable transaction will be created. `W` Waived. Indicates that a transaction should be created, but the transaction monetary amount should be `0.00`.
Detail Code	Detail code for the transaction to be created in Accounts Receivable. Detail codes are validated against the user if user security is enabled and the user is a 'secured user' as defined on the User Profile (TGAUPRF) page. Select the **Search** button for this field to display the Detail Code Control (TSADETC) page. List Detail Code Control (TSADETC) page
Fee Amount	Monetary amount of the fee to be charged. Required. If a fee is associated with the detail code, the system automatically enters the amount in this field, but you can change it.
Fee Date	System date, which is used as the effective and transaction dates when the transaction is created in Accounts Receivable. Display only.
Fee Indicator	Indicator that shows whether fee processing has occurred.

Fields	Descriptions
	Display only. `Y` Yes. Indicates that fee processing has created a charge in Accounts Receivable. `N` No. Indicates that no fee processing has occurred. `W` Waived. Indicates that fee processing has created an entry in Accounts Receivable, but the monetary amount of the transaction was `0.00`.
Authorized	Banner ID of the current user, which will be associated with the transaction when the transaction is created in Accounts Receivable. It is also the user ID of the cashier session in which the transaction will be recorded. Display only.

Student Targets, Waivers & Substitutions (SMASADJ) page

Updated: August 27, 2020

Use the Student Targets, Waivers, and Substitutions (SMASADJ) page to indicate that specific courses should be used to fulfill specific requirements or to waive individual course/attribute detail requirements entirely.

This page allows you to perform the following kinds of adjustments:

- Targets, which enable you to indicate that a completed course should be used to fulfill a requirement different from the one compliance would otherwise use it toward
- Waivers, which allow you to indicate that a student does not need to fulfill a requirement for a specific course
- Substitutions, which allow you to specify that a course that would not normally fulfill a requirement should be used to fulfill a requirement

This page includes the following windows:

- Main window.
- Target Courses Information window.

- Waivers window.
- Substitutions window.
- Other Adjustments Tracking window.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Navigation section.

Key block

Updated: August 27, 2020

Use this section to specify the ID and term for which you want to enter or display targets, waivers, or substitutions.

Fields	Descriptions
ID	Banner® ID of the person for whom you want to enter an adjustment. If you enter an ID that is not defined on the Student Adjustment Library (SMASLIB) page, the system displays a message with an option that opens SMASLIB so that the ID can be added. Select the **Search** button for this field to display the Option List. List Person Search (SOAIDEN) page Count Hits Student Adjustment Filter (SMISLIB) page
Term	Term associated with the adjustment. Select the **Search** button for this field to display the Option List. List Catalog Term Codes List Duplicate Item Terms Represented in Student Adjustment List
Catalog	Academic year to which the term belongs. Display only.

Navigation section

Updated: August 27, 2020

Use this section to navigate to the window in which you want to make adjustments to the area specified in the key block.

Mouse	Keyboard	Result
Target Courses	Enter/Return/Space bar	Opens the Target Courses Information window
Waivers	Enter/Return/Space bar	Opens the Waivers window
Substitutions	Enter/Return/Space bar	Opens the Substitutions window
All Tracking	Enter/Return/Space bar	Opens the Other Adjustments Tracking window

Target Courses Information window

Updated: August 27, 2020

Use the Target Courses Information window to specify for an individual student that a particular completed course should fulfill a specific requirement instead of another requirement to which it would otherwise apply.

Course targets can be defined globally (that is, they can apply to requirements in any program), or they can be applied only in specified programs.

This window is composed of the Target Courses section and the Valid Programs section.

Target Courses section

Updated: August 27, 2020

Use this section to enter or display the target courses for the ID and term specified in the key block of the main window.

Fields	Descriptions
From Term	First term in which this set of targets is in effect. Display only.

Fields	Descriptions
To Term	Last term in which this set of targets is in effect. Display only.
Subject	Code of the subject of the target course. Required. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course	Course number of the target course. Required. Select the **Search** button for this field to display the Existing Courses List. List Existing Courses List
Attribute	Code of the course attribute associated with this target adjustment, if applicable. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Area	Code of the area associated with the target adjustment, if applicable. Required. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. List Existing Area Inquiry (SMIAREA) page
Group	Code of the group associated with the

Fields	Descriptions
	target adjustment. Required. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. List Existing Group Inquiry (SMIGROP) page

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies course targets from a prior term range to a new effective term range
Maintenance	Duplicate Item	Ends course targets

Valid Programs section

Updated: August 27, 2020

Use this section to limit course targets to specific programs, if desired.

Fields	Descriptions
From Term	First term in which this set of valid programs specified for the target is in effect. Display only.
To Term	Last term in which this set of valid programs specified for the target is in effect. Display only.
Program	Code of the program to which the course targets apply. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. List Existing Program Inquiry (SMIPROG) page

Fields	Descriptions
	Count Hits Program Definition Rules (SMAPRLE) page

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies valid programs for a course target from a prior term range to a new effective term range
Maintenance	Duplicate Item	Ends valid programs for the course target

Waivers window

Updated: August 27, 2020

Use the Waivers window to waive an existing requirement for a student.

Waivers can be defined globally (that is, they can apply to requirements in any program), or they can be applied only in specified programs.

This window is composed of the Waivers section and the Valid Programs section.

Waivers section

Updated: August 27, 2020

Use this section to enter or display the waivers for the ID and term specified in the key block of the main window.

Fields	Descriptions
From Term	First term in which this set of waivers is in effect. Display only.
To Term	Last term in which this set of waivers is in effect. Display only.
Subject	Code of the subject of the waived course. Required.

Fields	Descriptions
	Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course	Course number of the waived course. Required. Select the **Search** button for this field to display the Existing Courses List. List Existing Courses List
Attribute	Code of the course attribute associated with this waiver, if applicable. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Area	Code of the area associated with the waiver, if applicable. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. List Existing Area Inquiry (SMIAREA) page
Group	Code of the group associated with the waiver. Select the **Search** button for this field to

Fields	Descriptions
	display the Existing Group Inquiry (SMIGROP) page. List Existing Group Inquiry (SMIGROP) page
Action	Code of the action associated with this waiver associated with this waiver. Required. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Credits	Number of credits that will accumulate toward the group, area, and program totals. A value can be entered only if the action code associated with this waiver is defined such that credits will be counted toward the waived requirement.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies waivers from a prior term range to a new effective term range
Maintenance	Duplicate Item	Ends waivers

Valid Programs section

Updated: August 27, 2020

Use this section to limit waived requirements to specific programs, if desired.

Fields	Descriptions
From Term	First term in which this set of valid programs specified for the waiver is in effect. Display only.
To Term	Last term in which this set of valid programs specified for the waiver is in effect. Display only.
Program	Code of the program to which the course waivers apply. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. List Existing Program Inquiry (SMIPROG) page Count Hits Program Definition Rules (SMAPRLE) page

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies valid programs specified for the waiver from a prior term range to a new effective term range
Maintenance	Duplicate Item	Ends valid programs specified for the waiver

Substitutions window

Updated: August 27, 2020

Use the Substitutions window to specify that a course that would not normally fulfill a requirement should be used to fulfill it.

Substitutions can be defined globally (that is, they can apply to requirements in any program), or they can be applied only in specified programs.

This window is composed of the Substitutions section and the Valid Programs section.

Substitutions section

Updated: August 27, 2020

Use this section to enter or display the substitutions for the ID and term specified in the key block of the main window.

Fields	Descriptions
From Term	First term in which this set of substitutions is in effect. Display only.
To Term	Last term in which this set of substitutions is in effect. Display only.
Requirements Subject	Code of the subject of the original requirement. Required. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Requirements Course	Course number of the original requirement. Required. Select the **Search** button for this field to display the Existing Courses List. List Existing Courses List
Requirements Attribute	Code of the course attribute associated with the original requirement, if applicable. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)

Fields	Descriptions
Substitutions Subject	Code of the subject of the substituted course. Required. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Substitutions Course	Course number of the substituted course. Required. Select the **Search** button for this field to display the Existing Courses List. List Existing Courses List
Substitutions Attribute	Code of the course attribute associated with the substituted course, if applicable. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Area	Code of the area associated with the substitution, if applicable. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. List Existing Area Inquiry (SMIAREA) page
Group	Code of the group associated with the substitution.

Fields	Descriptions
	Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. List Existing Group Inquiry (SMIGROP) page
Action	Code of the action associated with this substitution. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Credits	Number of credits that will accumulate toward the group, area, and program totals.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies substitutions from a prior term range to a new effective term range
Maintenance	Duplicate Item	Ends substitutions

Valid Programs section

Updated: August 27, 2020

Use this section to limit substitutions to specific programs, if desired.

Fields	Descriptions
From Term	First term in which this set of valid programs specified for the substitution is in effect. Display only.
To Term	Last term in which this set of valid programs specified for the substitution is in effect. Display only.

Fields	Descriptions
Program	Code of the program to which the substitutions apply. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. List Existing Program Inquiry (SMIPROG) page Count Hits Program Definition Rules (SMAPRLE) page

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies valid programs specified for the substitution from a prior term range to a new effective term range
Maintenance	Duplicate Item	Ends valid programs specified for the substitution

Other Adjustments Tracking window

Updated: August 27, 2020

Use the Other Adjustments Tracking window to view an audit trail of all adjustment actions. One audit trail record is automatically written for each table/ effective term/user/ date combination. You can also enter comments associated with each audit trail entry.

This window is composed of the Display-Only section and the Tracking Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about record for which adjustment tracking text is being entered or displayed.

.

Fields	Descriptions
Table	Seven-character name and full name of the table for which the adjustment was made. Select the **Search** button for this field to display the Other Adjustment Tracking Tables List. List Other Adjustment Tracking Tables List
Term	Code of the term for which the adjustment was effective. Display only. For searches, select the **Search** button for this field to display the Other Adjustment Tracking Terms List. List Other Adjustment Tracking Terms List
User	Banner ID of the person who made the adjustment. Display only.
Activity Date	Date on which the adjustment was made. Display only.

Tracking Text section

Updated: August 27, 2020

Use this section to enter or display the adjustment tracking text for the program specified in the key block of the main window.

.

Fields	Descriptions
Text Tracking	Text associated with the adjustment. There is no word-wrap in the lines. When

Fields	Descriptions
	you reach the line limit, the cursor stays in the same position and types over the last character.
Activity Date	Date on which the text was entered or modified.

Student Area Adjustments (SMASARA) page

Updated: August 27, 2020

Use the Student Area Adjustments (SMASARA) page to enter adjustments to area requirements for an individual student without changing the requirements for the entire area for all the students.

You should create adjustments to a student's area only for the components that should be different from the area's standard requirements. For example, if the only area requirements that should be different for a student are an area's course attachments, you should not create area general requirements adjustments.

This page includes the following windows:

- Main window.
- Default All Detail window.
- Area General Requirement Adjustments window.
- Default Area General Requirements window.
- Area Text window.
- Default Area Text window.
- Include/Exclude Course Level window.
- Default Additional Course Levels to Include/Exclude window.
- Restricted Subjects/Attributes window.
- Default Restricted Subjects/Attributes window.

- Restricted Subjects/Attributes Text window.
- Area Restricted Grades window.
- Default Restricted Grades window.
- Restricted Grades Text window.
- Valid Programs window.
- Area Adjustment Tracking window.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Navigation section.

Key block

Updated: August 27, 2020

Use this section to specify the ID, term, and area for which you want to make adjustments.

Fields	Descriptions
ID	Banner® ID of the person for whom you want to adjust area requirements. If you enter an ID that is not defined on the Student Adjustment Library (SMASLIB) page, the system displays a message with an option that opens SMASLIB so that the ID can be added. Select the **Search** button for this field to display the Option List. List Person Search (SOAIDEN) page Count Hits Student Adjustment Filter (SMISLIB) page
Term	Term in which the area adjustments began. Select the **Search** button for this field to display the Option List.

Fields	Descriptions
	List Catalog Term Codes List Duplicate Item Terms Represented in Student Adjustment List
Area	Code of the area for which requirements are being adjusted. Select the **Search** button for this field to display the Option List. List Area Library (SMAALIB) page Count Hits Existing Area Inquiry (SMIAREA) page Duplicate Item Areas Represented in Student Adjustment List
Catalog	Academic year to which the term belongs. Display only.
Student Level	Student level associated with the area. Display only.
Course Level	"Native" course level associated with the area. Display only.

Navigation section

Updated: August 27, 2020

Use this section to navigate to the window in which you want to make adjustments to the area specified in the key block.

Mouse	Keyboard	Result

Course Attachment	Enter/Return/Space bar	Opens the Area Course/ Attribute Attachment (SMQSACR) page
All Tracking	Enter/Return/Space bar	Opens the Area Adjustment Tracking window

Default All Detail window

Updated: August 27, 2020

Use the Default All Detail window to copy all of an existing area's requirements to the student's area adjustment record.

Note: This window is available only if no area-level requirements have been defined for the student's area adjustment record.

When you access this window, the page name changes to Area Requirements (SMQSADF), although the window can be accessed only from the key block of the Student Area Adjustments (SMASARA) page.

This window is composed of the Display-Only Block and the Default block.

Display-Only section

Updated: August 27, 2020

This section displays details about the record to which area information is being defaulted.

Fields	Descriptions
ID	Banner ID of the person for whom you want to adjust area requirements.
Term	Term in which the area adjustments began.

Fields	Descriptions
Area	Code of the area for which requirements are being adjusted.
Catalog	Academic year to which the term belongs.
Student Level	Student level associated with the area.
Course Level	'Native' course level associated with the area.

Default section

Updated: August 27, 2020

Use this section to specify the area from which you want to default all requirements.

Fields	Descriptions
Default From Area	Area from which to copy all details. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.
Area Rules Term	Term from which to copy area details. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Area Inquiry (SMIAREA) page
General Requirements	This check box is selected if general requirements exist for the area/term being copied.

Fields	Descriptions
	If you do not want to copy general requirements to the area, clear this check box.
Area Text	This check box is selected if area text exists for the area/term being copied. If you do not want to copy area text to the area, clear this check box.
Include/Exclude Additional Levels	This check box is selected if additional levels exist for the area/term being copied. If you do not want to copy additional levels to the area, clear this check box.
Restricted Subjects/Attributes	This check box is selected if restricted subjects and attributes exist for the area/term being copied. If you do not want to copy restricted subjects and attributes to the area, clear this check box.
Restricted Grades	This check box is selected if restricted grades exist for the area/term being copied. If you do not want to copy restricted grades to the area, clear this check box.
Group Attachments	This check box is selected if group attachments exist for the area/term being copied. If you do not want to copy group attachments to the area, clear this check box.

Fields	Descriptions
Course Attachments	This check box is selected if course attachments exist for the area/term being copied. If you do not want to copy course attachments to the area, clear this check box.

Area General Requirement Adjustments window

Updated: August 27, 2020

Use the Area General Requirement Adjustments window to enter adjustments to an area's general requirements record for a student's area adjustment record.

If you copied values from another area, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

Fields	Descriptions
From Term	First term in which this adjusted set of general requirements is in effect. Display only.
To Term	Last term in which this adjusted set of general requirements is in effect. Display only.
Active/Inactive	Option group to indicate whether the area is active or inactive for the term range. The default is `Inactive`. When an area is inactive, it cannot be used for compliance. If a user attempts to perform compliance for an inactive area, an error message is displayed.
Attached	Indicates whether groups or courses have been attached to the area. Display only.

Fields	Descriptions
Total Required Credits	Minimum total number of credits needed to satisfy the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses	Minimum total number of courses needed to satisfy the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits	Minimum number of credits that must be earned at your institution to satisfy the area's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Courses	Minimum number of courses that must be earned at your institution to satisfy the area's requirements.
Required Institutional Traditional Credits	Minimum number of credits earned at the institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) needed to satisfy the area's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system

Fields	Descriptions
	should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Traditional Courses	Minimum number of courses earned at the institution with a traditional grade (as defined on SHAGRDE) needed to satisfy the area's requirements.
Maximum Institutional Non-Trad Credits	Maximum number of credits earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the area's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Trad Courses	Maximum number of courses earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the area's requirements.
Maximum Transfer Credits	Maximum number of transfer credits that can be used to satisfy the area's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy the area's requirements.
Compliance Credits	Number of credits to be applied towards the program's minimum credit requirement for the area. Use this field to override the actual number of credits that would normally be accumulated by the area to the program. For example, you might need to define an area to use within a graduate program to verify that a student has completed specific

Fields	Descriptions
	undergraduate requirements. To satisfy the program, the student must complete the undergraduate work, but the undergraduate credits/courses (which are entered in the **Compliance Courses** field) do not accumulate toward the graduate program's minimum required credits/courses. To achieve this, you could define the undergraduate requirements as an area with zero compliance credits/courses, and then the work would not accumulate toward the program.
Compliance Courses	Number of courses to be applied towards the program's minimum course requirement for the area. Use this field to override the actual number of courses that would normally be accumulated by the area to the program. An example is provided in the description of the **Compliance Credits** field.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the area's requirements. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Area GPA	Lowest acceptable area GPA a student can have to satisfy the area's requirements. This is calculated from the grades received in native-level courses used to satisfy the requirements of the area.
Default Within Indicator	Check box used to indicate whether a course and its attribute(s) can be used to satisfy more than one detail requirement within the area.
Default Course Reuse	Default course reuse rule to be used by compliance.

Fields	Descriptions
	If a different reuse rule has been designated for a program to which this area is attached, the program-level rule overrides the area-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Default Attribute Reuse	Default attribute reuse rule to be used by compliance. If a different reuse rule has been designated for a program to which this area is attached, the program-level rule overrides the area-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default.
Default Priority	Default priority for the area when the area is attached to a program. If the area is dynamic and is not attached to a non-captive program, the default priority specifies the order in which the area is processed by compliance, unless dynamic area overrides are defined for the program.
Default Year Limit	Number of years old a course can be to satisfy the area's requirements. When a compliance request is processed, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses.

Fields	Descriptions
	CAPP checks the earliest term in the furthest year of the course year limit you set. Example: The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers courses back to 200110, which is the first term in the academic year five years back from 2006.

Default Area General Requirements window

Updated: August 27, 2020

Use the Default Area General Requirements window to copy an existing area's general requirements to a student's area adjustment record.

Note: This window is available only if no area-level general requirements have been defined for the student's area adjustment record.

When you access this window, the page name changes to Area Requirements (SMQSADF), although the window can be accessed only from the Area General Requirements Adjustments window of the Student Area Adjustments (SMASARA) page.

Fields	Descriptions
Default From Area	Area from which to copy general requirements.

Fields	Descriptions
	Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.
Area Rules Term	Term from which to copy general requirements. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Area Inquiry (SMIAREA) page

Area Text window

Updated: August 27, 2020

Use the Area Text window to enter text that describes the area and to indicate a print code that specifies how the text is used in compliance output.

This window is composed of the Display-Only section and the Area Text section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the area text adjustments.

Fields	Descriptions
From Term	First term in which this text is in effect.
To Term	Last term in which this text is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies text from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the Key section to the **To Term** field

Area Text section

Updated: August 27, 2020

Use this section to enter or display the text for the area adjustment specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the area. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Default Area Text window

Updated: August 27, 2020

Use the Default Area Text window to copy an existing area's text to a student's area adjustment record.

Note: This window is available only if no area-level text has been defined for the student's area adjustment record.

When you access this window, the page name changes to Area Requirements (SMQSADF), although the window can be accessed only from the Area Text window of the Student Area Adjustments (SMASARA) page.

Fields	Descriptions
Default From Area	Area from which to copy area text. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.

Include/Exclude Course Level window

Updated: August 27, 2020

Use the Include/Exclude Course Level window to enter adjustments to included/excluded course levels to a student's area adjustment record.

For included levels, you can also define:

- A minimum grade
- Maximum credits and maximum number of courses

Courses at excluded levels are not considered toward satisfying an area's requirements. Courses at included levels can satisfy area requirements and count toward the area's minimum credit requirements, but they are not used to calculate grade point averages within the area.

This window is composed of the Display-Only section and the Course Level Inclusions/Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the area course level inclusions/exclusions adjustments.

Fields	Descriptions
From Term	First term in which this set of inclusions/exclusions is in effect.
To Term	Last term in which this set of inclusions/exclusions is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies additional course levels from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the Key section to the **To Term**

Course Level Inclusions/Exclusions section

Updated: August 27, 2020

Use this section to enter or display the course level inclusions/exclusions adjustments for the area specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded. Required.
Level	Code of the course level to be included or excluded. Required. Select the **Search** button for this field to display the Level Codes (STVLEVL) list. List Level Codes (STVLEVL)
Description	Description of the course level. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the area's requirements. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits from an included course level that can be used to satisfy area requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value

Fields	Descriptions
	(**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses from an included course level that can be used to satisfy area requirements.

Default Additional Course Levels to Include/Exclude window

Updated: August 27, 2020

Use the Default Additional Course Levels to Include/Exclude window to copy an existing area's included/excluded course levels to a student's area adjustment record.

Note: This window is available only if no area-level additional course levels have been defined for the student's area adjustment record.

When you access this window, the page name changes to Area Requirements (SMQSADF), although the window can be accessed only from the Include/Exclude Course Level window of the Student Area Adjustments (SMASARA) page.

Fields	Descriptions
Default From Area	Area from which to copy included/excluded course levels. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page.

Fields	Descriptions
	Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.

Restricted Subjects/Attributes window

Updated: August 27, 2020

Use the Restricted Subjects/Attributes window to adjust restrictions placed on certain subjects or attributes from being used to satisfy requirements within this area.

Restrictions can be absolute (that is, none of the subjects or attributes can be used), or you can limit the number of subjects or attributes that can be used.

A restriction must include at least one of the fields. If more than one restriction is specified (for example, **Subject**, **Course Number Low**, and **Course Attribute**), a course is restricted only if it meets all of the criteria.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the area subject/attribute restrictions adjustments.

Fields	Descriptions
From Term	First term in which this set of restrictions is in effect.
To Term	Last term in which this set of restrictions is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies restricted subjects/ attributes from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the Key section to the **To Term** field

Subject/Attribute Restrictions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the subject/attribute restrictions adjustments for the area specified in the key block of the main window.

Fields	Descriptions
Campus	Code of the campus associated with the restriction. Select the **Search** button for this field to display the Campus Codes (STVCAMP) list. List Campus Codes (STVCAMP)
College	Code of the college associated with the restriction. Select the **Search** button for this field to display the College Codes (STVCOLL) list. List College Codes (STVCOLL)
Department	Code of the department associated with the restriction. Select the **Search** button for this field to display the Department Codes (STVDEPT) list. List Department Codes (STVDEPT)
Subject	Code of the subject associated with the restriction.

Fields	Descriptions
	Select the **Search** button for this field to display the Subject Codes (STVSUBJ) list. List Subject Codes (STVSUBJ)
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias Low	The Course Alias Low is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Course Number High	Highest number in a range of restricted courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias High	The Course Alias High is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Attribute	Code of the course attribute associated with the restriction. Select the **Search** button for this field to display the Degree Program Attributes (STVATTR) list. List Degree Program Attributes (STVATTR)
Maximum Credits	Maximum number of credits that can be taken within the restriction.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be taken within the restriction.

Restricted Subjects/Attributes Text window

Updated: March 20, 2025

Use the Restricted Subjects/Attributes Text window to enter descriptive information about the restriction selected in the Restricted Subjects/Attributes window.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which area subject/attribute restrictions adjustments text is being entered or displayed.

Fields	Descriptions
From Term	First term in which this restriction is in effect.
To Term	Last term in which this restriction is in effect.
Campus	Code of the campus associated with the restriction.
College	Code of the college associated with the

Fields	Descriptions
	restriction.
Department	Code of the department associated with the restriction.
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Attribute	Code of the attribute associated with the restriction.

Subject/Attribute Restrictions Adjustments Text section

Updated: August 27, 2020

Use this section to enter or display the subject/attribute restrictions adjustments text for the area specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you

Fields	Descriptions
	query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Area Restricted Grades window

Updated: August 27, 2020

Use the Area Restricted Grades window to define those grades that should be restricted or limited when applying a student's courses toward the area's requirements.

Grade restrictions defined in this window apply only to those grade codes that have the same course level defined the Grade Code Maintenance (SHAGRDE) page as the native course level for the area. Also, restrictions defined in this window apply only to the specific grade codes being restricted. The restrictions are not applied to grade codes that have a lower numeric value.

This window is composed of the Display-Only section and the Grade Restrictions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the area grade restrictions adjustments.

Fields	Descriptions

Valid Programs window

Updated: August 27, 2020

Adjusted area requirements can be defined globally or limited to one or more specific programs.

Use the Valid Programs window to specify the program(s) for which the area adjustments are valid if they should be limited. If no entries are made in the Valid Programs window for adjusted area requirements, they are treated as global adjustments and are used instead of the standard area requirements in all compliance evaluations for the student.

This window is composed of the Display-Only section and the Programs section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program adjustments.

Fields	Descriptions

Fields	Descriptions
	(SMAPRLE) page
Description	Description of the program code, automatically displayed when a valid program code is entered. Display only.

Area Adjustment Tracking window

Updated: August 27, 2020

Use the Area Adjustment Tracking window to view an audit trail of all adjustment actions. One audit trail record is automatically written for each table/ effective term/user/date combination. You can also enter comments associated with each audit trail entry.

This window is composed of the Display-Only section and the Tracking Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about record for which adjustment tracking text is being entered or displayed.

Fields	Descriptions
Table	Seven-character name and full name of the table for which the adjustment was made. For searches, select the **Search** button for this field to display the Other Adjustment Tracking Tables List. List Other Adjustment Tracking Tables List
Term	Code of the term for which the adjustment was effective. Display only. For searches, select the **Search** button for this field to display the Other Adjustment

Fields	Descriptions
	Tracking Terms List. List Other Adjustment Tracking Terms List
User	Banner ID of the person who made the adjustment.
Activity Date	Date on which the adjustment was made.

Tracking Text section

Updated: August 27, 2020

Use this section to enter or display the adjustment tracking text for the area specified in the key block of the main window.

Fields	Descriptions
Tracking Text	Text associated with the adjustment. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Activity Date	Date on which the text was entered or modified.

Student Group Adjustments (SMASGRP) page

Updated: August 27, 2020

Use the Student Group Adjustments (SMASGRP) page to enter adjustments to group requirements for an individual student without changing the requirements for the entire group for all the students.

You should create adjustments to a student's group adjustment record only for the components that should be different from the group's standard requirements. For example, if the only group requirements that should be different for a student are an group's additional levels, you should not create group general requirements adjustments.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Navigation section.

Key block

Updated: August 27, 2020

Use this section to specify the ID, term, and area for which you want to make adjustments.

Fields	Descriptions
ID	Banner® ID of the person for whom you want to adjust group requirements. If you enter an ID that is not defined on the Student Adjustment Library (SMASLIB) page, the system displays a message with an option that opens SMASLIB so that the ID can be added. Select the **Search** button for this field to display the Option List. List Person Search (SOAIDEN) page Count Hits Student Adjustment Filter (SMISLIB) page
Term	Term in which the group adjustments began. Select the **Search** button for this field to display the Option List. List Catalog Term Codes List Duplicate Item Terms Represented in Student Adjustment List
Group	Code of the group for which requirements are being adjusted. Select the **Search** button for this field to display the Option List. List Group Library (SMAGLIB) page Count Hits Existing Group Inquiry (SMIGROP) page

Fields	Descriptions
	Duplicate Item Groups Represented in Student Adjustment List
Catalog	Academic year to which the term belongs. Display only.
Student Level	Student level associated with the group. Display only.
Course Level	'Native' course level associated with the group. Display only.

Navigation section

Updated: August 27, 2020

Use this section to navigate to the window in which you want to make adjustments to the group specified in the key block.

Mouse	Keyboard	Result

Group General Requirement Adjustments window

Updated: August 27, 2020

Use the Group General Requirement Adjustments window to enter adjustments to a group's general requirements record.

If you copied values from another group, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

Fields	Descriptions
From Term	First term in which this adjusted set of general requirements is in effect. Display only.
To Term	Last term in which this adjusted set of general requirements is in effect. Display only.
Active/Inactive	Option group to indicate whether the group is active or inactive for the term range. The default is `Inactive`. When a group is inactive, it cannot be used for compliance. If a user attempts to perform compliance for an inactive group, an error message is displayed.
Total Required Credits	Minimum total number of credits needed to satisfy the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses	Minimum total number of courses needed to satisfy the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.

Fields	Descriptions
Required Institutional Credits	Minimum number of credits that must be earned at your institution to satisfy the group's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Courses	Minimum number of courses that must be earned at your institution to satisfy the group's requirements.
Required Institutional Traditional Credits	Minimum number of credits earned at the institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) needed to satisfy the group's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Traditional Courses	Minimum number of courses earned at the institution with a traditional grade (as defined on SHAGRDE) needed to satisfy the group's requirements.
Max Institutional Non-Traditional Credits	Maximum number of credits earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the group's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Max Institutional Non-Traditional Courses	Maximum number of courses earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the group's requirements.

Fields	Descriptions
Maximum Transfer Credits	Maximum number of transfer credits that can be used to satisfy the group's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy the group's requirements.
Compliance Credits	Number of credits to be applied towards the program's and area's minimum credit requirement for the group. Use this field to override the actual number of credits that would normally be accumulated by the area to the program. For example, you might need to define a group to use within a graduate program to verify that a student has completed specific undergraduate requirements. To satisfy the program, the student must complete the undergraduate work, but the undergraduate credits/courses (which are entered in the **Compliance Courses** field) do not accumulate toward the graduate program's minimum required credits/courses. To achieve this, you could define the undergraduate requirements as a group with zero compliance credits/courses, and then the work would not accumulate toward the program.
Compliance Courses	Number of courses to be applied towards the program's and area's minimum course requirement for the area. Use this field to override the actual number of courses that would normally be accumulated by the area to the program. An example is provided in the description of the **Compliance Credits** field.
Default Within Indicator	Check box used to indicate whether a course and its attribute(s) can be used to satisfy more than one detail requirement within the group.

Fields	Descriptions
Default Course Reuse	Default course reuse rule to be used by compliance. If a different reuse rule has been designated for an area to which this group is attached, the area-level rule overrides the group-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Default Attribute Reuse	Default attribute reuse rule to be used by compliance. If a different reuse rule has been designated for an area to which this group is attached, the area-level rule overrides the group-level rule. Values in the pull-down list are `None`, `In`, `Out`, and `Both`. `None` is the default.
Minimum Course Grade	Code of the minimum grade that must be earned for courses to satisfy the group's requirements. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Default Year Limit	Number of years old a course can be to satisfy the group's requirements. When a compliance request is processed, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses.

Fields	Descriptions
	CAPP checks the earliest term in the furthest year of the course year limit you set. Example: The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers courses back to 200110, which is the first term in the academic year five years back from 2006.

Group Text section

Updated: August 27, 2020

Use this section to enter or display the text for the group adjustment specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the group. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Default Group Text window

Updated: August 27, 2020

Use the Default Group Text window to copy an existing group's text to another group.

Note: This window is available only if no group-level text has been defined for the student's group adjustment record.

When you access this window, the page name changes to Group Requirements (SMQSGDF), although the window can be accessed only from the Group Text Adjustments window of the Student Group Adjustments (SMASGRP) page.

Fields	Descriptions
Default From Group	Group from which to copy group text. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page
Description (untitled)	Description associated with the group code, automatically displayed when a value is entered in the **Default From Group** field. Display only.

Group Additional Course Level Adjustments window

Updated: August 27, 2020

Use the Group Additional Course Level Adjustments window to enter adjustments to included/excluded course levels to a student's group adjustment record.

For included levels, you can also define:

- A minimum grade
- Maximum credits and maximum number of courses

Courses at excluded levels are not considered toward satisfying a group's requirements. Courses at included levels can satisfy group requirements and count toward the group's minimum credit requirements, but they are not used to calculate grade point averages within the group.

This window is composed of the Display-Only section and the Course Level Inclusions/ Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the group course level inclusions/exclusions adjustments.

Fields	Descriptions
From Term	First term in which this set of inclusions/ exclusions is in effect.
To Term	Last term in which this set of inclusions/ exclusions is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies additional course levels from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the Key section to the **To Term** field

Course Level Inclusions/exclusions block

Updated: August 27, 2020

Use this section to enter or display the course level inclusions/exclusions adjustments for the group specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded. Required.
Level	Code of the course level to be included or excluded. Required. Select the **Search** button for this field to display the Level Codes (STVLEVL) list. List Level Codes (STVLEVL)
Description	Description of the course level. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the group's requirements. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits from an included course level that can be used to satisfy group requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of

Fields	Descriptions
	the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses from an included course level that can be used to satisfy group requirements.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Default Additional Course Levels to Include/Exclude window

Updated: August 27, 2020

Use the Default Additional Course Levels to Include/Exclude window to copy an existing group's included/excluded course levels to a student's group adjustment record.

Note: This window is available only if no group-level additional course levels have been defined for the student's group adjustment record.

When you access this window, the page name changes to Group Requirements (SMQSGDF), although the window can be accessed only from the Group Additional Course Level Adjustments window of the Student Group Adjustments (SMASGRP) page.

Group Restricted Subject/Attribute Adjustments window

Updated: August 27, 2020

Use the Group Restricted Subjects/Attributes Adjustments window to adjust restrictions placed on certain subjects or attributes from being used to satisfy requirements within this group.

Restrictions can be absolute (that is, none of the subjects or attributes can be used), or you can limit the number of subjects and attributes that can be used.

A restriction must include at least one of the fields. If more than one restriction is specified (for example, **Subject**, **Course Number Low**, and **Course Attribute**), a course is restricted only if it meets all of the criteria.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the group subject/attribute restrictions adjustments.

Fields	Descriptions
From Term	First term in which this set of restricted subjects/attributes is in effect.
To Term	Last term in which this set of restricted subjects/attributes is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies restricted subjects/ attributes from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the Key section to the **To Term** field

Subject/Attribute Restrictions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the subject/attribute restrictions adjustments for the group specified in the key block of the main window.

Fields	Descriptions
Campus	Code of the campus associated with the restriction. Select the **Search** button for this field to display the Campus Codes (STVCAMP) list. List Campus Codes (STVCAMP)
College	Code of the college associated with the restriction. Select the **Search** button for this field to display the College Codes (STVCOLL) list. List College Codes (STVCOLL)
Department	Code of the department associated with the restriction. Select the **Search** button for this field to display the Department Codes (STVDEPT) list. List Department Codes (STVDEPT)
Subject	Code of the subject associated with the restriction.

Fields	Descriptions
	Select the **Search** button for this field to display the Subject Codes (STVSUBJ) list. List Subject Codes (STVSUBJ)
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of restricted courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Attribute	Code of the course attribute associated with the restriction. Select the **Search** button for this field to display the Degree Program Attributes (STVATTR) list. List Degree Program Attributes (STVATTR)
Maximum Credits	Maximum number of credits that can be taken within the restriction.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value

Fields	Descriptions
	can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be taken within the restriction.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Restricted Subject/Attribute Comments window

Updated: August 27, 2020

Use the Restricted Subject/Attribute Comments window to enter descriptive information about the restriction selected in the Group Restricted Subject/Attribute Adjustments window.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group subject/attribute restrictions adjustments text is being entered or displayed.

Fields	Descriptions
From Term	First term in which this text is in effect.
To Term	Last term in which this text is in effect.
Campus	Code of the campus associated with the restriction.
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.

Fields	Descriptions
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is associated with the restriction, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Attribute	Code of the attribute associated with the restriction.

Subject/Attribute Restrictions Adjustments Text section

Updated: August 27, 2020

Use this section to enter or display the subject/attribute restrictions adjustments text for the group specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first.

Fields	Descriptions
	Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Group Restricted Grade Adjustments window

Updated: August 27, 2020

Use the Group Restricted Grade Adjustments window to define those grades that should be restricted or limited when applying a student's courses toward the group's requirements.

Grade restrictions defined in this window apply only to those grade codes that have the same course level defined the Grade Code Maintenance (SHAGRDE) page as the native course level for the group. Also, restrictions defined in this window apply only to the specific grade codes being restricted. The restrictions are not applied to grade codes that have a lower numeric value.

This window is composed of the Display-Only section and the Grade Restrictions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the group grade restrictions adjustments.

Fields	Descriptions

Valid Area Adjustments window

Updated: August 27, 2020

Adjusted group requirements can be defined globally or limited to one or more specific areas.

Use the Valid Area Adjustments window to specify the area(s) for which the group adjustments are valid if they should be limited. If no entries are made in the Valid Area Adjustments window for adjusted group requirements, they are treated as global adjustments and are used instead of the standard group requirements in all compliance evaluations for the student.

This window is composed of the Display-Only section and the Areas section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the area adjustments.

Fields	Descriptions
From Term	First term in which this set of restrictions is in effect.
To Term	Last term in which this set of restrictions is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies area codes from a prior term range to a new effective term range
Maintenance	Duplicate Item	Copies the term code in the Key section to the **To Term** field

Programs section

Updated: August 27, 2020

Use this section to enter or display the area adjustments for the group specified in the key block of the main window.

Fields	Descriptions

Description	Description of the area code, automatically displayed when a value is entered in the **Area** field. Display only.

Group Adjustment Tracking window

Updated: August 27, 2020

Use the Group Adjustment Tracking window to view an audit trail of all adjustment actions. One audit trail record is automatically written for each table/ effective term/user/ date combination. You can also enter comments associated with each audit trail entry.

This window is composed of the Display-Only section and the Tracking Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about record for which adjustment tracking text is being entered or displayed.

Fields	Descriptions
Table	Seven-character name and full name of the table for which the adjustment was made.

Fields	Descriptions
	For searches, select the **Search** button for this field to display the Other Adjustment Tracking Tables List. List Other Adjustment Tracking Tables List
Term	Code of the term for which the adjustment was effective. Display only. For searches, select the **Search** button for this field to display the Other Adjustment Tracking Terms List. List Other Adjustment Tracking Terms List
User	Banner ID of the person who made the adjustment.
Activity Date	Date on which the adjustment was made.

Tracking Text section

Updated: August 27, 2020

Use this section to enter or display the adjustment tracking text for the group specified in the key block of the main window.

Fields	Descriptions
Tracking Text	Text associated with the adjustment. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Activity Date	Date on which the text was entered or modified.

Student Adjustment Library (SMASLIB) page

Updated: August 27, 2020

Use the Student Adjustment Library (SMASLIB) page to authorize a student as eligible to receive one or more adjustments to CAPP compliance rules and restrictions. No adjustment of any kind can be applied to a requirement unless the student has a student adjustment record.

The main window opens in query mode to allow you to perform a query (by name or ID) to find out if an entry exists in the Student Adjustment Library. If an adjustment has been made for a student, each applicable check box is selected to indicate which types of adjustments have been made.

Fields	Descriptions
ID	Student's Banner® ID.
Name	Student's name.
Program	Check box used to indicate whether program adjustments exist for the student. Display only. Program adjustments are maintained on the Student Program Adjustments (SMASPRG) page.
Area	Check box used to indicate whether area adjustments exist for the person. Display only. Area adjustments are maintained on the Student Area Adjustments (SMASARA) page.
Group	Check box used to indicate whether group adjustments exist for the person. Display only. Group adjustments are maintained on the Student Group Adjustments (SMASGRP) page.
Target	Check box used to indicate whether target course adjustments exist for the person. Display only.

Fields	Descriptions
	Target adjustments are maintained on the Student Targets, Waivers and Substitutions (SMASADJ) page.
Waiver	Check box used to indicate whether requirement waivers exist for the person. Display only. Waivers are maintained on the Student Targets, Waivers and Substitutions (SMASADJ) page.
Substitution	Check box used to indicate whether requirement substitutions exist for the person. Display only. Substitutions are maintained on the Student Targets, Waivers and Substitutions (SMASADJ) page.

Student Program Adjustments (SMASPRG) page

Updated: August 27, 2020

This page is used to adjust program requirements for a student without changing the requirements for the entire program for all students.

Some examples of program adjustments are:

- Minimum number of credits and courses
- Minimum grade point average required for completion of the program
- Program restrictions

You should create adjustments to a student's program only for the components of the program that should be different from the program's standard requirements. For example, if the only requirements that should be different for a student are the non-course requirements for a program, you should not create program general requirements adjustments.

This page includes the following windows:

- Main window
- Default All Program Information window
- Program General Requirements Adjustments window
- Default Program General Requirements window
- Program Text Adjustments window
- Default Program Text window
- Program Non-Course Requirements Adjustments window
- Default Program Non-Course Requirements window
- Program Additional Course Levels Adjustment window
- Default Additional Course Levels to Include/Exclude window
- Program Required Attributes Adjustments window
- Default Required Attributes window
- Program Restricted Subjects/Attributes Adjustments window
- Default Program Restricted Subject/Attributes window
- Program Restricted Subj/Attr Adjustments Comments window
- Program Restricted Grades Adjustments window
- Default Program Restricted Grade window
- Program Restricted Grades Adjustments Comments window
- Program Area Attachments Adjustments window
- Default Area Attachment and Priority Control window
- Program Adjustments Tracking window

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Navigation section.

Key block

Updated: August 27, 2020

Use this section to specify the ID, term, and program for which you want to make adjustments.

Fields	Descriptions
ID	Banner® ID of the person for whom you want to adjust program requirements. If you enter an ID that is not defined on the Student Adjustment Library (SMASLIB) page, the system displays a message with an option that opens SMASLIB so that the ID can be added. List Person Search (SOAIDEN) page Count Hits Student Adjustment Filter (SMISLIB) page
Name (untitled)	Name associated with the ID, automatically displayed when a value is entered in the **Institution** field. Display only.
Term	Term in which the program adjustments began. List Catalog Term Codes List Duplicate Item Terms Represented in Student Adjustment List
Program	Code of the program for which requirements are being adjusted. List Existing Program Inquiry (SMIPROG) page Count Hits Program Definition Rules (SMAPRLE) page Duplicate Item Programs Represented in Student Adjustment List
Catalog	Academic year to which the term belongs. Display only.
Student Level	Student level associated with the program. Display only.
Course Level	Native course level associated with the program. Display only.

Navigation section

Updated: August 27, 2020

Use this section to navigate to the window in which you want to make adjustments to the program specified in the key block.

Mouse	Keyboard	Result

Default All Program Information window

Updated: August 27, 2020

Use the Default All Program Information window to copy all of an existing program's requirements to the student's program adjustment record.

Note: This window is available only if no program-level requirements have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the key block of the Student Program Adjustments (SMASPRG) page.

This window is composed of the Display-Only Block and the Default block.

Display-Only section

Updated: August 27, 2020

This section displays details about the record to which program information is being defaulted.

Fields	Descriptions
ID	Banner ID of the person for whom you want to adjust program requirements.
Term	Term in which the program adjustments began.
Program	Code of the program for which requirements are being adjusted.
Catalog	Academic year to which the term belongs.
Student Level	Student level associated with the program.
Course Level	Native course level associated with the program.

Default section

Updated: August 27, 2020

Use this section to specify the program from which you want to default all requirements.

Fields	Descriptions
Default From Program	Program from which to copy all

Fields	Descriptions
	requirements. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page

Program General Requirements Adjustments window

Updated: August 27, 2020

Use the Program General Requirements Adjustments window to enter adjustments to a student's program.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

Fields	Descriptions
From Term	First term in which this adjusted set of general requirements is in effect. Display only.
To Term	Last term in which this adjusted set of general requirements is in effect. Display only.
Active/Inactive	Option group to indicate whether the program adjustment is active or inactive for the term range. The default is `Inactive`. When a program is inactive, it cannot be used for compliance.
Captive	Check box used to indicate whether the program is captive.
Single Entity	Check box used to indicate whether the program should be processed using single-entity reuse processing. See the *Reuse* section in the *Common Concepts* chapter of the

Fields	Descriptions
	Banner Student CAPP content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Total Required Credits	Minimum total number of credits needed to satisfy the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses	Minimum total number of courses needed to satisfy the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits	Minimum number of credits that must be earned at your institution to satisfy the program's requirements.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Courses	Minimum number of courses that must be earned at your institution to satisfy the program's requirements.
Required Institutional Traditional Credits	Minimum number of credits earned at the institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) needed to satisfy the program's requirements.

Fields	Descriptions
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Institutional Traditional Courses	Minimum number of courses earned at the institution with a traditional grade (as defined on SHAGRDE) needed to satisfy the program's requirements.
Maximum Institutional Non-Traditional Credits	Maximum number of credits earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the program's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses	Maximum number of courses earned at the institution with a non-traditional grade (as defined on SHAGRDE) that can be used to satisfy the program's requirements.
Maximum Transfer Credits	Maximum number of transfer credits that can be used to satisfy the program's requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use only one value (**None**) or either value (**Or**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy the program's requirements.
Number Institutional Required... Credits	This field works with the **out of Last Number of Earned Credits** field to establish a minimum number of credits that must be completed at your institution out of a specified number of the most recent of credits earned. For example, if you require that students take at least 15 of their

Fields	Descriptions
	last 120 credits at your institution (meaning you allow them to transfer in no more than 15 out of their last 120 credits earned), you would enter `15` in the **Number Institutional Required Credits** field and `120` in the **out of Last Number of Earned Credits** field.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Number Institutional Required... Courses	This field works with the **out of Last Number of Earned Courses** field to establish a minimum number of courses that must be completed at your institution out of a specified number of the most recent of courses earned. For example, if you require that students take at least 5 of their last 40 courses at your institution (meaning you allow them to transfer in no more than 5 out of their last 40 courses completed), you would enter `5` in the **Number Institutional Required Courses** field and `40` in the **out of Last Number of Earned Courses** field.
...out of Last Number of Earned Credits	This field works with the **Number Institutional Required Credits** field to establish a minimum number of credits that must be completed at your institution out of a specified number of the most recent of credits earned. For example, if you require that students take at least 15 of their last 120 credits at your institution (meaning you allow them to transfer in no more than 15 out of their last 120 credits earned), you would enter `15` in the **Number Institutional Required Credits** field and `120` in the **out of Last Number of Earned Credits** field.
Connector None/ And/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
...out of Last Number of Earned Courses	This field works with the **Number Institutional Required Courses** field to establish a minimum number of courses that must be completed at your institution out of a specified number of the most recent of courses earned. For example, if you require that students take at least 5 of their last 40 courses at your institution (meaning you allow them to transfer in no more than 5 out of their last 40 courses completed), you would enter `5` in the **Number Institutional Required Courses** field and `40` in the **out of Last Number of Earned Courses** field.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the program's requirements. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Course Year Limit	Number of years old a course can be to satisfy the program's requirements. When a compliance is run, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses. CAPP checks the earliest term in the furthest year of the course year limit you set. Example:

Fields	Descriptions
	The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers courses back to 200110, which is the first term in the academic year five years back from 2006.
Minimum Program GPA	Lowest acceptable program GPA a student can have to satisfy the program's requirements. This is calculated from the grades received in native-level courses used to satisfy the requirements of the program.
Minimum GPA	Minimum cumulative level GPA required to satisfy the program's requirements, for courses whose level matches the native course level of the program. The GPA is that which is stored in Banner (not calculated "on the fly").

Default Program General Requirements window

Updated: August 27, 2020

Use the Default Program General Requirements window to copy existing program's general requirements to a student's program adjustment record.

Note: This window is available only if no program-level general requirements have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program General Requirements Adjustments window of the Student Program Adjustments (SMASPRG) page.

Fields	Descriptions
Default From	Program from which to copy general requirements.

Fields	Descriptions
Program	Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page
Description (untitled)	Description associated with the program code, automatically displayed when a value is entered in the **Default From Program** field. Display only.
Program Rules Term	Term from which to copy program general requirements. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Program Inquiry (SMIPROG) page

Program Text Adjustments window

Updated: August 27, 2020

Use the Program Text Adjustments window to enter text that describes a student's program adjustment record and to indicate a print code that specifies how the text is used in compliance output.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

This window is composed of the Display-Only section and the Program Text section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program text adjustments.

Fields	Descriptions
From Term	First term in which this text is in effect.
To Term	Last term in which this text is in effect.

Maintenance	Duplicate Field	Ends text

Program Text section

Updated: August 27, 2020

Use this section to enter or display the text for the program adjustment specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the program. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Default Program Text window

Updated: August 27, 2020

Use the Default Program Text window to copy an existing program's text to a student's program adjustment record.

Note: This window is available only if no program-level text has been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program Text Adjustments window of the Student Program Adjustments (SMASPRG) page.

Fields	Descriptions
Default From Program	Program from which to copy text. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page

Program Non-Course Requirements Adjustments window

Updated: August 27, 2020

Use the Program Non-Course Requirements Adjustments window to enter adjustments to non-course requirements for a student's program. Non-course requirements are those that must be satisfied but are not associated with a specific course, such as an oral exam or community service.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

This window is composed of the Display-Only section and the Non-Course Requirements Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program non-course requirements adjustments.

Fields	Descriptions
From Term	First term in which this set of non-course requirements is in effect.
To Term	Last term in which this set of non-course requirements is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies non-course requirements from another program
Maintenance	Duplicate Field	Ends non-course requirements

Non-Course Requirements Adjustments section

Updated: August 27, 2020

Use this section to enter or display the non-course requirements adjustments for the program specified in the key block of the main window.

Fields	Descriptions
Non-Course Code	Code of the non-course requirement. Required. Select the **Search** button for this field to display the Non-Course Requirements Code Validation (STVNCRQ) list. List Non-Course Requirements Code Validation (STVNCRQ)
Description	Description of the non-course requirement code, automatically displayed when a valid non-course code is entered. Display only.
Non-Course Year Limit	Number of years old a non-course item can be to satisfy the program's requirements. When compliance is run, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid non-course items. CAPP checks the earliest term in the

Fields	Descriptions
	furthest year of the non-course item year limit you set. Example: The non-course item year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers non-course items back to 200110, which is the first term in the academic year five years back from 2006.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this non-course requirement. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Default Program Non-Course Requirements window

Updated: August 27, 2020

Use the Default Program Non-Course Requirements window to copy an existing program's non-course requirements to a student's program adjustment record.

Note: This window is available only if no program-level non-course requirements have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program Non-Course Requirements Adjustments window of the Student Program Adjustments (SMASPRG) page.

Fields	Descriptions
Default From Program	Program from which to copy non-course requirements. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page

Program Additional Course Levels Adjustment window

Updated: August 27, 2020

Use the Program Additional Course Levels Adjustment window to enter adjustments to additional course levels for a student's program.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

You can specify that courses and course attributes taken at a course level other than the program's native course level can be used by a student's program, or you can exclude courses taken at specific levels. CAPP uses these instructions during compliance to determine which levels (in addition to the native course level of the program) it can use to satisfy the student's program requirements. If you do not specifically include other levels, only courses at the program's native level are used.

Course levels included in a program can be excluded by areas or groups, but course levels excluded from a program cannot be included by areas or groups.

Courses taken at excluded levels are not considered toward satisfying a student's program requirements. Courses at included levels can satisfy program requirements and count toward the program's minimum credit requirements, but they are not used to calculate any grade point averages within the program.

This window is composed of the Display-Only section and the Course Level Inclusions/Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program course level inclusions/exclusions adjustments.

Fields	Descriptions
From Term	First term in which this set of additional course levels is in effect.
To Term	Last term in which this set of additional course levels is in effect.

Course Level Inclusions/Exclusions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course level inclusions/exclusions adjustments for the program specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded.
Level	Code of the course level to be included or excluded. Required.

Fields	Descriptions
	Select the **Search** button for this field to display the Level Codes (STVLEVL) list. List Level Codes (STVLEVL)
Description	Description of the course level. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the program's requirements. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits from an included course level that can be used to satisfy program requirements.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credit** field or the **Maximum Course** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of credits from an included course level that can be used to satisfy program requirements.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this course level adjustment.

Fields	Descriptions
	Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Default Additional Course Levels to Include/Exclude window

Updated: August 27, 2020

Use the Default Additional Course Levels to Include/Exclude window to copy an existing program's included/excluded course levels to student's program adjustment record.

Note: This window is available only if no program-level additional course levels have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program Additional Course Levels Adjustment window of the Student Program Adjustments (SMASPRG) page.

Program Required Attributes Adjustments window

Updated: August 27, 2020

Use the Program Required Attributes Adjustments window to enter adjustments to required course or student attributes for a student's program. For example, a course attribute could be a core requirement; a student attribute could be an honor program or senior standing.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

This window is composed of the Display-Only section and the Required Attributes Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program required attributes adjustments.

Fields	Descriptions

Required Attributes Adjustments section

Updated: August 27, 2020

Use this section to enter or display the required attributes adjustments for the program specified in the key block of the main window.

Fields	Descriptions
Course Attribute	Code of the required course attribute.

Fields	Descriptions
	After a value is entered in this field, the **Attributes Student** field becomes unavailable. Select the **Search** button for this field to display the Degree Program Attributes (STVATTR) list. List Degree Program Attributes (STVATTR)
Student Attribute	Code of the required student attribute. After a value is entered in this field, the **Attributes Course** field becomes unavailable. Select the **Search** button for this field to display the Student Attributes (STVATTS) list. List Student Attributes (STVATTS)
Description	Description of the attribute. Display only.
Required Credits	Number of required credits for a required course attribute. If a student attribute is being defined, this field is unavailable.
Connector None/ And/Or	Select this option button if you do not want a set number of credits or courses. You can enter a value in either the **Required Credit** field or the **Required Course** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**), both values (**And**), or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses	Number of courses for a required course attribute.

Fields	Descriptions
	If a student attribute is being defined, this field is unavailable.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Default Required Attributes window

Updated: August 27, 2020

Use the Default Required Attributes window to copy an existing program's required attributes to a student's program adjustment record.

Note: This window is available only if no program-level required attributes have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program Required Attributes Adjustments window of the Student Program Adjustments (SMASPRG) page.

Program Restricted Subjects/Attributes Adjustments window

Updated: August 27, 2020

Use the Program Restricted Subjects/Attributes Adjustments window to restrict certain subjects or attributes from being used to satisfy a student's program requirements.

Restrictions can be absolute (that is, none of the subjects or attributes can be used), or you can limit the number of credits/courses from certain subjects and attributes that can be used.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

A restriction must include at least one of the fields. If more than one restriction is specified (for example, **Subject**, **Course Number Low**, and **Course Attribute**), a course is restricted only if it meets all of the criteria.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program subject/attribute restrictions adjustments.

Fields	Descriptions
From Term	First term in which this set of restricted subjects/attributes is in effect.

Program Restricted Subj/Attr Adjustments Comments window

Updated: August 27, 2020

Use the Program Restricted Subj/Attr Adjustments Comments window to enter descriptive information about the restriction selected in the Program Restricted Subjects/ Attributes Adjustments window.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which program subject/attribute restrictions adjustments text is being entered or displayed.

Fields	Descriptions
From Term	First term in which this restriction is in effect.
To Term	Last term in which this restriction is in

Fields	Descriptions
	effect.
Campus	Code of the campus associated with the restriction.
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Course Attribute	Code of the attribute associated with the restriction.

Subject/Attribute Restrictions Adjustments Text section

Updated: August 27, 2020

Use this section to enter or display the subject/attribute restrictions adjustments text for the program specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are

Fields	Descriptions
	printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Program Restricted Grades Adjustments window

Updated: August 27, 2020

Use the Program Restricted Grades Adjustments window to define adjustments to acceptable grades for a student's program. You can use this, for example, to be specific about the grades that can be received for courses used to satisfy requirements.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

Example

Updated: August 27, 2020

Let's say that you want to define a program for honors students and want to allow no more than five courses where the student receive a D to be counted towards the program. For this, you would take the following steps.

- Enter the code associated with the D grade in the **Grade** field.
- Select the **None Connector** option button.
- Enter `5` in the **Maximum Courses** field.
  When you restrict a grade, CAPP looks only at that value (in this example, the `D`) and

not the numeric value. You must define each grade restriction individually. You can always exclude grades with numeric values less than a minimum when you create a compliance request. Use restricted grades only when you need to control the use of grades above the allowable minimum for the program.

Grade restrictions defined in this window apply only to those grade codes that have the same course level defined the Grade Code Maintenance (SHAGRDE) page as the native course level for the program. Also, restrictions defined in this window apply only to the specific grade codes being restricted. The restrictions are not applied to grade codes that have a lower numeric value.

This window is composed of the Display-Only section and the Grade Restrictions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for the program grade restrictions adjustments.

Fields	Descriptions
From Term	First term in which this set of restricted grades is in effect.
To Term	Last term in which this set of restricted grades is in effect.

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies restricted grades from a prior term range to a new effective term range

Grade Restrictions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the grade restrictions adjustments for the program specified in the key block of the main window.

Fields	Descriptions
Grade	Code of the grade associated with this restriction. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits with the restricted grade that can be used to satisfy program requirements.
Connector	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses with the restricted grade that can be used to satisfy program requirements.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Text	This check box is selected if text has been associated with the selected grade restriction. Display only. Edit Restricted Grade Text window

Default Program Restricted Grade window

Updated: August 27, 2020

Use the Default Program Restricted Grade window to copy an existing program's restricted grades to a student's program adjustment record.

Note: This window is available only if no program-level restricted grades have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program Restricted Grade Adjustments window of the Student Program Adjustments (SMASPRG) page.

Fields	Descriptions
Default From Program	Program from which to copy restricted grades. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page
Description (untitled)	Description associated with the program code, automatically displayed when a value is entered in the **Default From Program** field. Display only.
Program Rules Term	Term from which to copy restricted grades. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Program Inquiry (SMIPROG) page

Program Restricted Grades Adjustments Comments window

Updated: August 27, 2020

Use the Program Restricted Grades Adjustments Comments window to enter descriptive comments for the grade restriction selected in the Program Restricted Grade Adjustments window.

This window is composed of the Display-Only section and the Grade Restrictions Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which program grade restrictions adjustments text is being entered or displayed.

Fields	Descriptions
From Term	First term in which this restriction is in effect.
Restricted Grade	Grade that is restricted.
To Term	Last term in which this restriction is in effect.

Grade Restrictions Adjustments Text section

Updated: August 27, 2020

Use this section to enter or display the grade restrictions adjustments text for the program specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the grade restriction. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Program Area Attachments Adjustments window

Updated: August 27, 2020

Use the Program Area Attachments Adjustments window to define area attachment adjustments for a student's program.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

This window is composed of the Display-Only section and the Area Attachments Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays the term range for which program area attachments adjustments are being entered or displayed.

Fields	Descriptions
From Term	First term in which this set of area attachments is in effect.
To Term	Last term in which this set of area attachments is in effect

Mouse	Keyboard	Result
Maintenance	Duplicate Record	Copies area attachments from a prior term range to a new effective term range
Maintenance	Duplicate Field	Ends area attachments

Area Attachments section

Updated: August 27, 2020

Use this section to enter or display the area attachments adjustments for the program specified in the key block of the main window.

Fields	Descriptions
Area	Code of the attached area. Select the **Search** button for this field to display the Option List. List Existing Area Inquiry (SMIAREA) page Count Hits Area Library (SMAALIB) page
Priority	Area's priority within the program. The system considers lower number priorities before higher number priorities when running compliance. If two areas are assigned the same priority, the system considers them in alphabetical order. If a priority has been assigned to an area on the Area Definition (SMAAREA) page, that value defaults into this field when the area's code is entered in the **Area** field, although it can be changed.
Course Re-Use None	Option to indicate that courses applied to the area cannot have been applied to preceding areas and cannot be reused by later areas. When an area is attached to a program, the system automatically defaults the course reuse indicator from the area, but the value can be changed. (Course reuse is specified in the **Default Course Reuse** field of the General Requirements section of SMAAREA.) See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Course Re-Use In	Option to indicate courses that have been applied to requirements in preceding areas can also be considered for use in the current area, but if used in the current area, cannot be used again in later areas.
Course Re-Use Out	Option to indicate that courses cannot have been applied to any requirements in preceding areas, but if used in the current area,

Fields	Descriptions
	can be considered for use in later areas.
Course Re-Use Both	Option to indicate that courses that have been applied to requirements in preceding areas can also be considered for use in the current area and can be considered for use in later areas.
Attribute Re-Use None	Option to indicate that attributes cannot have been used in preceding areas and cannot be reused in later areas. When an area is attached to a program, the system automatically defaults the attribute reuse indicator from the area, but the value can be changed. (Attribute reuse is specified in the **Default Attribute Reuse** field of the General Requirements section of SMAAREA.) See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Attribute Re-Use In	Option to indicate that attributes that have been applied to requirements in preceding areas can also be considered for use in the current area, but if used in the current area, cannot be used again in later areas.
Attribute Re-Use Out	Option to indicate that attributes cannot have been applied to any requirements in preceding areas, but if used in the current area, can be considered for use in later areas.
Attribute Re-Use Both	Option to indicate that attributes that have been applied to requirements in preceding areas can also be considered for use in the current area and can be considered for use in later areas.
Within Indicator	Check box used to indicate whether both a course and its attributes can be used within the same area. In this case, the course's credits are used only one time toward the minimum credits required by the area or program. If this check box is cleared, either a course or its attributes can be used within the same area.
Year Rule	Number of years within which a course must be taken for it to be

Fields	Descriptions
	used by an area in the program. If a default year limit has been defined on SMAAREA, that value defaults into this field when the area's code is entered in the **Area** field, although you can change it.
Student Level	Student level associated with the area. Display only.
Course Level	Course level associated with the area. Display only.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward area and program minimum credit requirements, even though the area has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are 'counted' as waived. Waiver action codes that do not count waive the original requirement, but the credits associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward area and program minimum courses requirements, even though the area has been waived. Courses can be entered only when a waiver action code that counts is entered.

Default Area Attachment and Priority Control window

Updated: August 27, 2020

Use the Default Area Attachment and Priority Control window to copy an existing program's area attachments to another program.

Note: This window is available only if no area attachments have been defined for the student's program adjustment record.

When you access this window, the page name changes to Program Requirements (SMQSPDF), although the window can be accessed only from the Program Area Attachments Adjustments window of the Student Program Adjustments (SMASPRG) page.

If you copied values from another program, the defaulted values are displayed in the appropriate fields, but you can change them if desired.

Fields	Descriptions
Default From Program	Program from which to copy area attachments. Select the **Search** button for this field to display the Existing Program Inquiry (SMIPROG) page. Count Hits Existing Program Inquiry (SMIPROG) page
Description (untitled)	Description associated with the program code, automatically displayed when a value is entered in the **Default From Program** field. Display only.
Program Rules Term	Term from which to copy area attachments. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Program Inquiry (SMIPROG) page

Mouse	Keyboard	
Process Default	Duplicate Record	Copies attachments to the program

Mouse	Keyboard

adjustment record

Program Adjustments Tracking window

Updated: August 27, 2020

Use the Program Adjustments Tracking window to view an audit trail of all adjustment actions. One audit trail record is automatically written for each table/ effective term/user/ date combination. You can also enter comments associated with each audit trail entry.

This window is composed of the Display-Only section and the Tracking Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about record for which adjustment tracking text is being entered or displayed.

Fields	Descriptions
Table	Seven-character name and full name of the table for which the adjustment was made. For searches, select the **Search** button for this field to display the Other Adjustment Tracking Tables List. List Other Adjustment Tracking Tables List
Term	Code of the term for which the adjustment was effective. Display only. For searches, select the **Search** button for this field to display the Other Adjustment Tracking Terms List. List Other Adjustment Tracking Terms List
User	Banner ID of the person who made the adjustment.
Activity Date	Date on which the adjustment was made.

Tracking Text section

Updated: August 27, 2020

Use this section to enter or display the adjustment tracking text for the program specified in the key block of the main window.

Fields	Descriptions
Tracking Text	Text associated with the adjustment. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Activity Date	Date on which the text was entered or modified.

WebCAPP Rules (SMAWCRL) page

Updated: August 27, 2020

Use the WebCAPP Rules (SMAWCRL) page to build rules for WebCAPP evaluation.

To process compliance evaluations from the Web, you must run the Pipe Initialization Process (SFRPINI). For more information, refer to the *Student Records* chapter of the Banner *Student Self-Service Use* content or to the *Student Information* chapter of the Banner *Faculty Self-Service Use* content on the Documentation center.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Rules block.

Key block

Updated: August 27, 2020

Use this section to specify the term for which you want to define WebCAPP rules.

Fields	Descriptions
Term Code	Code of the term to which this set of WebCAPP rules applies. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)

Rule section

Updated: August 27, 2020

Use this section to define the WebCAPP rules for the term specified in the key block.

Fields	Descriptions
The following fields are displayed in the What-If Analysis Display section.	
Major 1 Display	Check box used to indicate whether the first concentration code

Fields	Descriptions
Concentration 1	associated with the first major should be displayed for what-if analyses.
Major 1 Display Concentration 2	Check box used to indicate whether the second concentration code associated with the first major should be displayed for what-if analyses.
Major 1 Display Concentration 3	Check box used to indicate whether the third concentration code associated with the first major should be displayed for what-if analyses.
Major 1 Display Department 1	Check box used to indicate whether the department code associated with the first major should be displayed for what-if analyses.
Major 2 Display	Check box used to indicate whether the second major should be displayed for what-if analyses.
Major 2 Display Concentration 1	Check box used to indicate whether the first concentration code associated with the second major should be displayed for what-if analyses.
Major 2 Display Concentration 2	Check box used to indicate whether the second concentration code associated with the second major should be displayed for what-if analyses.
Major 2 Display Concentration 3	Check box used to indicate whether the third concentration code associated with the second major should be displayed for what-if analyses.
Major 2 Display Department 2	Check box used to indicate whether the department code associated with the second major should be displayed for what-if analyses.
Minor 1	Check box used to indicate whether the first minor code should be displayed for what-if analyses.
Minor 2	Check box used to indicate whether the second minor code should be displayed for what-if analyses.
The following fields are displayed in the Evaluation Display section.	
Secondary Curriculum	Check box used to indicate whether secondary curriculum information is to be used for display and processing.
Print Type	Code of the print type to be used for displaying text on evaluations on the Web.

Fields	Descriptions
	This field is used for the original WebCAPP processing or processing that has been modified at your institution. It is not used with XML compliance output processing. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
Compliance Type	Code of the compliance type to be used for deriving print codes to display evaluation text on the Web. This field is required when you want to create XML compliance output. You must select a compliance type for Web display of compliance text. Select the **Search** button for this field to display the Compliance Type Validation (STVCPRT) list. List Compliance Type Validation (STVCPRT)
Student Email	Code of the e-mail type that must be on a students record on the E-mail Address (GOAEMAL) page for the students e-mail address to be displayed on the Web in Faculty and Advisor Self-Service. Select the **Search** button for this field to display the E-mail Type Validation (GTVEMAL) list. List E-mail Type Validation (GTVEMAL)
Faculty Email	Code of the e-mail type that must be on a faculty members or advisors record on the E-mail Address (GOAEMAL) page for the individuals e-mail address to be displayed on the Web in Faculty and Advisor Self-Service. Select the **Search** button for this field to display the E-mail Type Validation (GTVEMAL) list.

Fields	Descriptions
	List E-mail Type Validation (GTVEMAL)
The following field is displayed in the Expanded Requirements section.	
Print Type	Code of the print type to be used to determine the text to display for educational plan. Select the **Search** button for this field to display the Compliance Print Code Validation (STVPRNT) list. List Compliance Print Code Validation (STVPRNT)
The following field is displayed in the Faculty Control section.	
In-Progress Override	Check box used to indicate whether faculty members or advisors can override the default in-progress course usage setting, which is specified on the Compliance Default Parameters (SMADFLT) page.
The following fields are displayed in the Purge Controls section.	
Student Delete	Check box used to indicate whether students can delete compliance requests they created through the Web.
Faculty Delete	Check box used to indicate whether faculty members and advisors can delete compliance requests they created through the Web.
The following fields are displayed below the Purge Controls section.	
User	ID of the user who made the last change.
Activity Date	Date on which the last change was saved.

Area Output Inquiry (SMIAOUT) page

Updated: August 27, 2020

Use the Area Output Inquiry (SMIAOUT) page to view the details of compliance results for an area used by a compliance request.

Use the fields in the key block to specify the student, request number, and area for which you want to review area-level compliance results. The **ID**, **Request Number**, and **Area** fields are the only fields you can enter, and a valid combination must be entered to access compliance results.

The General Requirements section displays the area's general requirements and the student's compliance results. Requirements are displayed exactly as they were applied to the student and are either the original requirements or the adjusted requirements for the student.

Fields displayed in the General Requirements section are generally the same as those in the General Requirements section of the Area Requirements (SMAAREA) page, except that most of the fields are duplicated to display the area requirement (**Required**) and the actual value applied to the area (**Used**) based on the student's work.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the General Requirements section.

Key block

Updated: August 27, 2020

Use this section to specify the ID and number of the compliance request you want to view.

Fields	Descriptions
ID	ID of the student for whom you want to display compliance results. Required. Select the **Search** button for this field to display the Compliance Output Person Search List. List Compliance Output Person Search List
Request Number	Number of the compliance request number for which you want to display compliance results. Required. Select the **Search** button for this field to display the Compliance Requests List. List Compliance Requests List

Fields	Descriptions
Term	Effective term of the compliance request.
Area	Code of the area associated with the compliance request for which information is to be displayed. Required. Select the **Search** button for this field to display the Compliance Output Areas Attached List. List Compliance Output Areas Attached List
Area Level	Student level associated with the area.
Catalog	Academic year to which the term belongs.
Program	Code of the program associated with the compliance request.
Level	Student level associated with the program.

General Requirements section

Updated: August 27, 2020

Use this section to view the area general requirements for the compliance request specified in the key block.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data. If the program's requirements have been adjusted for the student, the adjustment type is displayed in this field.
Total Required Credits Required	Minimum total number of credits needed to satisfy the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Total Required Credits Used	Total number of credits earned toward the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).

Fields	Descriptions
	See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses Required	Minimum total number of courses needed to satisfy the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Total Required Courses Used	Total number of courses taken toward the area's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits Required	Minimum total number of credits that must be earned at your institution to satisfy the area's requirements.
Required Institutional Credits Used	Total number of credits earned at your institution toward the area's requirements.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
Required Institutional Courses Required	Minimum total number of courses that must be taken at your institution to satisfy the area's requirements.
Required Institutional Courses Used	Total number of courses taken at your institution toward the area's requirements.
Required Institutional Traditional Credits Required	Minimum total number of credits that must be earned at your institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) to satisfy the area's requirements.
Required Institutional Traditional Credits Used	Total number of credits earned at your institution with a traditional grade toward the area's requirements.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).

Fields	Descriptions
Required Institutional Traditional Courses Required	Minimum total number of courses that must be taken at your institution with a traditional grade to satisfy the area's requirements.
Required Institutional Traditional Courses Used	Total number of courses taken at your institution with a traditional grade toward the area's requirements.
Maximum Institutional Non-Traditional Credits Required	Maximum total number of credits that can be earned at your institution with a non-traditional grade (as defined on SHAGRDE) to satisfy the area's requirements.
Maximum Institutional Non-Traditional Credits Used	Total number of credits earned at your institution with a non-traditional grade toward the area's requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses Required	Maximum total number of courses that can be taken at your institution with a non-traditional grade to satisfy the area's requirements.
Maximum Institutional Non-Traditional Courses Used	Total number of courses taken at your institution with a non-traditional grade toward the area's requirements.
Maximum Transfer Credits Required	Maximum number of transfer credits that can be used to satisfy the area's requirements.
Maximum Transfer Credits Used	Maximum number of transfer credits used to satisfy the area's requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).
Maximum Transfer Courses Required	Maximum number of transfer courses that can be used to satisfy the area's requirements.
Maximum Transfer	Maximum number of transfer courses used to satisfy the area's

Fields	Descriptions
Courses Used	requirements.
Compliance Credits Required	Number of credits to be applied towards the program's minimum credit requirement for the area.
Compliance Courses Required	Number of courses to be applied towards the program's minimum course requirement for the area.
Minimum Area GPA Required	Lowest acceptable program GPA a student can have to satisfy the area's requirements.
Minimum Area GPA Actual	Student's actual program GPA, calculated from the grades received in native-level courses used to satisfy the requirements of the area.
Priority	Area's priority within the program. The system considers lower number priorities before higher number priorities when running compliance. If two areas are assigned the same priority, the system considers them in alphabetical order.
Course Reuse	Default course reuse rule to be used by compliance. `B` Both `I` In `N` None `O` Out
Attribute Reuse	Default attribute reuse rule to be used by compliance. `B` Both `I` In `N` None `O` Out

Fields	Descriptions
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the area's requirements.
Year Limit	Number of years old a course can be to satisfy the area's requirements.

Course/Attribute Attachment Results window

Updated: August 27, 2020

Use the Course/Attribute Attachment Results window to view a detailed list of course/attribute attachments for the area. This window is available only if a course or attribute is attached to the area.

This window is composed of the Display-Only section and the Course/Attribute Attachment section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course/attribute attachments are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Course/Attribute Attachment section

Updated: August 27, 2020

This section displays the course/attribute attachments for the compliance request specified in the key block of the main window.

Fields	Descriptions
Met	Check box used to indicate whether the detail requirement has been met.

Fields	Descriptions
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts*, chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Rule	User-defined identifier for the rule for this requirement, if applicable. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. List Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the requirement.
Course Number Low	Course number associated with this requirement or the lowest number in a range. Display only.
Course Number High	Highest number in a range associated with this requirement, if applicable. Display only.
Course Attribute	Code of the required course attribute.
Student Attribute	Code of the required student attribute.
Course Year Rule	Number of years within which the course must be taken to satisfy this requirement. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level.

Fields	Descriptions
	If a year rule is already in effect at a higher level, a lower-level rule can be more restrictive, but not less restrictive.
Minimum Course Grade	Minimum grade earned for the course to satisfy this requirement.
Count In GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Minimum Credits Per Course	Minimum number of credits earned for the course to satisfy this requirement.
Maximum Credits Per Course	Maximum number of credits for the course to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement.
Must Take Before End	Last term in which a course can be taken to satisfy this requirement.
Use Split Course	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one.
Credits Required	Number of credits required to satisfy the detail requirement.
Credits Used	Actual number of credits earned toward the detail requirement.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Courses Required	Number of courses required to satisfy the detail requirement.
Credits Used	Actual number of credits taken toward the detail requirement.
Credits Maximum	Maximum number of credits allowed in courses used to satisfy

Fields	Descriptions
	the detail requirement.
Credits Used	Actual number of credits used to satisfy the detail requirement.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Courses Maximum	Maximum number of courses allowed in courses used to satisfy the detail requirement.
Credits Used	Actual number of courses used to satisfy the detail requirement.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied.
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits Maximum	Maximum number of transfer credits from a course or group of courses that can be used to satisfy the detail requirement.
Transfer Credits Used	Actual number of transfer credits used to satisfy the detail requirement.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number

Fields	Descriptions
	of courses could be used to satisfy the detail requirement.
Transfer Courses Maximum	Maximum number of transfer courses that can be used to satisfy the detail requirement.
Transfer Credits Used	Actual number of transfer courses used to satisfy the detail requirement.
Action	Code for the adjustment type, if an adjustment was performed on the area.
Adjusted Credits	Number of credits counted for an adjusted requirement.
Adjusted Courses	Number of courses counted for an adjusted requirement.
Concurrent Enrollment	Check box used to indicate whether concurrent enrollment is allowed to meet this requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Test Code	Code of the test type associated with this requirement.
Score Minimum	Minimum test score that can satisfy this requirement.
Score Maximum	Maximum test score that can satisfy this requirement.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with this requirement, if applicable.
Department	Code of the department associated with this requirement, if applicable.

Course/Attribute Exclusions window

Updated: August 27, 2020

Use the Course/Attribute Exclusions window to view courses/course attributes that cannot be used to satisfy a detail requirement. This window is available only if an exclusion was defined for the detail line in the Course/Attributes Attachments window of the Area Requirements (SMAAREA) page.

You can access this window from the Course/Attribute Attachment Results window.

This window is composed of the Display-Only section and the Course/Attribute Exclusions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course/attribute exclusions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original

Fields	Descriptions
	requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Exclusions section

Updated: August 27, 2020

This section displays the course/attribute exclusions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Campus	Code of the campus associated with this exclusion, if applicable.
College	Code of the campus associated with this exclusion, if applicable.
Department	Code of the department associated with this exclusion, if applicable.
Subject	Code of the subject associated with this exclusion, if any.
Course Number Low	Course number that was excluded, or the lowest number in a range of excluded courses, if defined. Display only.
Course Number High	Highest number in a range of excluded courses, if defined. Display only.
Course Attribute	Code of the course attribute associated with this exclusion, if any.
Student Attribute	Code of the student attribute associated

Fields	Descriptions
	with this exclusion, if any.
Must Take In or After Term	Code of the first term of a range during which the course must have been taken, if used in the exclusion.
Must Take Before Term	Code of the last term of a range during which the course must have been taken, if used in the exclusion.
Action	Code for the adjustment type, if an adjustment was performed on the area.

Include/Exclude Course Level window

Updated: August 27, 2020

Use the Include/Exclude Course Level window to view additional level inclusions or exclusions associated with the detail requirement selected in the Course/Attribute Attachment Results window. This window is available only if additional levels were included or excluded for the course.

Additional levels are always displayed in the window; excluded levels appear only if a course that could have satisfied a requirement was rejected due to an exclusion.

You can access this window from the Course/Attribute Attachment Results window.

This window is composed of the Display-Only section and the Course Level Inclusions/ Exclusions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course level inclusions/ exclusions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if

Fields	Descriptions
	applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course Level Inclusions/Exclusions section

Updated: August 27, 2020

This section displays the course level inclusions/exclusions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group used to specify whether the course level was included or excluded.

Fields	Descriptions
Level	Code of the course level that was included or excluded.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the detail requirement. Used only for an included level.
Credits Maximum	Maximum number of credits from the included course level that can be used to satisfy the detail requirement.
Credits Used	Number of credits earned toward the detail requirement.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from the included course level that can be used to satisfy the detail requirement.
Credits Used	Actual number of courses from the included course level that were used to satisfy the detail requirement.
Action	Code for the adjustment type, if an adjustment was performed on the area.

Courses/Attributes Used Toward Requirement window

Updated: August 27, 2020

Use the Courses/Attributes Used Toward Requirement window to view details of courses and attributes used to satisfy the detail requirement selected in the Course/Attribute Attachment Results window.

You can access this window from the Course/Attribute Attachment Results window.

This window is composed of the Display-Only section and the Courses/Attributes Used section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which used courses/attributes are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the college associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that, when combined with the subject code, defines a specific course, or the lowest number in a range of possible courses, if defined.
Course Number High	Highest number in a range of possible courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Test	Code of the test type associated with the original requirement.
Minimum	Minimum test score that can satisfy the original requirement.
Maximum	Maximum test score that can satisfy the original requirement.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more

Fields	Descriptions
	information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Concurrent	Check box used to indicate whether concurrent enrollment is allowed to be used to satisfy the requirement.
Met	Check box used to indicate whether the detail attachment's requirements are met.

Courses/Attributes Used section

Updated: August 27, 2020

This section displays the used courses/attributes for the compliance request specified in the Key block of the main window.

Fields	Descriptions
Campus	Code of the campus associated with the course(s)/attribute(s) applied to this requirement, if applicable.
College	Code of the campus associated with the course(s)/attribute(s) applied to this requirement, if applicable.
Department	Code of the department associated with the course(s)/attribute(s) applied to this requirement, if applicable.
Subject	Code of the subject associated with the course(s)/attribute(s) applied to this requirement.
Course Number	Course number associated with the course(s)/attribute(s) applied to this requirement.
Course Level	Course level associated with the course(s)/attribute(s) applied to this requirement.
Source	Source of the course(s)/attribute(s) applied to this requirement. Values include: `E` Exam

Fields	Descriptions
	`H` History `I` In-progress `P` Planned `T` Transfer `Z` Student attribute
Course Attribute	Code of the course attribute associated with the course(s)/attribute(s) applied to this requirement, if any.
Student Attribute	Code of the student attribute associated with the course(s)/attribute(s) applied to this requirement, if any.
Credits Available	Number of credits the course had available to apply to the requirement for this detail attachment.
Credits Used	Actual number of credits used toward satisfying the requirement for the course(s)/attribute(s) applied to this requirement.
Grade Code	Code of grade earned for the course associated with the course(s)/attribute(s) applied to this requirement.
Grading Mod	Grade mode associated with the grade code.
Traditional	Indicates whether the grade assigned to the course is a 'traditional' grade, as defined on the Grade Code Maintenance (SHAGRDE) page.
Course Equivalence	Indicates that the course used is equivalent to the one specified in the requirement.
Potential	Indicates whether the course can potentially be used to satisfy the requirement.
Counted In Program	Indicates whether the course counts toward the program's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on).
Counted In Area	Indicates whether the course counts toward the area's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on).

Fields	Descriptions
Counted In Group	Indicates whether the course counts toward the group's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on), if the course is used to satisfy a group's requirements.
Counted In GPA	Indicates whether the course counts toward grade point averages calculated for the program.
Test Code	Code of the test type associated with this requirement. This code is used to indicate that the requirement can be satisfied by achievement of a satisfactory score on a test.
Test Score	Actual score earned on the test.
Concurrency Indicator	Indicates whether this course can be taken concurrently with a prerequisite. This indicator applies only to requirements that are used in prerequisite checking.

Course/Attribute Text window

Updated: August 27, 2020

Use the Course/Attribute Text window to view text associated with the detail requirement selected in the Course/Attribute Attachment Results window. This window is available only if text exists for the detail requirement.

You can access this window from the Course/Attribute Attachment Results window.

This window is composed of the Display-Only section and the Course/Attribute Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which used course/attribute comments are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Source	Original source of the compliance curriculum data.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Text section

Updated: August 27, 2020

This section displays the course/attribute comments for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the detail requirement.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Detail Area Rule Requirements window

Updated: August 27, 2020

Use the Detail Area Rule Requirements window to view detail attachment rules, which define very complicated requirements that cannot be easily configured using Boolean logic. This window is available only if a detail attachment rule exists.

You can access this window from the Course/Attribute Attachment Results window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella for the rule selected in the Course/Attribute Attachment Results window.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Key Rule	Name assigned to the rule.
Rule Text	Check box used to indicate whether text has been associated with this rule. Use the button to access the Course

Fields	Descriptions
	Attachment Rule Text window.
Description	Description of the rule.
Number of Conditions Required	Number of conditions required for this rule.
Number of Conditions Actual	Actual number of conditions used for this rule.
Required Credits Per Condition	Number of required credits for this condition, if applicable.
Connector (untitled)	Type of connector between the fields. N No connector, so either credits or courses could be used to satisfy the detail requirement. B Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. O Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Required Courses Per Condition	Number of required courses for this condition, if applicable.
Maximum Credits Per Condition	Maximum number of credits that can be used for this condition, if applicable.
Connector (untitled)	Type of connector between the fields. N No connector, so either credits or courses could be used to satisfy the detail requirement. O Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.

Fields	Descriptions
Maximum Courses Per Condition	Maximum number of courses that can be used for this condition, if applicable.
Total Credits Required	Total number of credits required by this entire rule.
Total Credits Used	Actual number of credits used for this entire rule.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Total Courses Required	Total number of courses required by this entire rule.
Total Courses Used	Actual number of courses used for this entire rule.
Total Credits Maximum	Maximum number of credits that can be used by this entire rule.
Total Credits Used	Actual number of credits used for this entire rule.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were

Fields	Descriptions
	required to satisfy the detail requirement. ○ Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Total Courses Maximum	Maximum number of courses that can be used by this entire rule.
Total Courses Used	Actual number of courses used for this entire rule.

Rule Detail section

Updated: August 27, 2020

This section displays the detail for the rule umbrella.

Fields	Descriptions
Met	Check box used to indicate whether the requirements of the rule have been met.
Condition	Condition defined on this row. The system determines conditions based on the way in which the detail lines are defined. For example, all entries using the same set will have a single condition number, because all are part of one condition.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Rule	User-defined identifier for the rule for this requirement, if

Fields	Descriptions
	applicable. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with this requirement.
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement.
Course Number High	Highest number in a range of courses that can satisfy the requirement.
Course Attribute	Code of the course attribute associated with this requirement, if applicable.
Student Attribute	Code of the student attribute associated with this requirement, if applicable.
Course Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured.
Minimum Course Grade	Minimum grade earned for the course that can satisfy the requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Minimum Credits Per Course	Minimum number of credits earned for the course to satisfy the requirement.
Maximum Credits Per Course	Maximum number of credits for the course to satisfy the requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement.

Fields	Descriptions
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement.
Use Split Course	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one.
Credits Required	Total number of credits required by this condition.
Credits Used	Actual number of credits used for this condition.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Courses Required	Total number of courses required by this condition.
Courses Used	Actual number of courses used for this condition.
Credits Maximum	Maximum number of credits that can be used by this condition.
Credits Used	Actual number of credits used for this condition.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Courses Maximum	Maximum number of courses that can be used by this condition.
Courses Used	Actual number of courses used for this condition.
Compliance Credits	Number of credits that can accumulate toward area and program

Fields	Descriptions
	general requirements after this requirements is satisfied.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied.
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits Maximum	Maximum number of transfer credits that can be used by this condition.
Transfer Credits Used	Actual number of transfer credits used for this condition.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Transfer Courses Maximum	Maximum number of transfer courses that can be used by this condition.
Transfer Courses Used	Actual number of transfer courses used for this condition.
Action	Code for the adjustment type, if an adjustment was performed on the area.
Adjusted Credits	Number of credits counted for an adjusted requirement.
Adjusted Courses	Number of courses counted for an adjusted requirement.
Concurrent Enrollment	Check box used to indicate whether concurrent enrollment is allowed to meet the requirement.
Test Code	Code of the test type associated with the requirement.
Score Minimum	Minimum test score that can satisfy the requirement.
Score Maximum	Maximum test score that can satisfy the requirement.
Campus	Code of the campus associated with the requirement, if

Fields	Descriptions
	applicable.
College	Code of the campus associated with the requirement, if applicable.
Department	Code of the department associated with the requirement, if applicable.

Rule within Rule window

Updated: August 27, 2020

Use the Rule within Rule window to view subrules within detail attachment rules. The fields in this window are identical to those in the Detail Area Rule Requirements window.

You can access this window from the Detail Area Rule Requirements window.

Detail Area Rule Base Text window

Updated: August 27, 2020

Use the Detail Area Rule Base Text window to view text for the course/attribute attachment rule displayed in the Detail Area Rule Requirements window. This window is available only if text exists for the detail attachment rule.

You can access this window from the Detail Area Rule Requirements window.

Fields	Descriptions
Text	Text associated with the detail attachment rule.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Area Text window

Updated: August 27, 2020

Use the Area Text window to view area-level text associated with the area. This window is available only if area-level text exists.

When you enter the window, all available text displays. You can query to display only the text defined for a specific compliance output type. In query mode, the Print List lists only those compliance print codes for which area text exists.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Area Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which area text is being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Area Text section

Updated: August 27, 2020

This section displays the area text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the area.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print

Fields	Descriptions
	Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Area Group Attachment window

Updated: August 27, 2020

Use the Area Group Attachment window to view a list of the groups attached to the area. This window is available only if groups are attached to the area.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Group Attachments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group attachments are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Group Attachments section

Updated: August 27, 2020

This section displays the Group Attachments for the compliance request specified in the key block of the main window.

Fields	Descriptions
Met	Check box used to indicate whether the detail requirement has

Fields	Descriptions
	been met.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Rule	User-defined identifier for the rule for this requirement, if applicable. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. List Course/Attribute Attachment Rules window
Group	Code of the attached group, if applicable. For searches, select the **Search** button for this field to display the Area Group Attachment List. List Area Group Attachment List
Description	Description of the group.
Action Code	Code for the adjustment type, if an adjustment was performed on the area.
Adjusted Credits	Number of credits counted for a waived requirement.
Adjusted Crse	Number of courses counted for a waived requirement.
Reason Rule/Group Not Met	Reason why a group rule or group is not met, if applicable.

Group Attachment Rules window

Updated: August 27, 2020

Use the Group Attachment Rules window to view group attachment rules, which define very complicated requirements that cannot be easily configured using Boolean logic. This window is available only if a group attachment rule exists.

You can access this window from the Area Group Attachment window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella for the rule selected in the Area Group Attachment window.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.
Rule	Set based on the rule code entered in the Area Group Attachment window.
Description	Description of the rule.
Rule Text	Check box used to indicate whether text has been associated with this rule. Edit Group Attachment Rule Text window.
Required Number of Conditions	Number of conditions required for this rule.

Mouse	Keyboard	Result
Comments	Edit	Opens the Group Attachment Rule Text window

Rule Detail section

Updated: August 27, 2020

This section displays the detail for the rule umbrella.

Fields	Descriptions
Condition	Condition defined on this row. The system determines conditions based on the way in which the detail lines are defined. For example, all entries using the same set will have a single condition number, because all are part of one condition.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Rule	User-defined identifier for the rule for this requirement, if applicable. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. For searches, select the **Search** button for this field to display the Group Attachment Rules window. Edit Group Attachment Rules window
Group	Code of the attached group. For searches, select the **Search** button for this field to display the Area Group Attachment List.

Fields	Descriptions
	List Area Group Attachment List
Course Re-Use	Course reuse rule used by compliance. `B` Both `I` In `N` None `O` Out
Attribute Re-Use	Attribute reuse rule used by compliance. `B` Both `I` In `N` None `O` Out
Within Ind	Check box used to indicate whether within reuse was allowed. When this check box is selected, different components of the same course (for example, the course itself and one of the course's attributes) can both be used within the same group.
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, a lower-level rule can be more restrictive, but not less restrictive.

Group Attachment Rule Text window

Updated: August 27, 2020

Use the Group Attachment Rule Text window to view text for the group attachment rule. This window is available only if text exists for the group attachment rule.

You can access this window from the Group Attachment Rules window.

This window is composed of the Display-Only section and the Group Attachment Rule Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group attachment rule text is being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Group Attachment Rule Text section

Updated: August 27, 2020

This section displays the group attachment rule text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the group attachment rule.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print

Fields	Descriptions
	Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Include/Exclude Course Level window

Updated: August 27, 2020

Use the Include/Exclude Course Level window to view additional course levels (those other than the 'native' course level of the area) for which compliance either included or excluded existing course work for the student. This window is available only if course inclusions/exclusions exist for the area.

If an area has additional included levels, and work at the included level is used to satisfy requirements, the number of used courses/credits are displayed in addition to the rules defined for the additional level. Excluded levels are displayed only if the excluded level also caused a course to be rejected.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Course Level Inclusions/ Exclusions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course level inclusions/ exclusions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Course Level Inclusions/Exclusions section

Updated: August 27, 2020

This section displays the course level inclusions/exclusions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level was included or excluded.
Level	Code of the course level that was included or excluded.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the area's requirements. Used only for an included level.
Credits Maximum	Maximum number of credits from an included course level that can be used to satisfy the area's requirements.
Credits Used	Number of credits earned toward the requirement.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from an included course level that can be used to satisfy the area's requirements.
Courses Used	Actual number of courses from the restricted course level that were used to satisfy the area's requirements.
Action Code	Code for the adjustment type, if an adjustment was performed on the area.

Area Restricted Subjects/Attributes window

Updated: August 27, 2020

Use the Area Restricted Subjects/Attributes window to view any area-level course or attribute restriction rules. This window is available only if restricted course/attribute rules exist for the area.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Area Subject/Attribute Restrictions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which area subject/attribute restrictions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Area Subject/Attribute Restrictions section

Updated: August 27, 2020

This section displays the area subject/attribute restrictions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Subject	Code of the subject associated with the restriction, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined. Display only.
Course Number High	Highest number in a range of restricted courses, if defined. Display only.
Course Attribute	Code of the course attribute associated with the restriction, if any.
Credits Maximum	Maximum number of credits from the restricted course level that can be used to satisfy area requirements.
Credits Used	Actual number of credits from the restricted course level that were used to satisfy area requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).

Fields	Descriptions
	See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from the restricted course level that can be used to satisfy area requirements.
Credits Used	Actual number of courses from the restricted course level that were used to satisfy area requirements.
Action	Code for the adjustment type, if an adjustment was performed on the area.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with this requirement, if applicable.
Department	Code of the department associated with this requirement, if applicable.

Area Restricted Subjects/Attributes Text window

Updated: August 27, 2020

Use the Area Restricted Subjects/Attributes Text window to view text associated with the restriction selected on the Area Restricted Subjects/Attributes window.

This window is composed of the Display-Only section and the Area Subject/Attribute Restrictions Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which area subject/attribute restrictions text is being viewed.

Fields	Descriptions
Term Effective	Effective term of the compliance request.
Campus	Code of the campus associated with the restriction, if any.

Fields	Descriptions
College	Code of the college associated with the restriction, if any.
Department	Code of the department associated with the restriction, if any.
Subject	Code of the subject associated with the restriction, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the restriction, if any.

Area Subject/Attribute Restrictions Text section

Updated: August 27, 2020

This section displays the area subject/attribute restrictions text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Area Restricted Grades window

Updated: August 27, 2020

Use the Area Restricted Grades window to view any area-level grade restriction rules. This window is available only if restricted grade rules exist for the area.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Area Grade Restrictions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which area grade restrictions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Area Grade Restrictions section

Updated: August 27, 2020

This section displays the area grade restrictions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Grade	Code of the grade associated with this restriction.
Credits Maximum	Maximum number of credits with the restricted grade that can be used to satisfy the area's requirements.
Credits Used	Actual number of credits earned with the restricted grade.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.

Fields	Descriptions
Courses Maximum	Maximum number of courses with the restricted grade that can be used to satisfy the area's requirements.
Courses Used	Actual number of courses taken in which the restricted grade was earned.
Action Code	Code for the adjustment type, if an adjustment was performed on the area.
Text	Check box used to indicate whether text has been associated with the selected restriction. Edit Area Restricted Grades Text window

Area Restricted Grades Text window

Updated: August 27, 2020

Use the Area Restricted Grades Text window to view text associated with the grade restriction selected on the Area Restricted Grades window.

This window is composed of the Display-Only section and the Area Grade Restrictions Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which area grade restrictions text is being viewed.

Fields	Descriptions
Grade	Code of the grade selected on the Area Restricted Grades window.

Area Grade Restrictions Text section

Updated: August 27, 2020

This section displays the area subject/attribute restrictions text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Existing Area Inquiry (SMIAREA) page

Updated: August 27, 2020

Use the Existing Area Inquiry (SMIAREA) page to view all areas for which requirements have been defined.

Fields	Descriptions
Area	Code of the area.
Description	Description of the area.
Student Level	Student level associated with the area.
Course Level	'Native' course level associated with the area.
Effective Term	Effective term for the set of general requirements. A separate

Fields	Descriptions
	record is displayed for each set of general requirements for each area.
Active Indicator	Check box used to indicate whether general requirements (and therefore the entire area) are active as of the displayed effective term.

Area Usage By Program Inquiry (SMIAUSE) page

Updated: August 27, 2020

Use the Area Usage By Program Inquiry (SMIAUSE) page to view the program(s) to which an area is attached. The page opens in query mode. After you execute a query, the data displayed in the Attached to Program section is for the record selected in the upper section.

Main window

Updated: August 27, 2020

The main window is composed of the Area Filter section and the Attached to Program section.

Area Filter section

Updated: August 27, 2020

Use this section to specify the areas for which you want to view the programs they are attached to.

Fields	Descriptions
Selected (untitled)	Indicator for the selected record. An asterisk is displayed in this field when you go to the next section so that you can identify the record for which you are viewing search results.
Area	Code of the area.
Description	Description of the area, automatically displayed when a valid area code is entered.
Student Level	Student level associated with the area.

Fields	Descriptions
Course Level	'Native' course level associated with the area.
Dynamic Association	Check box used to indicate whether the **Dynamic** check box on the Area Library (SMAALIB) page is selected for this area. (When the **Dynamic** check box on SMAALIB is selected, the area is available to be selected by non-captive programs based on the area's qualifiers during compliance.)

Attached to Program section

Updated: August 27, 2020

Use this section to view the results of your query.

Fields	Descriptions
Program	Code of the program to which the area is attached.
Description	Description of the program to which the area is attached.
Student Level	Student level associated with the program.
Course Level	Native course level associated with the program.
Curriculum Lock	Check box used to indicate whether the **Locked** check box on the Program Definition Rules (SMAPRLE) page is selected.
Curriculum Dependent	Check box used to indicate whether the **Curriculum Dependent** check box on SMAPRLE is selected.
Curriculum Rule	Check box used to indicate whether a curriculum rule is attached to the program code on the Curriculum Rules (SOACURR) page.

Compliance Results Inquiry (SMICRLT) page

Updated: August 27, 2020

Use the Compliance Results Inquiry (SMICRLT) page to view compliance results. This page allows you to “drill down” through successive levels of detailed compliance information.

You can use Scroll Down from the main window to access the Program Area Compliance Summary window. You can use Scroll Down from the Program Area Compliance

Summary window to access the Area Group Compliance Summary window. You can use buttons from the Program Area Compliance Summary window and the Area Group Compliance Summary window to access the other windows in the page.

- Select the **Courses Used** button to access the Courses Used by Area/Group window.
- Select the **Attributes Used** button to access the Attributes Used by Area/Group window.
- Select the **Courses Unused** button to access the Detail Courses Not Used by Program window.
- Select the **Attribute Unused** button to access the Detail Attributes Not Used by Program window.
- Select the **Tests Used** button to access the Used Test Scores window.
- Select the **Areas Unused** button to access the Areas Not Used by Program window.

From the Courses Used by Area/Group window, you can access the following windows:

- Area/Group Requirements window
- Rejected Courses window
- Compliance Process Order of Courses window

From the Attributes Used by Area/Group window, you can access the following windows:

- Area/Group Requirements window
- Rejected Courses window

From the Detail Courses Not Used by Program window and the Detail Attributes Not Used by Program window, you can access the Rejected Courses window.

Main window

Updated: August 27, 2020

The main window summarizes compliance results, provides a quick status of the compliance, and allows you to access additional information.

The main window is composed of the key block and the Program Compliance Summary section.

Key block

Updated: August 27, 2020

Use this section to specify the student ID and request number for which you want to review compliance results. The **ID** and **Request Number** fields are the only enterable fields, are required, and a valid combination must be entered to access compliance results.

Fields	Descriptions
ID	ID of the student for whom compliance results are to be displayed. Select the **Search** button for this field to display the Compliance Output Person Search List. List Compliance Output Person Search List
Name (untitled)	Name associated with the ID, automatically displayed when a value is entered in the **ID** field. Display only.
Request Number	Compliance request number for which compliance results are to be displayed. Select the **Search** button for this field to display the Compliance Requests List. List Compliance Requests List

Program Compliance Summary section

Updated: August 27, 2020

Use this section to display a brief summary of compliance results and a quick, at-a-glance status of the compliance request specified in the key block.

Fields	Descriptions
Program	Code and description of the program evaluated for this compliance request.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.

Fields	Descriptions
Originator ID	ID and name of the originator of the compliance request, if an originator ID was entered when the compliance request was created.
Originator Code	Code and description of the originator of the compliance request, if an originator code was entered when the compliance request was created.

Buttons provide access to compliance results. If requirements have been defined for a category (for example, general requirements or tests) the applicable button (**Met**, **Not Met**, **Used**, or **Unused**) is enabled. If requirements have not been defined for a category, no buttons are enabled and an X appears on the button.

Program Area Compliance Summary window

Updated: August 27, 2020

Use the Program Area Compliance Summary window to view a summary of compliance results for each area used by the program for the compliance request specified in the key block of the main window.

To access this window, place the cursor in the main window, then go to the next block.

This window is composed of the Program block, the Area block, the Requirements block, and the Attachments block.

Program section

Updated: August 27, 2020

This section displays the program and catalog term for the compliance results.

Fields	Descriptions
Program	Code and description of the program

Fields	Descriptions
	evaluated for this compliance request.
Program Name (untitled)	Name associated with the program code, automatically displayed when a value is entered in the **Program** field. Display only.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.

Area section

Updated: August 27, 2020

This section displays information about the area(s) for the compliance results.

Fields	Descriptions
Action Code	Code for the adjustment type, if an adjustment was performed on the area.
Awarded Credits	Number of credits awarded for the area.
Awarded Course	Number of courses awarded for the area.
Area	Code of an area used by the program.
Description	Description of the area.
Attached	Type of attachments (groups or courses) that make up the area's detail requirements.

Requirements section

Updated: August 27, 2020

This section provides buttons to access to compliance results for area requirements.

If details have been defined for a category (for example, general requirements) the applicable button (**Met** or **Not Met**) is enabled. If details have not been defined for a category, no buttons are enabled and an X appears on the button.

Area Group Compliance Summary window

Updated: August 27, 2020

Use the Area Group Compliance Summary window to view a summary of compliance results for each group attached to an area for the compliance request specified in the key block of the main window.

To access this window, in the Program Area Compliance Summary window, place the cursor in the row of the area for which you want to view group details, then go to the next block.

This window is composed of the Program/Area block, the Group block, the Reason Not Met block, the Requirements block, and the Attachments block.

Program/Area section

Updated: August 27, 2020

This section displays the program, catalog term, and area for the compliance results.

Fields	Descriptions
Program	Code and description of the program evaluated for this compliance request.
Program Name (untitled)	Name associated with the program code, automatically displayed when a value is entered in the **Program** field. Display only.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.
Area	Code of the area selected in the Program Area Compliance Summary window.

Group section

Updated: August 27, 2020

This section displays information about the group(s) for the compliance results.

Fields	Descriptions
Met	Check box used to indicate whether the requirements have been met for the group.
Set	User-defined identifier for the set to which this requirement belongs, if a set was defined. See the *Sets and Subsets* section in the *Common Concepts*

Fields	Descriptions
	chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if a subset was defined.
Rule	User-defined identifier for the rule for this requirement, if a rule was defined. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules.
Group	Code and description of a group. Select the **Search** button for this field to display the Area Group Attachment List. List Area Group Attachment List
Description	Description of the group.
Action Code	Code for the adjustment type, if an adjustment was performed on the area.
Awarded Credits	Number of credits awarded for the area.
Awarded Course	Number of courses awarded for the area.

Reason Not Met section

Updated: August 27, 2020

This section displays the reason a group rule or group is not met.

Fields	Descriptions
Reason Rule or Group Not Met	Reason why the group rule or group selected in the Group section is not met, if applicable.

Requirements and Rules section

Updated: August 27, 2020

This section provides buttons to access to compliance results for group requirements and rules.

If details have been defined for a category (for example, general requirements) the applicable button (**Met** or **Not Met**) is enabled. If details have not been defined for a category, no buttons are enabled and an X appears on the button.

Courses Used by Area/Group window

Updated: August 27, 2020

Use the Courses Used by Area/Group window to view both courses and course attributes used by the program for the compliance request specified in the Key block of the main window. This window can be accessed from the Program Area Compliance Summary window or the Area Group Compliance Summary window.

- If the window is accessed from the Program Area Compliance Summary window, the system displays all records associated with the program.
- If the window is accessed from the Area Group Compliance Summary window, the system displays all records associated with the area selected in the Area Group Compliance Summary window.

This window displays the records in order by subject/course number. If you want to view the records in order by compliance usage, access the Compliance Process Order of Courses window.

This window is composed of the Program block and the Courses Used block.

Program section

Updated: August 27, 2020

This section displays the program and catalog term for the compliance results.

Fields	Descriptions
Program	Code and description of the program evaluated for this compliance request.
Program Name (untitled)	Name associated with the program code, automatically displayed when a value is entered in the **Program** field. Display only.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.

Courses Used section

Updated: August 27, 2020

This section displays information about the courses used to satisfy requirements.

Fields	Descriptions
Subject	Subject code of the course used to satisfy an area or group requirement. Select the **Search** button for this field to display the Subject Codes List. List Subject Codes List
Course	Number of the course used to satisfy an area or group requirement. Display only. List Subjects and Courses List
Course Attribute	Code of the course attribute associated with the requirement, if any. Select the **Search** button for this field to display the Course

Fields	Descriptions
	Attributes List. List Course Attributes List
CRN	Course reference number of the course used to satisfy the requirement. The field is blank if the course is a planned or transfer course.
Title	Name of the course used to satisfy the requirement.
Concurrency Indicator	Indicates whether this course can be taken concurrently with a prerequisite. This indicator applies only to requirements that are used in prerequisite checking.
Source	Source of the course used to satisfy the requirement. `History` Institutional course that has already been rolled to Academic History `Transfer` Transfer course `In Progress` In-progress course that has not been graded and rolled to Academic History `Planned` Planned course associated with the compliance request
Course Level	Course level associated with the course. Courses at levels other than the native level of the program can satisfy a requirement only if the level is specifically included for the program, area, or group.
Credits Actual	Total number of credits earned in the course.
Credits Used	Number of credits earned in the course that were used to satisfy the requirement.

Fields	Descriptions
	The value in this field is different from the value in the **Credits Actual** field only when the course's credits were split because the student reached the maximum number of credits required.
Grade Code	Grade that the student earned in the course. Grades are not displayed for planned and in-progress courses.
Grading Mode	Grading mode associated with the grade that the student earned in the course. Grade modes are not displayed for planned and in-progress courses.
Term Code	Term in which the course was taken, is planned, or to which a transfer course was applied, as appropriate.
Course Level	Course level associated with the course. Courses at levels other than the native level of the program can satisfy a requirement only if the level is specifically included for the program, area, or group.
Campus	Code of the campus associated with the course.
College	Code of the college associated with the course.
Department	Code of the department associated with the course.
Traditional	Check box used to indicate whether the grade assigned to the course is a traditional grade, as defined on the Grade Code Maintenance (SHAGRDE) page. The check box is never selected for planned or in progress courses.
Repeat	Check box used to indicate whether the course is a repeated course.
Area	Code of the area in which the course was used to satisfy a requirement. Select the **Search** button for this field to display the Areas Used by

Fields	Descriptions
	Program List. List Areas Used by Program List
Group	Code of the group in which the course was used to satisfy a requirement, if the requirement is associated with a group. Select the **Search** button for this field to display the Used Courses by Group List. List Used Courses by Group List
Area Reuse Course	Default course reuse rule to be used by compliance for the area. `N` None `I` In `O` Out `B` Both
Area Reuse Attribute	Default attribute reuse rule to be used by compliance for the area. `N` None `I` In `O` Out `B` Both
Group Reuse Course	Default course reuse rule used by compliance for the group. `N` None `I` In

Fields	Descriptions
	`O` Out `B` Both
Group Reuse Attribute	Default attribute reuse rule used by compliance for the group. `N` None `I` In `O` Out `B` Both
Count in Program	Check box used to indicate whether the course counts toward the program's totals.
Count in Area	Check box used to indicate whether the course counts toward the area's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on).
Count in Group	Check box used to indicate whether the course counts toward the group's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on), if the course is used to satisfy a group's requirements.
Count in GPA	Check box used to indicate whether the course counts toward grade point averages calculated for the program.
Compliance Credits	Number of credits accumulated toward group, area, and program general requirements, if a specific number of compliance credits have been defined for the requirement.
Compliance Courses	Number of courses accumulated toward group, area, and program general requirements, if a specific number of compliance courses have been defined for the requirement.
Split Course	Check box used to indicate whether the course's credits are split because it exceeds the maximum number of credits allowed toward the requirement.
Applied Indicator	Check box used to indicate whether the course was applied toward the degree associated with the program for the

Fields	Descriptions
	compliance request.
Equivalent Course	Check box used to indicate whether the course used to satisfy the requirement is an equivalent one to the one specified in the requirement.
Potential Usage	Check box used to indicate whether the course can potentially be used to satisfy the requirement. It is selected only when a requirement cannot be completely satisfied by using the course.
Catalog Used	Check box used to indicate whether the requirement specified that all courses in the institution's catalog within a specified range were required to satisfy the requirement.
Action Code	Code for the adjustment type, if an adjustment was performed on the area.
Adjusted Credits	Number of credits accumulated if an adjustment was performed.
Adjusted Courses	Number of courses accumulated if an adjustment was performed.
Source of Adjustment	Source of the adjustment.

Attributes Used by Area/Group window

Updated: August 27, 2020

Use the Attributes Used by Area/Group window to view both student and course attributes used by the program for the compliance request specified in the Key block of the main window. This window can be accessed from the Program Area Compliance Summary window or the Area Group Compliance Summary window.

- If the window is accessed from the Program Area Compliance Summary window, the system displays all records associated with the program.
- If the window is accessed from the Area Group Compliance Summary window, the system displays all records associated with the area selected in the Area Group Compliance Summary window.

This window is composed of the Program block and the Attributes Used block.

Program section

Updated: August 27, 2020

This section displays the program and catalog term for the compliance results.

Fields	Descriptions

Adjusted Credits	Number of credits accumulated if an adjustment was performed.

Fields	Descriptions
Adjusted Courses	Number of courses accumulated if an adjustment was performed.
Source of Adjustment	Source of the adjustment.

Detail Courses Not Used by Program window

Updated: August 27, 2020

Use the Detail Courses Not Used by Program window to view the courses that were not used by the program for the compliance request specified in the Key block of the main window.

This window can be accessed from the Program Area Compliance Summary window or the Area Group Compliance Summary window.

- If the window is accessed from the Program Area Compliance Summary window, the system displays all records associated with the program.
- If the window is accessed from the Area Group Compliance Summary window, the system displays all records associated with the area selected in the Area Group Compliance Summary window.

Courses not considered by compliance are not reflected as not used. For example, when you enter a compliance request, you specify whether or not applied-to-degree courses will be used, whether or not to include in-progress courses, and the minimum and maximum terms from which to select courses. Any courses falling outside of any of these conditions are not selected, and therefore are not reported as unused.

This window is composed of the Program block and the Courses Not Used block.

Program section

Updated: August 27, 2020

This section displays the program and catalog term for the compliance results.

Fields	Descriptions
Program	Code and description of the program evaluated for this compliance request.
Program Name (untitled)	Name associated with the program code,

Fields	Descriptions
	automatically displayed when a value is entered in the **Program** field. Display only.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.

Courses Not Used section

Updated: August 27, 2020

This section displays information about the courses that were not used by the program.

Fields	Descriptions
Subject	Subject code of the course that was not used to satisfy this area or group requirement. Select the **Search** button for this field to display the Subject Codes List. List Subject Codes List
Course Number	Number of the course that was not used to satisfy this area or group requirement. Display only. List Subjects and Courses List
CRN	Course reference number of the course that was not used to satisfy this requirement. The field is blank if the course is a planned or transfer course.
Course Title	Name of the course that was not used to satisfy this requirement.
Source	Source of the course that was not used to satisfy this requirement. `History` Institutional course that has already been rolled to Academic History `Transfer` Transfer course

Fields	Descriptions
	`In Progress` In-progress course that has not been graded and rolled to Academic History `Planned` Planned course associated with the compliance request
Term	Term in which the course was taken, is planned, or to which a transfer course was applied, as appropriate.
Grade Code	Grade that the student earned in the course. Grades are not displayed for planned and in-progress courses.
Grading Mode	Grading mode associated with the grade that the student earned in the course. Grade modes are not displayed for planned and in-progress courses.
Credits Actual	Total number of credits earned in the course.
Credits Available	Number of credits earned in the course. The value in this field is different from the value in the **Credits Actual** field only when the course's credits were split because the student reached the maximum number of credits required.
Course Level	Course level associated with the course. Courses at levels other than the native level of the program can satisfy a requirement only if the level is specifically included for the program, area, or group.
Campus	Code of the campus associated with the course.
College	Code of the college associated with the course.
Department	Code of the department associated with the course.
Traditional	Check box used to indicate whether the grade assigned to the course is a 'traditional' grade, as defined on the Grade Code Maintenance (SHAGRDE) page. The check box is never selected for planned or in progress

Fields	Descriptions
	courses.
Repeat	Check box used to indicate whether the course is a repeated course.

Detail Attributes Not Used by Program window

Updated: August 27, 2020

Use the Detail Attributes Not Used by Program window to view the course attributes that were not used by the program for the compliance request specified in the Key block of the main window.

This window can be accessed from the Program Area Compliance Summary window or the Area Group Compliance Summary window.

- If the window is accessed from the Program Area Compliance Summary window, the system displays all records associated with the program.
- If the window is accessed from the Area Group Compliance Summary window, the system displays all records associated with the area selected in the Area Group Compliance Summary window.

Attributes not considered by compliance are not reflected as not used. For example, when you enter a compliance request, you specify whether or not applied-to-degree courses will be used, whether or not to include in-progress courses, and the minimum and maximum terms from which to select courses. Any attributes falling outside of any of these conditions are not selected, and therefore are not reported as unused.

This window is composed of the Program block and the Attributes Not Used block.

Program section

Updated: August 27, 2020

This section displays the program and catalog term for the compliance results.

Fields	Descriptions
Program	Code and description of the program

Fields	Descriptions
	evaluated for this compliance request.
Program Name (untitled)	Name associated with the program code, automatically displayed when a value is entered in the **Program** field. Display only.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.

Attributes Not Used section

Updated: August 27, 2020

This section displays information about the attributes that were not used by the program.

Fields	Descriptions
Course Attribute	Attribute code of the course that was not used to satisfy this area or group requirement.
Subject	Subject code of the course that was not used to satisfy this area or group requirement.
Course Number	Number of the course that was not used to satisfy this area or group requirement. Display Only. List Subjects and Courses List
CRN	Course reference number of the course that was not used to satisfy this requirement. The field is blank if the course is a planned or transfer course.
Course Title	Name of the course that was not used to satisfy this requirement.
Source	Source of the course that was not used to satisfy this requirement. `History` Institutional course that has already been rolled to Academic History `Transfer` Transfer course

Fields	Descriptions
	`In Progress` In-progress course that has not been graded and rolled to Academic History `Planned` Planned course associated with the compliance request
Credits Actual	Total number of credits earned in the course.
Credits Available	Number of credits earned in the course. The value in this field is different from the value in the **Credits Actual** field only when the course's credits were split because the student reached the maximum number of credits required.
Grade Code	Grade that the student earned in the course. Grades are not displayed for planned and in-progress courses.
Grading Mode	Grading mode associated with the grade that the student earned in the course. Grade modes are not displayed for planned and in-progress courses.
Term	Term in which the course was taken, is planned, or to which a transfer course was applied, as appropriate.
Course Level	Course level associated with the course. Courses at levels other than the native level of the program can satisfy a requirement only if the level is specifically included for the program, area, or group.
Campus	Code of the campus associated with the course.
College	Code of the college associated with the course.
Department	Code of the department associated with the course.
Traditional	Check box used to indicate whether the grade assigned to the course is a 'traditional' grade, as defined on the Grade Code Maintenance (SHAGRDE) page. The check box is never selected for planned or in progress

Fields	Descriptions
	courses.
Repeat	Check box used to indicate whether the course is a repeated course.

Areas Not Used by Program window

Updated: August 27, 2020

Use the Areas Not Used by Program window to view a list of areas that were not used by the program for the compliance request specified in the key block of the main window. It also provides the reason an area was not used.

To be considered unused, an area must be attached to the program and either be inactive for the catalog term for which compliance was run, or be a dynamic area attached to a non-captive program with area qualifiers that do not match the student's characteristics.

Fields	Descriptions
Area	Code of the area not used by the program.
Reason	Reason that the area was not used by the program.

Used Test Scores window

Updated: August 27, 2020

Use the Test Scores window to view test scores used by the program for the compliance request specified in the key block of the main window.

Fields	Descriptions
Area	Code of the area for which the test was used to satisfy a requirement.
Group	Code of the group for which the test was used to satisfy a requirement, if the requirement is associated with a group.
Test	Code of the test.

Fields	Descriptions
Description	Description associated with the test.
Minimum	Minimum acceptable test score.
Test Score	Actual test score.
Maximum	Maximum acceptable test score.

Area/Group Requirements window

Updated: August 27, 2020

Use the Area/Group Requirements window to view the details of the specific requirement that a used course/attribute satisfied for the compliance request specified in the key block of the main window.

Fields	Descriptions
The following fields display information about the selected course.	
Subject	Subject code of the course used to satisfy this area or group requirement.
Course Number	Number of the course used to satisfy this area or group requirement.
Course Attribute	Code of the course attribute associated with this requirement, if any.
The following fields display information about the definition of the requirement.	
Program	Code of the program associated with this requirement.
Area	Code of the area associated with this requirement.
Group	Code of the group associated with this requirement.
Effective Term	Code of the effective term associated with this requirement.
Met	Check box used to indicate whether this requirement is completely satisfied.
Set	User-defined identifier for the set to which this requirement belongs, if a set was defined. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more

Fields	Descriptions
	information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if a subset was defined.
Rule	User-defined identifier for the rule for this requirement, if a rule was defined. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules.
Subject	Code of the subject used associated with this requirement.
Course Number Low	Course number associated with this requirement or the lowest number in a range.
Course Number High	Highest number in a range associated with this requirement.
Course Attribute	Code of the course attribute associated with this requirement.
Student Attribute	Code of the student attribute associated with this requirement.
Year Rule	Number of years within which a course must be taken for it to be used by an area in the program.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the requirements.
Use Split Course	Check box used to indicate whether this requirement can be satisfied by a split course.
Minimum Credits Per Course	Minimum number of credits that can be earned for the course to satisfy this requirement.
Maximum Credits Per Course	Maximum number of credits that can be earned for the course to satisfy this requirement.
Used Credits	Number of credits used to satisfy this requirement.
Used Courses	Number of courses used to satisfy this requirement.
Used Transfer Credits	Number of transfer credits used to satisfy this requirement.
Used Transfer	Number of transfer courses used to satisfy this requirement.

Fields	Descriptions
Courses	
Required Credits	Minimum number of credits required to satisfy this requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses	The minimum number of courses required to satisfy this requirement.
Maximum Credits	Maximum number of credits from a course or group of courses that can be used to satisfy this requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**).
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Count in GPA	Check box used to indicate whether the grade assigned to the course for this requirement counts toward GPAs calculated within the program.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement.
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied.
Compliance Courses	Number of courses that can accumulate toward area and program

Fields	Descriptions
	general requirements after this requirements is satisfied.
Maximum Transfer Credits	Maximum number of transfer credits from a course or group of courses that can be used to satisfy this requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. The **Connector** option button group indicates whether the system should use both values (**And**), either value (**Or**), or only one value (**None**).
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Campus	Code of the campus associated with this requirement.
College	Code of the college associated with this requirement.
Department	Code of the department associated with this requirement.
Transfer	Check box used to indicate whether this requirement can be satisfied by a transfer course.
Originated	Source of this requirement. Original The requirement as originally defined Adjusted The requirement changed as a result of an adjustment
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet the requirement.
Test Code	Code of the test type associated with this requirement.
Test Score Minimum	Minimum test score that can satisfy this requirement.
Test Score Maximum	Maximum test score that can satisfy this requirement.

Rejected Courses window

Updated: August 27, 2020

Use the Rejected Courses window to view the courses/attributes that were not applied toward the program for the compliance request specified in the key block of the main window. The reason for rejection is included for each record.

Courses or course attributes can be rejected for the following reasons:

- Campus/Coll/Dept Not Valid for Requirement
- Outside Term Range
- Exceeded Year Rule Limit
- Outside Credits Per Crse Range
- Detail Min Grade Not Met
- Group Min Grade Not Met
- Area Min Grade Not Met
- Program Min Grade Not Met
- Detail Addl. Level Not Met
- Group Addl. Level Not Met
- Area Addl. Level Not Met
- Program Addl. Level Not Met
- Excluded from the Requirement
- Course Level Not Valid for Group/Area/Program
- Group Restricted Subject/Attribute
- Area Restricted Subject/Attribute
- Program Restricted Subject/Attribute
- Group Restricted Grade
- Area Restricted Grade
- Program Restricted Grade
- Transfer Course Not Allowed
- Exceeded Max Transfer Credits/Courses
- Exceeded Max Non-Traditional Credits/Courses

Fields	Descriptions
Program	Code and description of the program evaluated for this compliance request.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.
Area	Code of the area for which the course matched a requirement but was rejected.
Group	Code of the group for which the course matched a requirement but was rejected and, therefore, not applied, if the requirement is associated with a group.
Subject	Subject code of the course that matched a requirement but was rejected.
Course Number	Number of the course that matched a requirement but was rejected.
Attribute	Code of the course attribute that matched a requirement but was rejected.
Rejection Reason	The reason the course or course attribute was rejected. Display only.
CRN	Course reference number. Cross-reference number of a rejected course. Display only.
Term	Term in which the rejected course was taken. Display only.

Compliance Process Order of Courses window

Updated: August 27, 2020

Use the Compliance Process Order of Courses window to view both courses and course attributes used by the program for the compliance request specified in the Key block of the main window. This window displays the records in order by compliance usage.

Fields	Descriptions
Program	Code and description of the program evaluated for this compliance request.
Catalog Term	Code and description of the term used for the evaluation for this compliance request.
Subject	Subject code of the course used to satisfy an area or group

Fields	Descriptions
	requirement. For searches, select the **Search** button for this field to display the Subjects Codes List. List Subject Codes List
Crse	Number of the course used to satisfy an area or group requirement. For searches, select the **Search** button for this field to display the Subjects and Courses List. List Subjects and Courses List
Course Attribute	Code of the course attribute associated with the requirement, if any. For searches, select the **Search** button for this field to display the Course Attributes List. List Course Attributes List
CRN	Course reference number of the course used to satisfy the requirement. The field is blank if the course is a planned or transfer course.
Title	Name of the course used to satisfy the requirement.
Concurrency Ind	Indicates whether this course can be taken concurrently with a prerequisite. This indicator applies only to requirements that are used in prerequisite checking.
Source	Source of the course used to satisfy the requirement. `History` Institutional course that has already been rolled to

Fields	Descriptions
	Academic History `Transfer` Transfer course `In Progress` In-progress course that has not been graded and rolled to Academic History `Planned` Planned course associated with the compliance request
Credits Actual	Total number of credits earned in the course.
Credits Used	Number of credits earned in the course that were used to satisfy the requirement. The value in this field is different from the value in the **Credits Actual** field only when the course's credits were split because the student reached the maximum number of credits required.
Grade Code	Grade that the student earned in the course. Grades are not displayed for planned and in-progress courses.
Grade Mode	Grading mode associated with the grade that the student earned in the course. Grades are not displayed for in-progress and planned courses.
Term	Term in which the course was taken, is planned, or to which a transfer course was applied, as appropriate.
Level	Course level associated with the course. Courses at levels other than the native level of the program can satisfy a requirement only if the level is specifically included for the program, area, or group.
Camp	Code of the campus associated with the course.
College	Code of the college associated with the course.
Dept	Code of the department associated with the course.
Trad	Check box used to indicate whether the grade assigned to the

Fields	Descriptions
	course is a traditional grade, as defined on the Grade Code Maintenance (SHAGRDE) page. The check box is never selected for planned or in progress courses.
Repeat	Check box used to indicate whether the course is a repeated course.
Area	Code of the area in which the course was used to satisfy a requirement. For searches, select the **Search** button for this field to display the Areas Used by Program List. List Areas Used by Program List
Group	Code of the group in which the course was used to satisfy a requirement, if the requirement is associated with a group. For searches, select the **Search** button for this field to display the Used Courses by Group List. List Used Courses by Group List
Credits Used	Number of credits earned in the course that were used to satisfy the requirement.
Cnt in Program	Check box used to indicate whether the course counts toward the program's totals.
Area Reuse Course	Default course reuse rule to be used by compliance for the area. `N` None `I` In `O` Out `B` Both

Fields	Descriptions
Area Reuse Attribute	Default attribute reuse rule to be used by compliance for the area. `N` None `I` In `O` Out `B` Both
Group Reuse Course	Default course reuse rule used by compliance for the group. `N` None `I` In `O` Out `B` Both
Group Reuse Attribute	Default attribute reuse rule used by compliance for the group. `N` None `I` In `O` Out `B` Both
Count in Prog	Check box used to indicate whether the course counts toward the programs's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on).
Count in Group	Check box used to indicate whether the course counts toward the group's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on), if the course is used to satisfy a group's requirements.
Count in Area	Check box used to indicate whether the course counts toward the area's general requirement (minimum credits and courses,

Fields	Descriptions
	maximum transfer credits and courses, and so on).
Count in GPA	Check box used to indicate whether the course counts toward grade point averages calculated for the program.
Compliance Credits	Number of credits accumulated toward group, area, and program general requirements, if a specific number of compliance credits have been defined for the requirement.
Compliance Courses	Number of courses accumulated toward group, area, and program general requirements, if a specific number of compliance courses have been defined for the requirement.
Split Course	Check box used to indicate whether the course's credits are split because it exceeds the maximum number of credits allowed toward the requirement.
Applied Ind	Check box used to indicate whether the course was applied toward the degree associated with the program for the compliance request.
Equivalent Course	Check box used to indicate whether the course used to satisfy the requirement is an equivalent one to the one specified in the requirement.
Potential Used	Check box used to indicate whether the course can potentially be used to satisfy the requirement. It is selected only when a requirement cannot be completely satisfied by using the course.
Catalog Used	Check box used to indicate whether the requirement specified that all courses in the institution's catalog within a specified range were required to satisfy the requirement.
Action Code	Code for the adjustment type, if an adjustment was performed on the area.
Adjusted Credits	Number of credits accumulated if an adjustment was performed.
Adjusted Courses	Number of courses accumulated if an adjustment was performed.
Source of Adjustment	Source of the adjustment.

Group Output Inquiry (SMIGOUT) page

Updated: August 27, 2020

Use the Group Output Inquiry (SMIGOUT) page to view the details of compliance results for a group within an area used by a compliance request.

Use the fields in the key block to specify the student, request number, and area for which you want to review area-level compliance results. The **ID**, **Request Number**, **Area**, and **Group** fields are the only enterable fields, and a valid combination must be entered to access compliance results.

The General Requirements section displays the group's general requirements and the student's compliance results. Requirements are displayed exactly as they were applied to the student and are either the original requirements or the adjusted requirements for the student.

Fields displayed in the General Requirements section are generally the same as those in the General Requirements section of the Group Requirements (SMAGROP) page, except that most of the fields are duplicated to display the group requirement (**Required**) and the actual value applied to the group (**Used**) based on the student's work.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the General Requirements section.

Key block

Updated: August 27, 2020

Use this section to specify the ID and number of the compliance request you want to view.

Fields	Descriptions
ID	ID of the student for whom you want to display compliance results. Required. Select the **Search** button for this field to display the Compliance Group Output Person Search List.

Fields	Descriptions
	List Compliance Group Output Person Search List
Request Number	Number of the compliance request number for which you want to display compliance results. Required. Select the **Search** button for this field to display the Compliance Requests List. List Compliance Requests List
Term	Effective term of the compliance request.
Area	Code of the area associated with the compliance request for which information is to be displayed. Required. Select the **Search** button for this field to display the Areas Attached List. List Areas Attached List
Area Level	Native course level of the area.
Catalog	Academic year to which the term belongs.
Group	Code of the group associated with the compliance request for which information is to be displayed. Required. Select the **Search** button for this field to display the Group Attached List. List Group Attached List
Group Level	Native course level of the group.
Group Rule	Rule associated with the group, if any.
Program	Code of the program associated with the compliance request.
Level	Student level associated with the program.

General Requirements section

Updated: August 27, 2020

Use this section to view the group general requirements for the compliance request specified in the key block.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data. If the program's requirements have been adjusted for the student, the adjustment type is displayed in this field.
Total Required Credits Required	Minimum total number of credits needed to satisfy the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Total Required Credits Used	Total number of credits earned toward the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Total Required Courses Required	Minimum total number of courses needed to satisfy the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Total Required Courses Used	Total number of courses taken toward the group's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits Required	Minimum total number of credits that must be earned at your institution to satisfy the group's requirements.
Required	Total number of credits earned at your institution toward the

Fields	Descriptions
Institutional Credits Used	group's requirements.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
Required Institutional Courses Required	Minimum total number of courses that must be taken at your institution to satisfy the group's requirements.
Required Institutional Courses Used	Total number of courses taken at your institution toward the group's requirements.
Required Institutional Traditional Credits Required	Minimum total number of credits that must be earned at your institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) to satisfy the group's requirements.
Required Institutional Traditional Credits Used	Total number of credits earned at your institution with a traditional grade toward the group's requirements.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
Required Institutional Traditional Courses Required	Minimum total number of courses that must be taken at your institution with a traditional grade to satisfy the group's requirements.
Required Institutional Traditional Courses Used	Total number of courses taken at your institution with a traditional grade toward the group's requirements.
Maximum Institutional Non-Traditional Credits Required	Maximum total number of credits that can be earned at your institution with a non-traditional grade (as defined on SHAGRDE) to satisfy the group's requirements.
Maximum Institutional Non-Traditional Credits	Total number of credits earned at your institution with a non-traditional grade toward the group's requirements.

Fields	Descriptions
Used	
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses Required	Maximum total number of courses that can be taken at your institution with a non-traditional grade to satisfy the group's requirements.
Maximum Institutional Non-Traditional Courses Used	Total number of courses taken at your institution with a non-traditional grade toward the group's requirements.
Maximum Transfer Credits Required	Maximum number of transfer credits that can be used to satisfy the group's requirements.
Maximum Transfer Credits Used	Maximum number of transfer credits used to satisfy the group's requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).
Maximum Transfer Courses Required	Maximum number of transfer courses that can be used to satisfy the group's requirements.
Maximum Transfer Courses Used	Maximum number of transfer courses used to satisfy the group's requirements.
Compliance Credits Required	Number of credits to be applied towards the program's minimum credit requirement for the area.
Compliance Courses Required	Number of courses to be applied towards the program's minimum course requirement for the area.
Course Reuse	Default course reuse rule to be used by compliance. Values are `None`, `In`, `Out`, and `Both`.
Attribute Reuse	Default attribute reuse rule to be used by compliance. Values are `None`, `In`, `Out`, and `Both`.
Group Active	Check box used to indicate whether the group is active.
Minimum Course	Code of the minimum grade that must be earned for the course to

Fields	Descriptions
Grade	satisfy the group's requirements.
Course Year Limit	Number of years old a course can be to satisfy the group's requirements.

Group Text window

Updated: August 27, 2020

Use the Group Text window to view group-level text associated with the group. This window is available only if group-level text exists.

When you enter the window, all available text displays. You can query to display only the text defined for a specific compliance output type. In query mode, the Print List lists only those compliance print codes for which group text exists.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Group Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group text is being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Group Text section

Updated: August 27, 2020

This section displays the group text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the group.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Include/Exclude Course Level window

Updated: August 27, 2020

Use the Include/Exclude Course Level window to view additional course levels (those other than the native course level of the group) for which compliance either included or excluded existing course work for the student. This window is available only if course inclusions/exclusions exist for the group.

If a group has additional included levels, and work at the included level is used to satisfy requirements, the number of used courses/credits are displayed in addition to the rules defined for the additional level. Excluded levels are displayed only if the excluded level also caused a course to be rejected.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Course Level Inclusions/ Exclusions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course level inclusions/ exclusions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.

Fields	Descriptions
Source	Original source of the compliance curriculum data.

Course Level Inclusions/Exclusions section

Updated: August 27, 2020

This section displays the course level inclusions/exclusions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level was included or excluded.
Level	Code of the course level that was included or excluded.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the group's requirements. Used only for an included level.
Credits Maximum	Maximum number of credits from an included course level that can be used to satisfy the group's requirements.
Credits Used	Number of credits earned toward the requirement.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from an included course level that can be used to satisfy the group's requirements.
Courses Used	Actual number of courses from the restricted course level that were used to satisfy the group's requirements.
Action Code	Code for the adjustment type, if an adjustment was performed on the group.

Restricted Subjects/Attributes window

Updated: August 27, 2020

Use the Restricted Subjects/Attributes window to view any group-level course or attribute restriction rules. This window is available only if restricted course/attribute rules exist for the group.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Subject/Attribute Restrictions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which subject/attribute restrictions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Subject/Attribute Restrictions section

Updated: August 27, 2020

This section displays the subject/attribute restrictions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Subject	Code of the subject associated with the restriction, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the restriction, if any.

Fields	Descriptions
Credits Maximum	Maximum number of credits from the restricted course level that can be used to satisfy the group's requirements.
Credits Used	Actual number of credits from the restricted course level that were used to satisfy the group's requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from the restricted course level that can be used to satisfy the group's requirements.
Credits Used	Actual number of courses from the restricted course level that were used to satisfy the group's requirements.
Action	Code for the adjustment type, if an adjustment was performed on the group.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with this requirement, if applicable.
Department	Code of the department associated with this requirement, if applicable.
Text	Check box used to indicate whether text has been associated with the selected restriction. Edit Restricted Subjects/Attributes Text window

Restricted Subjects/Attributes Text window

Updated: August 27, 2020

Use the Restricted Subjects/Attributes Text window to view text associated with the restriction selected on the Restricted Subjects/Attributes window.

This window is composed of the Display-Only section and the Group Subject/Attribute Restrictions Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group subject/attribute restrictions text is being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this

Fields	Descriptions
	requirement or set of requirements.
Campus	Code of the campus associated with the restriction, if any.
College	Code of the college associated with the restriction, if any.
Department	Code of the department associated with the restriction, if any.
Subject	Code of the subject associated with the restriction, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the restriction, if any.

Group Subject/Attribute Restrictions Text section

Updated: August 27, 2020

This section displays the group subject/attribute restrictions text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Restricted Grades window

Updated: August 27, 2020

Use the Restricted Grades window to view any group-level grade restriction rules. This window is available only if restricted grade rules exist for the group.

You can access this window from the General Requirements section of the main window.

This window is composed of the Display-Only section and the Grade Restrictions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which grade restrictions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Grade Restrictions section

Updated: August 27, 2020

This section displays the grade restrictions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Grade	Code of the grade associated with this restriction.
Credits Maximum	Maximum number of credits with the restricted grade that can be used to satisfy the group's requirements.
Credits Used	Actual number of credits earned with the restricted grade.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of

Fields	Descriptions
	the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses with the restricted grade that can be used to satisfy the group's requirements.
Courses Used	Actual number of courses taken in which the restricted grade was earned.
Action Code	Code for the adjustment type, if an adjustment was performed on the group.
Text	Check box used to indicate whether text has been associated with the selected restriction. Edit Restricted Grades Text window

Restricted Grades Text window

Updated: August 27, 2020

Use the Restricted Grades Text window to view text associated with the grade restriction selected on the Restricted Grades window.

This window is composed of the Display-Only section and the Group Grade Restrictions Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group grade restrictions text is being viewed.

Fields	Descriptions
Grade	Code of the grade selected on the Restricted Grades window.

Group Grade Restrictions Text section

Updated: August 27, 2020

This section displays the group grade restrictions text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the restriction.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Course/Attribute Attachment window

Updated: August 27, 2020

Use the Course/Attribute Attachment window to view a detailed list of course/attribute attachments for the group. This window is available only if a course or attribute is attached to the group.

This window is composed of the Display-Only section and the Course/Attribute Attachments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course/attribute attachments are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Course/Attribute Attachments section

Updated: August 27, 2020

This section displays the course/attribute attachments for the compliance request specified in the key block of the main window.

Fields	Descriptions
Met	Check box used to indicate whether the detail requirement has been met.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Rule	User-defined identifier for the rule for this requirement, if applicable. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules.

Fields	Descriptions
	For searches, select the **Search** button for this field to display the Course/Attribute Attachment Rules window. List Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the requirement.
Course Number Low	Course number associated with this requirement or the lowest number in a range.
Course Number High	Highest number in a range associated with this requirement, if applicable.
Course Attribute	Code of the required course attribute.
Student Attribute	Code of the required student attribute.
Course Year Rule	Number of years within which the course must be taken to satisfy this requirement. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, a lower-level rule can be more restrictive, but not less restrictive.
Minimum Course Grade	Minimum grade earned for the course to satisfy this requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Minimum Credits Per Course	Minimum number of credits earned for the course to satisfy this requirement.
Maximum Credits Per Course	Maximum number of credits for the course to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement.
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement.

Fields	Descriptions
Use Split Course	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one.
Credits Required	Number of credits required to satisfy the detail requirement.
Credits Used	Actual number of credits earned toward the detail requirement.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Courses Required	Number of courses required to satisfy the detail requirement.
Courses Used	Actual number of credits taken toward the detail requirement.
Credits Maximum	Maximum number of credits allowed in courses used to satisfy the detail requirement.
Credits Used	Actual number of credits used to satisfy the detail requirement.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Courses Maximum	Maximum number of courses allowed in courses used to satisfy the detail requirement.
Courses Used	Actual number of courses used to satisfy the detail requirement.
Compliance Credits	Number of credits that can accumulate toward area and program

Fields	Descriptions
	general requirements after this requirements is satisfied.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirements is satisfied.
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits Maximum	Maximum number of transfer credits from a course or group of courses that can be used to satisfy the detail requirement.
Transfer Credits Used	Actual number of transfer credits used to satisfy the detail requirement.
Connector (untitled)	Type of connector between the fields. `N` No connector, so either credits or courses could be used to satisfy the detail requirement. `B` Both the minimum number of credits and the minimum number of courses were required to satisfy the detail requirement. `O` Either the minimum number of credits or the minimum number of courses could be used to satisfy the detail requirement.
Transfer Courses Maximum	Maximum number of transfer courses that can be used to satisfy the detail requirement.
Transfer Credits Used	Actual number of transfer courses used to satisfy the detail requirement.
Action	Code for the adjustment type, if an adjustment was performed on the group.
Adjusted Credits	Number of credits counted for an adjusted requirement.
Adjusted Courses	Number of courses counted for an adjusted requirement.
Concurrent Enrollment	Check box used to indicate whether concurrent enrollment is allowed to meet this requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be

Fields	Descriptions
	taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Test Code	Code of the test type associated with this requirement.
Score Minimum	Minimum test score that can satisfy this requirement.
Score Maximum	Maximum test score that can satisfy this requirement.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with this requirement, if applicable.
Department	Code of the department associated with this requirement, if applicable.

Course/Attribute Text window

Updated: August 27, 2020

Use the Course/Attribute Text window to view text associated with the detail requirement selected in the Course/Attribute Attachment window. This window is available only if text exists for the detail requirement.

You can access this window from the Course/Attribute Attachment window.

This window is composed of the Display-Only section and the Course/Attribute Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course/attribute text is being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of

Fields	Descriptions
	requirements.
Source	Original source of the compliance curriculum data.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Text section

Updated: August 27, 2020

This section displays the course/attribute text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the detail requirement.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Additional Levels for Group window

Updated: August 27, 2020

Use the Additional Levels for Group window to view additional level inclusions or exclusions associated with the detail requirement selected in the Course/Attribute Attachment window. This window is available only if additional levels were included or excluded for the course.

Additional levels are always displayed in the window; excluded levels appear only if a course that could have satisfied a requirement was rejected due to an exclusion.

You can access this window from the Course/Attribute Attachment window.

This window is composed of the Display-Only section and the Group Additional Levels section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which group additional levels are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if

Fields	Descriptions
	applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Group Additional Levels section

Updated: August 27, 2020

This section displays the group additional levels for the compliance request specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group used to specify whether the course level was included or excluded.

Fields	Descriptions
Level	Code of the course level that was included or excluded.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the detail requirement. Used only for an included level.
Credits Maximum	Maximum number of credits from the included course level that can be used to satisfy the detail requirement.
Credits Used	Number of credits earned toward the detail requirement.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from the included course level that can be used to satisfy the detail requirement.
Credits Used	Actual number of courses from the included course level that were used to satisfy the detail requirement.
Action	Code for the adjustment type, if an adjustment was performed on the group.

Course/Attribute Exclusions window

Updated: August 27, 2020

Use the Course/Attribute Exclusions window to view courses/course attributes that cannot be used to satisfy the detail requirement selected in the Course/Attribute Attachment window. This window is available only if exclusion was defined for the detail line in the Course/Attributes Attachments window of the Group Requirements (SMAGROP) page.

You can access this window from the Course/Attribute Attachment window.

This window is composed of the Display-Only section and the Course/Attribute Exclusions section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which course/attribute exclusions are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Exclusions section

Updated: August 27, 2020

This section displays the course/attribute exclusions for the compliance request specified in the key block of the main window.

Fields	Descriptions
Campus	Code of the campus associated with this exclusion, if applicable.
College	Code of the campus associated with this exclusion, if applicable.
Department	Code of the department associated with this exclusion, if applicable.
Subject	Code of the subject associated with this exclusion, if any.
Course Number Low	Course number that was excluded, or the lowest number in a range of excluded courses, if defined.
Course Number High	Highest number in a range of excluded courses, if defined.
Course Attribute	Code of the course attribute associated with this exclusion, if any.
Student Attribute	Code of the student attribute associated with this exclusion, if any.
Must Take In or After Term	Code of the first term of a range during which the course must have been taken, if used in the exclusion.
Must Take Before Term	Code of the last term of a range during which the course must have been taken, if used in the exclusion.
Action	Code for the adjustment type, if an adjustment was performed on the group.

Used Courses/Attributes window

Updated: August 27, 2020

Use the Used Courses/Attributes window to view details of courses and attributes used to satisfy the detail requirement selected in the Course/Attribute Attachment window.

You can access this window from the Course/Attribute Attachment window.

This window is composed of the Display-Only section and the Used Courses/Attributes section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which used courses/attributes are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Campus	Code of the campus associated with this requirement, if applicable.
College	Code of the campus associated with the original requirement, if applicable.
Department	Code of the department associated with the original requirement, if applicable.
Subject	Code of the subject associated with the original requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the original requirement, if any.
Student Attribute	Code of the student attribute associated with the original requirement, if any.
Set	User-defined identifier for the set to which this requirement

Fields	Descriptions
	belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.
Test	Code of the test type associated with the original requirement.
Minimum	Minimum test score that can satisfy the original requirement.
Maximum	Maximum test score that can satisfy the original requirement.
Concurrency	Check box used to indicate whether concurrent enrollment is allowed to be used to satisfy the requirement.
Met	Check box used to indicate whether the detail attachment's requirements are met.

Used Courses/Attributes section

Updated: August 27, 2020

This section displays the used courses/attributes for the compliance request specified in the Key block of the main window.

Fields	Descriptions
Campus	Code of the campus associated with this detail attachment, if applicable.
College	Code of the campus associated with this detail attachment, if applicable.
Department	Code of the department associated with this detail attachment, if applicable.
Subject	Code of the subject associated with this detail attachment.
Course Number	Course number associated with this detail attachment.
Course Level	Course level associated with this detail attachment.
Course Source	Source of the course(s)/attribute(s) applied to this requirement.

Fields	Descriptions
	Values include: `H` History `R` Registration `P` Planned `T` Transfer `E` Exam `Z` Student attribute
Course Attribute	Code of the course attribute associated with this detail attachment, if any.
Student Attribute	Code of the student attribute associated with this detail attachment, if any.
Credits Available	Number of credits the course had available to apply to the requirement for this detail attachment.
Credits Used	Actual number of credits used toward satisfying the requirement for this detail attachment.
Grade Code	Code of grade earned for the course associated with this detail attachment.
Grading Mode	Grade mode associated with the grade code.
Traditional	Indicates whether the grade assigned to the course is a 'traditional' grade, as defined on the Grade Code Maintenance (SHAGRDE) page.
Course Equivalence	Indicates that the course used is equivalent to the one specified in the requirement.
Potential	Indicates whether the course can potentially be used to satisfy the requirement.
Counted in Program	Indicates whether the course counts toward the program's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on).

Fields	Descriptions
Counted in Area	Indicates whether the course counts toward the area's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on).
Counted in Group	Indicates whether the course counts toward the group's general requirement (minimum credits and courses, maximum transfer credits and courses, and so on), if the course is used to satisfy a group's requirements.
Counted in GPA	Indicates whether the course counts toward grade point averages calculated for the program.
Test Code	Code of the test type associated with this requirement. This indicator is used to indicate that the requirement can be satisfied by achievement of a satisfactory score on a test.
Test Score	Actual score earned on the test.
Concurrency Indicator	Indicates whether this course can be taken concurrently with a prerequisite. This indicator applies only to requirements that are used in prerequisite checking.

Existing Group Inquiry (SMIGROP) page

Updated: August 27, 2020

Use the Existing Group Inquiry (SMIGROP) page to view all groups for which requirements have been defined.

Fields	Descriptions
Group	Code of the group.
Description	Description of the group.
Student Level	Student level associated with the group.
Course Level	'Native' course level associated with the group.
Effective Term	Effective term for the set of general requirements. A separate

Fields	Descriptions
	record is displayed for each set of general requirements for each group.
Active Indicator	Check box used to indicate whether general requirements (and therefore the entire group) are active as of the displayed effective term.

Group Usage By Area Inquiry (SMIGUSE) page

Updated: August 27, 2020

Use the Group Usage By Program Inquiry (SMIGUSE) page to view the area(s) to which a group is attached. The page opens in query mode. After you execute a query, the data displayed in the Attached to Area section is for the record selected in the upper section.

Main window

Updated: August 27, 2020

The main window is composed of the Group Filter section and the Attached to Area section.

Area Filter section

Updated: August 27, 2020

Use this section to enter the groups for which you want to view the areas they are attached to.

Fields	Descriptions
Selected (untitled)	Indicator for the selected record. An asterisk is displayed in this field when you go to the next section so that you can identify the record for which you are viewing search results.
Group	Code of the group.
Description	Description of the group, automatically displayed when a valid group code is entered.
Student Level	Student level associated with the group.
Course Level	Native course level associated with the group.

Attached to Area section

Updated: August 27, 2020

Use this section to view the results of your query.

Fields	Descriptions
Area	Code of the program to which the group is attached.
Description	Description of the area to which the group is attached.
Student Level	Student level associated with the area.
Course Level	“Native” course level associated with the area.
Dynamic Indicator	Check box used to indicate whether the **Dynamic** check box on the Area Library (SMAALIB) page is selected for this area. (When the **Dynamic** check box on SMAALIB is selected, the area is available to be selected by non-captive programs based on the area's qualifiers during compliance.)

Program Output Inquiry (SMIPOUT) page

Updated: August 27, 2020

Use the Program Output Inquiry (SMIPOUT) page to view compliance results at the program level for a specific compliance request number.

Use the fields in the key block to specify the student and request number for which you want to review program-level compliance results. The **ID** and **Request Number** fields are the only enterable fields, and a valid combination must be entered to access compliance results.

The General Requirements section displays the program's general requirements and the student's compliance results. Requirements are displayed exactly as they were applied to the student and are either the original program requirements or the adjusted requirements for the student.

Fields displayed in the General Requirements section are generally the same as those in the General Requirements section of the Program Requirements (SMAPROG) page, except that most of the fields are duplicated to display the program requirement (**Required**) and the actual value applied to the program (**Used**) based on the student's work.

Each window for this page is enabled only if data exists for it.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the General Requirements section.

Key block

Updated: August 27, 2020

Use this section to specify the ID and number of the compliance request you want to view.

Fields	Descriptions
ID	ID of the student for whom you want to display compliance results. Required. Select the **Search** button for this field to display the Compliance Output Person Search List. List Compliance Output Person Search List
Request Number	Number of the compliance request number for which you want to display compliance results. Required. Select the **Search** button for this field to display the Compliance Requests List. List Compliance Requests List
Term	Term in which the program requirements began.

Fields	Descriptions
Program	Code of the program associated with the compliance request.
Student Level	Student level associated with the program.
Catalog Year	Academic year to which the term belongs.

General Requirements section

Updated: August 27, 2020

Use this section to view the program general requirements for the compliance request specified in the key block.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data. If the program's requirements have been adjusted for the student, the adjustment type is displayed in this field.
Captive	Check box used to indicate whether the program is captive.
Single Entity	Check box used to indicate whether the program should be evaluated for reuse using single-entity processing.
Total Required Credits Required	Minimum total number of credits needed to satisfy the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Total Required Credits Used	Total number of credits earned toward the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer credits.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.

Fields	Descriptions
Total Required Courses Required	Minimum total number of courses needed to satisfy the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Total Required Courses Used	Total number of courses taken toward the program's requirements. This number includes all institutional (both traditional and non-traditional) and transfer courses.
Required Institutional Credits Required	Minimum total number of credits that must be earned at your institution to satisfy the program's requirements.
Required Institutional Credits Used	Total number of credits earned at your institution toward the program's requirements.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
Required Institutional Courses Required	Minimum total number of courses that must be taken at your institution to satisfy the program's requirements.
Required Institutional Courses Used	Total number of courses taken at your institution toward the program's requirements.
Required Institutional Traditional Credits Required	Minimum total number of credits that must be earned at your institution with a traditional grade (as defined on the Grade Code Maintenance [SHAGRDE] page) to satisfy the program's requirements.
Required Institutional Traditional Credits Used	Total number of credits earned at your institution with a traditional grade toward the program's requirements.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
Required Institutional Traditional Courses Required	Minimum total number of courses that must be taken at your institution with a traditional grade to satisfy the program's requirements.
Required	Total number of courses taken at your institution with a traditional

Fields	Descriptions
Institutional Traditional Courses Used	grade toward the program's requirements.
Maximum Institutional Non-Traditional Credits Required	Maximum total number of credits that can be earned at your institution with a non-traditional grade (as defined on SHAGRDE) to satisfy the program's requirements.
Maximum Institutional Non-Traditional Credits Used	Total number of credits earned at your institution with a non-traditional grade toward the program's requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).
Maximum Institutional Non-Traditional Courses Required	Maximum total number of courses that can be taken at your institution with a non-traditional grade to satisfy the program's requirements.
Maximum Institutional Non-Traditional Courses Used	Total number of courses taken at your institution with a non-traditional grade toward the program's requirements.
Maximum Transfer Credits Required	Maximum number of transfer credits that can be used to satisfy the program's requirements.
Maximum Transfer Credits Used	Maximum number of transfer credits used to satisfy the program's requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**).
Maximum Transfer Courses Required	Maximum number of transfer courses that can be used to satisfy the program's requirements.
Maximum Transfer Courses Used	Maximum number of transfer courses used to satisfy the program's requirements.
Last Number Institutional Required Credits Required	Minimum number of credits that must be completed at your institution out of the number specified in the **out of Last Earned Credits Required** field.

Fields	Descriptions
Last Number Institutional Required Credits Used	Actual number of credits completed at your institution out of the number specified in the **out of Last Earned Credits Required** field.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
Last Number Institutional Required Courses Required	Minimum number of courses that must be completed at your institution out of the number specified in the **out of Last Earned Credits Required** field.
Last Number Institutional Required Courses Used	Actual number of courses completed at your institution out of the number specified in the **out of Last Earned Credits Required** field.
...out of Last Earned Credits Required	Minimum number of credits that must be completed at your institution out of the most recent of credits earned.
...out of Last Earned Credits Used	Actual number of credits that must be completed at your institution out of the most recent of credits earned.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**).
...out of Last Earned Courses Required	Minimum number of courses that must be completed at your institution out of the most recent of credits earned.
...out of Last Earned Courses Used	Actual number of courses that must be completed at your institution out of the most recent of credits earned.
Minimum Program GPA Required	Lowest acceptable program GPA a student can have to satisfy the program's requirements.
Minimum Program GPA Actual	Student's actual program GPA, calculated from the grades received in native-level courses used to satisfy the requirements of the program.
Minimum Course Grade	Code of the minimum grade that must be earned for the course to satisfy the program's requirements.
Minimum GPA Required	Minimum cumulative level GPA required to satisfy the program's requirements.
Minimum GPA Actual	Student's actual cumulative level GPA, calculated from the grades received in native-level courses used to satisfy the requirements of

Fields	Descriptions
	the program.
Course Year Limit	Number of years old a course can be to satisfy the program's requirements. When a compliance is run, the evaluation term entered for the compliance request is used in conjunction with this field to determine how far back to go in a student's academic history to retrieve valid courses. CAPP checks the earliest term in the furthest year of the course year limit you set. Example: The course year limit is five, and the user enters an evaluation term of 200620. When processing the request, CAPP considers courses back to 200110, which is the first term in the academic year five years back from 2006.

Program Text window

Updated: August 27, 2020

Use the Program Text window to view program-level text associated with the program for the compliance request specified in the key block of the main window. This window is available only if program-level text exists.

When you enter the window, all available text displays. You can query to display only the text defined for a specific compliance output type. In query mode, the Print List lists only those compliance print codes for which program text exists.

This window is composed of the Display-Only block and the Program Text section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which program text is being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Program Text section

Updated: August 27, 2020

This section displays the program text for the compliance request specified in the key block of the main window.

Fields	Descriptions
Text	Text associated with the program.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Program Non-Course Requirements Output window

Updated: August 27, 2020

The Program Non-Course Requirements Output window displays information about how program-level non-course requirements were applied to the student's compliance results for the compliance request specified in the Key block of the main window.

Non-course requirements are those that must be satisfied but are not associated with a specific course, such as an oral exam or community service. This window is available only if non-course requirement information exists for the compliance results.

A student's non-course detail information is maintained on the Academic Non-Course (SHANCRS) page.

This window is composed of the Display-Only block and the Non-Course Requirements section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which program-level non-course requirements are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Non-Course Requirements section

Updated: August 27, 2020

This section displays the program-level non-course requirements for the compliance request specified in the key block of the main window.

Fields	Descriptions
Met	Indicates whether the non-course requirement was met.
Non-Course Code	Code of the non-course requirement. For searches, select the **Search** button for this field to display the Non-Course Requirements Codes (STVNCRQ) list. List Non-Course Requirements Codes (STVNCRQ)
Description	Description of the non-course requirement code.
Year Limit	Number of years old a non-course item can be to satisfy the program's requirements.
Status Code	Code associated with the current status of the detail item.
Status Date	Date associated with the current status of the detail item.
Action Code	Code for the adjustment type, if an adjustment was performed on the program.

Program Additional Course Levels to Include/Exclude Output window

Updated: August 27, 2020

Use the Program Additional Course Levels to Include/Exclude Output window to view other course levels to be included in or excluded from the program for the compliance request specified in the Key block of the main window.

This window is available only if additional course level information exists for the compliance results.

If a program has additional included levels, and work at the included level is used to satisfy requirements, the number of used courses/credits and the rules defined for the additional level display. Excluded levels appear only if the excluded level also caused a course to be rejected from use.

This window is composed of the Display-Only block and the Additional Course Levels section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which additional course levels are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Additional Course Levels section

Updated: August 27, 2020

This section displays the additional course levels for the compliance request specified in the key block of the main window.

Fields	Descriptions
Include/Exclude	Option group used to specify whether the course level is to be

Fields	Descriptions
	included or excluded.
Level	Code of the course level that was included or excluded. For searches, select the **Search** button for this field to display the Level Codes (STVLEVL) list. List Level Codes (STVLEVL)
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the program's requirements. Used only for an included level.
Credits Maximum	Maximum number of credits from the included course level that can be used to satisfy program requirements.
Credits Used	Actual number of credits from the included course level that were used to satisfy program requirements.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses from the included course level that can be used to satisfy program requirements.
Credits Used	Actual number of courses from the included course level that were used to satisfy program requirements.
Action Code	Code for the adjustment type, if an adjustment was performed on the program.

Program Required Attributes Output window

Updated: August 27, 2020

Use the Program Required Attributes Output window to view program-level student or course attribute requirements for the compliance request specified in the key block of the main window. This window is available only if required attribute information exists for the compliance results

This window is composed of the Display-Only block and the Program Required Attributes section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which program required attributes are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Program Required Attributes section

Updated: August 27, 2020

This section displays the program required attributes for the compliance request specified in the key block of the main window.

Fields	Descriptions
Met	Indicates whether the attribute requirement was met.
Course Attribute	Code of the required course attribute.
Student Attribute	Code of the required student attribute.
Credits Required	Number of required credits for a required course attribute.
Credits Used	Actual number of credits earned for a required course attribute.
Connector None/ And/Or	Option group used to indicate whether the system used only one value (**None**), both values (**And**), or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.

Fields	Descriptions
Courses Required	Number of required courses for a required course attribute.
Courses Used	Actual number of courses taken for a required course attribute.
Action Code	Code for the adjustment type, if an adjustment was performed on the program.

Program Restricted Subjects/Attributes Output window

Updated: August 27, 2020

Use the Program Restricted Subjects/Attributes Output window to view any program-level course or attribute restrictions for the compliance request specified in the key block of the main window. This window is available only if course or attribute restriction information exists for the compliance results.

This window is composed of the Display-Only block and the Restricted Subjects/ Attributes section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which restricted subjects/attributes are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Restricted Subjects/Attributes section

Updated: August 27, 2020

This section displays the restricted subjects/attributes for the compliance request specified in the key block of the main window.

Fields	Descriptions
Subject	Code of the subject associated with the restriction.

Fields	Descriptions
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses, if applicable.
Course Attribute	Code of the attribute associated with the restriction.
Credits Maximum	Maximum number of credits that can be taken within the restriction.
Credits Used	Actual number of credits earned within the restriction.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses that can be taken within the restriction.
Courses Used	Actual number of courses earned within the restriction.
Action Code	Code for the adjustment type, if an adjustment was performed on the program.
Campus	Code of the campus associated with the restriction.
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.
Text	Check box used to indicate whether text has been associated with the selected restriction. Options Restricted Subject/Attribute Comments window

Mouse	Keyboard	
Comments	Edit	Opens the Restricted Subject/Attribu

Mouse	Keyboard

teCommentswindow

Restricted Subject/Attribute Comments window

Updated: August 27, 2020

Use the Restricted Subject/Attribute Comments window to view descriptive information about the restriction selected in the Program Restricted Subjects/Attributes Output window.

This window is composed of the Display-Only section and the Restricted Subject/Attribute Comments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which restricted subject/attribute comments are being viewed.

Fields	Descriptions
Campus	Code of the campus associated with the restriction.
College	Code of the college associated with the restriction.
Department	Code of the department associated with the restriction.
Subject	Code of the subject associated with the restriction.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses.
Course Number High	Highest number in a range of restricted courses.
Course Attribute	Code of the attribute associated with the restriction.

Restricted Subject/Attribute Comments section

Updated: August 27, 2020

This section displays the Restricted Subject/Attribute Comments for the restriction selected in the Program Restricted Subjects/Attributes Output window.

Fields	Descriptions
Text	Text associated with the restriction.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

The Course Alias Low and Course Alias High are read-only fields.

Program Restricted Grade Output window

Updated: August 27, 2020

Use the Program Restricted Grade Output window to view program-level grade restriction for the compliance request specified in the key block of the main windows. This window is available only if course or attribute restriction information exists for the compliance results.

This window is composed of the Display-Only block and the Restricted Grades section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which restricted grades are being viewed.

Fields	Descriptions
Term Effective	Code of the effective term for this requirement or set of requirements.
Source	Original source of the compliance curriculum data.

Restricted Grades section

Updated: August 27, 2020

This section displays the restricted grades for the compliance request specified in the key block of the main window.

Fields	Descriptions
Grade	Code of the grade associated with this restriction.
Credits Maximum	Maximum number of credits with the restricted grade that can be used to satisfy program requirements.
Credits Used	Actual number of credits earned with the restricted grade.
Connector None/Or	Option group used to indicate whether the system used only one value (**None**) or either value (**Or**). See the *Connectors* section in the *Common Concepts* chapter of

Fields	Descriptions
	the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Courses Maximum	Maximum number of courses with the restricted grade that can be used to satisfy program requirements.
Courses Used	Actual number of courses taken in which the restricted grade was earned.
Action Code	Code for the adjustment type, if an adjustment was performed on the program.
Text	Check box used to indicate whether text has been associated with the selected grade restriction. Options Restricted Grade Comment window

Mouse	Keyboard

Mouse	Keyboard

cted Grade Comments window

Restricted Grade Comment window

Updated: August 27, 2020

Use the Restricted Grade Comment window to view descriptive comments for the grade restriction selected in the Program Restricted Grade Output window.

This window is composed of the Display-Only section and the Restricted Subject/ Attribute Comments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which restricted subject/attribute comments are being viewed.

Fields	Descriptions
Grade	Code of the grade associated with this restriction.

Restricted Subject/Attribute Comments section

Updated: August 27, 2020

This section displays the Restricted Subject/Attribute Comments for the restriction selected in the Program Restricted Grade Output window.

Fields	Descriptions
Text	Text associated with the grade restriction.
Print	Compliance print type associated with the line of text. For searches, select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Program Area Output window

Updated: August 27, 2020

Use the Program Area Output window to view a list of the areas used by the compliance request for the compliance request specified in the key block of the main window. Areas are displayed in the same order that they were used by the compliance process.

This window is composed of the Display-Only block and the Program Used Areas section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record for which used areas are being viewed.

Fields	Descriptions
Attachment Term	Effective term of the compliance request.
Attachment Source	Original source of the compliance curriculum data.

Program Used Areas section

Updated: August 27, 2020

This section displays the used areas for the compliance request specified in the key block of the main window.

Fields	Descriptions
Met	Check box used to indicate whether the area's requirements have been met.
Selected Dynamically	Check box used to indicate whether the area was selected dynamically.
Effective Term	Effective term of the area used for the compliance request.
Priority	Area's priority within the program. The system considers lower number priorities before higher number priorities when running compliance. If two areas are assigned the same priority, the system considers them in alphabetical order.
Student Level	Student level associated with the area.
Course Level	Course level associated with the area.
Used Area	Code of the used area.
Description	Description of the used area.
Action Code	Code for the adjustment type, if an

Fields	Descriptions
	adjustment was performed on the program.
Awarded Credits	Number of credits counted for the adjusted area.
Awarded Courses	Number of courses counted for the adjusted area.

Existing Program Inquiry (SMIPROG) page

Updated: August 27, 2020

Use the Existing Program Inquiry (SMIPROG) page to view all programs for which requirements have been defined.

Fields	Descriptions
Program	Code of the program.
Description	Description of the program.
Student Level	Student level associated with the program.
Course Level	'Native' course level associated with the program.
Effective Term	Effective term for the set of general requirements. A separate record is displayed for each set of general requirements for each program.
Active Indicator	Check box used to indicate whether general requirements (and therefore the entire program) are active as of the displayed effective term.

Student Adjustment Filter (SMISLIB) page

Updated: August 27, 2020

Use the Student Adjustment Filter (SMISLIB) page to view student adjustment records. This page is a query-only version of the Student Adjustment Library (SMASLIB) page.

Fields	Descriptions
ID	Student's Banner® ID.

Fields	Descriptions
Name	Student's name.
Program	Check box used to indicate whether program adjustments exist for the student. Display only. Program adjustments are maintained on the Student Program Adjustments (SMASPRG) page.
Area	Check box used to indicate whether area adjustments exist for the person. Display only. Area adjustments are maintained on the Student Area Adjustments (SMASARA) page.
Group	Check box used to indicate whether group adjustments exist for the person. Display only. Group adjustments are maintained on the Student Group Adjustments (SMASGRP) page.
Target	Check box used to indicate whether target course adjustments exist for the person. Display only. Target adjustments are maintained on the Student Targets, Waivers and Substitutions (SMASADJ) page.
Waiver	Check box used to indicate whether requirement waivers exist for the person. Display only. Waivers are maintained on the Student Targets, Waivers and Substitutions (SMASADJ) page.
Substitution	Check box used to indicate whether requirement substitutions exist for the person. Display only. Substitutions are maintained on the Student Targets, Waivers and Substitutions (SMASADJ) page.

Area Course/Attribute Attachment (SMQSACR) page

Updated: August 27, 2020

Use the Area Course/Attribute Attachment (SMQSACR) page to adjust course/attribute detail requirements for a student's area adjustment records.

The only way to access this page is to select the **Course Attachment** button on the main window of the Student Area Adjustment (SMASARA) page. You cannot access it any other way.

Main window

Updated: August 27, 2020

The main window is composed of the Display-Only section and the Course Attachment section.

Display-Only block

Updated: August 27, 2020

This block display details about the record selected in the key block of the Student Area Adjustment (SMASARA) page.

Fields	Descriptions
ID	Banner® ID of the person for whom you are adjusting area requirements.
Term	Term in which the area adjustments began.
Area	Code of the area for which requirements are being adjusted.
Catalog	Academic year to which the term belongs.
Student Level	Student level associated with the area.
Course Level	'Native' course level associated with the area.

Course Attachment section

Updated: March 20, 2025

Use this section to enter or display the course attachments adjustments for the area specified in the Display-Only section.

Fields	Descriptions
From Term	First term in which this set of attachments is in effect. Display only.
To Term	Last term in which this set of attachments is in effect. Display only.
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window.

Fields	Descriptions
	Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias Low	The Course Alias Low is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Alias High	The Course Alias High is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number Low** and **Course Number High** fields that are defined in your course catalog.

Fields	Descriptions
	If this check box is cleared, compliance will use any course the student has completed (for example, academic history or transfer) in-progress or planned to attempt to meet the requirement.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured.

Fields	Descriptions
	A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course to satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the area. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Credits Per Course	Minimum number of credits earned for the course to satisfy the requirement.
Maximum Credits Per Course	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining number of credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits. The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded. Example: A student who is an English major has taken ENGL 1050 (a

Fields	Descriptions
	literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the

Fields	Descriptions
	Maximum Courses field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Maximum Transfer Credits	Maximum number of transfer credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Transfer Credits** field or the **Maximum Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirement is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.

Fields	Descriptions
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet this requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Test	Code of the test type associated with this requirement. This field is used to specify that the requirement can be satisfied with a satisfactory test score. If a test requirement is entered, the only other values for the requirement that can be defined are: • **Set** (optional) • **Subset** (optional) • **Test Score Minimum** (required) • **Test Score Maximum** (required) Select the **Search** button for this field to display the Test Code Validation (STVTESC) list. List Test Code Validation (STVTESC)
Test Score Minimum	Minimum test score that can satisfy this requirement. Required if a value is entered in the **Test** field. The value entered must fall within the valid range of scores for the test type defined on STVTESC.
Test Score	Maximum test score that can satisfy this requirement. Required if

Fields	Descriptions
Maximum	a value is entered in the **Test** field. The value entered must be greater than the value entered in the **Test Score Minimum** field and must fall within the valid range of scores for the test type defined on STVTESC.
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Fields	Descriptions
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward group, area, and program minimum credit requirements, even though the requirement has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are 'counted' as waived. Waiver action codes that do not count waive the original requirement, but the credits associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward group, area, and program minimum courses requirements, even though the requirement has been waived. Courses can be entered only when a waiver action code that counts is entered.

Default Detail Attachments window

Updated: August 27, 2020

Use the Default Detail Attachments window to copy an existing area's course attachments to another area.

Note: This window is available only if no area-level course attachments have been defined for the student's area adjustment record.

When you access this window, the page name changes to Area Requirements (SMQSADF), although the window can be accessed only from the key block of the Area Course/Attribute Attachment (SMQSACR) page.

Fields	Descriptions
Default From Area	Area from which to copy course attachments. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.
Area Rules Term	Term from which to copy course attachments. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List

Fields	Descriptions
	Count Hits Existing Area Inquiry (SMIAREA) page

Include/Exclude Course Level window

Updated: August 27, 2020

You can enter course level inclusions/exclusions that apply to a specific requirement on the Include/Exclude Course Level window.

Detail requirements are already controlled by any level inclusions/exclusions defined at the program or area level. You can be more restrictive than at a higher level, but you cannot override additional level rules defined at a higher level.

This window is composed of the Display-Only section and the Course Level Inclusions/Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
From Term	First term in which this requirement is in effect.
To Term	Last term in which this requirement is in effect.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number associated with the requirement, or the lowest number in a range of required courses, if defined.
Course Number High	Highest number in a range of required courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course Level Inclusions/Exclusions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course level inclusions/exclusions adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded.

Fields	Descriptions
Level	Code of the level to be included or excluded. Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description (untitled)	Description associated with the level code, automatically displayed when a value is entered in the **Level** field. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the requirement. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits that can be considered from an included level.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be considered from an included level.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment.

Fields	Descriptions
	Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Course/Attribute Text window

Updated: August 27, 2020

Use the Course/Attribute Text window to enter text for each detail attachment.

This window is composed of the Display-Only section and the Course/Attribute Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
From Term	First term in which this requirement is in effect.
To Term	Last term in which this requirement is in effect.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number associated with the requirement, or the lowest number in a range of required courses, if defined.
Course Number High	Highest number in a range of required courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.

Fields	Descriptions
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Text Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course/attribute text adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Text	Text associated with the detail requirement. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first.

Fields	Descriptions
	Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Course/Attribute Exclusions window

Updated: August 27, 2020

Use the Course/Attribute Exclusions window to exclude courses or attributes from a detail requirement.

For example, if you have specified that a range of courses is included but need to exclude two courses within that range, you use this window to define the exclusions.

This window is composed of the Display-Only section and the Course/Attribute Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
From Term	First term in which this requirement is in effect.
To Term	Last term in which this requirement is in effect.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number associated with the requirement, or the lowest number in a range of required courses, if defined.
Course Number High	Highest number in a range of required courses, if defined.

Fields	Descriptions
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Exclusions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course/attribute exclusions adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Campus	Campus code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course taken on the specified campus. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)

Fields	Descriptions
College	College code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified college. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Department code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified department. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Subject	Code of the subject being excluded from satisfying the detail requirement. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is being excluded, or

Fields	Descriptions
	the lowest number in a range of excluded courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of excluded courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Attribute	Code of the course attribute excluded from satisfying the detail requirement. You can define a requirement as a single course attribute, so that any course with the attribute is excluded, or as a combination of values, so that a course must meet all of the specifications to be excluded. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute excluded from satisfying the detail requirement.

Fields	Descriptions
	If a requirement is for a student attribute, no other exclusions can be defined for this row. Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Must Take In or After Term	Earliest term in which a course can be taken for this exclusion to apply. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken for this exclusion to apply. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list.

Fields	Descriptions
	List Action Code Validation (STVACTN)

Course/Attribute Attachment Rules window

Updated: August 27, 2020

Use the Course/Attribute Attachment Rules window if you need to define very complicated requirements that cannot be easily configured using Boolean logic.

Attachment rules use the same variables as other attachments, but add the concept of conditions. Rules allow you to specify the number of conditions that must be satisfied and also allow you to place requirements and restrictions on conditions.

After you define the number of conditions in the upper portion of the window, you must save your changes before you can define the conditions in the lower portion of the window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella.

Fields	Descriptions
From Term	First term in which this rule is in effect. Display only.
To Term	Last term in which this rule is in effect. Display only.
Rule	Rule code entered in **Rule** field in the Course/Attribute Attachment window. Display only. Edit Course Attachment Rule Text window
Description	Description of the rule. Required.
Rule Text	Check box used to indicate whether text has been associated with this rule.

Fields	Descriptions
	Use the **Search** button to access the Course Attachment Rule Text window.
Required Number of Conditions	Number of conditions required for this rule.
Required Credits Per Condition	Number of required credits for each condition, if appropriate.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits Per Condition** field or the **Required Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses Per Condition	Number of required courses for each condition.
Maximum Credits Per Condition	Maximum number of credits that can be used per condition.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits Per Condition** field or the **Maximum Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses Per Condition	Maximum number of courses that can be used per condition.

Fields	Descriptions
Total Required Credits	Total number of credits required to satisfy the entire rule.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Required Credits** field or the **Total Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Required Courses	Total number of courses required to satisfy the entire rule.
Total Maximum Credits	Maximum number of credits which may be used to satisfy the entire rule.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Maximum Credits** field or the **Total Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Maximum Courses	Maximum number of courses that can be used to satisfy the entire rule.

theCourseAttachmentRuleTextwindow

Rule Detail section

Updated: August 27, 2020

This section displays the detail for the rule umbrella.

Fields	Descriptions
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Condition	Condition defined on this row. Display only. The system determines conditions based on the way in which you define the detail lines. For example, all entries using the same set will have a single condition number, because all are part of one condition. Review the condition indicators to determine whether you have defined the detail requirements correctly and to understand how compliance interprets the required number of conditions specified in your rule umbrella.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if

Fields	Descriptions
	applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List

Fields	Descriptions
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number Low** and **Course Number High** fields that are defined in your course catalog. If this check box is cleared, compliance will use any course the student has completed (for example, academic history or transfer) in-progress or planned to attempt to meet the requirement.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)

Fields	Descriptions
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course that can satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the area. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Credits per Course	Minimum number of credits earned for the course to satisfy the requirement.
Maximum Credits per Course	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits. The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction

Fields	Descriptions
	to be exceeded. Example: A student who is an English major has taken ENGL 1050 (a literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the

Fields	Descriptions
	Maximum Courses field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits	Maximum number of transfer credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Transfer Credits** field or the **Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Compliance Credits	Number of credits that can accumulate toward area and program general requirements after this requirements is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward area and program general requirements after this requirement is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/ courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.
Action	Code of the action (for example, waive, substitute, eliminate)

Fields	Descriptions
	associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward group, area, and program minimum credit requirements, even though the requirement has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are 'counted' as waived. Waiver action codes that do not count waive the original requirement, but the credits associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward group, area, and program minimum courses requirements, even though the requirement has been waived. Courses can be entered only when a waiver action code that counts is entered.
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not

Fields	Descriptions
	transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Course Attachment Rule Text window

Updated: August 27, 2020

Use the Course Attachment Rule Text window to enter text for the course attachment rule. This window is accessed by selecting the **Comments** button for the **Rule Text** field.

Fields	Descriptions
Text	Text associated with the course attachment rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text.

Fields	Descriptions
	This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Rule Course/Attribute Text window

Updated: August 27, 2020

Use the Rule Course/Attribute Text window to enter text for the adjusted attachment rule. Access this window by selecting Text from the Options Menu in the Course/Attribute Attachment Rules window. The cursor must be on a row in the lower section of the window.

This window is composed of the Display-Only section and the Rule Course/Attribute Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.

Fields	Descriptions
Subject	Code of the subject associated with the requirement, if any.
Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Rule Course/Attribute Text Adjustments section

Updated: August 27, 2020

Use this section to enter or display the rule course/attribute text adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Text	Text associated with the adjusted attachment rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text.

Fields	Descriptions
	This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Include/Exclude Rule Course Level window

Updated: August 27, 2020

Use the Include/Exclude Rule Course Level window to enter level inclusions/exclusions for the adjusted attachment rule. Access this window by selecting Level from the Options Menu in the Course/Attribute Attachment Rules window. The cursor must be on a row in the lower section of the window.

This window is composed of the Display-Only section and the Rule Course Level Inclusions/Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.

Fields	Descriptions
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
Course Number High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Rule Course Level Inclusions/Exclusions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the Rule Course Level Inclusions/Exclusions adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded.
Level	Code of the level to be included or excluded. Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)

Fields	Descriptions
Description (untitled)	Description associated with the level code, automatically displayed when a value is entered in the **Level** field. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the requirement. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits that can be considered from an included level.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be considered from an included level.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Rule Course/Attribute Exclusions window

Updated: August 27, 2020

Use the Rule Course/Attribute Exclusions window to enter text for the adjusted attachment rule. Access this window by selecting Exclusions from the Options Menu in the Course/Attribute Attachment Rules window. The cursor must be on a row in the lower section of the window.

This window is composed of the Display-Only section and the Rule Course/Attribute Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Low	Course number that is restricted, or the lowest number in a range of restricted courses, if defined.
High	Highest number in a range of restricted courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts*, chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement

Fields	Descriptions
	belongs, if applicable.

Rule Course/Attribute Adjustments section

Updated: August 27, 2020

Use this section to enter or display the Rule Course Level Inclusions/Exclusions adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Campus	Campus code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course taken on the specified campus. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	College code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified college. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)

Fields	Descriptions
Department	Department code associated with the course(s) the being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified department. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Subject	Code of the subject being excluded from satisfying the detail requirement. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is being excluded, or the lowest number in a range of excluded courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of excluded courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field.

Fields	Descriptions
	Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Attribute	Code of the course attribute excluded from satisfying the detail requirement. You can define a requirement as a single course attribute, so that any course with the attribute is excluded, or as a combination of values, so that a course must meet all of the specifications to be excluded. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute excluded from satisfying the detail requirement. If a requirement is for a student attribute, no other exclusions can be defined for this row. Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Must Take In or After Term	Earliest term in which a course can be taken for this exclusion to apply.

Fields	Descriptions
	Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken for this exclusion to apply. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Area Requirements (SMQSADF) page

Updated: August 27, 2020

The Area Requirements (SMQSADF) page is displayed when you choose to default requirements into an area adjustment window. The page itself is not accessible through the navigation menu or Direct Access, and the windows for this page can be accessed only through the Student Area Adjustments (SMASARA) page.

Default All Detail window

Updated: August 27, 2020

Use the Default All Detail window to copy all of an existing area's requirements to the student's area adjustment record.

Note: This window is available only if no area-level requirements have been defined for the student's area adjustment record.

This window can be accessed only from the key block of the Student Area Adjustments (SMASARA) page.

This window is composed of the Display-Only Block and the Default block.

Display-Only section

Updated: August 27, 2020

This section displays details about the record to which area information is being defaulted.

Fields	Descriptions
ID	Banner® ID of the person for whom you want to adjust area requirements.
Term	Term in which the area adjustments began.
Area	Code of the area for which requirements are being adjusted.
Catalog	Academic year to which the term belongs.
Student Level	Student level associated with the area.
Course Level	Native course level associated with the area.

Default section

Updated: August 27, 2020

Use this section to specify the area from which you want to default all requirements.

Fields	Descriptions
Default From Area	Area from which to copy all details.

Fields	Descriptions
	Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.
Area Rules Term	Term from which to copy area details. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List Count Hits Existing Area Inquiry (SMIAREA) page
General Requirements	This check box is selected if general requirements exist for the area/term being copied. If you do not want to copy general requirements to the area, clear this check box.
Area Text	This check box is selected if area text exists for the area/term being copied. If you do not want to copy area text to the area, clear this check box.
Include/Exclude Additional Levels	This check box is selected if additional levels exist for the area/term being copied.

Fields	Descriptions
	If you do not want to copy additional levels to the area, clear this check box.
Restricted Subjects/Attributes	This check box is selected if restricted subjects and attributes exist for the area/term being copied. If you do not want to copy restricted subjects and attributes to the area, clear this check box.
Restricted Grades	This check box is selected if restricted grades exist for the area/term being copied. If you do not want to copy restricted grades to the area, clear this check box.
Group Attachments	This check box is selected if group attachments exist for the area/term being copied. If you do not want to copy group attachments to the area, clear this check box.
Course Attachments	This check box is selected if course attachments exist for the area/term being copied. If you do not want to copy course attachments to the area, clear this check box.

Default Area General Requirements window

Updated: August 27, 2020

Use the Default Area General Requirements window to copy an existing area's general requirements to a student's area adjustment record.

Note: This window is available only if no area-level general requirements have been defined for the student's area adjustment record.

This window can be accessed only from the Area General Requirement Adjustments window of the Student Area Adjustments (SMASARA) page.

Fields	Descriptions
Default From Area	Area from which to copy general requirements. Select the **Search** button for this field to display the Existing Area Inquiry (SMIAREA) page. Count Hits Existing Area Inquiry (SMIAREA) page
Description (untitled)	Description associated with the area code, automatically displayed when a value is entered in the **Default From Area** field. Display only.

Group Attachment section

Updated: August 27, 2020

Use this section to enter or display the group attachments adjustments for the area specified in the Display-Only section.

Fields	Descriptions
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if

Fields	Descriptions
	applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Group Attachment Rules window. Edit Group Attachment Rules window
Group	Code for the group being attached. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page list. List Existing Group Inquiry (SMIGROP) page
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward group, area, and program minimum credit requirements, even though the group has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are 'counted' as waived. Waiver action codes that do not count waive the original requirement, but the credits

Fields	Descriptions
	associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward group, area, and program minimum courses requirements, even though the group has been waived. Courses can be entered only when a waiver action code that counts is entered.
Course Re-Use	Specify the reuse rules for courses between the groups attached to the area. Valid options are None, In, Out and Both. None is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Attribute Re-Use	Specify the reuse rules for course attributes between the groups attached to the area. Valid options are None, In, Out and Both. None is the default.
Within Indicator	Check box used to indicate whether within reuse is allowed. When this check box is selected, different components of the same course (for example, the course itself and one of the course's attributes) can both be used within the same group.
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.

Group Attachment Rules window

Updated: August 27, 2020

Use the Group Attachment Rules window if you need to define very complicated requirements that cannot be easily configured using Boolean logic.

Attachment rules use the same variables as other attachments, but add the concept of conditions. Rules allow you to specify the number of conditions that must be satisfied and also allow you to place requirements and restrictions on conditions.

After you define the number of conditions in the upper portion of the window, you must save your changes before you can define the conditions in the lower portion of the window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella.

Fields	Descriptions
From Term	First term in which this rule is in effect. Display only.
To Term	Last term in which this rule is in effect. Display only.
Rule	Set based on the rule code entered in the Group Attachment and Management window. Display only. Edit Group Attachment Rule Text window
Description	Description of the rule. Required.
Rule Text	Check box used to indicate whether text has been associated with this rule. Use the **Search** button to access the Group Attachment Rule Text window.

Fields	Descriptions
Required Number of Conditions	Number of conditions required for this rule.

Mouse	Keyboard	Result
Comments	Edit	Opens the Group Attachment Rule Text window

Rule Detail section

Updated: August 27, 2020

This section displays the detail for the rule umbrella.

Fields	Descriptions
Condition	Condition defined on this row. Display only. The system determines conditions based on the way in which you define the detail lines. For example, all entries using the same set will have a single condition number, because all are part of one condition. Review the condition indicators to determine whether you have defined the detail requirements correctly and to understand how compliance interprets the required number of conditions specified in your rule umbrella.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement

Fields	Descriptions
	belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. Edit Course/Attribute Attachment Rules window
Group	Code of the group being attached. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page list. List Existing Group Inquiry (SMIGROP) page
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward group, area, and program minimum credit requirements, even though the group

Fields	Descriptions
	has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are 'counted' as waived. Waiver action codes that do not count waive the original requirement, but the credits associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward group, area, and program minimum courses requirements, even though the group has been waived. Courses can be entered only when a waiver action code that counts is entered.
Course Re-Use	Specify the reuse rules for courses within the group. Valid options are None, In, Out and Both. None is the default. See the *Reuse* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about reuse in CAPP.
Attribute Re-Use	Specify the reuse rules for course attributes within the group. Valid options are None, In, Out and Both. None is the default.
Within Indicator	Check box used to indicate whether within reuse is allowed. When this check box is selected, different components of the same course (for example, the course itself and one of the course's attributes) can both be used within the same group.
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured.

Fields	Descriptions
	A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.

Group Attachment Rule Text window

Updated: August 27, 2020

Use the Group Attachment Rule Text window to enter text for the group attachment rule.

Fields	Descriptions
Text	Text associated with the group attachment rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list.

Fields	Descriptions
	List Compliance Print Codes (STVPRNT)

Group Course/Attributes Attachment (SMQSGCR) page

Updated: August 27, 2020

Use the Group Course/Attributes Attachment (SMQSGCR) page to adjust the course/ attribute attachments for a student's group adjustment record.

The only way to access this page is to select the **Course Attachments** button on the main window of the Student Group Adjustments (SMASGRP) page. You cannot access it any other way.

Main window

Updated: August 27, 2020

The main window is composed of the Display-Only section and the Course/Attribute Attachment section.

Display-Only block

Updated: August 27, 2020

This block display details about the record selected in the key block of the Student Group Adjustments (SMASGRP) page.

Fields	Descriptions
ID	Banner® ID of the person for whom you are adjusting group requirements.
Term	Term in which the group adjustments began.
Group	Code of the group for which requirements are being adjusted.
Catalog	Academic year to which the term belongs.
Student Level	Student level associated with the group.
Course Level	'Native' course level associated with the group.

Course/Attribute Attachment section

Updated: August 27, 2020

Use this section to enter or display the group attachments adjustments for the area specified in the Display-Only section.

Fields	Descriptions
From Term	First term in which this set of adjusted attachments is in effect. Display only.
To Term	Last term in which this set of adjusted attachments is in effect. Display only.
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts*, chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area.

Fields	Descriptions
	See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the requirement. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number**

Fields	Descriptions
	Low and **Course Number High** fields that are defined in your course catalog. If this check box is cleared, compliance will use any course the student has completed (for example, academic history or transfer) in-progress or planned to attempt to meet the requirement.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken.

Fields	Descriptions
	When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured. A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course to satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the group. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Credits per Course	Minimum number of credits earned for the course to satisfy the requirement.
Maximum Credits per Course	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits. The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded.

Fields	Descriptions
	Example: A student who is an English major has taken ENGL 1050 (a literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Maximum Transfer Credits	Maximum number of transfer credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use.

Fields	Descriptions
	You can enter a value in either the **Maximum Transfer Credits** field or the **Maximum Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Transfer Courses	Maximum number of transfer courses that can be used to satisfy this requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Compliance Credits	Number of credits that can accumulate toward group, area, and program general requirements after this requirement is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward group, area, and program general requirements after this requirement is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.

Fields	Descriptions
Concurrent Enrollment Allowed	Check box used to indicate whether concurrent enrollment is allowed to meet the requirement. This indicator applies only to requirements that are used in prerequisite checking. When the check box is cleared, the prerequisite course must be taken in a term earlier than the one in which registration is attempted. When the check box is selected, the prerequisite course can be taken in an earlier term or the same term as the one in which registration is attempted.
Test	Code of the test type associated with the requirement. This field is used to specify that the requirement can be satisfied with a satisfactory test score. If a test requirement is entered, the only other values for the requirement that can be defined are: • **Set** (optional) • **Subset** (optional) • **Test Score Minimum** (required) • **Test Score Maximum** (required) Select the **Search** button for this field to display the Test Code Validation (STVTESC) list. List Test Code Validation (STVTESC)
Test Score Minimum	Minimum test score that can satisfy the requirement. Required if a value is entered in the **Test** field. The value entered must fall within the valid range of scores for the test type defined on STVTESC.
Test Score	Maximum test score that can satisfy the requirement. Required if

Fields	Descriptions
Maximum	a value is entered in the **Test** field. The value entered must be greater than the value entered in the **Test Score Minimum** field and must fall within the valid range of scores for the test type defined on STVTESC.
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Fields	Descriptions
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward group, area, and program minimum credit requirements, even though the requirement has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are 'counted' as waived. Waiver action codes that do not count waive the original requirement, but the credits associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward group, area, and program minimum courses requirements, even though the requirement has been waived. Courses can be entered only when a waiver action code that counts is entered.

Default Detail Attachments window

Updated: August 27, 2020

Use the Default Detail Attachments window to copy an existing group's course attachments to another group.

Note: This window is available only if no group-level course attachments have been defined for the student's group adjustment record.

When you access this window, the page name changes to Group Requirements (SMQSGDF), although the window can be accessed only from the key block of the Group Course/Attributes Attachment (SMQSGCR) page.

Fields	Descriptions
Default From Group	Group from which to copy course attachments. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page
Description (untitled)	Description associated with the group code, automatically displayed when a value is entered in the **Default From Group** field. Display only.
Group Rules Term	Term from which to copy course attachments. Select the **Search** button for this field to display the Catalog Term Codes List. List Catalog Term Codes List

Fields	Descriptions

Additional Course/Attribute Levels to Include/Exclude

Updated: August 27, 2020

Use the Additional Course/Attribute Levels to Include/Exclude window to enter level inclusions/exclusions that apply to a specific detail line requirement.

Detail line requirements are already controlled by any level inclusions/exclusions you have defined at the program, area, and group level. You can be more restrictive at a higher level, but you cannot override additional level rules defined at a higher level.

After additional levels to include or exclude have been entered, asterisks (*) appear on both sides of Course/Attribute Levels on the Options menu.

This window is composed of the Display-Only section and the Course Level Inclusions/ Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
From Term	First term in which this requirement is in effect.
To Term	Last term in which this requirement is in effect.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number associated with the requirement, or the lowest number in a range of required courses, if defined.
Course Number High	Highest number in a range of required courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course Level Inclusions/Exclusions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course level inclusions/exclusions adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Include/Exclude	Option group to specify whether the course level is to be included or excluded.
Level	Code of the level to be included or excluded. Required. Select the **Search** button for this field to display the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Description (untitled)	Description associated with the level code, automatically displayed when a value is entered in the **Level** field. Display only.
Minimum Grade	Code of the minimum grade that must be earned for the course at the specified level to satisfy the requirement. If the course level is being excluded, this field is unavailable. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Maximum Credits	Maximum number of credits that can be considered from an included level.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* section of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Maximum Courses	Maximum number of courses that can be considered from an included level.

Fields	Descriptions
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Course/Attribute Text window

Updated: August 27, 2020

Use the Course/Attribute Text window to enter text for each detail attachment. After text has been entered, asterisks (*) appear on both sides of Course/Attribute Text on the Options menu.

This window is composed of the Display-Only section and the Course/Attribute Text Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
From Term	First term in which this requirement is in effect.
To Term	Last term in which this requirement is in effect.
Campus	Code of the campus associated with the requirement, if any.
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number associated with the requirement, or the lowest number in a range of required courses, if defined.
Course Number High	Highest number in a range of required courses, if defined.

Fields	Descriptions
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Text Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course/attribute text adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Text	Text associated with the requirement. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents.

Fields	Descriptions
	After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Course/Attribute Exclusions window

Updated: August 27, 2020

Use the Course/Attribute Exclusions window to exclude courses or attributes from a detail requirement.

For example, if you have specified that a range of courses is required but need to exclude two courses within that range, you use this window to define the exclusions.

After exclusions have been entered, asterisks (*) appear on both sides of Course/ Attribute Exclusions on the Options menu.

This window is composed of the Display-Only section and the Course/Attribute Exclusions Adjustments section.

Display-Only section

Updated: August 27, 2020

This section displays details about the record specified in the main window.

Fields	Descriptions
From Term	First term in which this requirement is in effect.
To Term	Last term in which this requirement is in effect.
Campus	Code of the campus associated with the requirement, if any.

Fields	Descriptions
College	Code of the college associated with the requirement, if any.
Department	Code of the department associated with the requirement, if any.
Subject	Code of the subject associated with the requirement, if any.
Course Number Low	Course number associated with the requirement, or the lowest number in a range of required courses, if defined.
Course Number High	Highest number in a range of required courses, if defined.
Course Attribute	Code of the course attribute associated with the requirement, if any.
Student Attribute	Code of the student attribute associated with the requirement, if any.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable.

Course/Attribute Exclusions Adjustments section

Updated: August 27, 2020

Use this section to enter or display the course/attribute exclusions adjustments for the record specified in the Display-Only section.

Fields	Descriptions
Campus	Campus code associated with the course being excluded, indicating that the detail requirement cannot be satisfied by a course taken on the specified campus. Course campus is associated only with

Fields	Descriptions
	institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	College code associated with the course being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified college. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Department code associated with the course being excluded, indicating that the detail requirement cannot be satisfied by a course offered by the specified department. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)
Subject	Code of the subject being excluded from satisfying the detail requirement.

Fields	Descriptions
	Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that is being excluded, or the lowest number in a range of excluded courses. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of excluded courses. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Attribute	Code of the course attribute excluded from satisfying the detail requirement. You can define a restriction as a single course attribute, so that any course with the attribute is excluded, or as a combination of values, so that a course must meet all of the specifications to be excluded. Select the **Search** button for this field to display the Degree Program Attribute

Fields	Descriptions
	Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute excluded from satisfying the detail requirement. If a requirement is for a student attribute, no other exclusions can be defined for this row. Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Must Take In or After Term	Earliest term in which a course can be taken for this exclusion to apply. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken for this exclusion to apply. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)

Fields	Descriptions
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)

Group Course/Attribute Attachment Rules window

Updated: August 27, 2020

Use the Course/Attribute Attachment Rules window if you need to define very complicated requirements that cannot be easily configured using Boolean logic.

Attachment rules use the same variables as other attachments, but add the concept of conditions. Rules allow you to specify the number of conditions that must be satisfied and also allow you to place requirements and restrictions on conditions.

After you define the number of conditions in the upper portion of the window, you must save your changes before you can define the conditions in the lower portion of the window.

This window is composed of the Rule Umbrella section and the Rule Detail section.

Rule Umbrella section

Updated: August 27, 2020

Use this section to define the rule umbrella.

Fields	Descriptions
From Term	First term in which this rule is in effect. Display only.
To Term	Last term in which this rule is in effect. Display only.
Rule	Rule code entered in **Rule** field in the Course/Attribute Attachment window. Display only.

Fields	Descriptions
	Edit Rule Text window
Description	Description of the rule. Required.
Rule Text	Check box used to indicate whether text has been associated with this rule. Use the **Search** button to access the Rule Text window.
Required Number of Conditions	Number of conditions required for this rule.
Required Credits Per Condition	Number of required credits for each condition, if appropriate.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits Per Condition** field or the **Required Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.) See the *Connectors* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about connectors.
Required Courses Per Condition	Number of required courses for each condition.
Maximum Credits Per Condition	Maximum number of credits that can be used per condition.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits Per Condition** field or the **Maximum Courses Per Condition** field, or both. Use the **Connector** option button group to indicate whether

Fields	Descriptions
	the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses Per Condition	Maximum number of courses that can be used per condition.
Total Required Credits	Total number of credits required to satisfy the entire rule.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Required Credits** field or the **Total Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Required Courses	Total number of courses required to satisfy the entire rule.
Total Maximum Credits	Maximum number of credits which may be used to satisfy the entire rule.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Total Maximum Credits** field or the **Total Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Total Maximum Courses	Maximum number of courses that can be used to satisfy the entire rule.

Mouse	Keyboard	
Comments	Edit	Opens the Rule Text window

Rule Detail section

Updated: August 27, 2020

This section displays the detail for the rule umbrella.

Fields	Descriptions
Data Exists Indicator (untitled)	Indicator for whether data exists for the row. If so, an asterisk (*) is displayed in this field. Display only.
Condition	Condition defined on this row. Display only.

Fields	Descriptions
	The system determines conditions based on the way in which you define the detail lines. For example, all entries using the same set will have a single condition number, because all are part of one condition. Review the condition indicators to determine whether you have defined the detail requirements correctly and to understand how compliance interprets the required number of conditions specified in your rule umbrella.
Set	User-defined identifier for the set to which this requirement belongs, if applicable. The value can be alphanumeric, but must begin with an alpha character. See the *Sets and Subsets* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site for more information about sets and subsets.
Subset	User-defined identifier for the subset to which this requirement belongs, if applicable. The value must be a three-digit number. If only one or two digits are entered, the system inserts leading zeroes to cause the subset to sort properly.
Rule	User-defined identifier for the rule for this requirement, if applicable. The system does not validate codes entered in this field; you must therefore be careful not to use the same code for different rules within the same area. See the *Rules* section in the *Common Concepts* chapter of the *Banner Student CAPP* content in the *Banner Student Use* content in

Fields	Descriptions
	the Ellucian Documentation site for more information about rules. Select the **Search** button for this field to display the Course/ Attribute Attachment Rules window. Edit Course/Attribute Attachment Rules window
Subject	Code of the subject associated with the required course. Select the **Search** button for this field to display the Subject Validation (STVSUBJ) list. List Subject Validation (STVSUBJ)
Course Number Low	Course number that, when combined with the subject code, is a specifically required course, or the lowest number in a range of courses that can satisfy the requirement. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Course Number High	Highest number in a range of courses that can satisfy the requirement. A value can be entered in this field only if a value has been entered in the **Course Number Low** field. Select the **Search** button for this field to display the Existing Courses List. Count Hits Existing Courses List
Use Catalog	Check box used to indicate whether the system should use only those courses within the range specified in the **Course Number Low** and **Course Number High** fields that are defined in your course catalog.

Fields	Descriptions
	If this check box is cleared, compliance will use any course the student has completed (for example, academic history or transfer) in-progress or planned to attempt to meet the requirement.
Course Attribute	Code of the course attribute associated with this requirement, if applicable. You can define a requirement as a single course attribute, so that any course with the attribute satisfies the requirement, or as a combination of values, so that a course must meet all of the specifications to satisfy the requirement. Select the **Search** button for this field to display the Degree Program Attribute Validation (STVATTR) list. List Degree Program Attribute Validation (STVATTR)
Student Attribute	Code of the student attribute associated with this requirement, if applicable. If a requirement is for a student attribute, the only other values for the requirement that can be defined are: • **Set** • **Subset** • **Compliance Credits** • **Compliance Courses** Select the **Search** button for this field to display the Student Attribute Validation (STVATTS) list. List Student Attribute Validation (STVATTS)
Year Rule	Number of years within which the course must be taken. When compliance is performed, the evaluation term is used to determine the term from which year rule limits are measured.

Fields	Descriptions
	A year rule can also be defined at the program, area, or group level. If a year rule is already in effect at a higher level, you can be more restrictive in the detail requirement, but you cannot be less restrictive at a lower level.
Minimum Grade	Minimum grade earned for the course to satisfy the requirement. The restriction applies only to grade codes with levels that match the native course level for the group. Minimum grades can also be defined at the program, area, or group level. If a minimum grade is already in effect at a higher level, you can be more restrictive for the detail requirement, but you cannot be less restrictive at a lower level. Select the **Search** button for this field to display the Grade Code Maintenance (SHAGRDE) page. List Grade Code Maintenance (SHAGRDE) page
Minimum Credits Per Course	Minimum number of credits earned for the course to satisfy the requirement.
Maximum Credits Per Course	Maximum number of credits for the course to satisfy the requirement.
Use Split Courses	Check box used to indicate whether the remaining credits from a course that was partially used to satisfy another requirement can be used to satisfy this one. Course credits are split only when a requirement or restriction has a maximum number of credits. The **Maximum Credits** field controls whether a course will be split if it has more credits than are required to satisfy a requirement or would cause a restriction to be exceeded. Example: A student who is an English major has taken ENGL 1050 (a

Fields	Descriptions
	literature course [attribute = `LIT`] that can be taken for variable credits based on the amount of outside reading) for 4 credits. The English major requires exactly 3 credits in ENGL 1050 (required minimum credits = `3` and required maximum credits = `3`), and also requires at least 6 credits in literature courses (attribute = `LIT`). If the literature attribute requirement allows split courses to be used, the remaining 1 credit from ENGL 1050 would be applied to the attribute requirement.
Required Credits	Minimum number of credits required to satisfy the requirement.
Connector None/ And/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Required Credits** field or the **Required Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use both values (**And**), either value (**Or**), or only one value (**None**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Required Courses	The minimum number of courses required to satisfy this requirement. Optional.
Maximum Credits	Maximum number of credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Maximum Credits** field or the **Maximum Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Maximum Courses	Maximum number of courses that can be used to satisfy this

Fields	Descriptions
	requirement.
Must Take In or After Term	Earliest term in which a course can be taken to satisfy this requirement. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Must Take Before Term	Last term in which a course can be taken to satisfy this requirement. If a value is entered, it must be equal to or greater than the start term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Use Transfer Courses	Check box used to indicate whether transfer work can be used to satisfy this requirement.
Transfer Credits	Maximum number of transfer credits from a course or range of courses that can be used to satisfy this requirement. A maximum number of credits specified in this field could cause a course to be split and the remaining credits applied to requirements that allow split courses to be used.
Connector None/Or	Option group to indicate which value(s) the system should use. You can enter a value in either the **Transfer Credits** field or the **Transfer Courses** field, or both. Use the **Connector** option button group to indicate whether the system should use only one value (**None**) or either value (**Or**). (If using the **None** connector, a value can be entered in only one of the two fields.)
Transfer Courses	Maximum number of transfer courses that can be used to satisfy

Fields	Descriptions
	this requirement.
Count in GPA	Check box used to indicate whether work used to satisfy this requirement should be used in GPA calculations.
Compliance Credits	Number of credits that can accumulate toward group, area, and program general requirements after this requirement is satisfied. The value can be higher or lower than the actual number of credits used.
Compliance Courses	Number of courses that can accumulate toward group, area, and program general requirements after this requirement is satisfied. The value can be higher or lower than the actual number of courses used. When compliance credits/courses are specified, the detail requirements are processed normally, but the compliance credits/courses are used instead of the actual credits/courses. Compliance credits/courses are used only in the calculation of group, area, or program total required credits/courses. Example: You require that a student take at least two physical education courses, but the physical education credits do not accumulate toward the requirements for the degree. You define the requirement to include the courses that satisfy the requirement, but set compliance credits and courses to `0`.
Action	Code of the action (for example, waive, substitute, eliminate) associated with this adjustment. Select the **Search** button for this field to display the Action Code Validation (STVACTN) list. List Action Code Validation (STVACTN)
Adjusted Credits	Number of credits that can accumulate toward group, area, and

Fields	Descriptions
	program minimum credit requirements, even though the requirement has been waived. Credits can be entered only when a waiver action code that counts is entered. A waiver action code that counts is one in which the requirement is waived and the credits that were associated with the original requirement are counted as waived. Waiver action codes that do not count waive the original requirement, but the credits associated with the original requirement need to be made up from elsewhere.
Adjusted Courses	Number of courses that can accumulate toward group, area, and program minimum courses requirements, even though the requirement has been waived. Courses can be entered only when a waiver action code that counts is entered.
Campus	Code of the campus associated with the requirement, if the course must be taken on a specific campus to satisfy the requirement. Course campus is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
College	Code of the college associated with the requirement, if the course must be taken at a specific college to satisfy the requirement. Course college is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the College Validation (STVCOLL) list. List College Validation (STVCOLL)
Department	Code of the department associated with the requirement, if the course must be taken within a specific department to satisfy the

Fields	Descriptions
	requirement. Course department is associated only with institutional work, not transfer work. Select the **Search** button for this field to display the Department Validation (STVDEPT) list. List Department Validation (STVDEPT)

Rule Text window

Updated: August 27, 2020

Use the Rule Text window to enter text for the course attachment rule.

Fields	Descriptions
Text	Text associated with the course attachment rule. There is no word-wrap in the lines. When you reach the line limit, the cursor stays in the same position and types over the last character.
Print	Compliance print type associated with the line of text. This allows you to specify which lines are printed on different compliance documents. After the text is saved, the system displays the rows in print code order when you query the information. Lines with no print code appear first. Select the **Search** button for this field to

Fields	Descriptions
	display the Compliance Print Codes (STVPRNT) list. List Compliance Print Codes (STVPRNT)

Group Requirements (SMQSGDF) page

Updated: August 27, 2020

The Group Requirements (SMQSGDF) page is displayed when you choose to default requirements into a group adjustment window. The page itself is not accessible through the navigation menu or Direct Access, and the windows for this page can be accessed only through the Student Group Adjustments (SMASGROP) page.

Default All Detail window

Updated: August 27, 2020

Use the Default All Detail window to copy an existing group's requirements to a student's group adjustment record.

Note: This window is available only if no group-level requirements have been defined for the student's group adjustment record.

This window can be accessed only from the key block of the Student Group Adjustments (SMASGROP) page.

This window is composed of the Display-Only Block and the Default block.

Display-Only section

Updated: August 27, 2020

This section displays details about the record to which group information is being defaulted.

Fields	Descriptions
ID	Banner® ID of the person for whom you want to adjust group

Fields	Descriptions
	requirements.
Term	Term in which the group adjustments began.
Area	Code of the group for which requirements are being adjusted.
Catalog	Academic year to which the term belongs.
Student Level	Student level associated with the group.
Course Level	Native course level associated with the group.

Default section

Updated: August 27, 2020

Use this section to specify the group from which you want to default all requirements.

Fields	Descriptions
Default From Group	Group from which to copy details. When a valid code is entered, the description is automatically displayed. Select the **Search** button for this field to display the Existing Group Inquiry (SMIGROP) page. Count Hits Existing Group Inquiry (SMIGROP) page

Student Prior Activities (SOAACTC) page

Updated: March 16, 2023

Add or update prior activities (higher education, sports, and learning) for a person.

You do not need a person to have a recruiting or admissions record. You can create, copy, and delete records using this page.

Key block

Updated: March 16, 2023

Enter the person's ID.

Fields	Description
ID	Identification number of the person for whom the appointment is scheduled. You can also use this field to search for or create a new person record.

Student Prior Activities section

Updated: March 16, 2023

Enter the student's priority activity details.

Fields	Description
Activity Code	Code of the activity. This is an LOV based field and the values are defined in the STVACTC table.
Source	Source of the record, read-only. When you save the record, this field displays the source.
Activity Start Date	Start date of the activity.
Activity End Date	End date of the activity.
Activity Description	Text box to enter the description of the activity.

Administrator Role Rules (SOAADAS) page

Updated: August 27, 2020

This page allows you to define a combination of rules to be used in assigning different administrators (recruiter, reader, alumni recruiter, etc.) to high school and person records.

The page allows institutions to use many fields available within Banner® to determine how a specific administrative role should be assigned. Examples of fields which are included are: college code, campus, level, home address state, EPS market code, geographic region code, high school code, degree, program, ethnicity, gender, etc.

The page can be entered in query mode, allowing you to see which rules have been defined for the administrator ID in the key.

- If you enter a role in the key, only rules matching that value are displayed.
- If an effective term is entered in the key, all rules for that effective term and earlier are displayed.
- If the **Active Only** check box is checked, only active rules for this administrator ID are displayed.

To create a new rule for the administrator ID in the key, enter the appropriate effective term and role for the new rule in the Rule Definitions section. The system automatically creates the rule number after the new rule assignments have been saved.

Access the Assignment Rules section, and define the specific elements that govern the new rule.

The fields that are available have been predefined in the Administrator Assignment Data Element Validation (STVADDA) page. The logic is an OR condition within like data elements and an AND condition between different data elements. If more than one rule ID exists for an administrator/role combination, OR logic is used between the rules.

Fields	Descriptions
Active	Rules can be inactivated by unchecking the **Active** check box in the Rule Definitions section. Only rules that are active can be modified in the Assignment Rules section.
Data Element	Use List from the **Data Element** field to see the Administrator Assignment Data Element Codes Lookup button.
Operator	The **Operator** field can be set to either "=" equal or "<>" not equal.
From Value	Use List from the **From Value** field to assign the appropriate value for the corresponding data element.
To Value	You may designate a range of values for a data element using List from the **To Value**

Fields	Descriptions
	field, for example a ZIP Code range of 06000 to 06599.

Administrator's Assignments (SOAAINF) page

Updated: August 27, 2020

This page displays the IDs and names of everyone assigned to the administrator/role combination identified in the Key block.

For example, if Russell Jones is a recruiter for Banner® University, and using the Administrator Role Rules (SOAADAS) page was assigned as the recruiter for all high schools in Michigan, then SOAAINF would display all IDs having recruiting records which had been entered into Banner for a specific term, that had associated high schools with an address in Michigan. The page obtains this information by querying the SORAROL table for the administrator ID, role, and term in the key.

Use the Remember ID item in the Options Menu to carry one of the IDs to another page.

Assign Administrator window

Updated: August 27, 2020

Use the Assign Student item in the Options Menu to access the Assign Administrator window. This window is used to view and assign an administrator to the person in this window's **ID** field. The administrator who is assigned is the ID in the key of the main window.

Person Appointments/Contacts (SOAAPPT) page

Updated: August 27, 2020

Add or update appointments, contacts, and application details for a person.

A person is not required to have a recruiting or an admissions record. An appointment may be scheduled to occur on campus or at a source. Appointments may be scheduled before occurring or recorded after they have occurred.

The result of the appointment determines whether a contact is created for the appointment based on the result code (STVRLST) that is entered. If the contact qualifies the person for communication plan material for an admissions or recruiting record, that will also be generated automatically. If a contact was created by the appointment result, it will not be deleted.

Key block

Updated: August 17, 2023

Specify the person's ID and appointment start and end dates.

Fields	Descriptions
ID	Identification number of the person for whom the appointment is scheduled. You can also use this field to search for or create a new person record.
Appointment Range Start Date	Beginning date of the person's appointment.
End Date	Last date of the person's appointment.

Main window

Updated: August 17, 2023

Use this window to add and update appointments, application details, and a contact person.

Fields	Descriptions
Appointments section	
Appointment Date	Person's scheduled contact or appointment date with the institution. The current date defaults, but may be changed. The source of this value is the current database date.
From Time	Start time of the person's scheduled appointment. The time must be entered using the HHMM format on a 24-hour clock. For example, a start time of 10:30 AM should be entered as 1030. An end time of 3:30 PM should be enter as 1530.

Fields	Descriptions
To Time	End time of a person's scheduled appointment. The time must be entered using the HHMM format on a 24-hour clock. For example, an end time of 11:30 AM should be entered as 1130; an end time of 3:30 PM should be entered as 1530.
Contact	How the person was notified of the appointment. If a contact type is entered, and the result entered for the appointment should generate a contact, the contact will appear in the Contact section after the appointment result is saved. If a contact is generated in the Contact section, any new materials associated with an active communication plan for that student which includes the contact in the material rules will automatically be generated. After the result code is entered, a new contact type may not be entered, if it was previously blank. The contact type can be deleted, but not changed. Choices come from the Contact Code Validation (STVCTYP) list of values.
Interviewer	ID that belongs to the interviewer for the appointment. Either an interviewer or a recruiter may be associated with the appointment, but not both.
Recruiter	Code for the recruiter associated with the appointment. Either an interviewer or recruiter must be associated with an appointment, but not both. Choices come from the Recruiter Identification Validation (STVRECR) list of values.
Source Code	Source associated with the appointment. After the result code is entered, a new source code may not be entered if it was previously blank, and an existing source code may not be changed to a different source code. The source code, however, may be deleted. Choices come from Source/Background Institution Code

Fields	Descriptions
	(STVSBGI) list of values.
Interview Results	Result of the interview. If a contact is associated with the appointment, and if the result code is flagged to generate a contact, a contact record is created and displays in the **Contact Type** field of the Contacts section. Choices come from the Appointment Result Validation (STVRSLT) list of values.
Application Details section You can view this section when the interview details from DfE comes to Banner.	
Admissions Application Number	Displays the admissions application number.
Interview ID	Interviewer's ID for the appointment.
Decision Code	Decision code that implies the decision applied for application (codes are displayed from the STVAPDC page).
Term	Term code.
Contacts section Records all contacts between the person and the institution. When a contact is entered, materials to be mailed are generated automatically based on the material rules created on the Material (SOAMATL) page. If material is created that only requires a specific contact to exist, and no other material rules are used, then when that contact is added for a person the material is generated on the Student Mail (SUAMAIL) page only if the material is also part of the person's communication plan.	
Contact Type	Type of contact between the institution and the person. Contacts may be entered directly, or created when a contact is associated with an appointment and the result code of the interview is flagged to generate a

Fields	Descriptions
	contact. More than one contact with the same contact code may be entered if the contact dates are different. The contact code entered may automatically generate materials depending on the person's communication plan and the rules for generating materials on the Materials Rules (SOAMATL) page. Choices come from the Contact Type Code (STVCTYP) list of values.
Contact Date	Date the contact type was entered. The default is the current date. Use the format DD-MON-YYYY.

Create a contact or appointment

Updated: August 17, 2023

You can create a contact or an appointment.

Procedure

1. Access the Person Appointments/Contacts (SOAAPPT) page.
2. In the Key block, specify the person's details for which you want to create an appointment, application, and contact person detail.
3. Go to the **Appointments** section.
4. Enter the start date and end date of the appointment.
5. Enter or search for the interviewer ID.
6. Enter the application details.
7. Go to the **Contacts** section.
8. Enter or search for the contact type.
9. Save the record.

Administrator Role (SOAAROL) page

Updated: August 27, 2020

This page is used to display all the administrative roles assigned to the ID in the Key block.

Because individuals can hold more than one type of administrative role, this page allows you to see all the roles that have been assigned to different individuals. This page is populated with data from the SORAROL table.

Attendance Tracking Meeting Rule Setup (SOAATMT) page

Updated: August 27, 2020

Use the Attendance Tracking Meeting Rule Setup (SOAATMT) page to define attendance tracking meeting rules for CRNs, if required.

This page is optional and provides a specific method of control for faculty members. When you save a record, the system creates an attendance tracking rule record for the chosen class meeting session of the CRN.

This page allows an institution to configure attendance tracking at the meeting level. They can fine tune their meeting tracking requirements, while protecting the higher level tracking configuration set up on SOAATRK for term, part of term, subject, and course.

This page is composed of the following sections:

- Key block
- Section Details
- Section Meetings
- Attendance Tracking Meeting Rule

Key block

Updated: August 27, 2020

Use the key block to enter the term and CRN for the attendance tracking meeting rule.

Fields	Description
Term	Code and description of the term for the attendance tracking rule.
CRN	CRN number and description for the attendance tracking meeting rule.

Section Details

Updated: August 27, 2020

Use the Section Details information to view the course data for the rule.

Fields	Description
Subject	Subject of the course.
Course Number	Course number.
Title	Course title.
Course Alias	The values in the Course Alias field are read-only and populated if Course Alias is defined on SCACRSE page for the appropriate Subject, Term and Course combination.
Campus	Campus where the course is offered.
Schedule Type	Schedule type associated with the course.
Part of Term	Part of term for the course.
Credit Hours	Credit or contact hours of the course.
Total Students	Total number of students registered in the section of the course.
Total Current Students	Current total of students registered in the section of the course who are active, not withdrawn.
Active Rule	Attendance tracking meeting rule ID and details that apply to the CRN. Displayed are the rule ID, tracking unit method, whether Self-Service access is enabled, and the start and end dates.

Fields	Description
	This is the rule that will be applied if no data is stored in this page. Changes to meetings on this page will take precedence over the rule displayed.

Section Meetings

Updated: August 27, 2020

Use the Section Meetings information to view the meeting type, date, day, and time data for the rule.

Fields	Description
Meeting Type	Code of the CRN/section meeting to which the rule applies.
Start Date	Date when attendance tracking begins.
End Date	Date when attendance tracking ends.
Monday	Check box used to indicate that the section meets on Monday.
Tuesday	Check box used to indicate that the section meets on Tuesday.
Wednesday	Check box used to indicate that the section meets on Wednesday.
Thursday	Check box used to indicate that the section meets on Thursday.
Friday	Check box used to indicate that the section meets on Friday.
Saturday	Check box used to indicate that the section meets on Saturday.
Sunday	Check box used to indicate that the section meets on Sunday.
Start Time	Time when attendance tracking begins.
End Time	Time when attendance tracking ends.

Fields	Description
Session	Session identifier of the class session meeting. This comes from the `SSRMEET_CATEGORY` column.

Attendance Tracking Meeting Rule

Updated: August 27, 2020

Use this section of the page to enter or display tracking and Self-Service data for the section meeting record selected in the Section Meetings information. The records in the Attendance Tracking Meeting Rule section of the page are child records of the master records in the Section Meetings information.

The **Display Class** and **Tracking Unit** fields are required for attendance tracking. The **Track Class Attendance**, **Tracking Start Date**, and **Tracking End Date** fields are used to determine whether the faculty member has view only access or can enter data and for what date range.

When a rule exists in SOAATMT for the CRN and meeting combination, it applies to the student and the faculty member. When a rule does not exist in SOAATMT for the CRN and meeting combination, then the rules in SOAATRK are evaluated for the student and faculty member. When no applicable rule exists in either SOAATMT or SOAATRK, the CRN and meeting are not displayed. Classes are only displayed for rules that are set up by term, to limit the number of terms displayed to the students.

Fields	Description
Display Class	Check box used to indicate whether attendance tracking is active for the CRN and term combination in the key block. Default is checked or Y.
Tracking Unit	Code of the unit (method) used to record attendance for the rule. Valid values are: Present/Absent, Hours Present, Hours Absent. These are saved to the database as 001, 002, and 003 respectively.

Fields	Description
Track Class Attendance	Check box used to indicate whether attendance recording is available for the meeting in Self-Service. Default is checked or Y. When this indicator is unchecked, the records are not displayed in Self-Service. This field serves as a master control for quickly turning Self-Service access on or off.
Tracking Start Date	Date when attendance recording begins in Self-Service for the meeting. This date should be equal to or later than the meeting start date. Attendance can only be recorded for meetings that have already occurred. These date settings allow the display of a CRN in the Banner Faculty and Advisor Self-Service pages for this date range, but data entry is not permitted until the first meeting has occurred.
Tracking End Date	Date when attendance recording ends in Self-Service for the meeting. Attendance can only be recorded for meetings that have already occurred. These date settings allow the display of a CRN in the Banner Faculty and Advisor Self-Service pages for this date range, but data entry is not permitted until the first meeting has occurred.

Attendance Tracking Rule Setup (SOAATRK) page

Updated: August 27, 2020

Use the Attendance Tracking Rule Setup (SOATTRK) page to define and maintain attendance tracking rules. When you save a record, the system creates an attendance tracking rule record.

You can set up attendance tracking at different levels, such as by term, subject, course, CRN, or part of term. This allows you to define the setup at any time, without the need for post-registration setup.

When rules are entered for a term, a number of checks are performed to ensure that no duplicates exist based on the combination of term, part of term, subject, course number, or CRN values.

In addition to these regular checks (such as you cannot have two part of term rules for the same part of term), a unique check is performed for course numbers. Specifically, you cannot have a rule for a course number and a second rule for the same course number combined with a subject. For example, if you have a rule for course number '123', you cannot also have a rule for 'MATH 123'.

This page is composed of the following sections:

- Key block
- Attendance Tracking Rule

Key block

Updated: August 27, 2020

Use the key block to enter the term for the attendance tracking rule.

Fields	Description
Term	Code and description of the term for the attendance tracking rule.

Attendance Tracking Rule

Updated: August 27, 2020

Use the Attendance Tracking Rule section to enter the part of term, subject, course or

CRN, tracking, and Self-Service data for the rule. These items are not required but can be used to specify the attendance tracking setup.

The **Display Class** and **Tracking Unit** fields are required for attendance tracking. You must turn on attendance tracking for the rule and define the tracking method. Check the **Display Class** indicator to display classes to faculty members so they can verify their assignments. Faculty members can view their assigned classes before the term begins based on the start date of the rule and the meeting start date. Start dates for term, part of term, or CRN, are not considered. When the current date is between the rule start and end dates, the class is displayed. When the current date is equal to or after the first meeting date, attendance can be taken.

The **Track Class Attendance**, **Tracking Start Date**, and **Tracking End Date** fields are used to determine whether the faculty member has view only access or can enter data and for what date range. When the date is within the defined date range, data entry is allowed. When it is not with the defined date range, users can only view the data.

Check the **Track Class Attendance** indicator and set up the **Tracking Start Date** and **Tracking End Date** fields to activate attendance tracking. Clear the **Track Class Attendance** indicator to turn off attendance tracking. You do not need to modify the **Tracking Start Date** and **Tracking End Date** fields.

Fields	Descriptions
Rule Code	Attendance tracking rule code. This is a unique sequence number assigned to the rule. It allows users to determine which rule is in use for a CRN.
Part of Term	Part of term code for the term in the Key block.
Subject	Subject code for the course.
Course Number	Course number.
CRN	Course reference number assigned to the section of the course.
Display Class	Check box used to indicate whether attendance tracking is active for the rule. Default is checked or Y.
Tracking Unit	Code of the unit (method) used to record attendance for the rule. Valid values are: Present/Absent, Hours Present, Hours Absent.

Fields	Descriptions
	These are saved to the database as 001, 002, and 003 respectively.
Track Class Attendance	Check box used to indicate whether attendance recording is available for the rule and level in Self-Service. Default is checked or Y. When this indicator is cleared, the records are not displayed in Self-Service. This field serves as a master control for quickly turning Self-Service access on or off.
Tracking Start Date	Date when attendance recording begins in Self-Service for the rule. This date should be equal to or later than the meeting start date. Attendance can only be recorded for meetings that have already occurred. These date settings allow the display of a CRN in the Banner Faculty and Advisor Self-Service pages for this date range, but data entry is not permitted until the first meeting has occurred.
Tracking End Date	Date when attendance recording ends in Self-Service for the rule. Attendance can only be recorded for meetings that have already occurred. These date settings allow the display of a CRN in the Banner Faculty and Advisor Self-Service pages for this date range, but data entry is not permitted until the first meeting has occurred.

Web Application Term Display Control (SOAATRM) page

Updated: August 27, 2020

This page is used to specify the terms for which Student Self-Service admissions applications can be submitted and the calendar periods in which applications can be submitted for each term.

The information on this page allows each institution to control when admissions applications can be submitted through the Web. Multiple date ranges are allowed for a specific term, as long as the date ranges for each entry do not overlap. Multiple terms can be available at the same time.

Fields	Descriptions
Term	Use the **Term** field to specify the term for which application availability dates are to be maintained. One term may have more than one set of application availability dates, as long as the dates do not overlap. Required. Must be valid on the Term Code Validation (STVTERM) page. List Term Code Validation (STVTERM)
Description	The **Description** field displays the description of the term code.
Start Date	Use the **Start Date** field to specify the beginning date of a date range in which Web admissions applications will be available for the specified term. Must be entered in a valid date format and be a valid date. Required.
End Date	Use the **End Date** field to specify the ending date of a date range in which Web admissions applications will be available for the specified term. Must be entered in a valid date format, be a valid date, and be greater than the Start Date. Required.
Activity Date	**Activity Date** is system-maintained. It is set to the system date when a record is added or changed.

Source/Background Institution Year (SOABGIY) page

Updated: August 27, 2020

The Source/Background Institution Year Page is used to capture yearly information about a source or background institution. Much of the information captured is not validated to allow for flexibility. All of the data are dependent on calendar year, providing a historical record of the information.

The Source or Background Institution Base (SOASBGI) page must be established before using this page.

Characteristics window

Updated: August 27, 2020

Use this window to enter and maintain information regarding source characteristics. This window is accessed using the Characteristics item in the Options Menu.

Degrees window

Updated: August 27, 2020

Use this window to enter and maintain information regarding degrees offered by the source institution. This window is accessed using the Degrees Offered item in the Options Menu.

Diplomas window

Updated: August 27, 2020

Use this window to enter and maintain information regarding diplomas offered by the source institution. This window is accessed using the Diplomas Offered item in the Options Menu.

Test Results window

Updated: August 27, 2020

Use this window to enter the source institution's mean test scores. This window is accessed using the Mean Test Scores item in the Options Menu.

Transfer Articulation Institution (SOABGTA) page

Updated: August 27, 2020

The purpose of the Transfer Articulation Institution Page is to capture and maintain information pertaining to the transfer institution and its articulation practices, calendar type, transfer levels, and any comment information.

The key to the page is the institution code and the effective term associated with the transfer information. Transfer institution information can be built for either a college or high school.

The transfer institution must be established on the Source/Background Institution Validation (STVSBGI) page before building data on this page. Valid transfer levels must be established on this page before creating the valid transfer grades on the Transfer Code Maintenance (SHATGRD) page.

Calendar Day Information (SOACALD) page

Updated: August 27, 2020

Use the Calendar Day Information (SOACALD) page to enter or display information specific to each day on each campus for institutional reporting.

For each day, you can define a day type, which can indicate the terms in which the day falls. Five day attributes can also be assigned to a day. These attributes can be defined by your institution as needed. Examples of day attributes are instructional days, a holidays, exam days, and so on.

After entering day information for one campus, you can copy these values to different campuses. You can copy from campus to campus only within the year specified in the Key block. To copy, enter the desired year and campus and then use Duplicate Record.

Note: This page does not tie into any other Schedule module functionality or schedule exclusions.

Main window

Updated: August 27, 2020

This window is composed of the key block and the Day Attribute Information section.

Key block

Updated: August 27, 2020

Use this section to specify the year and campus for which you want to define day attributes.

Fields	Descriptions
Year	Calendar year in YYYY format.
Campus	Code of the campus.

Fields	Descriptions
	Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)

Day Attribute Information section (California Localization)

Updated: August 27, 2020

Use this section to define day attributes for dates within the calendar year specified in the key block.

The day attribute fields in this block can be used to maintain information about a day that is specifically required by the institution. These fields and the supporting validation forms allow you to determine which additional data must be maintained regarding the day. Each of the day attribute codes is supported by one of the Day Attribute (Number) Validation Pages (STVATRA through STVATRE), which are used to maintain institution-specific information. **Day Attribute One** values are derived from the Day Attribute One Validation (STVATRA) page, **Day Attribute Two** values are derived from the Day Attribute Two Validation (STVATRB) page, and so on through **Day Attribute Five** and the Day Attribute Five Validation (STVATRE) page.

Fields	Descriptions
Date	Date to which the attributes in this block apply. The date must be in the calendar specified in the key block. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
Day	Day associated with the date, automatically displayed when a valid value is entered in the **Date** field. Display only.
Day Type	Code for the day type. Code of the date's principal term. This field is not used in any processing within the Schedule

Fields	Descriptions
	module, therefore, you can use this field as needed for institutional reporting. Select the **Search** button for this field to display the Institutional Type of Day Validation (STVDAYT) list. List Institutional Type of Day Validation (STVDAYT)
Day Attribute One	Code for day attribute one. Select the **Search** button for this field to display the Day Attribute One Validation (STVATRA) list. List Day Attribute One Validation (STVATRA)
Day Attribute One Description	Description of the day attribute, automatically displayed when a valid value is entered in the **Day Attribute One** field. Display only.
Day Attribute Two	Code for day attribute two. Select the **Search** button for this field to display the Day Attribute Two Validation (STVATRB) list. List Day Attribute Two Validation (STVATRB)
Day Attribute Two Description	Description of the day attribute, automatically displayed when a valid value is entered in the **Day Attribute Two** field. Display only.
Day Attribute Three	Code for day attribute three. Select the **Search** button for this field to display the Day Attribute Three Validation (STVATRC) list. List Day Attribute Three Validation (STVATRC)
Day Attribute Three Description	Description of the day attribute, automatically displayed when a valid value is entered in the **Day Attribute Three** field. Display only.
Day Attribute Four	Code for day attribute four.

Fields	Descriptions
	Select the **Search** button for this field to display the Day Attribute Four Validation (STVATRD) list. List Day Attribute Four Validation (STVATRD)
Day Attribute Four Description	Description of the day attribute, automatically displayed when a valid value is entered in the **Day Attribute Four** field. Display only.
Day Attribute Five	Code for day attribute five. Select the **Search** button for this field to display the Day Attribute Five Validation (STVATRE) list. List Day Attribute Five Validation (STVATRE)
Day Attribute Five Description	Description of the day attribute, automatically displayed when a valid value is entered in the **Day Attribute Five** field. Display only.
Copy To Year	Year to which to copy the current values. This must be the same year as in the key block.
Campus	Code of the campus to which the current values should be copied. After you have entered values in the **Copy To Year** and **Campus** field, you can perform a Duplicate Record to copy the values. You cannot perform a Duplicate Record until the current record is saved.
Activity Date	Date on which the record was last updated. Display only.

California Localization

The field and description apply to California only.

Fields	Descriptions
Day Type	Code of the date's principal term.
Instruction Status	Code of the type of instructional day (primary, secondary, or neither).
Instruction Status	Description associated with the instructional day type code.

Fields	Descriptions
Description	
Flex Status	Code of the flex status.
Flex Status Description	Description associated with the flex status code.
Census Status in Primary Term	Code indicating whether the date is the first census day for the primary term.
Census Status in Primary Term Description	Description associated with the census status code.
Holiday Status	Code of the holiday status.
Holiday Status Description	Description associated with the holiday status code.
Exam Status	Code of the final exam status.
Exam Status Description	Description associated with the final exam status code.

Complementary Activity Program Rules (SOACAPR) page

Updated: June 17, 2021

Create and define the complementary activity program rules for a particular category and activity.

Key block

Updated: June 17, 2021

Specify the program code and the term for which you want to create the Complementary Activity program rules.

Field	Description
Program	Banner program code for which the Complementary Activities general requirements are defined.
Term	Effective term code from which the Complementary Activities general requirements are defined for the program.

Base block

Updated: June 17, 2021

Enter the Complementary Activity program rule details for the program code and term specified in the key block.

Field	Description
Program and Term Rules section	
Required Hours	Required number of hours to be taken to complete the Complementary Activities general requirements for the specified program.
Required Credits	Required number of credits to be taken to complete Complementary Activities general requirements for the specified program. **Note:** You need to either enter the Required Hours or Required Credits only.
Equivalent Credits	Number of hours a student must submit to be in compliance with one credit.
Category Rules for the Program section	
Category Code	Code that identifies the Complementary Activity category code for the program. The codes are listed in the LOV from the STVACCG page.
Category Description	Category code description.
Category Hours	Required number of hours which must be taken to complete the Complementary Activities category requirements for the program. **Note:** If you decide to enter the Required Hours in the Program and Term Rules section, you need to enter the Category Hours. The Category Hours should not exceed the Required Hours entered in the Program and Term Rules section.
Category Credits	Required number of credits which must be taken to complete the Complementary Activities category requirements for the program.

Field	Description
	Note: If you decide to enter the Required Credits in the Program and Term Rules section, you need to enter the Category Credits. The Category Credits should not exceed the Required Credits entered in the Program and Term Rules section.
Activity Rules for the Program section	
Activity Code	The code that identifies the Complementary Activities activity code for the program. The codes are listed in the LOV from the STVACTC page.
Activity Description	Activity code description.
Activity Hours	Required number of hours which must be taken to complete Complementary Activities activity requirements for the program. **Note:** The Activity Hours should not exceed the Category Hours entered in the Category Rules for the Program section.
Activity Credits	Required number of credits which must be taken to complete Complementary Activities activity Requirements for the program. **Note:** The Activity Credits should not exceed the Category Credits entered in the Category Rules for the Program section.

Complementary Activities Submission Admissions (SOACASA) page

Updated: June 17, 2021

Approve or reject the complementary activity submissions.

Key block

Updated: June 17, 2021

Specify the student's complementary activity submission record details for which you want to approve or reject.

Field	Description
ID	Student’s sequence identification number to uniquely identify a record.
Program	Program code of the submitted complementary activity.
Term	Term code of the submitted complementary activity.
Category Code	Category code of the submitted complementary activity.

Base block

Updated: June 17, 2021

Approve or reject complementary activity submission for the student details specific in the key block.

Field	Description
Complementary Activities Submission section	
ID	Student’s sequence identification number to uniquely identify a record.
Name	Student's name associated with the student's unique sequence identification number.
Category Code	Category code of the submitted complementary activity.
Activity Code	Activity code of the submitted complementary activity.
CA Request ID	Sequence number to uniquely identify a record.
Submission Date	Date of complementary activity submission.
Student Comments	Comment given by the student for the submitted complementary activity.
Document Submitted Indicator	Check box used to indicate whether a document has been submitted or not for the complementary activity.
Status	Status code of the submitted complementary activity.
Approval/Rejection Comment	Approval or rejection comment given by the admin for the submitted complementary activity.
Approved Hours	Hours approved for the submitted complementary activity.
Approval/Rejection Date	Date of approval or rejection of the submitted complementary activity.
Complementary Activities Summary section (Display only)	

Field	Description
By Program Required Hours	Activity summary of the required hours for a program.
By Program Hours Submitted	Activity summary of the program hours submitted.
By Program Approved Hours	Activity summary of the program approved hours for a program.
By Category Required Hours	Activity summary of the required hours for a category.
By Category Hours Submitted	Activity summary of the category hours submitted.
By Category Approved Hours	Activity summary of the approved hours for a category.

Complementary Activities Submission Rules (SOACASR) page

Updated: June 17, 2021

Associate the activity code to the document type.

Field	Description
Activity Code Rules section	
Activity Code	The code that identifies a complementary activity. The codes are listed in the LOV from the STVACTC page.
Activity Code Description	Activity code description.
Category Code	Category code of the submitted complementary activity.
Minimum Hours	Minimum number of hours a student can submit for the complementary activity.
Maximum Hours	Maximum number of hours a student can submit for the complementary activity.
Activity Document Types section	
Document Code	The code that identifies the complementary activity document type. The codes are listed in the LOV from the STVCADT page.
Document Description	Description of the complementary activity document type

Field	Description
	code.

Communication Plan Collector (SOACCOL) page

Updated: August 27, 2020

This page displays those people who have been added to the collector file for batch processing of communication plans.

Records are sorted alphabetically within the date of creation (day, month, year). The Communication Plan Processing Report (SORCPLN) updates these changes for communication plans in the collector file. Update the changes online by performing a Count Filter Hits function from the record you want to update.

The batch collector file is updated with communication plan information when the Electronic Prospect Load Process (SRTLOAD) is run, when the Student Type Update Report (SHRTYPE) is run, when the Admissions Decision Calculation Report (SARBDSN) is run if student records are created, or when changes are made to the general student information after a registration record exists.

Fields	Descriptions
Module	Pulldown list with the code of the module for the collector record. Valid values are: Recruiting saved to the database as R Admissions saved to the database as A Student saved to the database as S None saved to the database as Null
Term	Code of the term for the recruiting or application record.
Sequence Number	Administrative identifier, either the sequence number for the recruit or the admissions application number for the applicant.

Communication Plan Change window

Updated: August 27, 2020

The user may perform a Count Filter Hits function for a recruiting record with an Add New Comm Plan or Change Comm Plan status in the **Action** field of the main window to display and process communication plan changes in this window.

When Generate materials is displayed in the main window's **Action** field for a recruiting record, the Count Filter Hits function processes the communication plan changes and generates the materials. The window does not display in this instance.

Note: To exit from the window, you must make some change to the record (such as remove a plan and Save, change a plan and Save) or simply save the existing/assigned plans. Use the **Return** button to return to the main window of the page.

Fields

Updated: August 27, 2020

This section is used to define Category Code information.

The section contains the following fields:

Fields	Descriptions
Communication Plan	The communication plan code. List Communication Plan Validation (STVCPLN)
Description	Description of the plan code.
Recruit, Applicant, Learner	Radio group which displays the module the plan exists in: Recruit, Applicant, or Learner.
Term	The recruit term or the admissions term for the plan. If the plan is in Recruiting (radio group is set to Recruit), the List function accesses the Prospect Summary (SRASUMI) page. If the plan is in Admissions (radio group is set to Applicant), the List function accesses the Admissions Application Summary (SAASUMI) page.

Fields	Descriptions
	If the plan is in General Student (radio group is set to Learner), the List function accesses the General Student Summary (SGASTDQ) page. List Prospect Summary (SRASUMI) page List Admissions Application Summary (SAASUMI) page List General Student Summary (SGASTDQ) page
Sequence Number	The sequence number or the application number for the plan. If the plan is in Recruiting (radio group is set to Recruit), the List function accesses the Prospect Summary (SRASUMI) page. If the plan is in Admissions (radio group is set to Applicant), the List function accesses the Admissions Application Summary (SAASUMI) page. If the plan is in General Student (radio group is set to Learner), the List function accesses the General Student Summary (SGASTDQ) page. List Prospect Summary (SRASUMI) page List Admissions Application Summary (SAASUMI) page List General Student Summary (SGASTDQ) page
Active Plan	Check box indicates when checked that the communication plan is active. Only active communication plans display in this window. You can inactivate a plan by unchecking the **Active Plan** check box.
Pending Mail	Indicates whether mail exists for the plan. When the communication plan is first added, the field is blank, because the materials have not been created. This value cannot be changed. Choices are:

Fields	Descriptions
	checked-Unsent mail exists for the communication plan. This value is stored in the database as Y. unchecked-No pending mail exists for the plan. This value is stored in the database as N.
Delete Mail	Indicate whether to delete mail for the communication plan. This field can be changed to Y (checked) if there is pending mail for the plan and the **Active Plan** check box has been unchecked. This field cannot be changed when the **Active Plan** check box is checked because of processing that takes place when materials are created. Missing materials are created for all active communication plans. If you delete the mail on an active plan, the materials are recreated when you save the plan. If the **Active Plan** check box is checked, and the **Delete Mail** field is checked, the communication plan is deleted from the Communication Plan Assignment (SOAPLAN) page, along with any existing mail on the Student Mail (SUAMAIL) page. Choices are: checked-Delete communication plan mail. This value is stored in the database as Y. unchecked-Do not delete communication plan mail. This value is stored in the database as N.

Options

Updated: August 27, 2020

The following navigation options are available on the Communication Plan Change window.

Option	Description
Student Mail	Use the Student Mail item in the Options Menu to access the Student Mail

Option	Description
	(SUAMAIL) page to update/view mail for the current ID in the key block of the application page.
Return	Use the **Return** button or the Return to (Applicant, Recruit, or Prospect) item in the Options Menu to go back to the **Term** field on the main window of the application page. If the plan was initiated when a record was removed, the process will continue. This option will not return you to the main window if there are pending changes in the window. All changes must be saved before returning.
Start Over Button	Use the Start Over Button function to do a complete page rollback. The cursor will be returned to the Key of the application page. This function will not return you to the main window if there are pending changes in the window. All changes must be saved before returning. To access the Communication Plan Change window, all changes must have been saved on the application page, except in the case of the record being removed. If you do not make any changes in the Communication Plan Change window, you will not be prompted to save your changes.

Functions and Updatable Fields window

Updated: August 27, 2020

You may use Oracle functions to modify communication plan records.

Action	Description
Delete old plans	Use the Remove Record function. This will also automatically delete pending materials.
Insert new plan	Use the Insert Record function. You must enter the plan code and select the module. If the module is Recruiting or Admissions, you must also enter a term and sequence number.
Update plan	Change the active status and delete pending mail by changing the value of the **Active Plan** check box to checked or unchecked and the **Pending Mail** check box to checked or unchecked.
Next and Scroll Up	These functions are not allowed in the Communication Plan Change window. To navigate back to the main window of the application page, press the **Return** button**,** select the Return to (Applicant, Recruit, or Prospect) item in the Options Menu, or use the Duplicate Item function. All changes must be saved before exiting the Communication Plan Change window.

Communication Group (SOACGRP) page

Updated: August 27, 2020

Use this page to assign material codes to a communication group.

For example, suppose your institution decides to distribute athletic brochures. Instead of adding each athletic brochure to the communication plan individually, you can use group code processing to accomplish the same task. On SOACGRP, enter the group code for athletic brochures, then add the material codes for football brochures, baseball brochures, and field hockey brochures. Each material in this group is now associated with the communication plan.

Materials are generated based on a person's attributes of being a recruit, an applicant, or a student. When materials are changed for a group, all plans that use those materials are automatically changed as well. Groups of materials are set up, added to communication plans, and maintained at the group level. Overrides may occur at the plan level.

Note: You must establish communication group codes on the Communications Group Validation (STVCGRP) page before assigning material codes to them.

Main window

Updated: August 27, 2020

Use this window to assign materials to a communication group.

Key block

Updated: August 27, 2020

Use the key block to choose the appropriate communication group.

Fields	Descriptions
Communication Group	Group of related materials for use with communication plan. This value comes from the Communications Group Validation (STVCGRP) list. Select Valid Group Codes from the Option List, or use List to display valid values from STVCGRP. You can confirm that the code you selected is part of a communication plan by choosing Display Communication Plans from the Option List and reviewing the available plans. You can also use Count Filter Hits to display the plans. If there is no value in the **Communication Group** field, all communication groups and their associated plans are displayed for the query.

Plan Materials section

Updated: August 27, 2020

Use the Plan Materials section to select the materials you want to associate with a communication group.

Fields	Descriptions
Material Code	Material(s) to be sent.

Fields	Descriptions
	Choices come from the Material Codes (STVMATL) list. The material must first be defined on the Material (SOAMATL) page before you can add it to a communication group.
Wait Days	Number of days that must pass before materials are sent. Choices are: 0 (default) - 365-Number of days that must pass before materials are sent. 999-These materials are on hold. You cannot send these materials until the hold is removed.

Assign material codes to a communication group

Updated: August 27, 2020

You can assign the material codes to a communication group.

About this task

Procedure

1. Access the Communication Group (SOACGRP) page.
2. Enter the group code for the communication group.
3. Go to the Plan Materials section.
4. Enter the codes for materials you want to add to this group.
5. If appropriate, enter the number of days that need to pass before these materials are sent.

6. Repeat steps 4 and 5 for each material you want to add.
7. Save.

Curriculum Mapping (SOACMAP) page

Updated: August 27, 2020

Use this page to map Banner curriculum rules to external admission codes.

The page is primarily used for Australian clients to map Banner curricula (base rule and major rule) to Tertiary Admissions Center (TAC) course codes, and by UK clients to map Banner curricula (base rule and major rule) to Department for Education (DfE) course codes.

Curriculum mapping allows the clients to successfully populate correct curriculum rule numbers into electronic admissions tables when loading admissions application files from these external sources.

Curriculum mapping rules are saved for an academic year and can be copied to a different academic year using the SOPCROL Process.

The data is saved to the SKRPOFR table.

Key block

Updated: August 27, 2020

Use the key block to specify the academic year of the mapping rules.

Fields	Description
Academic Year	Code and description of the academic year of the curriculum mapping rules.

Curriculum Mapping section

Updated: August 27, 2020

Use the Curriculum Mapping section to create rules to map Banner curriculum (base and major rule) to external admission codes.

The same base curriculum and major combination can be mapped to multiple Admit Course codes as long as they are from different Admit Category codes or are in different terms

Fields	Description
Term	Term code for the curriculum mapping record.
Program	Program code for the curriculum mapping record.
Campus	Campus code for the curriculum mapping record. **Note:** If the campus has been specified for the base curriculum rule of the Program, it will be automatically populated here and cannot be changed.
Recruit	Indicates whether the curriculum rule is ON or OFF for module control for the Recruit module. Display only.
Admissions	Indicates whether the curriculum rule is ON or OFF for module control for the Admissions module. Display only.
Major	Major code for the curriculum mapping record.
Admit Category	Admissions category code for the curriculum mapping record.
Admit Course	Course code for admissions category for the curriculum mapping record.
Part of Term	Part of term for the curriculum mapping record.
Expiry Date	Expiry date for the curriculum mapping record.
Cohort	Cohort code for the curriculum mapping record.
Source/Background Institution	Source/Background Institution for the curriculum mapping record.
Full or Part Time	Full Time or Part Time indicator for the curriculum mapping record. Choices are: • Full Time • Part Time • None
Session	Session code for the curriculum mapping record.
Student Type	Student type for the curriculum mapping record.

Fields	Description
Residence	Residence code for the curriculum mapping record.
Rate	Rate code for the curriculum mapping record.
CRICOS Course	Australian regulatory CRICOS code for the curriculum mapping record. Click this button to open the CRICOS Code Validation window, where you can select the CRICOS record that is valid for the program and academic year in the Key block. **Note:** You can assign the same CRICOS code to multiple curriculum mapping records.
TCSI Course	Australian regulatory reporting course code associated with the curriculum mapping record. Display only.
National ID	Australian regulatory reporting National ID associated with the curriculum mapping record. Display only.
Active	Check box used to specify whether the curriculum mapping record is active.
Quota Count	Head count quota for the curriculum mapping record. The value entered in this field is for information purposes only; it is not used in any system processing.
Quota Load	Load quota for the curriculum mapping record. The value entered in this field is for information purposes only; it is not used in any system processing.
Offers	Number of offers for the curriculum mapping record. The value entered in this field is for information purposes only; it is not used in any system processing.
Enrolled	Number of enrolled students for the curriculum mapping record. The value entered in this field is for information purposes only; it is not used in any system processing.
Expected Acceptance Percentage	Expected percentage of acceptances for the curriculum mapping record. The value entered in this field is for information purposes only; it is not used in any system processing.
Enforce Lapse Date	Check box used to indicate whether to enforce a lapse date for completion of enrollment for the curriculum. (For information only.)

Fields	Description
	Use this indicator to record that a particular curriculum mapping record uses a lapse date for completion of the enrollment process. The indicator can be used in letters and e-mails to inform students that there is a date after which their offer will lapse. The actual lapse date would be included in any such letter as a run-time variable.
HELP types	Australian Commonwealth assistance types associated with the program that are effective for the term. Display only. Displays from the HELP Types section on the SKADRCO page.

Communication Rules (SOACOMM) page

Updated: August 27, 2020

Use this page to establish the rules for a communication plan.

These rules are requirements that must be met before a person can be assigned to a communication plan. You can set up a communication plan using one rule only, or you can set up plans specific to each campus, level, college, and degree combination or to the person's stage of processing in Recruiting, Admissions, or General Student.

You can build communication plan rules for curricula beyond the primary curriculum. SOACOMM allows the designation of primary, secondary, or any curricula for the rule to be applied.

To change a person's plan, establish their status with a recruiting, admissions, or general student record, or change their campus, level, college, or degree information.

Note: If a recruiting level is not defined during the Electronic Prospect Load Process (SRTLOAD), the default value of level 00 will be assigned to each of the added recruiting records. If you choose to use this defaulted level value and intend to use communication plan processing, you need to create communication plan rules for the 00 level on the Communication Plan Rules (SOACOMM) page. Otherwise, your newly created recruits will not be assigned to a communication plan. It is also important to note that the defaulted level value of 00 is also used when initially creating recruiting records on the Prospect Information (SRARECR) page and the Quick Recruit (SRAQUIK) page.

Main window

Updated: August 27, 2020

Use this window to establish the rules for a communication plan. Any fields in this window that are left blank are treated as wildcards.

Fields	Descriptions
Level	Required level of education, for example, UG (undergraduate) or GR (graduate). Choices come from the Level Code Validation (STVLEVL) list.
Campus	Campus to which the person (recruit, student, or applicant) must be assigned. Choices come from the Campus Validation (STVCAMP) list.
College	College within the institution that the student must attend, such as the College of Arts and Sciences or the College of Nursing. Choices come from the College Validation (STVCOLL) list.
Degree	Degree that the student must have earned. Choices come from the Degree Code Validation (STVDEGC) list.
Program	Program in which the student is assigned. Choices come from Program Definition Rules (SMAPRLE) list.
Field of Study Type	Field of study type for the curriculum. The delivered value for the field is NULL, and the

Fields	Descriptions
	default is MAJOR. List Learner Field of Study Type (GTVLFST)
Field of Study Code	Code for the field of study. List All Major Codes (STVMAJR) Help Curriculum Rules (SOACURR) page
Department	Department in which the student is assigned. Choices come the Department Code Validation (STVDEPT) list.
Curricula	Pulldown field used to specify if the curricular elements defined on the rule must come from the primary curriculum record, secondary curriculum record, or any curricula. The delivered value for the field is Primary. Valid values are: Primary Secondary Any The default value is Primary.
Recruit (Recruiting)	Recruiting communication plan associated with the rules defined on the page for campus, level, college, or degree. Choices come from the Communication

Fields	Descriptions
	Plan Validation (STVCPLN) list.
Admissions	Admissions communication plan associated with the rules defined on the page for campus, level, college, or degree. Choices come from the Communication Plan Validation (STVCPLN) list.
Student	Student communication plan associated with the rules defined on the page for campus, level, college, or degree. Choices come from the Communication Plan Validation (STVCPLN) list.

View communication plans

Updated: August 27, 2020

You can view the communication plans.

About this task

Procedure

1. Access the Communication Rules (SOACOMM) page.
2. Scroll to navigate to the plan you are interested in.
3. View the rules established for this plan.
4. Exit.

Establish rules for the automatic assignment of people to communication plans

Updated: August 27, 2020

You can establish the rules to automatically assign people to the communication plans.

About this task

Procedure

1. Access the Communication Rules (SOACOMM) page.
2. Select the campus, level, college, and degree information that you want to establish for a communication plan.
3. Select the communication plan to associate with the information you selected in step 2.
4. Save.

Non-Person Search (SOACOMP) page

Updated: August 27, 2020

The Non-Person Search page is called by all non-person related pages which require an ID number. This page is used to determine the correct ID number for a non-person using the query capabilities of the system.

The name, change indicator (an indicator to record name and ID changes-blank for the current record), and name type are also displayed.

A second function, the soundex search, is provided on the Soundex Search window. This search allows the user to enter information (or partial information) for a “sounds like” search. Use the Search Using Sounds Like choice in the Tools menu to access this window.

All non-person IDs available to all other pages will be displayed on this page. The creation of these names/IDs occurs in the General Person Identification page (SPAIDEN).

Perform a soundex search

Updated: August 27, 2020

Use the Soundex Search window to query the database for non-person names that are approximate matches for the name entered in the **Sounds Like…Name** field. Soundex searches are not case sensitive.

Procedure

To use the soundex search, enter a name in the **Sounds Like...Name** field, and search.

Result: The search data will be displayed in the main window. The system returns the data in the main window as possible selections for the name searched.

Communication Plan (SOACPLN) page

Updated: August 27, 2020

Use this page to assign individual materials or groups of materials to a communication plan.

Groups of materials are set up, added to communication plans, and maintained at the group level. Overrides may occur at the plan level. Materials assigned to a plan which are also included in groups of materials assigned to a plan, are not duplicated when mailed.

Main window

Updated: August 27, 2020

Use this window to assign materials and their associated wait days to a communication plan.

Key block

Updated: August 27, 2020

Use the key block to choose a communication plan.

Fields	Descriptions
Communication Plan	Name of the communication plan. A communication plan identifies standard materials to be sent at pre-defined time intervals. Choices come from the Communications Plan Validation (STVCPLN) list.

Materials section

Updated: August 27, 2020

Use the Materials section to select the materials you want to associate with the communication plan and then assign the wait days.

Fields	Descriptions
Material Code	Specific material to be sent for a plan. Choices come from the Material Codes (STVMATL) list. A material must first be defined on the Material (SOAMATL) page before you can add it to a communication plan.
Wait Days	Number of days that must pass before materials are sent for a plan. Choices are: 0 (default) - 365-Number of days that must pass before materials are sent. 999-Indicates a hold. You cannot send these materials until the hold is removed.

Communication Group window

Updated: August 27, 2020

Use this window to select group codes for a communication plan and associate these codes with groups of materials you selected in the Materials section.

Tip: To access this window from the Materials section, choose Scroll Down.

Fields	Descriptions
Group Code	Code that you want to associate with materials you selected in the Materials

Fields	Descriptions
	section. Choices come from the Group Validation (STVCGRP) list, or you may display materials for that code.

Assign individual material and groups of materials to a communication plan

Updated: August 27, 2020

You can assign individual material or groups of materials to a communication plan.

About this task

Procedure

1. Access the Communication Group (SOACPLN) page.
2. Choose a communication plan.
3. Go to the Materials section.
4. Choose the materials to be included in this communication plan.
5. If appropriate, enter the number of days that need to pass before materials are sent.
6. Go to the Communication Group section.
7. Choose the group code you want to associate with the selected materials.
8. Save.

Applicant Course Summaries (SOACRSS) page

Updated: August 27, 2020

Use this page to enter or review the course hour summaries for different groups of courses taken at other institutions.

Course summaries will be loaded by the AMCAS (American Medical College Application

Service) data load process, but can also be added manually online. Course Summary Types are loaded (or entered) for the person in the Key block, and are validated against the Applicant Course Summary Type Validation (STVCRSS) page.

A course summary can be stand-alone, or it can be associated with an institution source code (high school or college), an admissions application, or both. If a course summary is associated with a specific school, entry of an institution source code from the Source/ Background Institution Filter-Only (SOISBGI) page is available from SOACRSS. If a course summary is associated with a specific application, entry of both a valid term and a valid application number is required.

You may navigate to the Admissions Application Summary (SAASUMI) page, the High School Information (SOAHSCH) page, and the Prior College Summary (SOAPCOQ) page from SOACRSS to review application, high school, and prior college information which exists for the person.

Main window

Updated: August 27, 2020

Use this window to enter or select information about course hours earned by an applicant.

Key block

Updated: August 27, 2020

Use the key block to enter the applicant's ID.

Fields	Descriptions
ID	Applicant's ID and name for whom course summary types are loaded. Choices come from the Person Search (SOAIDEN) page.

Course Summary section

Updated: August 27, 2020

Use the Course Summary section to enter or select information about course summary hours earned by an applicant and course summary types taken by the applicant.

Fields	Descriptions
Course Summary	Code and description of course hours taken by an applicant. Choices come from the Course Summary Codes (STVCRSS) list.
Summary Hours	Number of course hours earned by the applicant for course summary types. Choices are: 0 (default) - 999999.9-Number of course hours earned.
School	Institution code for the school where the applicant earned these course hours. When you save a record without entering a school code in this field, the system uses 999999 as the default value. This value comes from the Source/Background Institution Filter-Only (SOISBGI) page. It can be changed. Choices are: 999999 (default)
School Description	Name of school where the applicant earned these course hours.
Application Number	Specific application associated with these course hours. When you select an application from the Admissions Application Summary (SAASUMI) page, the system retrieves both the application number and its associated term code. Both fields must exist for the application to be valid. If you save a record without entering a value in this field, the system uses 00 as the default value. This value comes from the Admissions Application Summary (SAASUMI) page. Choices are: 00 (default)-No specific application. You can change the value that appears in this field. If you enter an incorrect combination of application number and term code in a record, the system displays an appropriate error

Fields	Descriptions
	message.
Term	Term of the application associated with these course hours. When you select an application from the Admissions Application Summary (SAASUMI) page, the system retrieves both the application number and its associated term code. Both fields must exist for the application to be valid. If you save a record without entering a value in this field, the system uses 999999 as the default value. It can be changed. Valid values come from the Term Code Validation (STVTERM) page. Choices are: 999999 (default) If you enter an incorrect combination of application number and term code in a record, the system displays an appropriate error message.
Activity Date	Last date that information was entered on this page. The date is system-maintained and cannot be changed.

Enter course hour information for an applicant

Updated: August 27, 2020

You can enter the course hour information for an applicant.

About this task

Procedure

1. Access the Applicant Course Summaries (SOACRSS) page.
2. Enter the applicant's ID.
3. Go to the next section.
4. Choose the type of course hour information you want to enter.

Note: When you select a code for course hours, its associated description also displays.

5. Enter the number of hours, the school where these hours were earned, the relevant application code, and the relevant school term for these course hours.
6. Save.

Review course hour information for an applicant

Updated: August 27, 2020

You can review the course hour information for an applicant.

About this task

Procedure

1. Access the Applicant Course Summaries (SOACRSS) page.
2. Enter the applicant's ID.
3. Go to the next section.
4. Choose the type of course hour information you want to review.

   Note: When you select a code for course hours, its associated description also displays.
5. Review the information.
6. Exit.

Continuant Student Centric Period Rule (SOACSCP) page

Updated: August 27, 2020

Use this page to view and maintain continuant student centric period rules by term and student type.

The keys to the page are rule term and student type. These rules are used to process student type updates for student centric periods. When a cycle has been assigned to a student centric period, and that period is then assigned to a term on SOACSCP, the cycle cannot be changed on the page. When a term has been assigned to a student centric period, and that period is then assigned to a student for the term header record, the term cannot be removed from SOACSCP.

Continuant student centric period rules should be defined for all student types that are updated by the Student Type Update Process (SHRTYPE). This includes student type codes that have a different value in the **Next Student Type** field than in the **Code** field on STVSTYP. Academic history must exist for a registered student in the period, in order for the student type updates to occur when SHRTYPE is run.

Main window

Updated: August 27, 2020

The main window contains the key block and the Data block.

Key block

Updated: August 27, 2020

Use this section to enter the term and student type for the rule.

Field	Description
Term	Term code for the continuant student centric period rule. List Term Code Validation (STVTERM)
Student Type	Student type for the continuant student centric period rule. List Student Type Code Validation (STVSTYP) Count Hits Continuant SCP Filter (SOQCSCP) page

Data section

Updated: August 27, 2020

Use this section to enter or view the continuant student centric period for the rule.

Field	Description
Continuant Student Centric Period	Continuant student centric period for the

Field	Description
	rule. Academic history must exist for a registered student in the period, in order for the student type updates to occur when SHRTYPE is run. List Student Centric Period (SOBSCPC)
Description	Description of the continuant student centric period for the rule.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Curriculum Rules Control (SOACTRL) page

Updated: August 27, 2020

Use the Curriculum Rules Control (SOACTRL) page to set various options related to the use of the curriculum rules and to set the severity level of curriculum checking for the associated Banner Student System modules.

You can also set up the number of curricula and fields of study allowed by module for majors, minors, concentrations, and also set up study paths.

This page is composed of the following sections:

- Curriculum Rules
- Number of Curricula Allowed
- Institutional Defaults
- Study Paths
- Prerequisite By Program

Curriculum Rules

Updated: August 27, 2020

This topic lists the options for curriculum rules, curriculum checking error severity, and error severity on learner curriculum updates. Use the Curriculum Rules section to access this area of the page.

Use the **Show All Options** button to expand all the sections of the Curriculum Rules information. Use the **Hide All Options** button to close all the sections of the Curriculum Rules information.

Curriculum Rules information options are provided so you can quickly access the information you need. Click on the option (such as Curriculum Error Checking Severity) to view that section of the Curriculum Rules information. Click the option again (such as Curriculum Error Checking Severity) to close that section of the Curriculum Rules information.

The following sub sections are available from this page:

- Curriculum Rules - Use this section to define the overall curriculum processing rules.
- Curriculum Error Checking Severity - Use this section to define error checking by module and for CAPP compliance.
- Error Severity on Learner Curriculum Updates - Use this section to define error checking on the learner curriculum records.

Curriculum Rules (Processing Controls)

Updated: August 27, 2020

Use this sub section of the SOACTRL page to define the overall curriculum processing rules.

Fields	Descriptions
Require Program Code on Curriculum Rules	Radio group that indicates whether programs are used in conjunction with curriculum rules. If so, every new and existing curriculum rule must contain a program code. The option cannot be set to Yes unless every curriculum rule contains a program code. Every new curriculum rule must contain a program code. Choices are:

Fields	Descriptions
	Yes - Programs are used in conjunction with curriculum rules. You have assigned a program to every curriculum rule. You are not be able to build new curriculum rules unless you assign a program to the base rule. No - Programs are not necessarily used in conjunction with curriculum rules. Consequently, program code is an optional field for new and existing curriculum rules.
Perform Curriculum Checking	Radio group that indicates whether curriculum rules are enforced. This feature is also referred to as curriculum checking. When you add or update a curriculum record in Recruiting, Admissions, General Student, Academic History, or CAPP, the system validates that the curriculum is in effect on the Curriculum Rules (SOACURR) page. Choices are: Yes - Curriculum rules are applied based upon the **Error Severity** flags for each module set on SOACTRL and the module controls set for each base curriculum rule on Curriculum Rules (SOACURR) page. No - Curriculum checking is not performed. If you are using CAPP features (**Require Program Code on Curriculum Rules** is set to Yes), you must also have curriculum rule checking in effect. When **Require Program Code on Curriculum Rules** is set to No, **Perform Curriculum Checking** may be either Yes or No.
Attach Concentrations to Majors	Radio group that indicates how concentrations can be attached to curriculum rules. Choices are:

Fields	Descriptions
	Yes - Concentrations can be attached to major/ department rules and to base curriculum rules. When attached to a major/department rule, a concentration is valid only within the specified major/department rule. No - Concentrations cannot be attached directly to major/department rules, although they can be attached to base curriculum rules. Concentrations attached directly to base curriculum rules are valid for any majors within the base curriculum rule.
Create or Update Outcome Record with Primary Learner Curriculum	Radio group that sets the value of the **Primary** check box default on the Curriculum Rules (SOACURR) page. The **Primary** check box setting in the curriculum rule is the default value for the **Roll Learner** radio group on the General Student (SGASTDN) page. When that field is set to D, the system creates or updates a degree record in the Degrees and Other Formal Awards (SHADEGR) page in Academic History from the primary curriculum record in General Student. Choices are: Yes - **Primary** check box is checked by default on the Curriculum Rules (SOACURR) page. No - **Primary** check box is unchecked by default on the Curriculum Rules (SOACURR) page.
Create or Update Outcome Record with Secondary Learner Curricula	Radio group that sets the value of the **Secondary** check box default on the Curriculum Rules (SOACURR) page. The **Secondary** field in the curriculum rule is the default value for the **Roll Learner** radio group on the

Fields		Descriptions
		General Student (SGASTDN) page. When that field is set to D, the system creates or updates a degree record in the Degrees and Other Formal Awards (SHADEGR) page in Academic History from the secondary curriculum records in General Student. Choices are: Yes - **Secondary** check box is checked by default on the Curriculum Rules (SOACURR) page. No - **Secondary** check box is unchecked by default on the Curriculum Rules (SOACURR) page.
	Display current outcome curriculum by term	The check box used to indicate whether to display the current outcome curriculum record first by term followed by the sequence number within priority. This indicator must be set before the outcome conversion is run.
	Enable Study Paths	The check box used to indicate whether study paths can be created at the institution level for all admissions applications. The default value is unchecked (N).
Enable Curriculum Start and End Dates		Check box group used to enable/disable a Curriculum Start and End Date entry window and Field of Study Start and End Date entry window on SRARECR, SAAADMS, SGASTDN, SFAREGS and SHADEGR to input curriculum start and end dates.
	Recruiting	Check box used to enable/disable Curriculum Start and End Date entry window and Field of Study Start and End Date entry window for Recruiting.
	Admissions	Check box used to enable/disable Curriculum Start and End Date entry window and Field of Study Start and End Date entry window for Admissions.
	Learner	Check box used to enable/disable Curriculum Start and End Date entry window and Field of Study Start and End Date entry window for Learner records.

Fields		Descriptions
	Outcome	Check box used to enable/disable Curriculum Start and End Date entry window and Field of Study Start and End Date entry window for Outcome records.

Curriculum Checking Error Severity

Updated: August 27, 2020

Use this sub section to define error checking by module and for CAPP compliance.

Fields	Descriptions
Recruiting	Radio group that indicates the severity of curriculum checking in the Recruiting module. Choices are: Fatal - System does not allow a curriculum combination that is not defined and locked on the Curriculum Rules (SOACURR) page. Warning - Generates a message that the curriculum combination is not valid, and gives the user the option to continue or cancel. No Checking - Curriculum rules are not checked, and no message is displayed.
Admissions	Radio group that indicates the severity of curriculum checking in the Admissions module. Choices are: Fatal - System does not allow a curriculum combination that is not defined and locked on the Curriculum Rules (SOACURR) page. Warning - Generates a message that the curriculum combination is not valid, and gives the user the option to continue or cancel. No Checking - Curriculum rules are not checked, and no message is displayed.
Learner	Radio group that indicates the severity of curriculum checking in the General Student module. Choices are: Fatal - System does not allow a curriculum combination that is not

Fields	Descriptions
	defined and locked on the Curriculum Rules (SOACURR) page. Warning - Generates a message that the curriculum combination is not valid, and gives the user the option to continue or cancel. No Checking - Curriculum rules are not checked, and no message is displayed.
Outcome	Radio group that indicates the severity of curriculum checking in the Academic History module. Choices are: Fatal - System does not allow a curriculum combination that is not defined and locked on the Curriculum Rules (SOACURR) page. Warning - Generates a message that the curriculum combination is not valid, and gives the user the option to continue or cancel. No Checking - Curriculum rules are not checked, and no message is displayed.
CAPP Compliance Request	Error severity of curriculum checking for compliance requests in CAPP has just one value, Fatal. It cannot be changed. Consequently, if the **Perform Curriculum Checking** option is `Yes`, the system validates that the curriculum combination used for a compliance evaluation is in effect on the Curriculum Rules (SOACURR) page. Otherwise, the system does not permit the compliance evaluation.

Error Severity on Learner Curriculum Update

Updated: August 27, 2020

Use this sub section to define error checking on learner curriculum records.

These controls work with the controls in the Number of Curricula Allowed section that define the number of curricula allowed per learner module. For example, if a learner applies to and is accepted into a third curriculum, but only two current and active learner curricula are allowed, the new curriculum is copied to the learner module and are assigned an INACTIVE/OVERLOAD status code.

Here are the controls you can set for setting learner curriculum updates.

Fields	Descriptions
Inactivate Current Curriculum in Same Term	Radio group that determines the type and severity of any error messages issued when an admissions decision generates a learner curriculum that would inactivate an existing current and active learner curriculum with the same effective term. Valid values are: Fatal - The system issues a fatal error message informing you that you cannot proceed without changing the application preference or curriculum priority on the application you are processing, because it causes an existing learner curriculum to become inactive/non-current. Warning - The system issues a warning message informing you that the decision you are about to apply causes an existing curriculum to become inactive/non-current. You have the option to continue or cancel. • Clicking on Continue copies the existing curriculum record with a curriculum status of ADMITREPLACE and then insert the new curriculum record and the application decision record. • Clicking on Cancel allows you to cancel the application decision and adjust the application's preference value or the admissions curriculum priority as needed to avoid making changes to existing learner curricula. No Checking - The system does not check for messages when you enter a decision that causes an existing curriculum to become inactive/non-current.
Inactivate Current Curriculum in Different Term	Radio group that determines the type and severity of any error messages issued when an admissions decision generates a learner curriculum that would inactivate an existing current and

Fields	Descriptions
	active learner curriculum with an earlier effective term. Valid values are: Fatal - The system issues a fatal error message informing you that you cannot proceed without changing the application preference or curriculum priority on the application you are processing, because it will cause an existing learner curriculum to become inactive/non-current. Warning - The system issues a warning message informing you that the decision you are about to apply causes an existing curriculum with an earlier effective term to become inactive/non-current. You have the option to continue or cancel. • Clicking on Continue copies the existing curriculum record with a curriculum status of ADMITREPLACE, and then insert the new curriculum record and the application decision record. • Clicking on Cancel allows you to cancel the application decision and adjust the application's preference value or the admissions curriculum priority as needed to avoid making changes to existing learner curricula. No Checking - The system will not check for messages when you enter a decision that causes an existing curriculum with an earlier effective term to become inactive/non-current.
Cause a Curriculum Overload	Radio group that determines the type and severity of any error messages issued when an admissions decision generates a learner curriculum with a curriculum status value of OVERLOAD, because the number of curricula or fields of study allowed has been exceeded. Valid values are: Fatal - The system issues a fatal error message informing you that you cannot proceed, because it would cause a learner curriculum

Fields	Descriptions
	or field of study record to be created with an OVERLOAD status. To process the application decision, you would need to inactivate the curriculum or field of study on the admissions application that would cause the overload. Warning - The system issues a warning message informing you that the decision you are about to apply causes a learner curriculum or field of study record to be created with an OVERLOAD status. You have the option to continue or cancel. • Clicking on Continue copies the admissions curriculum and field of study record(s) with a curriculum status of OVERLOAD to the General Student module and then insert the application decision record. • Clicking on Cancel allows you to cancel the application decision and inactivate the admissions curriculum and field of study record(s) as needed to avoid causing a curriculum overload in the General Student module. No Checking - The system does not check for messages when you enter a decision that causes a learner curriculum or field of study record to be created with an OVERLOAD status.
Delete Learner Curriculum	Check box used to control whether the learner curriculum record with same term as the learner effective term (SGASTDN) can be automatically deleted. The learner record cannot be deleted if a curriculum exists for the same term and effective term that is also current in a future learner effective term.

Example of how to verify a learner curriculum update

This example demonstrates the impact of the different application preference generation values. The applicant has an existing application in term 202110 with a preference of *1* and a second existing application in term 202030 with a preference of *3*. The applicant is submitting a new application for term 202110.

Effective Term	SORLCUR Term	SORLCUR Sequence and Curriculum	Current	Active
200443	200443	1 BA-HISTORY	Y	Y
200520	none exists			

Note: Because there are two active records for the learner, you cannot delete the SGBSTDN record for term 200443, because the curriculum record is also current for term 200520.

Number of Curricula Allowed

Updated: August 27, 2020

Use the Number of Curricula Allowed section to specify by module the number of curricula that can be used and the associated fields of study. The Number of Curricula Allowed section is used to access this section of the page.

Note: Only the primary and secondary curriculum values are populated by the Backfill API.

Fields	Descriptions
Learner Module	Banner module for which the number of curricula, majors, minors, and concentrations are being defined.
Maximum Allowed	Number of active curricula allowed for the module.
System Required	Check box used to determine which values are required by the system. If the **System Required** check box is checked, the record cannot be deleted.

Number of Fields of Study Allowed

Updated: August 27, 2020

This sub section to set up the number of fields of study that are allowed for majors, minors, and concentrations by learner module.

This sub section of the page uses the SORLMFS table. The Number of Curricula Allowed section can be used to access this section of the page.

Note: Only the primary and secondary curriculum values are populated by the Backfill API.

The value of zero can be entered for a non-major field of study type. This prevents users from adding active and current fields of study for that type. An SOBLMOD record which defines the learner module and number of curriculum allowed must exist before defining fields of study counts on SORLMFS. The field display on the transcript provides the means for suppressing individual 'other' fields of study from the transcript.

Fields	Descriptions
Learner Module Code	Banner module that defines the number of curricula, majors, minors, and concentrations.
Field of Study	Field of study for the curriculum rule.
Maximum Allowed	Maximum number of field of study types allowed. Enter 1 - 999 for majors and 0 - 999 for all other types.
Display on Transcript	Check box used to display the field of study on the transcript.
System Required	Check box used to determine which values are required by the system. The record cannot be deleted if the **System Required** check box is selected.

Institutional Defaults

Updated: December 15, 2023

The individual defaults page contains the default curriculum priority, the default curriculum status, and default application preference generation. These defaults are for Student Overall.

This section of the page uses the SORLMFS table. Use the Number of Curricula Allowed section to access this section of the page.

Enter **zero** for a non-major field of study type. Using zero prevents users from adding active and current fields of study for that type. An SOBLMOD record defines the learner module and number of curriculum allowed must exist before defining fields of study counts on SORLMFS. The field display on the transcript provides the means for suppressing individual and other fields of study from the transcript.

Default Priority Setup

The Default Priority Setup subsection contains default priority setup information. The priority default values for the priority are defined at the institution level and include the initial priority number and the incremented priority value for new records.

Field	Descriptions
Starting Priority Number	Default starting priority number. Values must be from 1 - 9999.
Priority Increment	Default priority increment. Values must be from 1 - 9999.

Default Curriculum Status

The default priority setup and default curriculum status information. The curriculum status default values are defined at the institution level and include the default active and inactive statuses for new records added.

Fields	Descriptions
Active Status	Default active curriculum status code and description.
Inactive Status	Default inactive curriculum status code description.

Default Application Preference Generation

The default application preference generation setup information controls the application preference for any new admissions.

The default generation method is defined at the institution level and controls the if and how an application preference is generated for any new admissions applications that are added without a preference number.

You can select the preference generation method by selecting the appropriate option.

Fields	Descriptions
None	No application preference number is generated.

Fields	Descriptions
Like Term	The generated preference number is one greater (+1) than the current maximum preference number for all applications for the student for the term of the application. If the student has either no other applications for this term or all the applications are without a preference number, the generated preference is 1.
All Terms	The generated preference number is one greater (+1) than the current maximum preference number for all applications for the student. If the student has either no other applications or all the applications are without a preference number, the generated preference is 1.

Examples that show the impact of different application generation values

This example demonstrates the impact for a student in term 202110 that has a preference of 1 and also in term 202030 with a preference of 3.

Application preference generation value	Preference on a new application	Reason
None	Blank	The preference generation is not enabled.
Like Term	2	When looking for like terms, another application with a preference of 1 (1+1) is found.
All Terms	4	When looking for all terms, we find two other

Application preference generation value	Preference on a new application	Reason
		applications, the one with the highest preference number, which is 3 (3+1) is selected.

Integration Controls

The Integration Controls subsection contains two check boxes that control whether or not a relevant integration is allowed to make learner curriculum updates for a term in which the student is registered. The integration controls do not have any impact on the behavior of any Banner Admin or Self-Service pages. Use the check boxes only for integrations.

Fields	Descriptions
Allow learner curriculum changes in registration term	If the **Allow learner curricula changes in registration term** check box is cleared, then the processes using an integration cannot change learner curricula for a student for a term in which the student is registered If the **Allow learner curricula changes in registration term** check box is selected, then the processes using an integration can change the learner curricula for a student for a term in which the student is registered, depending on the settings of the controls on the SOACURR page. See the *Base Curriculum Rules* section in the *Curriculum Rules (SOACURR) page* for more information.
Allow changes to learner status fields that do not impact registration in registration term	If the **Allow changes to learner status fields that do not impact registration in registration term** check box is cleared, then

Fields	Descriptions
	the processes using an integration cannot change learner status fields for a student for a term in which the student is registered. If the **Allow changes to learner status fields that do not impact registration in registration term** check box is selected, then the processes using an integration can change the learner status fields for a student for a term in which the student is registered, but only those learner status fields that do not impact registration.

Study Paths

Updated: August 27, 2020

Use this section to create rules for how study path names are displayed in the Study Path information on SGASTDN and SFAREGS and also in the lists of valid values that are displayed in the Registration module.

In this section you can select data elements (column names) from a view, add the punctuation used to separate them, and determine their display order.

Field	Description
Sequence	Number that indicates the order the column is to appear in the study path name.
Field Name	Column name from the SOVSPNM view used in the study path.
Separator	Value used to separate the column values in the study path name. Use ^ for a space.

Prerequisite by Program

Updated: August 27, 2020

When you are running registration, you have the option to require prerequisite checking by program.

To enable this functionality, select the Perform Prerequisite By Program Checking check box. Use the Term Restriction check box to perform the prerequisite checking for the term defined on the Program Requirements (SMAPROG) page. Use the Program Requirements (SMAPROG) page to select whether you want prerequisite checking to occur at the Catalog level, Program level, or at the Program and Course level.

Field	Description
Perform Prerequisite By Program Checking	Select this **check box** if you are using the Program option in registration and you want to check for prerequisites.
Term Restriction	Select this **check box** to restrict the prerequisite term on SCAPPRQ to correspond to the program term on SMAPROG.

Continuant Terms Rule (SOACTRM) page

Updated: August 27, 2020

The purpose of the Continuant Terms Rule Page is to provide the rules for which terms constitute consecutive enrollment. The rules on this page must be established before running the Student Type Update Process (SHRTYPE).

Curriculum Rules (SOACURR) page

Updated: August 27, 2020

This page is used to view or create curriculum rules.

The key to this page is term, which is optional. If you enter the term in the key, the page only shows you the rules which are valid for that term; no future term rules are displayed. If entered, the value in the **Term** field does not control or filter data displayed in the windows for module control, majors and departments, concentrations, and minors rules.

For more information on using curriculum rules, please refer to the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site.

Main window

Updated: August 27, 2020

The page is entered in query mode. You may search on term, program, level, campus, college, or degree to display base rule information. This data is sorted in alpha order if a program exists. If not, base rules are sorted in numeric order by rule number.

Note: It is important to understand what is meant by "base curriculum information" when you are building curriculum rules. Base curriculum information consists of program, campus, level, college, and degree. These items work on the same concept as catalog base information.

The Curriculum Rules (SOACURR) page checks with the Program Definition Rules (SMAPRLE) page when you try to attach a program to a rule. The program is not required unless the **Require Program Code on Curriculum Rules** radio group on the Curriculum Rules Control (SOACTRL) page is set to Yes. When program is used on a rule, the level, campus, college, and degree have to match what has been defined on SMAPRLE. If the campus on SMAPRLE is blank, all campuses are valid for the rule. The information defaults back into SOACURR from the Lookup button window for SMAPRLE.

You are permitted to attach majors to base rules or majors/departments when the radio group for **Attach Concentrations to Majors** on SOACTRL on has been set to Yes. To attach majors to base rules, select the base rule and then select the Rule-Based Concentrations section to access the Rule-Based Concentrations window.

To attach concentrations to majors/departments, select the rule associated with the major/department in which you are interested. Then select the Majors and Departments section to access the Majors and Departments window. Select the major for which you want to attach a concentration, and then select the Rule-Based Concentrations section to access the Rule-Based Concentrations window.

You may navigate among the secondary windows of SOACURR using the window tabs. Use an Edit function, the **Return** button, or the Base Curriculum Rules section from the additional windows to return to the main window.

The **Study Path** check box is displayed when the **Enable Study Paths** check box on SOACTRL is checked (Y). This check box is used to indicate whether study paths are enabled for the curriculum rule during the admission acceptance process.

Study paths are created when:

- The **Enable Study Paths** indicator on SOACTRL is checked (Y), the curriculum on SOACURR is valid, and the **Study Path** indicator on SOACURR is checked (Y) for the curriculum.
- The **Enable Study Paths** indicator on SOACTRL is checked (Y), and the curriculum is not valid per SOACURR rules.

Study paths are not created when:

- The **Enable Study Paths** indicator on SOACTRL is unchecked (N).
- The **Enable Study Paths** indicator on SOACTRL is checked (Y), the curriculum on SOACURR is valid, but the **Study Path** indicator on SOACURR is unchecked (N).

Key block

Updated: August 27, 2020

The following field is in the key block.

Fields	Descriptions
Term	Term for which to view or create curriculum rules. List Term Code Validation (STVTERM) This field can be left blank to view all curriculum rules.

Base Curriculum Rules section

Updated: August 27, 2020

The following fields are in the Base Curriculum Rules section.

Fields	Descriptions
Base Rule Number	System-assigned rule number.
Program	Code of the program associated with the base curriculum rule. If a program code is entered, it must be valid on the Program Definition Rules

Fields	Descriptions
	(SMAPRLE) page and must be curriculum-dependent (the **Curriculum Dependent** check box for the program is checked on SMAPRLE). List Existing Programs
Level	Code of the student level associated with the base curriculum rule. Required. If a program code is or will be attached, its level code must match the level code entered for the base curriculum rule. List Level Code Validation (STVLEVL)
Campus	Code of the campus associated with the base curriculum rule. If no campus code is entered, the base curriculum rule is valid for all campuses. List Campus Validation (STVCAMP)
College	Code of the college associated with the base curriculum rule. Required. If a program code is or will be attached, its college code must match the college code entered for the base curriculum rule. List College Validation (STVCOLL)
Degree	Code of the degree associated with the base curriculum rule. Required. If a program code is or will be attached, its

Fields	Descriptions
	degree code must match the degree code entered for the base curriculum rule. List Degree Code Validation (STVDEGC)
Effective Term	Term in which the base program rule takes effect. List Term Code Validation (STVTERM)
Primary	Check box used to indicate that degree records should be created or updated by the Grade Roll process (SHRROLL) if the base curriculum values are present in a student's primary curriculum (general student record). If the **Create or Update Degree with Primary Curriculum** field on the Curriculum Rules Control (SOACTRL) page is set to `Yes`, this check box defaults to checked, but it can be changed.
Secondary	Check box used to indicate that degree records should be created or updated by the SHRROLL process if the base curriculum values are present in a student's secondary curriculum (general student record). If the **Create or Update Degree with Secondary Curriculum** field on SOACTRL is set to `Yes`, this check box defaults to checked, but it can be changed.
Locked	Check box used to indicate that the curriculum rule has been completely

Fields	Descriptions
	defined. Curriculum rules are not completely defined until the base rule has been saved and all appropriate attachments and module controls have been saved. The default is unchecked or unlocked. Only rules that are locked can be assigned to a student. If you unlock the rule, it is no longer available to be assigned to a person.
Study Path	Check box used to indicate whether study paths are enabled for the curriculum rule during the admission acceptance process. The default is N. This field is displayed when the **Enable Study Paths** check box on SOACTRL is checked (Y).
Allow change in registration term	If the **Allow change in registration term** check box is cleared for a curriculum rule, then the processes using an integration cannot change a student's learner curriculum for this curriculum rule for a term in which the student is registered, even if the **Allow learner curricula changes in registration term** check box is selected on the SOACTRL page. If the **Allow change in registration term** check box is selected for a curriculum rule, then the processes using an integration can change a student's learner curriculum for this curriculum rule for a term in which the student is registered, if the **Allow learner curricula changes in registration term** check box is selected on the SOACTRL

Fields	Descriptions
	page. See the *Integration Controls* section in the *Curriculum Rules Control (SOACTRL) pages* for more information.
Allow transfer in	If the **Allow transfer in** check box is cleared, then the processes using an integration cannot make curriculum changes to move the students into this curriculum. If the **Allow transfer in** check box is selected, then the processes using an integration can make curriculum changes to move the students into this curriculum.

Majors and Departments window

Updated: August 27, 2020

Use this window to attach majors to rules. The base rule displays at the top of the window. You can access this window using the Majors and Departments section.

Each base curriculum rule can have one or more valid major attachments at any given point in time. Data values will not be able to be saved in a module when curriculum rules are in effect unless the fields match values in a locked base curriculum rule and in an attached major/department rule. Major/department attachments can also change over time. For example, some majors may be discontinued, and so the attachment would no longer be valid in Recruiting and Admissions, but would need to remain valid in General Student, Academic History, and CAPP until all current students had graduated. At that time, the attachment would no longer be valid in any module.

You can copy attached majors/departments to a new effective term or end them as of a given term. The message No Effective Terms Found appears in the window until at least one record is added for an initial term range (e.g., 199501 - 999999). If the record is copied or ended, creating multiple effective term records (e.g, 199501 - 199601 and 199601 - 999999), the message Multiple Effective Terms Present will display in the window. A List function from the **From Term** field will display the major/department rule effective terms which exist. When attempting to copy or end a rule, the list of terms presented will not include terms which have already been used for copying or ending.

Even though the base rule to which a major is attached may be valid for a given term and module, only some of the majors attached may be valid. Majors may be turned on and off over time in Recruiting, Admissions, General Student, Academic History, and CAPP using the checkboxes in this window.

A major may have concentrations attached. These display in the **Concentration** field. Majors are usually formed within departments, and concentrations are usually formed within majors. When string of asterisks (****) is displayed in the **Concentration** field, it indicates that multiple concentrations are attached to that major. To view the concentrations for a major, perform a Help function from the **Major** field.

Majors and departments can be set up and used separately. The combination of major and department is also valid.

Use the EDI Cross-Reference Curriculum Rules (SOAXCUR) page to define valid curricula which can be displayed on the Web admissions application and also to define the description which should display. You can access SOAXCUR from the Options Menu on SOACURR.

Note: To use both Web Admissions Application processing and receive EDI admissions applications, the programs of study for which an applicant can apply must be defined on SOACURR, cross-referenced to valid EDI values on the EDI Cross-Reference Curriculum Rules (SOAXCUR) page, be in effect for the term for which the application is submitted, and be valid for Admissions processing. Web and EDI application processing use the college, degree, and major from the curriculum rule to populate these fields in the applications created.

Majors and Departments section

Updated: August 27, 2020

The following fields are defaulted in from the rule in the Base Curriculum section.

Fields	Descriptions
From Term	First term in which the base curriculum rule is in effect. Display only.
To Term	Last term in which the base curriculum rule

Fields	Descriptions
	is in effect. Display only.
Program	Code of the program associated with the base curriculum rule, if one has been assigned. Display only.
Level	Code of the student level associated with the base curriculum rule, if one has been assigned. Display only.
Campus	Code of the campus associated with the base curriculum rule. Display only.
College	Code of the college associated with the base curriculum rule. Display only.
Degree	Code of the degree associated with the base curriculum rule. Display only.

The following fields are updateable for the majors and departments.

Fields	Descriptions
From Term	First term in which this major/department rule is in effect. List Module Control Effective Terms Help Major/Dept Rule Effective Terms Dup Record Copy Current Rule Dup Item End Current Rule
To Term	Last term in which this major/department rule is in effect. Display only.
Major	Code of a major associated with the base curriculum rule. When a valid code is entered in this field, the description of the major is automatically displayed in the **Major** field at the bottom of the window.

Fields	Descriptions
	List All Major Codes Help Major-Dependent Concentrations window
Department	Code of the department associated with the major for the base curriculum rule. When a valid code is entered in this field, the description of the department is automatically displayed in the **Department** field at the bottom of the window. List Department Validation (STVDEPT)
Concentration	Concentration associated with this major/ department rule. If more than one concentration has been associated with this rule, **** is displayed in this field. Display only.
Recruiting	Check box used to indicate whether this major/department rule is valid for the Recruiting module.
Admissions	Check box used to indicate whether this major/department rule is valid for the Admissions module.
General Student	Check box used to indicate whether this major/department rule is valid for the General Student module.
Academic History	Check box used to indicate whether this major/department rule is valid for the Academic History module.
CAPP	Check box used to indicate whether this major/department rule is valid for CAPP.
Major Rule	Description of the major associated with the selected base curriculum rule. Display only.

Electronic Data Interchange and Self-Service section

Updated: August 27, 2020

Use this section to set up Electronic Data Interchange (EDI) and Web control items for Web admissions and EDI application processing, maintain the display title for curricula which are Web-enabled, and define the values which will allow EDI data to be translated to valid Banner® curricula.

The **Generate Identification** maintenance button is used to generate values for the **EDI Level** and **EDI Identification** fields. The button is enabled when these fields are blank and can be used to facilitate data entry for EDI codes that have been established on SOAXREF for the EDI degree code, EDI identification, and EDI field of study qualifier code (level).

The button creates the EDI degree code, EDI identification, and EDI field of study qualifier code values for you. The entries will be found under the STVMAJR label on SOAXREF. The button performs the following tasks:

- generates a unique value for the curriculum and the field of study, and
- inserts degree and level qualifiers into SOAXREF under the STVMAJR label.

Fields	Descriptions
Display on Self-Service	Check box which indicates if the major is to be displayed in Self-Service.
Auto Student	Check box which indicates if learner and curriculum records should be created during the Quick Start process.
Self-Service Description	Free format text field used to enter a description that will appear in Self-Service.
EDI Degree	EDI degree level code. List EDI Degree Level Codes
EDI Level	EDI level qualifier field of study code. List EDI Field of Study Qualifier Codes
EDI Identification	EDI field of study identification code. List EDI Field of Study Identifier Codes

Major-Dependent Concentrations window

Updated: August 27, 2020

Use this window to view concentrations attached to a major.

You can access this window using the Major-Dependent Concentrations section. The base rule and specific major display at the top of the window. The concentrations attached to the major can be turned on and off over time, using the checkboxes for the modules.

You can access this window only if the **Attach Concentrations to Majors** radio group on SOACTRL is set to Yes, and the Major-Dependent Concentrations section is displayed from the Majors and Departments window.

You can copy attached concentrations to a new effective term or end them as of a given term. The message No Effective Terms Found appears in the window until at least one record is added for an initial term range (e.g., 199501 - 999999). If the record is copied or ended, creating multiple effective term records (e.g., 199501 - 199601 and 199601 -

999999), the message Multiple Effective Terms Present will display in the window. A List function from the **From Term** field will display the concentration rule effective terms which exist. When attempting to copy or end a rule, the list of terms presented will not include terms which have already been used for copying or ending.

The system will interpret a window with no data as an indicator that all concentrations are valid for the major. To specify that no concentrations are valid, a value (e.g., XCON - No Concentrations Valid) should be created on the Major, Minor, Concentration Code Validation (STVMAJR) page and entered in this window for the specific major where no concentrations are valid.

Use an Edit function from the **From Term** field to access the Majors and Departments window, or select the Majors and Departments section.

Concentrations section

Updated: August 27, 2020

The following fields are defaulted in from the rule in the Base Curriculum section.

Fields	Descriptions
From Term	First term in which the base curriculum rule is in effect. Display only.
To Term	Last term in which the base curriculum rule is in effect. Display only.
Program	Code of the program associated with the base curriculum rule, if one has been assigned. Display only.
Level	Code of the student level associated with the base curriculum rule, if one has been assigned. Display only.
Campus	Code of the campus associated with the base curriculum rule. Display only.
College	Code of the college associated with the base curriculum rule. Display only.
Degree	Code of the degree associated with the base curriculum rule. Display only.

The following fields are defaulted in from the Majors and Departments section.

Fields	Descriptions
From Term	First term in which the major/department rule is in effect. Display only.
To Term	Last term in which the major/department rule is in effect. Display only.
Major	Code of a major associated with the base curriculum rule. Display only.
Major Rule	Description of the major associated with the selected base curriculum rule. Display only.
Department	Code of the department associated with the major for the base curriculum rule, if one has been defined. Display only.

The following fields are updateable for the major-dependent concentrations.

Fields	Descriptions
From Term	First term in which this concentration rule is in effect. List Term Code Validation (STVTERM) Help Concentration Rule Effective Terms Edit Majors/Department Rules window Dup Record Copy Current Rule Dup Item End Current Rule
To Term	Last term in which this concentration rule is in effect. Display only.
Concentrations	Code of the concentration associated with the major/department rule. When a valid code is entered, the description is automatically displayed.

Fields	Descriptions
	List All Concentration Codes
Recruiting	Check box used to indicate whether this major/department/concentration rule is valid for the Recruiting module.
Admissions	Check box used to indicate whether this major/department/concentration rule is valid for the Admissions module.
General Student	Check box used to indicate whether this major/department/concentration rule is valid for the General Student module.
Academic History	Check box used to indicate whether this major/department/concentration rule is valid for the Academic History module.
CAPP	Check box used to indicate whether this major/department/concentration rule is valid for CAPP.
Concentration Rule	Description of the concentration associated with the selected base curriculum rule. Display only.
Activity Date	Date on which the record was last saved. Display only.

Electronic Data Interchange and Self-Service section

Updated: August 27, 2020

Use this section to set up Electronic Data Interchange (EDI) and Web control items.

The **Generate Identification** maintenance button is used to generate values for the **EDI Level** and **EDI Identification** fields. The button is enabled when these fields are blank and can be used to facilitate data entry for EDI codes that have been established on SOAXREF for the EDI degree code, EDI identification, and EDI field of study qualifier code (level).

The button creates the EDI identification and EDI field of study qualifier code values for you. The entries will be found under the STVMAJR label on SOAXREF. The button performs the following tasks:

- generates a unique value for the curriculum and the field of study
- inserts degree and level qualifiers into SOAXREF under the STVMAJR label

Fields	Descriptions
Display on Self-Service	Check box which indicates if the major is to be displayed in Self-Service.
Self-Service Description	Free format text field used to enter a description that will appear in Self-Service.

EDI Identification	EDI field of study identification code. List EDI Field of Study Identifier Codes

Rule-Based Concentrations window

Updated: August 27, 2020

Use this window to view concentrations attached to rules.

You can access this window using the Rule-Based Concentrations section. The window is accessible regardless of how the radio group for **Attach Concentrations to Majors** on the Curriculum Control (SOACTRL) page has been set. The base rule information is displayed at the top of the window.

You can copy concentration rules to a new effective term or end them as of a given term. The message No Effective Terms Found appears in the window until at least one record is added for an initial term range (e.g., 199501 - 999999). If the record is copied or ended, creating multiple effective term records (e.g., 199501 - 199601 and 199601 - 999999), the message Multiple Effective Terms Present will display in the window. A List function from the **From Term** field will display the concentration rule effective terms which exist. When attempting to copy or end a rule, the list of terms presented will not include terms which have already been used for copying or ending.

The system will interpret a window without data as an indicator that all concentrations are valid for the rule. To specify that no concentrations are valid, a value (e.g., XCON - No Concentrations Valid) should be created on the Major, Minor, Concentration Code

Validation (STVMAJR) page and entered in this window for the rule.

Concentrations section

Updated: August 27, 2020

The following fields are defaulted in from the rule in the Base Curriculum section.

Fields	Descriptions
From Term	First term in which the base curriculum rule is in effect. Display only.
To Term	Last term in which the base curriculum rule is in effect. Display only.
Program	Code of the program associated with the base curriculum rule, if one has been assigned. Display only.
Level	Code of the student level associated with the base curriculum rule, if one has been assigned. Display only.
Campus	Code of the campus associated with the base curriculum rule. Display only.
College	Code of the college associated with the base curriculum rule. Display only.
Degree	Code of the degree associated with the base curriculum rule. Display only.

The following fields are defaulted in from the Majors and Departments section.

Fields	Descriptions
From Term	First term in which the major/department rule is in effect. Display only.
To Term	Last term in which the major/department rule is in effect. Display only.
Major	Code of a major associated with the program. Display only.
Major Rule	Description of the major associated with the selected base curriculum rule. Display

Fields	Descriptions
	only.
Department	Code of the department associated with the major for the program. Display only.

The following fields are updateable for the rule-based concentrations.

Fields	Descriptions
From Term	First term in which this concentration rule is in effect. List Term Code Validation (STVTERM) Help Concentration Rule Effective Terms Edit Majors/Department Rules window Dup Record Copy Current Rule Dup Item End Current Rule
To Term	Last term in which this concentration rule is in effect. Display only.
Concentrations	Code of the concentration associated with the concentration rule. When a valid code is entered, the description is automatically displayed. List All Concentration Codes
Recruiting	Check box used to indicate whether this concentration rule is valid for the Recruiting module.
Admissions	Check box used to indicate whether this concentration rule is valid for the Admissions module.
General Student	Check box used to indicate whether this concentration rule is valid for the General

Fields	Descriptions
	Student module.
Academic History	Check box used to indicate whether this concentration rule is valid for the Academic History module.
CAPP	Check box used to indicate whether this concentration rule is valid for CAPP.
Concentration Rule	Description of the concentration associated with the selected base curriculum rule. Display only.
Activity Date	Date on which the record was last saved. Display only.

Electronic Data Interchange and Self-Service section

Updated: August 27, 2020

Use this section to set up Electronic Data Interchange (EDI) and Web control items.

The **Generate Identification** maintenance button is used to generate values for the **EDI Level** and **EDI Identification** fields. The button is enabled when these fields are blank and can be used to facilitate data entry for EDI codes that have been established on SOAXREF for the EDI degree code, EDI identification, and EDI field of study qualifier code (level).

The button creates the EDI identification and EDI field of study qualifier code values for you. The entries will be found under the STVMAJR label on SOAXREF. The button performs the following tasks:

- generates a unique value for the curriculum and the field of study, and
- inserts degree and level qualifiers into SOAXREF under the STVMAJR label.

Fields	Descriptions
Display on Self-Service	Check box which indicates if the major is to be displayed in Self-Service.
Self-Service Description	Free format text field used to enter a description that will appear in Self-Service.
EDI Level	EDI level qualifier field of study code.

Fields	Descriptions
	List EDI Field of Study Qualifier Codes
EDI Identification	EDI field of study identification code. List EDI Field of Study Identifier Codes

Minors window

Updated: August 27, 2020

Use this window to attach curriculum minors directly to the base rule. The base rule information displays at the top of the window. You can access this window using the Minors section.

You can copy attached minors to a new effective term or end them as of a given term. The message No Effective Terms Found appears in the window until at least one record is added for an initial term range (e.g., 199501 - 999999). If the record is copied or ended, creating multiple effective term records (e.g., 199501 - 199601 and 199601 - 999999), the message Multiple Effective Terms Present will display in the window. A List function from the **From Term** field will display the minor rule effective terms which exist. When attempting to copy or end a rule, the list of terms presented will not include terms which have already been used for copying or ending.

The system will interpret a window with no data as an indicator that all minors are valid for the rule. To specify that no minors are valid, a value (e.g., XMIN - No Minors Valid) should be created on the Major, Minor, Concentration Code Validation (STVMAJR) page and entered in this window for the specific rule where no minors are valid.

Minors section

Updated: August 27, 2020

The following fields are defaulted in from the rule in the Base Curriculum section.

Fields	Descriptions
From Term	First term in which the base curriculum rule is in effect. Display only.

Fields	Descriptions
To Term	Last term in which the base curriculum rule is in effect. Display only.
Program	Code of the program associated with the base curriculum rule, if one has been assigned. Display only.
Level	Code of the student level associated with the base curriculum rule, if one has been assigned. Display only.
Campus	Code of the campus associated with the base curriculum rule. Display only.
College	Code of the college associated with the base curriculum rule. Display only.
Degree	Code of the degree associated with the base curriculum rule. Display only.

The following fields are updateable for the minors.

Fields	Descriptions
From Term	First term in which this minor rule is in effect. List Term Code Validation (STVTERM) Help Minor Rule Effective Terms Edit main window Dup Record Copy Current Rule Dup Item End Current Rule
To Term	Last term in which this minor rule is in effect. Display only.

EDI Level	EDI level qualifier field of study code. List EDI Field of Study Qualifier Codes
EDI Identification	EDI field of study identification code. List EDI Field of Study Identifier Codes

Module Control window

Updated: August 27, 2020

Use this window to set the module controls on a base rule.

You can access this window using the Module Control section. The base rule information displays at the top of the window. Module control settings are term effective. If multiple term ranges exist for a base curriculum rule, the message Multiple Effective Terms is displayed in the window.

This window is used to set the validity of a rule in a given module as of the from term. So, rules can be turned on and off over time by module using the radio group for the selected module(s). You will receive the Fatal or Warning message if you try to assign a rule inappropriately, provided one of those options is set on SOACTRL.

Each base curriculum rule can be valid or not in each of the modules in which curriculum checking is performed. The validity of base rules in different modules can also change over time. For example, some programs may be discontinued, and so the base rule would no longer be valid in Recruiting and Admissions, but would need to remain valid in General Student, Academic History, and CAPP until all current students had graduated. At that time, the base rule would no longer be valid in any module.

The following fields are defaulted in from the rule in the Base Curriculum section.

Fields	Descriptions
Curriculum Rule	Description of the module curriculum rule associated with the selected base curriculum rule. Display only.
Program	Code of the program associated with the base curriculum rule, if one has been assigned. Display only.
Level	Code of the student level associated with the base curriculum rule, if one has been assigned. Display only.
Campus	Code of the campus associated with the base curriculum rule. Display only.
College	Code of the college associated with the base curriculum rule. Display only.
Degree	Code of the degree associated with the base curriculum rule. Display only.

The following fields are updateable for the module controls.

Fields	Descriptions
From Term	First term in which this set of module control settings is in effect. List Module Control Effective Terms
To Term	Last term in which this set of module control settings is in effect.
Recruiting	Option group that indicates whether the base curriculum rule is in effect for the Recruiting module for the specified term code range. `On` The combination of fields defined by the base rule and its attachments is in effect, as long as the base rule is locked. `Off` The combination of the fields defined by the base rule and its attachments is not in effect.
Admissions	Option group that indicates whether the base curriculum rule is in effect for the Admissions module for the specified term code range.

Fields	Descriptions
	`On` The combination of fields defined by the base rule and its attachments is in effect, as long as the base rule is locked. `Off` The combination of the fields defined by the base rule and its attachments is not in effect.
General Student	Option group that indicates whether the base curriculum rule is in effect for the General Student module for the specified term code range. `On` The combination of fields defined by the base rule and its attachments is in effect, as long as the base rule is locked. `Off` The combination of the fields defined by the base rule and its attachments is not in effect.
Academic History	Option group that indicates whether the base curriculum rule is in effect for the Academic History module for the specified term code range. `On` The combination of fields defined by the base rule and its attachments is in effect, as long as the base rule is locked. `Off` The combination of the fields defined by the base rule and its attachments is not in effect.
Curriculum, Advising, and Program Planning	Option group that indicates whether the base curriculum rule is in effect for CAPP for the specified term code range. `On` The combination of fields defined by the base rule and its attachments is in effect, as long as the base rule is locked. `Off` The combination of the fields defined by the base rule and its attachments is not in effect.

Address Summary (SOADDRQ) page

Updated: August 27, 2020

Use this page to display all address information associated with a person or a non-person, such as a vendor. This page is query only, and fields on SOADDRQ cannot be changed.

Addresses are displayed in the following order:

- All active or current addresses in type order
- Future addresses in type order
- All inactive addresses ordered by type, from date, to date, and status

Prerequisite

An address must exist for the ID. You can add address information for the ID on the General Person Identification (SPAIDEN) page.

Main window

Updated: August 27, 2020

Use this window to query on existing address information for an ID.

Key block

Updated: August 27, 2020

Use the key block to enter the ID of the person or non-person for the address information query. The page can only be used in query mode, and no updates can be made.

Field	Description
Confidential (Confidential Message)	Displays when the **Confidential (Indicator)** check box is checked on the General Person (SPAPERS) page. Confidentiality may be requested by the student or determined by institution policy.

Field	Description
Deceased (Deceased Message)	Displays when the **Deceased (Indicator)** check box is checked on the General Person page (SPAPERS). You may process data for a person who is deceased.
ID	ID and name of the person or non-person for the address information query. Choices come from the Person Search (SOAIDEN) page or the Non-Person Search (SOACOMP) page.

Address section

Updated: August 27, 2020

Use the Address section to view the existing addresses for the ID in type order.

Field	Description
Address Type	Displays the code for the type of address associated with the ID. Examples include mailing, billing, business. You cannot update this field, but you may view the Address Type Validation (STVATYP) list to see the address type description for the code in the field. The value comes from the **Address Type** field in the Address window on the General Person Identification (SPAIDEN) page.
Sequence Number	Used to display the internal sequence number that is assigned to each address type associated with the ID. It cannot be changed. This value comes from the **SequenceNumber** field in the Address window on the General Person Identification (SPAIDEN) page.
Source	Displays the source code for the address record. Examples include individual, registrar, phonathon, return mail. It cannot be changed.

Field	Description
	This value comes from the **Source** field in the Address window on the General Person Identification (SPAIDEN) page.
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1 Street Line 2 Street Line 3 Street Line 4	Displays the street address for the address type for the ID. This information cannot be changed. This information comes from the **House Number**, **Street Line 1**, **Street Line 2**, **Street Line 3**, and **Street Line 4** fields in the Address window on the General Person Identification (SPAIDEN) page.
City	Displays the city in the address for the address type for the ID. It cannot be changed. This value comes from the **City** field in the Address window on the General Person Identification (SPAIDEN) page.
Inactive Address	Check box that indicates whether the status of the address type is not active or active for the ID. It cannot be changed. Choices are: • Checked = Address type is inactive for the ID. • Not checked = Address type is active for the ID. This value comes from the **Inactive Address** check box in the Address window on the General Person Identification (SPAIDEN) page.
From Date	Date from which address type is active or inactive for the ID. If blank, the address type is effective. It cannot be changed. This value comes from the **From Date** field in the Address window on the General Person Identification (SPAIDEN) page.
To Date	Date to which address type is active or inactive for the ID. If

Field	Description
	blank, the address type is effective. It cannot be changed. This value comes from the **To Date** field in the Address window on the General Person Identification (SPAIDEN) page.
State	Displays the state or province in the address for the address type for the ID. It cannot be changed. This value comes from the **State or Province** field in the Address window on the General Person Identification (SPAIDEN) page.
ZIP/Postal Code	Displays the ZIP or postal code in the address for the address type for the ID. It cannot be changed. This value comes from the **ZIPor Postal Code** field in the Address window on the General Person Identification (SPAIDEN) page.
Nation	Displays the nation code and description in the address for the address type for the ID. It cannot be changed. These values come from the **Nation** field in the Address window on the General Person Identification (SPAIDEN) page.

Filter on an address from the Key block

Updated: August 27, 2020

An address must exist for the ID. You can add address information for the ID on the Identification page (SPAIDEN).

Procedure

1. Enter an ID in SOADDRQ or select one from the Person Search (SOAIDEN) page or the Non-Person Search (SOACOMP) page.
2. Go to the next section to view existing address records for the ID.

Note: If an expected address record is not displayed, add it on the Identification (SPAIDEN) page.

Filter on an address from another page

Updated: August 27, 2020

An address must exist for the ID. You can add address information for the ID on the Identification (SPAIDEN) page.

Procedure

1. Access SOADDRQ from the application page you are using, such as SRAQUIK or SAAQUIK.
2. View the existing address records.
3. You can exit to select the record and take it back to the application page.

   Note: If an expected address record is not displayed, add it on the Identification (SPAIDEN) page.

Student System Distribution Initialization (SOADEST) page

Updated: August 27, 2020

Use this page to enter the intended destination of hardcopy student schedules, invoices, academic transcripts, enrollment verification reports, and compliance results requested during the terminal session.

You can designate the selection criteria used in the sleep/wake routines when processing schedules, invoices, and transcripts. Enrollment verifications are not printed using sleep/wake processing, but the printer to be used may be set up from this field.

This page is displayed the first time you enter any Registration, Accounts Receivable, Academic History (transcript request), or CAPP (compliance request) module page during a session. Entries are stored for the current Banner® session only. To change distribution designations after exiting the Student System Distribution Initialization (SOADEST) page during a session, you must re-access the page directly. The page appears again during your next session whenever you attempt to access one of the same module forms.

Values entered on SOADEST must correspond to the institution's defined sleep/wake selection criteria. Your institution's technical support staff must create report distribution selection criteria before being entered on SOADEST. If the user is not going to be generating any sleep/wake routines this page can be bypassed by the Exit button or function.

Note: To use % as a parameter option for printer destination, you will need to designate it as a valid printer on the Printer Code Validation (GTVPRNT) page. Please be aware, however, that designating % as a valid printer and making it the printer destination will route all requests to that one printer, regardless of the printer destination selected by an individual user on the Student System Distribution Initialization (SOADEST) page. The % remains a valid parameter option for the printer destination when running the above processes outside of sleep/wake mode.

Fields	Descriptions
Schedules	Hardcopy output destination of student schedules requested during the session. Choices come from the Printer Validation (GTVPRNT) list of values.
Invoices	Hardcopy output destination of invoices requested during the session. Choices come from the Printer Validation (GTVPRNT) list of values.
Transcripts	Hardcopy output destination of transcripts requested during the current session. Choices come from the Printer Validation (GTVPRNT) list of values.
Enrollments	Hardcopy output destination of enrollment verification reports requested during the current session. Choices come from the Printer Validation (GTVPRNT) list of values.
Compliance	Hardcopy output destination for compliance results requested during the session. Choices come from the Printer Validation (GTVPRNT) list of values.

Specify the destination of hardcopy requests for compliance results

Updated: August 27, 2020

You can specify the destination of hard copy requests for the compliance results.

About this task

Procedure

1. Access the Student System Distribution Initialization (SOADEST) page.
2. Use List from the **Schedules**, **Invoices**, **Transcripts**, **Enrollments**, or **Compliance** fields to display a list of values for the selected field.
3. Select the output destination from the pulldown list.
4. Select the X to exit out of the page.

Duplicate Material Rules (SOADPMR) page

Updated: August 27, 2020

Use this page to define the rules in the Recruiting, Admissions, and General Student modules that apply to the assignment of duplicate materials for a student for a communication plan. You can define separate duplicate checking parameters for each module.

Prerequisite

Updated: August 27, 2020

Before you can use SOADPMR, you must first define values on the Duplicate Material Rule Code Validation (STVDPMR) page.

Following are the considerations for the set-up and use of the rules:

- When considering whether or not to assign a material, communication plan processing will first determine if the material has ever been assigned to the person before.
- If the material has never been assigned to the person, it will be assigned.
- If the material has been assigned to the person and is still pending, the material will not be assigned, regardless of the module attempting to assign the material.
- If the material has been printed for the person, plan processing will determine whether the material has a duplicate rule code. Duplicate rule codes are attached to a material on the Material (SOAMATL) page. If the material has no duplicate rule code

attached, no duplicates of the material are allowed and the material will not be assigned.

- If the material has a duplicate rule code, the rule's effective date on the Duplicate Material Rules (SOADPMR) page will be checked. Only rules with an effective date less than or equal to the processing date will be applied.
- If an effective rule is found for the material, the duplicate rule parameters for the module attempting to assign the material will be checked.
- The time interval after the most recent date printed for the material will be checked. If the existing material's print date plus the rule's interval days is less than or equal to the processing date, the material may be assigned again, depending on the **Within** and **Across (Term Indicators)** and the **Override Date**. If the date printed plus the interval days is greater than the processing date, the material will not be assigned.
- If a potential duplicate passes the interval check, the term code being used to attempt to assign the material will be checked against the term code of already printed copies of the material.
- If the material has already been printed for the same term and the **Within (Term Indicator)** is checked or Y, the material will be assigned again. If the **Within (Term Indicator)** is unchecked or N, the material will not be assigned again, unless the **Override Date** has passed.
- If the material has already been printed for a different term and the **Across (Term Indicator)** is checked or Y, the material will be assigned again. If the **Across (Term Indicator)** is unchecked or N, the material will not be assigned again, unless the **Override Date** has passed.

  Note: Duplicate rules for the Student module do not include the **Within** and **Across (Term Indicators)** because materials assigned by Student module Communication Plan processing all contain the term code '999999'. Materials assigned by Student module plan processing use this code, because student records are effective-term records, not term-specific records.
- If all other duplicate checking has prevented the material from being assigned, but the **Override Date** for the module attempting to assign the material is less than or equal to the processing date plus any wait days for the material, the material will be assigned.

The following fields are on this page:

Fields	Descriptions
Rule	Code associated with the duplicate material rules. When a code has been defined, it cannot be changed. Choices come from the Duplicate Material Code Validation (STVDPMR) list.
Effective Date	Effective date for the duplicate material rules. When performing duplicate material checking, if the effective date of a material's duplicate rule is greater than the processing date, no further duplicate checking will be performed and no duplicate material will be assigned. The system date will default to the effective date when a new duplicate rule is added, but may be changed to another date if desired.
Recruiting Interval (Days)	Number of days that must pass before new materials are assigned. If duplicate materials are always permitted in Recruiting module plan processing, set this interval to 0 and the **Recruiting Within (Term Indicator)** and the **Recruiting Across (Term Indicator)** to checked or Y. Choices are: 0 (default) - A new duplicate rule is added. This value can be changed. 0-999 - Number of days that must pass before new materials are assigned.
Recruiting Within (Term Indicator)	Check box that indicates whether duplicate materials are assigned within the same term in the Recruiting module, if duplicate checking is allowed under the rule code for the module. The **Recruiting Within (Term Indicator)** will default to unchecked or N when a new duplicate rule is added, but can be changed to checked or Y to allow duplicates within the same term. If duplicates should always be allowed in recruiting module plan processing, interval days should be set to 0 (zero), and both the within term and across term Indicators should be set to checked or Y. Choices are: checked (default) - Duplicate materials are assigned within the same term. You can change the value in this field if duplicates are

Fields	Descriptions
	permitted within the same school term. unchecked - Duplicate materials are not assigned within the same term.
Recruiting Across (Term Indicator)	Check box that indicates whether duplicate materials are assigned across terms in the Recruiting module, if duplicate checking is allowed under the rule code for the module. The **Recruiting Across (Term Indicator)** will default to unchecked or N when a new duplicate rule is added, but can be changed to checked or Y to allow duplicates across terms. If duplicates should always be allowed in recruiting module plan processing, interval days should be set to 0 (zero), and both the Within Term and Across Term Indicators should be set to checked or Y. Choices are: checked (default) - Duplicate materials are assigned across terms. You can change the value in this field if duplicates are permitted within the same school term. unchecked - Duplicate materials are not assigned across terms.
Recruiting Override Date	Duplicate materials are assigned on or after this date. The settings for the **Recruiting Interval (Days)**, **Recruiting Within (Term)**, and **Recruiting Across (Term)** fields have no impact. If entered, plan processing in the Recruiting module will assign a duplicate material if the processing date plus wait days for the material is greater than or equal to the override date.
Admissions Interval (Days)	Number of days that must pass before new materials are assigned. If duplicate materials are always permitted under the rule code in Admissions module plan processing, set this interval to 0 and the **Admissions Within (Term Indicator)** and the **Admissions Across (Term Indicator)** to checked or Y. Choices are: 0 (default) - A new duplicate rule is added. You can change the

Fields	Descriptions
	value in this field. 0-999 - Number of days that must pass before new materials are assigned.
Admissions Within (Term Indicator)	Check box that indicates whether duplicate materials are assigned within the same term for the Admissions module, if duplicate checking is allowed under the rule code for the module. This indicator will default to unchecked or N when a new duplicate rule is added, but can be changed to checked or Y to allow duplicates within the same term. If duplicates should always be allowed in admissions module plan processing, interval days should be set to 0 (zero), and both the **Admissions Within (Term Indicator)** and **Admissions Across (Term Indicator)** should be set to checked or Y. Choices are: checked - Duplicate materials are assigned within the same term. unchecked (default) - Duplicate materials are not assigned within the same term. You can change the value in this field.
Admissions Across (Term Indicator)	Check box that indicates whether duplicate materials are assigned across terms for the Admissions module, if duplicate checking is allowed under the rule code for the module. The **Admissions Across (Term Indicator)** will default to unchecked or N when a new duplicate rule is added, but can be changed to checked or Y to allow duplicates across terms. If duplicates should always be allowed in admissions module processing, interval days should be set to 0 (zero), and both the W **Admissions Within (Term Indicator)** and **Admissions Across (Term Indicator)** should be set to checked or Y. Choices are:

Fields	Descriptions
	checked (default) - Duplicate materials are assigned across terms. You can change the value in this field. unchecked - Duplicate materials are not assigned across terms.
Admissions Override Date	Duplicate materials are assigned on or after this date. The settings for the **Admissions Interval (Days)**, **Admissions Within (Term)**, and **Admissions Across (Term)** fields have no impact. If entered, plan processing in the Admissions module will assign a duplicate material if the processing date plus wait days for the material is greater than or equal to the override date.
Student Interval (Days)	Number of days that must pass before new materials are assigned. If duplicate materials are always permitted under the rule code in General Student module plan processing, set this interval to 0. (There are no Within Term and Across Term Indicators associated with student module duplicate checking rules because materials assigned by student module plan processing are not assigned for a specific term.) Choices are: 0 (default) - A new duplicate rule is added. 0-999 - Number of days that must pass before new materials are assigned.
Student Override Date	Duplicate materials for student modules are assigned on or after this date. The setting for the **Student Interval (Days)** field has no impact. If entered, plan processing in the General Student module will assign a duplicate material if the processing date plus wait days for the material is greater than or equal to the override date.

Define the rules for the assignment of duplicate materials

Updated: August 27, 2020

You can define the rules for the assignment of duplicate materials.

About this task

Procedure

1. Access the Duplicate Material Rules (SOADPMR) page.
2. Enter values in the **Rule** field and the **Effective Date** field.
3. Enter values for the associated module interval days, the module within indicator, and the module across indicator. You can also enter values for the module override dates.
4. Save.

Electronic Applicant Search (SOAEIDN) page

Updated: August 27, 2020

This page is used to perform name or ID searches on data in the electronic admissions holding tables. The page is accessed through the menu or by using a List function from the **Web ID** field in the Key block of the Electronic Application Submitted (SAAETBL) page.

When accessed, the page displays in query mode. Enter the criteria you want to search by, and then perform the query. The data displayed will be exactly as provided by the person in the electronic application. It may not conform to any of your institution's data standards, nor does it necessarily reflect the ID or name which has or will be loaded into the Banner® permanent tables. Queries are performed using the exact criteria specified, and case and spacing are important.

Fields	Descriptions
Web ID	Use the **Web ID** field to enter the Web ID for which you want to search. Or, after a query has been performed, the field displays the Web ID used when an electronic admissions application was created.
Last Name	Use the **Last Name** field to enter the last name of an electronic admissions application for which you want to search. Or, after a

Fields	Descriptions
	query has been performed, the field displays the last name specified by the applicant.
First Name	Use the **First Name** field to enter the first name of an electronic admissions application for which you want to search. Or, after a query has been performed, the field displays the first name specified by the applicant.
Middle Name	Use the **Middle Name** field to enter the middle name of an electronic admissions application for which you want to search. Or, after a query has been performed, the field displays the middle name specified by the applicant.
Birth Date	Use the **Birth Date** field to enter the birth date of an electronic admissions application for which you want to search. Or, after a query has been performed, the field displays the birth date specified by the applicant.
Record Type	Use the **Record Type** field to specify the type of electronic application records for which you want to search. N indicates applications submitted through unsecured Web processing. S indicates applications submitted through secured Web processing. Or, after a query has been performed, the field displays the source type for the displayed applicant.

HTML Letter Rules (SOAELTL) page

Updated: August 27, 2020

This rules page is used to record the letters that can be generated as email. The letter must first be entered on SOAELTL before it can be formatted on the Format HTML Letter Rules (SOAELTR) page.

Fields	Descriptions
Letter	The **Letter (Code)** used may be any valid letter code from GTVLETR.
Module	The **Module** field value must be a value recorded in the HTML Letter Module Validation (STVELMT) page.

Format HTML Letter Rules (SOAELTR) page

Updated: August 27, 2020

This page is used to construct letters using formatting commands and free page text. When constructed, the letter is ready for the Admissions office staff to send by email.

Use the **Copy Letter** button in the Key block to create letters that are similar to one another.

The **Formatting**, **Variable**, and **Text** fields are not required, but you will be prompted to enter a value in at least one of the fields. If you do not manually enter a value in the **Sequence Number** field, one will be filled in when you Save. Rows having the same sequence number will be flagged as not valid. To avoid this problem, consider entering the sequence number during the initial sequencing and increment each one by five or ten. This will make it easier to add new lines at a later time. The automatic sequencing uses increments of ten. You can also use the **Auto Sequence** button under the **Sequence Number** field to automatically re-sequence and save the records.

Use the **Display Letter** button in the main block to view the letter after it has been formatted, without actually having to send an email message or create a Web application. When you have finished reviewing the letter, use the **Return** button to go back to the main window of SOAELTR.

Fields	Descriptions
Letter Code	The **Letter Code** in the Key block must be for a letter which has been defined on GTVLETR and SOAELTL.
Sequence Number	The **Sequence Number** determines the order in which the lines appear in the letter. Use the **Auto Sequence** button to automatically re-sequence and save the records.
Formatting	The **Formatting** field is a pulldown list with basic formatting descriptions.
Variable	The **Variable** field is for a column name from the view that corresponds to the module, which is maintained on STVELMT for the letter. The List function shows the columns for the view identified on STVELMT. The source of the column names is the

Fields	Descriptions
	`ALL_TAB_COLUMNS` table.
Text	The **Text** field is a free format area where you can add text. The text expands to 250 characters and has an Edit function which will display the Oracle editor. If you are creating a customized Signature Page for the Web, you can also include HTML commands in this text field.

Enrollment Planning Service Rules (SOAEPSC) page

Updated: August 27, 2020

This page allows you to set up rules for each EPS code by state, ZIP/PC, county, or city. Only the **State/Province Code** field is required. These rules are for specific region criteria and apply only to high school addresses.

Existing/Incoming Application Mapping (SOAEQUI) page

Updated: August 27, 2020

Use this page for exception processing, if there are certain combinations of student/Web applicant data for which you don't want to allow a student record to be inserted.

If an incoming Quick Start record is not matched to a record on this page, a student record will be inserted. If a combination record exists on this page and a match is made with an incoming Quick Start application, no student record will be inserted, and whatever letter code is present for the record on SOAEQUI will be displayed to the Web applicant on the Signature Page. If no letter code exists, the letter code associated with the DEFAULT letter type on SAAWADF will be displayed for the Web applicant. If no letter code is associated with the DEFAULT letter type, the default Web Tailor Signature Page will display.

Main window

Updated: August 27, 2020

The main window contains the key block and the Existing Student Data/Incoming Data block.

Key block

Updated: August 27, 2020

The fields in the Key block are optional but can be used to query for existing records that match the entered criteria.

Each field has a Lookup button from which you may select a valid value for the query. The existing term and incoming term are effective terms. Each set of existing student data and incoming data equals a record that is joined for term, level, college, degree, program, and major.

Existing Student Data/Incoming Data section

Updated: August 27, 2020

Fields for existing and incoming student data have Lists of Values from which to select a valid value. The Lookup button for the **Letter Code** field displays the letters defined on SOAELTL with a module code of S.

Fields	Descriptions
Priority	The **Priority (Number by Term)** field designates the priority to be used when an applicant matches to multiple rules. The rule with the highest priority will be used (along with its associated letter code). One (1) is the highest priority.
Student Status	The **Student Status** field displays the student status to be matched against the incoming Web applicant's existing student record.
Academic Status	The **Academic Status** field displays the academic status to be matched against the incoming Web applicant's existing academic status. If an override academic end of term status exists for the most recent student record, it will be used. If none exists, then the academic status from SHAINST will be used.
Registration Status	The **Registration Status** field displays the

Fields	Descriptions
	enrollment status to be matched against the incoming Web applicant's existing enrollment status.
End Term	The **End Term** fields for both records are used to end an effective term. You can end a given rule and replace it with something similar but not exactly equal to the current rule.
User ID	The value in the **User ID** field represents the last user ID to update the record.
Activity Date	The value in the **Activity Date** field represents the last date on which a record was updated.

Faculty/Advisor Process Rules (SOAFACS) page

Updated: August 27, 2020

This page is used to set up process rules for process/role access and evaluation in Self-Service.

Within a rule, you can restrict faculty member and advisor access to Self-Service as needed by role (faculty or advisor), active process, overall access, student PIN, relationship to student or CRN, primary instructor or advisor, attribute type, or advisor type. Each rule, with the exception of the ENTERGRADES rule, can be customized for a faculty member or an advisor to control access to the various processes set up on the Process Control Code Validation (STVPROC) page and associated Self-Service options. The ENTERGRADES process is available for faculty only. Processes include Self-Service options that relate to viewing or updating student information such as schedules, test scores, grades, holds, transcripts, and compliance evaluations. You can also control access to grade entry by faculty.

The following fields are on this page.

Field	Description
Process	Process code and description for the faculty/advisor process rule.

Field	Description
	List Process Code Control Validation (STVPROC)
Faculty or Advisor	Designates if the process rule is for a faculty member or advisor. Valid values are Faculty or Advisor. The ENTERGRADES process is available for faculty only.
Process Available on Self-Service	Check box used to indicate whether the process rule is active for the faculty member or advisor in Self-Service. When this indicator is checked, and faculty members or advisors meet the process rule, they have access to the process. When this indicator is unchecked, faculty members and advisors cannot access the process, but they can see the link to the process. A message is displayed indicating they do not have access to the process.
All Access	Check box used to indicate that no security is invoked for the process, and faculty members and advisors are able to view all available student information in Self-Service. When this indicator has been checked, you cannot activate the settings for the other indicators except for the **Process Available on Self-Service** indicator. The **All Access** indicator must be unchecked to set the other indicators to checked or unchecked and activate those settings for the rule.
PIN Control	Check box used to indicate whether the student's PIN needs to be entered to access the process rule in Self-Service. When checked, the PIN is required. The **PIN Control** check box is not available for the DISPLAYGRADES or ENTERGRADES process rules.
Relationship	Check box used to require that the faculty member or advisor

Field	Description
	must have a teaching (CRN) or advising (ID) relationship with the student, to access the process rule in Self-Service. For example, when a faculty member is teaching a section in which the student is enrolled, and the Web page is displayed based on the student's ID, that faculty member can access the process. Or, when a faculty member is assigned to teach a section, and the Web page is displayed based on the CRN, that faculty member can access the process.
Primary	Check box used to require that the faculty member or advisor must be the primary instructor or primary advisor for the student to access the process rule in Self-Service. The faculty member must be the primary instructor on SSASECT to access the process. The advisor must be the primary advisor on SGAADVR to access the process.
Attribute Type Checking	Check box used to require that the faculty attribute type or advisor type must be checked to access the process rule in Self-Service. For faculty members, the system checks the attribute on SIAINST and then cross-references it to SOAFAPC. For advisors, the system checks the advisor type on SGAADVR and then cross-references it to SOAFAPC.
System Required	Check box is used to specify whether the code is required by the system. If this check box is checked, the record cannot be deleted. When this check box is checked, it cannot be unchecked. For this page, all delivered processes are system-required.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Role Based Access Rule Control Page Control (SOAFAPC) page

Updated: August 27, 2020

This page is used in Electronic Grade Book processing with Faculty and Advisors Self-Service to attach a process code (and thereby grant Web access if attribute or advisor type checking is turned on) to a faculty attribute or advisor type.

These attributes/types are then assigned to a faculty member or advisor.

Main window

Updated: August 27, 2020

The main window contains the key block and the Access Role Processing section.

Key block

Updated: August 27, 2020

Use the key block to enter a process code directly, or to select a code you may use List from the **Process** field to display a list of valid values.

Fields	Descriptions
Term	The term entered in the **Term** field is the starting term that this relationship is going to be effective, or if querying on an existing code, this is the term you want to query on

Access Role Processing section

Updated: August 27, 2020

Use this section to enter and maintain information relative to a term range.

If you want to change the definitions and create a new effective term range or end the current definitions, enter the starting term in the Key block, perform a Go button, then select the **Maintenance** button. An Option List is displayed giving you the option to End Process Rules or Copy Process Rules. If you choose to End or Copy Process Rules, the term in the Key block will be entered in the **To Term** field. This means that this rule is active from the **From Term** to the terms up to but not including the **To Term**. When you Copy Process Rules, a new record is created with the term in the Key block assigned to the **From Term** in the page.

Fields	Descriptions
Role	This field allows you to enter a process rule specific to faculty or advisors. The values of F or A are delivered for the roles of F (Faculty Member) and A (Advisor). The assignment of attributes to non-faculty/advisor roles (i.e., role values other than F or A) is prohibited. Other roles can be created on STVROLE and included in the building of rules associated to a process. List Role Definition Validation (STVROLE)
Attribute/Type	This field is used to determine what faculty attribute or advisor type you want to attach the process type to. If the value in the **Role** field is A, the Advisor Type Validation (STVADVR) page is displayed. If the value in the **Role** field is F, the Faculty Member Attributes Code Validation (STVFATT) page is displayed.
Description	This is the attribute/type description as defined in STVADVR or STVFATT.
Active	This field defines whether the attribute/type is active for this term range based on if the check box is checked or unchecked.
Include	This field is used to include all faculty members and advisors in this attribute/type, when the option button is selected.
Exclude	This field is used to exclude all faculty members and advisors with this attribute/type, when the option button is selected.

Available Faculty By Term Filter (SOAFAVQ) page

Updated: August 27, 2020

This page is used to query and view available faculty information by category, staff, contract, college, or department.

This is a stand alone query page which may also be accessed from the *FACULTY menu.

You can access SOAFAVQ from the SGAASST page. To do so, use a Help function from the **Supervisor** field in the Assistantship/Fellowship/Internship information or from the **Coordinator** field in the Tasks and Comments window. You may also use the Available Faculty by Term Filter item in the Options Menu.

You can access SOAFAVQ from the SHACOMI page. To do so, use a Help function from the **Member** field in the Committee/Service Members information. You may also use the Available Faculty by Term Filter item in the Options Menu.

Final Exam Dates (SOAFNDT)

Updated: August 27, 2020

The Final Exam Dates page is used to define final exam dates for Parts of Term and Individual CRNs or both.

The final exam dates defined can then be used by the Clearinghouse Extract Report (SFRNLSC) to report the enrollment dates for students, inclusive of final exam dates.

Main Window

Updated: August 27, 2020

The main window contains the key block, Part of Exam Dates and CRN Final Exam Dates.

Key block

Updated: August 27, 2020

Use the key block to enter the term code for which Part of Term Exam Dates and CRN Final Exam Dates can be added.

Field	Description
Term	Code and description of the term.

Term Dates

Updated: August 27, 2020

This section displays the term start and end dates.

Field	Description
Term Start Date	Date the term begins as listed on STVTERM. Display only.
Term End Date	Date term ends as listed on STVTERM. Display only.

Part of Term Final Exam Dates

Updated: August 27, 2020

Use this section to add final exam dates for part of term. The part of term must exist on SOATERM to be added in this section.

Field	Description
Part of Term	Part of term code for Part of Term Final Exam Dates.
Description	Part of term description. Display only.
Start Date	Part of term start date. Display only.
End Date	Part of term end date. Display only.
Number of Weeks	Length of the part of term in weeks. Display only
Finals Start Date	Date when finals begin for the part of term.
Finals End Date	Date when finals end for the part of term.
Census One Date	Designates that census one enrollment be calculated for the part of term. Display only.
Census Two Date	Designates that census two enrollment be calculated for the part of term. Display only.
Incomplete Extension Date	Extension/expiration date when incomplete final grades become eligible to replace final grades during automated incomplete grade processing. This date serves as a default date when incomplete grades are assigned to a student.

Field	Description
	The date can vary by part of term, is optional, and can remain null. The date will be null for old term records and can be left null for all terms when automated incomplete grade processing is not in use. When the rules on SHAINCG indicate that automated incomplete grade processing is active for a term, with default grades on SHAGRDE that can be entered or overridden by faculty members, the extension date is also defaulted for the term or part of term that matches the CRN. Display only.
Section Override	Check box used to indicate whether the start and end dates and census one and two freeze dates can be update don SSASECT for the part of term. • When checked, these dates can be overridden on SSASECT. • When unchecked, these dates cannot be overridden and will default to the dates associated with this part of term. Display only.

CRN Final Exam Dates

Updated: August 27, 2020

Use this section to add CRN final exam dates for CRN(s). Only CRNs that exist for the TERM shown in the key block can be inserted into this section.

Field	Description
CRN	Course reference number.
Subject	Code for the subject associated with CRN Final Exam dates. Display Only.
Course	Course code for the course associated with the subject. Display only.
Title	Course subject title. Display only.
Section	Course section code. Display only.
Part of Term	Part of term code for CRN. Display only.

Field	Description
Section Begin Date	Begin date for section. Display only.
Section End Date	End date for section. Display only.
Number of Weeks	Number of weeks for CRN. Display only.
Section Finals Start Date	Date when finals begin for the CRN.
Section Finals End Date	Date when the finals end for the CRN.
Enrollment	Enrollment participants for the CRN. Display only.

Guardian Information (SOAFOLK) page

Updated: August 27, 2020

Use this page to enter information about a student's parent or legal guardian.

Prerequisite

Before you can use SOAFOLK, you must enter student information on the Identification (SPAIDEN) page.

Main window

Updated: August 27, 2020

Use this window to enter or view contact information about a student's parent or legal guardian, including their address and phone number.

Key block

Updated: August 27, 2020

You must enter a valid student ID in the key block before you can access the Parent/Guardian Information block.

Fields	Descriptions
ID	ID and name for the student whose information is on this page. Choices come from the Identification (SPAIDEN) page. Select a

Fields	Descriptions
	name to return to the SOAFOLK Page.

Parent/Guardian Information section

Updated: August 27, 2020

Use the Parent/Guardian Information section to enter and review the student's parent or guardian address and phone contact information.

Fields	Descriptions
Prefix	Prefix used by the student's parent or guardian (for example, MS, MRS, MR, or DR). This is a free page field. You can enter any prefix you choose.
Last Name Prefix	Prefix that precedes a last name (for example, 'Von' in the last name 'Von Hintz'). This is a free page field. You can enter any last name prefix you choose.
Last Name	Last name of the student's parent or guardian. This is a free page field. You can enter any last name in this field.
First Name	First name of the student's parent or guardian. This is a free page field. You can enter any first name in this field.
Middle Initial	Middle initial of the student's parent or guardian. This is a free page field. You can enter any letter in this field.
Suffix	Suffix used by the student's parent or guardian (for example, Jr., III, or M.D.). This is a free page field. You can enter any applicable suffix in this field.
Deceased	Check box that indicates whether the student's parent or guardian is deceased. Choices are: checked - The parent or guardian is deceased. unchecked (default) - The parent or guardian is not deceased. When this check box is checked, the system deletes all address information for the parent or guardian from this page.
Relationship	Relationship between the parent or guardian and the student. Choices come from the Relationship Validation (STVRELT) list.

Fields	Descriptions
Degree	Degree earned by the student's parent or guardian. You can enter any degree you choose. There is no list of values associated with this field.
Employer	Employer of the student's parent or guardian. This is a free page field. You can enter any employer name in this field.
Title	Job title for the student's parent or guardian. This is a free page field.
Address Type	Type of address for the student's parent or guardian (for example, temporary address, parent's address, or guardian's address). Choices come from the Address Type Validation (STVATYP) list.
From Date	First date this address is effective. If this field is left blank, the address is effective until an end date is specified. This value comes from the **From** field on the Identification (SPAIDEN) page.
To Date	Last date this address is effective. If this field is left blank, the address is always effective. This value comes from the **To** field on the Identification (SPAIDEN) page.
Sequence	Sequence number the system assigns to the address. This value comes from the Identification (SPAIDEN) page and cannot be changed.
Source	Source for the address information. This value comes from the **Source** field on the Identification (SPAIDEN) page.
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1	First line of the street address.

Fields	Descriptions
	This field comes from the Identification (SPAIDEN) page.
Street Line 2	Second line of the street address. This field comes from the Identification (SPAIDEN) page.
Street Line 3	Third line of the street address. This field comes from the Identification (SPAIDEN) page.
Street Line 4	Fourth line of the street address. This field comes from the Identification (SPAIDEN) page.
City	City of residence. This value comes from the Identification (SPAIDEN) page.
State/Province	State or province of residence. This value comes from the Identification (SPAIDEN) page.
ZIP/Postal Code	ZIP or postal code. This value comes from the Identification (SPAIDEN) page.
County	County of residence. This value comes from the Identification (SPAIDEN) page.
Nation	Country of residence. This value comes from the Identification (SPAIDEN) page.
Status	Code that indicates whether the address is active. Choices are: checked - The address is inactive.

Fields	Descriptions
	unchecked (default) - The address is active. This value comes from the **Inactive** field on the Identification (SPAIDEN) page.
Telephone Type	Type of residence associated with this phone number (for example, car or business). This value comes from the **Type** field on the Identification (SPAIDEN) page.
Telephone (Country Code)	International country code. This value comes from the **Phone** field on the Identification (SPAIDEN) page.
Telephone (Area Code)	Area code. This value comes from the **Phone** field on the Identification (SPAIDEN) page.
Telephone (Number)	Phone number. This value comes from the **Phone** field on the Identification (SPAIDEN) page.
Telephone (Extension)	Phone extension. This value comes from the **Phone** field on the Identification (SPAIDEN) page.
More Phone Numbers Exist	Check box that indicates whether the student's parent or guardian has additional phone numbers. Choices are: checked - Additional phone numbers exist. unchecked (default) - Additional phone numbers do not exist.

Geographic Region Rules (SOAGEOR) page

Updated: August 27, 2020

The Geographic Region Rules (SOAGEOR) page is used to establish rules for the geographic region and geographic region division codes entered in the Key block.

You must create the processing rules which are used to determine the geographic regions associated with each person based on the address information. Geographic regions can be retrieved by entering valid geographic regions and division codes. The rules consist of valid type codes with associated values set for each type code entered.

The geographic region codes must be established in the Geographic Region Code Validation (STVGEOR) page, and the geographic region division codes must be established in the Geographic Region Division Code Validation (STVGEOD) page before the rules for SOAGEOR can be established.

The Key block is used to enter the geographic region codes and geographic region division codes (which are validated against STVGEOR and STVGEOR respectively). Valid geographic region codes and division codes must be entered before you can move into the next block on the page.

- Use Count Filter Hits or select the Filter Geographic Regions item in the Options Menu when you are in the **Region** field to access the Geographic Region Filter (SOAQGEO) page for existing region and division information. Use List to see a list of valid region codes for this field.
- Use Count Filter Hits or select the Filter Geographic Regions item in the Options Menu when you are in the **Division** field to access the Geographic Region Filter (SOAQGEO) page for existing region and division information. Use List to see a list of valid division codes for this field.

The Geographic Region Rules block is used to add, delete, and update the rules that you may set up for the geographic codes entered in the Key block. The rules consist of valid type codes with associated values that have been set for each of the type codes.

Fields	Descriptions
Type	The **Type** field specifies the geographic region type code which corresponds to the ranges specified in the value fields. Valid types for this field are CITY, STATE, COUNTY, NATION, and ZIP.

Fields	Descriptions
Value A	The **Value A** field specifies the starting range for the type of geographic region. If you enter a state in the **Value A** field, the value in the **Value B** field must match that state code. If you enter a city code in the **Value A** field, you must enter a state code in the **Value B** field. Use List from the **Value A** field to view a list of valid state/province codes from STVSTAT.
Value B	The **Value B** field specifies the ending range for the type of geographic region. Use List to view a list of valid state/province codes from STVSTAT. Use Count Filter Hits to view a list of valid nation codes from STVNATN. You may also use the **Search** feature to access the Option List and then select either List of States or List of Nations.

Applicant GPA Types (SOAGPAT) page

Updated: August 27, 2020

Use this page to enter or review grade point averages (GPAs) for an applicant.

GPA types will be loaded by the AMCAS (American Medical College Application Service) data load process, but can also be added manually online. GPA Types are loaded (or entered) for the person in the Key block, and are validated against the Applicant GPA Type Validation (STVGPAT) page.

A GPA type record can be stand-alone, or it can be associated with an institution source code (high school or college), an admissions application, or both. If a GPA type record is associated with a specific school, entry of an institution source code (SBGI) from the Source/Background Institution Filter-Only (SOISBGI) page is available from SOAGPAT. If a GPA type record is associated with a specific application, entry of both a valid term and a valid application number is required.

You may navigate to the Admissions Application Summary (SAASUMI) page, the High School Information (SOAHSCH) page, and the Prior College Summary (SOAPCOQ) page from SOAGPAT to review application, high school, and prior college information which exists for the person.

Main window

Updated: August 27, 2020

Use this window to enter or access different types of GPAs for an applicant.

Key block

Updated: August 27, 2020

You must enter an ID in the key block before you can access the main window and view the grade point average records for that applicant.

Fields	Descriptions
ID	ID for the applicant whose GPA information is on this page. When you select an ID, the name for the applicant also displays.

Applicant GPA Types block

Updated: August 27, 2020

Use the Applicant GPA Types block to enter or access different types of GPAs for the applicant whose ID is in the Key block.

Fields	Descriptions
GPA Type	Type of GPA for the student. When you select a GPA type, the associated description displays automatically. Valid values come from the Applicant GPA Type Validation (STVGPAT) page.
GPA	The applicant's numeric GPA. Choices are 0.000000000 - 99,999,999,999,999.999999999. The default is .000000000.
+/- Used (Plus/ Minus Scale Used Indicator)	Check box that indicates whether the GPA contains grades that include either a plus or a minus and have been scaled. Choices are: checked - The GPA includes grades with a plus or minus. unchecked (default) - The GPA does not include grades with a plus or minus.
School	Source/background institution code for the high school or college where the student earned this GPA. When you save a record

Fields	Descriptions
	without entering a school code in this field, the system saves 999999 in this field. Choices are: 999999 (default). The value that appears when you save a record without entering a school code in this field. You can change this value. This value comes from the Source/Background Institution Filter-Only (SOISBGI) page.
School Description	Name of the high school or college where the student earned this GPA.
Application Number	Identifies the specific application associated with this applicant's GPA. When you select an application from the Admissions Application Summary (SAASUMI) page, the system retrieves both the application number and the term code associated with the application. Both fields must exist for the application to be valid. (The only exception to this is if the application number is 00.) Choices are: 00 (default). No specific application is associated with this GPA. This value displays when you save a record without entering a value in this field. You can change this value. If you enter an incorrect combination of application number and term code in a record, the system displays an appropriate error message. This value comes from the Application Summary (SAASUMI) page.
Term	Applicant term associated with this GPA. When you select an application from the Admissions Application Summary (SAASUMI) page, the system retrieves both the application number and the term code associated with the application. Choices are: 999999 (default). This value displays when you save a record without entering a value in this field. You can change this value.

Fields	Descriptions
	If you enter an incorrect combination of application number and term code in a record, the system displays an appropriate error message. This value comes from the Term Code Validation (STVTERM) page.
Activity Date	Date that this record was last updated. This date is system-maintained and cannot be changed.

Access GPA records

Updated: August 27, 2020

You can access the GPA records and add an ID.

About this task

Procedure

1. Access the Applicant GPA Types (SOAGPAT) page.
2. Enter a valid ID in the **ID** field.
3. Go to the Applicant GPA Types section. Any GPA type records that exist for this applicant will display.

Enter GPA records

Updated: August 27, 2020

You can enter the values for the GPA records.

About this task

Procedure

1. Access the Applicant GPA Types (SOAGPAT) page.

2. Enter a valid ID in the **ID** field.
3. Go to the Applicant GPA Types section.
4. Select a GPA type from the list of valid values.
5. Go to the **GPA** field and enter the appropriate GPA in 99,999,999,999,999.999999999 format.
6. If the school from which the GPAs were generated used plus or minus codes, select the **+/- Used** check box.
7. Select a school from SOISBGI.
8. Select an appropriate application number and application from SAASUMI.
9. Save.

View the name of the school associated with a specific GPA record

Updated: August 27, 2020

You can view the name of the associated with a specific GPA record.

About this task

Procedure

1. Access the Applicant GPA Types (SOAGPAT) page.
2. Enter a valid ID in the **ID** field.
3. Go to the Applicant GPA Types section.
4. Select the GPA record in which you are interested.
5. View the name of the school associated with this GPA record. GPA types loaded through the AMCAS load process have a default school code of 999999.
6. Exit.

HEA Graduate Outcome Survey (SOAHEGO) page

Updated: June 20, 2024

The SOAHEGO page allows administrators to enter the graduate outcome survey on behalf of the student and view the survey answers.

Key block

The Key block contains the fields where you can specify the details for which you want the administrator to do the graduate outcome survey.

Field	Description
Survey Reference	Survey reference number. The List of Values (LOV) field displays all the survey reference numbers that are available for the HEA Graduate Outcomes survey for you to select.
ID	Student ID. When you click the LOV field, the SOAIDEN page appears and you can select the desired student ID for the survey purposes.

Main block

Updated: June 20, 2024

Contains multiple types of questionnaires related to the Graduate Outcomes survey that the administrators can take on behalf of the student.

The page contains the following:

- Survey Answers window: If the survey is already submitted for the details selected in the Key block, this window appears with the questions and answers.
- Main block: If the survey is not submitted, administrators need to enter the answer the survey questions and view the results.

Field names in the Main block (common in all the windows):

- Mandatory: Y indicates that this is a mandatory set of questions that the administrators need to answer.
- Answer Value: The administrator selects the appropriate answer value option for the student from the LOV field.
- Open Answer: Free text box field for the administrators to enter the answers.

  Note: Depending upon the questions that the administrator selects, the Answer Value and Open Answer columns gets enabled or disabled.

Window Names	Description
Your Current Situation	List of questions related to the student's current situation. Depending upon the selected values, the corresponding window in this Main block gets enabled for taking the survey.
Employment Full-time	List of questions related to the student's full time employment details. This window gets enabled when the administrator selects the Working full-time option from the Answer Value field in the Your Current Situation window.
Employment Part-time	List of questions related to the student's part time employment details. This window gets enabled when the administrator selects the Working part-time option from the Answer Value field in the Your Current Situation window.
Employment - Due to start a job	List of questions related to the student's employment that is due to start a job. This window gets enabled when the administrator selects the Due to start a job in the next 3 months option from the Answer Value field in the Your Current Situation window.

Window Names	Description
Further study Full-time	List of questions related to the student's employment that is due to start a job. This window gets enabled when the administrator selects the Due to start a job in the next 3 months option from the Answer Value field in the Your Current Situation window.
Other Activity - Unemployed	List of questions related to the student's other unemployed activity. This window gets enabled when the administrator selects the Unemployed and looking for work option from the Answer Value field in the Your Current Situation window.
Other Activity	List of questions related to the student's other activity. This window gets enabled when the administrator selects the Other Activity (e.g. engaged in home duties, retired from employment, unable to work due to illness or disability, travelling, volunteering etc.) option from the Answer Value field in the Your Current Situation window.
Contact details section	List of questions related to the student's contact details. The window is enabled, by default. In this window, administrators can save the responses of the survey after answering all the questions.

Student Help Balances (SOAHELP) page

Updated: December 12, 2024

Displays the HELP balance information of the student.

Fields	Description
HELP Limit	Limit of any Commonwealth assistance that a student can have in their lifetime.
Pending Balance	Balance amount that is available in the lifetime limit.
Available Balance	Balance of Commonwealth assistance that remains available for the student.
Max Help Loan Amount	Total help loan amount used at the institution.
Notification message	Latest notification received from TCSI to see if there are any loan notification for the student.

Hold Information (SOAHOLD) page

Updated: August 27, 2020

The Hold Information (SOAHOLD) page is used to assign holds to a person or entity. Hold information is used in the Registration, Academic History, and Accounts Receivable modules.

Hold type codes are created and maintained on the Hold Type Code Validation (STVHLDD) page. These codes use a series of indicators to specify how the person or entity is affected by the hold. Holds may prevent registration or graduation, or the production of transcripts, enrollment verification documents, and grade mailers. Holds can also affect admissions applications, compliance, and Accounts Receivable information. Hold information is created by a particular user and may only be deleted or changed by that user (unless the user specifies otherwise). Each office should determine a user to create and delete hold information.

The user ID and date information for the person who last updated the hold record is displayed in a message at the bottom of the page. The message contains Last Updated By: User ID on DD-MON-YYYY.

Key block

Updated: August 27, 2020

Use the Key block to enter the student's ID for whom you want to add or view holds.

Fields/Buttons	Descriptions
ID	ID and name of the student for whom holds exist or need to be added.

Hold Details

Updated: March 16, 2023

Use this section of the page to add holds for the student in the key block.

Fields	Descriptions
Hold Sequence	Auto generated hold sequence number.
Hold Type	Hold type code and description.
Reason	Hold reason. This field is optional and is used to specify a free-format reason for the hold.
Release Indicator	When checked, indicates the release of this hold may only be performed by the user who entered it. When unchecked, the hold can be released by any user.
Amount	Amount of hold fee. Values use format 0.00 to 9999.99.
From	Start date for which the hold is active. The default is the system date.
To	End date for which the hold is active. The default is the system date.
Origination Code	Origination code and description for the hold, such as the office that generated the hold (Student Accounts Office, Bursar's Office, Library, and so on).

High School Information (SOAHSCH) page

Updated: August 27, 2020

Use this page to enter high school information such as the school name and address, graduation date, subjects taken, course, overall GPA, and class rank/size.

Main window

Updated: August 27, 2020

Use this window to enter high school information.

Key block

Updated: August 27, 2020

Use the key block to enter the identification number of the person whose high school information is being added or updated.

Fields	Descriptions
ID	Identification number of the person for whom high school information is being added/queried. Choices come from the Person Search (SOAIDEN) list of values.

High School Details section

Updated: August 27, 2020

Use the High School Details section to gather information about the person's high school record.

An unlimited number of high schools may be entered for each person. This information is used when admissions decisions are processed automatically. Select the High School Details section to access this area from a secondary window.

Fields	Descriptions
High School	High school code for the prospect/applicant. Choices come from the Source/Background Institution Filter-Only (SOISGBI) list of values, or the **Source or Background Institution** field on the Source/Background Institution Code Validation (STVSBGI) list of values.
Enrollment Planning Service Code	Value determined by the geographic region in which a high school resides. This field is display only. EPS codes are created by the College Board and are stored on the

Fields	Descriptions
	Enrollment Planning Service Code Validation (STVEPSC) page.
Graduation Date	Date the prospect/applicant graduated from high school. Use the date format DD-MON-YYYY.
Transcript Received Date	Date the prospect/applicant's high school transcript was received by the institution. Use the date format DD-MON-YYYY.
Class Rank and Size (Rank)	Used to calculate the class rank. The class rank must be less than the class size. The percentile is calculated if both fields are entered. You can enter the percentile manually if only one field is entered.
Class Rank and Size (Size)	Used to calculate the percentile of the student body. The class size must be greater than the class rank. The percentile is calculated if both fields are entered.
Percentile	Student's percentile as related to class rank and size. It is calculated by the system when the class rank and class size are entered. You may enter it manually if the rank or size are not entered.
GPA (Grade Point Average)	High school GPA earned by the prospect/applicant. This field is free format.
Diploma	Type of high school diploma earned. Choices come from the **Diploma Type** field on the Diploma Type Validation (STVDPLM) list of values.
College Preparation	Check box that indicates whether the high school curriculum completed was college preparatory or not. Choices are: checked - College preparatory. This value is stored in the database as Y. unchecked - Not college preparatory. This value is stored in the database as N.
Admissions Request	Links high school transcripts with admissions checklist items in the Checklist window of the Admissions Application (SAAADMS) page. If the following conditions are met, the checklist item received date is updated when the transcript receive date or the

Fields	Descriptions
	request codes are entered or updated. • The admission request code entered on this page exists on any of the person's applications. • The high school code is the same as the item code on the Checklist window on the Admission Application (SAAADMS) page, or the **Item (Code)** field is blank. • The receive date on the checklist item is blank. All request items with matching criteria are updated, regardless of the application number or term. The checklist receive date is updated with the transcript date and may be changed on SAAADMS. Choices come from the **Request Code** field on the Admission Request Code Validation (STVADMR) list of values.

High School Subjects window

Updated: August 27, 2020

Use this window to add and update high school subjects completed by the student. Select the High School Subjects section to access this window.

Fields	Descriptions
Subject	High school subject and description, completed by the applicant. Choices come from the **Code** field on the High School Subject Validation (STVSBJC) list of values.
Subject Grade	Grade earned by the student for high school subjects. Use alphabetic characters only.
Years Taken	Number of years the high school subject was taken by the applicant. Use the format 99.99.
Subject GPA	GPA earned by the applicant for the associated high school. This field is free

Fields	Descriptions
	format.

High School Address window

Updated: August 27, 2020

Use this window to review the high school's address. Select the High School Address section to access this window. You can update high school address on the Source or Background Institution Base (SOASBGI) page.

Fields	Descriptions
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1	High school address street line 1.
Street Line 2	High school address street line 2.
Street Line 3	High school address street line 3.
Street Line 4	High school address street line 4.
City	High school address city.
State or Province	High school address state or province.
ZIP or Postal Code	High school address ZIP or postal code.
County	High school address county.
Nation	High school address nation.

Enter high school information for a student

Updated: August 27, 2020

You can enter the information of high school for a student.

About this task

Procedure

1. Access the High School Information (SOAHSCH) page.

2. Enter the student's ID.
3. Go to the High Information section.
4. Enter or search for the high school.
5. Save.

   Note: The other fields on this page, although not required, are referenced in other Banner® forms. Therefore, it is highly recommended that you enter information into all fields for optimal data results.

Person Search (SOAIDEN) page

Updated: August 27, 2020

The Person Search page may be accessed from all pages that require an ID number in the key block. This page may be used to determine the correct ID number for a person using the query capabilities of the system.

The name, ID number, birth date, change indicator (an indicator to record name and ID changes-blank for the current record), and name type are displayed.

A second function, the soundex search, is provided on the Soundex Search window. This search allows the user to enter information (or partial information) for a "sounds like" search. Use the Search Using Sounds Like choice in the Tools menu to access this window.

All persons available to all other pages will be displayed on this page. The creation of these persons occurs in the General Person Identification (SPAIDEN) page. You can use the Common Matching Entry (GOAMTCH) page to create a person after checking to see if they are a match to an existing Banner® ID.

If you want to enter a case sensitive query for your search, in the **CaseSensitive Filter** radio group, select Yes, and then enter your query.

Perform a soundex search

Updated: August 27, 2020

Use the Soundex Search window to query the database for non-person names that are approximate matches for the name entered in the **Sounds Like…Last Name** or **Sounds**

Like…First Name fields or both. Soundex searches are not case sensitive.

Procedure

To use the soundex search, enter a name in the **Sounds Like…Name** field, and search.

You can view detail for the ID and access the Person Search Detail (SOAIDNS) page from the **ID** field in the main window, or use Search and Display More Detail from the Tools menu to access SOAIDNS from the Soundex Search window.

Result: The search data will be displayed in the main window.

Person Search Detail (SOAIDNS) page

Updated: August 27, 2020

Use this page to further determine the correct student to be used for processing by querying on person information and viewing related student information.

The Person Search Detail page is called from the Person Search (SOAIDEN) page when student-related information is accessed for a specific record.

A second function, the soundex search, is provided in the Soundex Search section. This search allows the user to enter information (or partial information) for a "sounds like" search and query the database for names that are approximate matches for the name entered in the **SoundsLike…LastName** field or the **First Name** field. To use the soundex search, enter a name in the **SoundsLike…LastName** field or the **FirstName** field, and perform a Filter function. The filtered data will be displayed in the first section of the window. The information in the General Student and Address Details sections is the detail for the record selected in the top section of the window.

Note: Soundex searches are not case sensitive.

The creation of the persons and their address information occurs on the General Person Identification (SPAIDEN) page. You can use the Common Matching Entry (GOAMTCH) page to create a person after checking to see if they are a match to an existing Banner® ID. The General Student (SGASTDN) page maintains the detailed general student information.

Note: To exit and return with the value, you must select the Add Person to Database [SPAIDEN] item from the Related menu.

The section navigation order on the page is:

- SPRADDR
- SOUNDEX
- SGBSTDN
- SFBETRM
- SOVLCUR
- SOVLFOS

Main window

Updated: August 27, 2020

The main window contains the Person Detail, Soundex Search, Address Details, General Learner, Registration Terms, Curricula Summary, and Field of Study Summary sections.

Person Detail section

Use this section to enter person information for the query such as ID, name, birth date and gender.

Soundex Search section

Use this section to search on a potential name, when you are not sure of the exact name. The results display in the Person Detail Section where you can select the record.

Address Details section

Use this section to view detailed address information for the person.

Field	Description
From Date	Effective start date for the address associated with the person.
To Date	Effective end date for the address associated with the person.
Inactive Indicator	Indicator that identifies if address information is inactive. Valid value is I (Inactive).

General Learner section

Use this section to view general student information such as status, residence, and class.

Registration Terms section

Use this section to view terms with registration records for the person.

Curricula Summary section

This section is display only for the ID in the key block and displays a summary of curricula data. This section displays the most recent curriculum data for each priority if the curriculum row is ACTIVE.

The section displays the critical curriculum fields so that users can quickly determine what curricula the learner is pursuing. The curricula summary information comes from the general student record. The summary sections are populated when the SGBSTDN record for the person is queried.

To make it easier for users to identify which curriculum records have been backfilled into the primary and secondary curriculum fields, the key words *Primary* or *Secondary* are displayed next to the Curricula Summary section title to identify these two rows. This section will only display the appropriate fields for curriculum rows for the module from which it is being called.

Field	Description
Priority	Priority number that defines the curriculum rank.
Term	Term code for the module's curriculum record.
Program	Program for the module's curriculum record.
Catalog	Catalog term code for the module's curriculum record.
Student Type	Student type code entered specifically for the curriculum record.
Rate	Rate code entered specifically for the curriculum record.
Level	Level for the module's curriculum record.
Campus	Campus for the module's curriculum record.
College	College for the module's curriculum record.
Degree	Degree for the module's curriculum record.
End	Term code for the end of the curriculum.

Field	Description
Outcome Key	For the learner record, this is the sequence number of the outcome (degree) the curriculum was rolled to. For the outcome record, this is the key sequence number the curriculum belongs to.
Admission Type	Admission type code entered specifically for the curriculum record.
Admission	Admission term code entered specifically for the curriculum record.
Matriculation	Matriculation term code entered specifically for the curriculum record.

Field of Study Summary section

This section is display only for the ID in the key block and displays a summary of field of study data. This section will only display the appropriate fields for curriculum rows for the module from which it is being called.

The **Attached to Major** button is enabled when the cursor is on a field of study record for a major with attached concentrations. Click on the button to display a list of the attached concentrations in a pop-up window. The button is not enabled if the cursor is on a record for a major with no attached concentrations, or if the record is for a minor or a concentration.

Field	Description
Priority	Priority number that defines the field of study rank.
Term	Term code for the field of study. This value defaults from the Curriculum section.
Type	Type code for the learner field of study. It identifies whether the row is for a major, minor, or concentration.
Field of Study	Major, minor, or concentration code for the field of study.
Department	Department code for the field of study.
Attached to Major	Code for the attached major for the field of study. This field indicates to which major a concentration is attached, if appropriate. This field is only enabled if the field of study type is CONCENTRATION.

Integration Partner Rules (SOAINTG) page

Updated: August 27, 2020

This page is used to define integration partner rules for integration partner processing, such as competency-based education with Brainstorm or continuing education with Elevate.

Term-based rules can be created for each integration partner code defined on the Integration Partner System Rules (GORINTG) page. Only one term code and integration partner code rule combination can exist at a time. Multiple rules can exist for an integration partner code when they are set up as between terms. Records cannot be deleted when the integration partner code is set up on the Schedule (SSASECT) page for the term.

Main window

Updated: August 27, 2020

The main window contains the key block and the Integration Partner Rules block.

Key block

Updated: August 27, 2020

Use the key block to enter the term and integration partner code for the rule.

Fields	Descriptions
Term	Term code for the rule. List - Term Code Validation (STVTERM)
Integration Partner	Integration partner code for the external partner for the rule. List - Integration Partner System Rules (GORINTG) page

Integration Partner Rules section

Updated: August 27, 2020

This section is used to define integration partner rules.

Use this section to set up rules for two specific processing areas:

- when a final grade is received for the student from an integration partner
- for the override of duration units on open learning sections

  Note: Final grade processing will be supported in a future release.

Fields	Descriptions
Roll Final Grade and Calculate GPA	Radio group used to indicate whether processing can automatically roll the final grade and calculate the GPA when a final grade is received from an integration partner such as Brainstorm. Values are `Yes` or `No`. This option is available for all sections that are associated with the integration partner code and term, whether a section is a traditional section, an open learning section, or an open learning section with override duration. Final grade validation and processing are performed by the Grade Entries API.
Allow Override Duration on Open Learning Registration Sections	Radio group used to indicate whether processing can override the duration units on open learning sections during registration. Values are `Yes` or `No`. When set to `Yes`, the user can check the **Override Duration** indicator on SSASECT when the section is defined as an open learning section and the integration partner and term code match the Key section information.

Language Proficiency Details (SOALANP) page

Updated: August 19, 2021

Record a student's ability to communicate in a given language.

Field	Description
Language Identifier	Describes the language in which the student's proficiency is recorded. Select the language identifier code from the Native Language Validation (STVLANG) page.
Language Identifier Description	Language identifier description.
Proficiency Type	Type of proficiency the student has in the language indicated in Language Proficiency. Select the language proficiency type from the Language Proficiency Type (STVLPTY) page.
Proficiency Type Description	Description of the language proficiency.
Proficiency Level	Student's ability to speak in the language indicated in Language Proficiency. Select the language proficiency level from the Language Proficiency Level (STVLPLV) page.
Proficiency Level Description	Description of the proficiency level.

Material (SOAMATL) page

Updated: August 27, 2020

Use this page to choose materials to be sent to a person and to determine who will receive these materials.

Materials include such diverse items as admission packets, housing information, scholarship information, and brochures about extracurricular activities. The recipient of these materials must meet all required criteria defined on this page.

For example, suppose you want to send scholarship information pamphlets to students who received a score of 700 or better on the Math SAT and who are new freshmen at your institution. You can use this page to indicate these specific requirements.

If a rule or condition applies to a person, they will be sent the corresponding material. Automatic mailing of materials is based on a person's attributes and the status of their recruiting record, admissions application, or general student record. When rules are created for any of the elements, that check box will be checked by the system.

Rules have an OR condition within a rule type, and rules have an AND condition among rule types. For example, in the Material Rules information, the codes which determine the rules for each field, such as the **Department** field, follow the OR condition. The codes which determine the rules for all the fields in the Material Rules section, from department through student type, follow the AND condition in relation to each other.

Main window

Updated: August 27, 2020

Use this window to define the materials to be distributed and establish rules for distribution of these materials.

Key block

Updated: August 27, 2020

The fields in the Key block identify the material to be distributed. The Key block may also contain information about groups of materials in addition to communication plans associated with the material.

Fields	Descriptions
Material	Material to be defined or distributed. When you select a material code, its associated description displays automatically. You must define the material code before you can define the rules in the Material Rules block.

Fields	Descriptions
	Values come from the Material Code Validation (STVMATL) list.
Plans	Button or Count Filter Hits to access Communication Plans Using This Material list. View plans that use the material code entered in the **Material** field, and Save to select one.
Groups	Button or Count Filter Hits to access Communication Groups Using This Material list. View groups that use the material code entered in the **Material** field, and Save to select one.

Material section

Updated: August 27, 2020

The information in the Material section defines what types of materials are produced for the material code and indicates whether the material is assigned by a communication plan or entered directly on the Student Mail (SUAMAIL) page.

Fields	Descriptions
Material	Material to be defined or distributed. When you select a material code, its associated description displays automatically. You must define the material code before you can define the rules in the Material Rules section. Values come from the Material Code Validation (STVMATL) list.
Plans	Use Search or Count Filter Hits to access the Communication Plans Using This Material list. View plans that use the material code entered in the **Material** field, and Save to select one.
Groups	Use Search or Count Filter Hits to access the Communication Groups Using This Material list. View groups that use the

Fields	Descriptions
	material code entered in the **Material** field, and Save to select one.

Material section

Updated: August 27, 2020

The information in the Material section defines what types of materials are produced for the material code and indicates whether the material is assigned by a communication plan or entered directly on the Student Mail (SUAMAIL) page.

Fields	Descriptions
Published or Generated	Indicates whether the materials to be sent are published materials (that is, off the shelf) or system-generated. For system-generated materials, you must also enter a code in the **Letter** Field in the section labelled Generated Materials Only. Choices are: P - Materials are published materials. G - Materials are system-generated.
Duplicate Material Rule	Indicates whether Communication Plan processing can assign duplicates of material and identifies the rules to be used in the processing of duplicate materials. When you select a material rule, its associated description displays. If this field is blank, the Communication Plan cannot assign duplicate materials. Choices come from the Duplicate Material Code Validation (STVDPMR) list.

Fields	Descriptions
Allow duplicate entry on SUAMAIL	Check box that indicates whether you can enter requests for duplicate materials on the Student Mail (SUAMAIL) page. You can enter additional requests for materials only when printed dates have been set for all other requests. Choices are: checked (default) - You can enter requests for duplicate materials on SUAMAIL. unchecked - You cannot enter requests for duplicate materials on SUAMAIL.
Letter (Code)	Identifies a standard letter that will be produced for the material you have selected. A description of this code appears in the field beside the code. You can enter a value in this field for system-generated materials only, that is, the **Published or Generated** field must contain a value of G. Choices come from the Letter Code Validation (GTVLETR) page.
Initials	Contains initials for the person responsible for signing the letter. After you select initials, the name associated with the initials displays. You can enter a value in this field for generated materials only, that is, the **Published or Generated** field must contain a value of G. Choices come from the Initial Code Validation (STVINIT) list.
Override Initials	Check box that indicates whether the

Fields	Descriptions
	default signature initials can be overridden by entering a different initial code on the Student Mail (SUAMAIL) page. You can enter a value in this field for generated materials only, that is, the **Published or Generated** field must contain a value of G. Choices are: checked (default) - You cannot override the initials entered in the **Initials** field. unchecked - You can override the initials entered in the **Initials** field.

Material Rules section

Updated: August 27, 2020

The Material Rules section contains rules that you can define to designate who will receive the materials selected in the Material section.

Use the **Data/No Data** buttons for each rules type to display the associated window. Use Scroll Down from within the rule windows to cycle through all the rules. Use List from within each rule window to see the valid ranges for the rule.

Fields	Descriptions
Department	Contains information about the student or prospective student's department.
Major	Contains information about the primary field of student for the student or prospective student.
Contacts	Contains information about the method used to contact the student or prospective student.
Interests	Contains information about the outside interests of the student or prospective student.

Fields	Descriptions
Attributes	Contains a description of the student or prospective student's academic status (for example, FY for first-year students, SY for second-year students).
Gender	Identifies the gender of the student or prospective student.
State or Province	Identifies the state or province where the student or prospective student lives.
Ethnicity	Identifies the ethnic type of the student or prospective student.
Legacy	Indicates the relationship to the student or prospective student of other family members who were students here, such as sister, daughter, or father.
Citizenship	Identifies the citizenship status of the student or prospective student.
Recruit Type	Identifies the status of the prospective student, for example, Class of '96.
Test Scores	Contains the specific test scores required, for example, ACT Math.
Admission Type	Indicates the type of admission, for example, Early Admission.
Admission Decision	Identifies the status of the application decision, for example, Application Rejected.
Student Type	Identifies the type of student, for example, Reinstated Undergrad.
Source	Identifies the source of the student or prospective student.
Application Status	Identifies the application status of the student or prospective student.
EPS Code	Identifies the EPS market of the student or prospective student.
Region or Division	Identifies the geographic region and division of the student or prospective

Fields	Descriptions
	student.

Department Rule window

Updated: August 27, 2020

This window contains information about the department for the student or prospective student. To open this window, select the **Department** button in the Material Rules section.

Fields	Descriptions
Department	Contains information about the department for the student or prospective student. Choices come from the Department Validation (STVDEPT) list.

Major Rule window

Updated: August 27, 2020

This window identifies the primary field of study for the student or prospective student. To open this window, select the **Major** button in the Material Rules section.

Fields	Descriptions
Major	Primary field of study for the student or prospective student.

Contact Rule window

Updated: August 27, 2020

This window identifies the initial method used to contact the student or prospective student. To open this window, select the **Contacts** button in the Material Rules section.

Fields	Descriptions
Contact	Initial method used to contact the student or prospective student. Choices come from the Contact Code Validation (STVCTYP) list.

Interest Rule window

Updated: August 27, 2020

This window contains outside interests of the student or prospective student. To open this window, select the **Interests** button in the Material Rules section.

Fields	Descriptions
Interest	Outside interests of the student or prospective student. Choices come from the Outside Interests Code Validation (STVINTS) list.

Attribute Rule window

Updated: August 27, 2020

This window identifies a specific attribute, such as the student's academic status (for example, FY for first-year students, or SY for second-year students). To open this window, select the **Attributes** button in the Material Rules section.

Fields	Descriptions
Attributes	Identifies a specific attribute, such as the student's academic status (for example, FY for first-year students, or SY for second-year students). Choices come from the Student Attribute Validation (STVATTS) list.

Gender Rule window

Updated: August 27, 2020

This window contains the gender of the student or prospective student. To open this window, select the **Gender** button in the Material Rules section.

Fields	Descriptions
Gender	Gender of the student or prospective student. Choices are: M - male

Fields	Descriptions
	F - Female N - Not available

State or Province Rule window

Updated: August 27, 2020

This window contains the state or province where the student or prospective student lives. To open this window, select the **State or Province** button in the Material Rules section.

Fields	Descriptions
State or Province	State or province where the student or prospective student lives. Choices come from the State/Province Code Validation (STVSTAT) list.
Address Type	Type of address available for the student or prospective student. Choices come from the Address Type Validation (STVATYP) list.

Ethnic Rule window

Updated: August 27, 2020

This window contains the ethnic type of the student or prospective student. To open this window, select the **Ethnicity** button in the Material Rules section.

Fields	Descriptions
Ethnicity	Ethnic type of the student or prospective student. Choices come from the Ethnic Code Validation (STVETHN) list.

Legacy Rule window

Updated: August 27, 2020

This window contains information about relatives of the student who attended this institution. To open this window, select the **Legacy** button in the Material Rules section.

Fields	Descriptions
Legacy	Relatives who were students at this institution, such as sister, daughter, or father. Choices come from the Legacy Code Validation (STVLGCY) list.

Citizenship Rule window

Updated: August 27, 2020

This window contains information about the student or prospective student's citizenship. To open this window, select the **Citizenship** button in the Material Rules section.

Fields	Descriptions
Citizenship	The student or prospective student's citizenship. Choices come from the Citizen Type Validation (STVCITZ) list.

Recruit Type Rule window

Updated: August 27, 2020

This window contains the status of the prospective students, for example, Class of '96. To open this window, select the **Recruit Type** button in the Material Rules section.

Fields	Descriptions
Recruit Type	Status of the prospective students, for example, Class of '96. Choices come from the Recruiting Type Validation (STVRTYP) list.

Test Score Rule window

Updated: August 27, 2020

This window contains specific types of test scores that must be attained. To open this window, select the **Test Scores** button in the Material Rules section.

Fields	Descriptions
Test Score	Specific type of test scores required. Choices come from the Test Score Validation (STVTESC) list.
Minimum (Test Score)	Number value indicating the minimum test score acceptable. Choices are 0-99.
Maximum (Test Score)	Number value indicating the maximum test score required. Choices are 0-99.

Admission Type Rule window

Updated: August 27, 2020

This window specifies the type of admission. To open this window, select the **Admission Type** button in the Material Rules section.

Fields	Descriptions
Admission Type	Type of admission. Choices come from the Admission Type Validation (STVADMT) list.

Admission Decision Rule window

Updated: August 27, 2020

This window contains information about the status of the application decision. To open this window, select the **Admission Decision** button in the Material Rules section.

Fields	Descriptions
Admission Decision	Status of the application decision, for example, application rejected. Choices come from the Admission Application Decision Code Validation (STVAPDC) list.

Student Type Rule window

Updated: August 27, 2020

This window contains information about the student type. To open this window, select the **Student Type** button in the Material Rules section.

Fields	Descriptions
Student Type	Student type. Choices come from the Student Type Validation (STVSTYP) list.

Source Rule window

Updated: August 27, 2020

This window contains information about the source. To open this window, select the **Source** button in the Material Rules section.

Fields	Descriptions
Source	The source code required for the material code. Entering a source code will ensure that only people with this source code will receive the material. Choices come from the Source/Background Institution Code Validation (STVSBGI) list.

Application Status Rule window

Updated: August 27, 2020

This window contains information about the application status. To open this window, select the **Application Status** button in the Material Rules section.

Fields	Descriptions
Appl Status (Application Status)	Application status code. Entering a status code will ensure that only people with this application status code will receive the material. Choices come from the Admission Application Status Code (STVAPST) list.

EPS Market Rule window

Updated: August 27, 2020

This window contains information about the enrollment planning services code. To open this window, select the **EPS Code** button in the Material Rules section.

Fields	Descriptions
EPS Code	Enrollment Planning Services Code. Can specify what EPS codes are eligible for the material. Choices come from the Enrollment Planning Service Code Validation (STVEPSC) list.

Geographic Region and Division Rule window

Updated: August 27, 2020

This window contains information about the geographic region and division. To open this window, select the **Region or Division** button in the Material Rules section.

Fields	Descriptions
Region	Geographic Region Code associated with an address. Can be associated with a person address, source/background institution address, or both. Choices come from the Geographic Region Code Validation (STVGEOR) list.
Division	The Geographic Division code associated with an address. Can be associated with a person address, source/background institution address, or both. Choices come from the Geographic Region Division Code Validation (STVGEOD) list.
Address Source	Address source code radio group. Use the geographic region/division codes to only look at addresses by **Person**, **SBGI (Source/Background Institution)**, or to look at **Both**.

Fields	Descriptions
	Values are saved to the database as: R1 (Person) R2 (Source/background Institution (SBGI)) R3 (Both)

Define the materials to be distributed and establish rules for a distribution of materials

Updated: August 27, 2020

You can define the materials to be distributed and establish rules for distributing the materials.

About this task

Procedure

1. Access the Material (SOAMATL) page.
2. Enter the material code.
3. Go to the Material section.
4. Enter G or P in the **Published or Generated** field. Enter values in the rest of the fields in this section.
5. If the materials to be distributed are system-generated, perform the following steps. (If not, go to the next step.)
    a. Go to the **Letter** field in the Generated Materials Only section.
    b. Enter a letter code in the **Letter** field. Enter values in the rest of the fields in this section.
6. Go to the Material Rules section.
7. Select the button for each relevant topic in this section and establish specific rules that apply to the materials to be distributed.

8. Save.

Mass Entry Audit (SOAMAUD) page

Updated: August 27, 2020

Use this page to query and view the results of a mass entry event.

The audit data that is displayed comes from the SOBMAUD and SORMAUD tables. You can query mass entry sessions by mass entry page name, user ID, and date the event was entered. You can then view the search criteria and the updated and inserted values in the Search/Update window. The processing results are displayed in the Results window with any associated status or result messages and whether the record was manually added.

The mass entry process updates the mass entry tables with result codes and associated result messages. The **Update** radio group in the Results window shows whether the update was successful (Yes), partially or not successful (No), or that no updates were considered (None). The **Message** field displays the related message for the update.

The SOBMAUD and SORMAUD audit tables are updated when the mass entry updates are processed in real time on a mass entry page. The tables are also updated when job submission batch processing (SORMEBP) is run for updates that have been held for later processing. The SORMECL table is also updated when SORMEBP is run.

Main window

Updated: August 27, 2020

The main window contains the Key block and the Sessions section. Use the Sessions section to access this window from other windows on the page.

Key block

Updated: August 27, 2020

Use this section to enter information for the mass entry session query. If these fields are left blank, all mass entry sessions will be displayed. The session data displayed is from real time updates, and pending or completed job submission updates.

Fields	Descriptions
Submit Date From	Start date for the query range. This is the date that the updates occurred or that the updates were held for job submission.
Submit Date To	End date for the query range. If not entered, this defaults to the current date.
User ID	Banner® ID of user who performed the updates. All records that have been initiated or completed are displayed for this ID.
Page Name	Banner mass entry page on which the updates took place. List Object Maintenance (GUAOBJS) page

Sessions section

Updated: August 27, 2020

Use this section to view mass entry session records from the SOBMAUD table that are returned by the query in the key block. The data includes the mass entry page name, user ID, processing start date and timestamp, processing end date and timestamp, and batch ID used for job submission.

Fields	Descriptions
Date Initiated	Date and time the updates were started.
User ID Initiated	ID of user who performed the updates. List All Oracle Users
Date Completed	Date and time the updates were completed.
User ID	ID of user who completed the updates. This ID can be different from the user who started the updates, especially if the updates were held for job submission. List All Oracle Users
Page Name	Banner mass entry page on which the updates took place.

Fields	Descriptions
	List Object Maintenance (GUAOBJS) page
Description (untitled)	Banner mass entry page descriptive name.
Batch Process ID	Batch process identifier, system generated by the mass entry page when updates were held for job submission. List All Oracle Users. Selection of an ID will display all batch process IDs associated with the query.

Search/Update window

Updated: August 27, 2020

Use this window to review the search and update criteria for the mass entry session selected in the main window.

The search and update criteria come from the mass entry page where the records were searched on/updated or from the job submission updates that were written to the SORMAUD table. The date, time, and user ID information is repeated for the record from the main window.

Fields	Descriptions
Date Initiated	Date and time the updates were started.
User ID Initiated	ID of user who performed the updates.
Date Completed	Date and time the updates were completed.
User ID Completed	ID of user who completed the updates. This ID can be different from the user who started the updates, especially if the updates were held for job submission.
Page Name	Banner mass entry page on which the updates took place.
Description (untitled)	Banner mass entry page descriptive name.
Batch Process ID	Batch process identifier, system generated by the mass entry page when updates were held for job submission.

Fields	Descriptions
Search Criteria Column	Mass entry data element name used in the search criteria.
Search Criteria Value	Mass entry value entered in the search criteria.
Update Criteria Column	Mass entry data element name used in the update criteria.
Update Criteria Value	Mass entry value entered in the update criteria.

Results window

Updated: August 27, 2020

Use this window to view the update results of the search by student ID, including result messages and whether updates were successful (Yes), partially or not successful (No), or not considered (None).

Records are listed in name order by last name, then first name, then middle name. The results detail that is displayed in this window changes based on the mass entry page used in the session.

- When SAAMAPP is used, the **Application Number** and **Admission Term** fields are displayed.
- When SGAMSTU is used, the **Effective Term** field is displayed.
- When SGAMSPT is used, the **Sport** and **Search Term** fields are displayed.
- When SHAMDEG, SHAMCAT, SHAMDIP, and SHAMUDI are used, the **Sequence Number** field is displayed.
- When SHAMUCA is used, the **Ceremony** and **Ceremony Term** fields are displayed.

You can navigate to directly display and review individual result messages for consecutive records without using Enter and tabbing to the **Message** field. When you are in the **Message** field for a record, use the **Edit** button to open the Edit window. Click OK when you are done, and then press the Tab key to view the message for the next record. Continue to click OK and press the Tab key to review as many messages as you want.

Fields	Descriptions
Date Initiated	Date and time the updates were started.
User ID Initiated	ID of user who performed the updates.
Date Completed	Date and time the updates were completed.
User ID Completed	ID of user who completed the updates. This ID can be different from the user who started the updates, especially if the updates were held for job submission.
Page Name	Banner mass entry page on which the updates took place.
Description (untitled)	Banner mass entry page descriptive name.
Batch Process ID	Batch process identifier, system generated by the mass entry page when updates were held for job submission.
ID	ID of the student.
Name	Name of student.
Display of fields below from **Application Number** to **Ceremony Term** is determined by which mass entry page was used.	
Application Number	Admissions application number for the record. Displayed when detail is from SAAMAPP.
Admission Term	Term of admission for the record. Displayed when detail is from SAAMAPP.
Effective Term	Effective term for the record. Displayed when detail is from SGAMSTU.
Sport	Sport code for the record. Displayed when detail is from SGAMSPT.
Search Term	Search term for the record. Displayed when detail is from SGAMSPT.
Sequence Number	Degree (outcome) record sequence number for the record. Displayed when detail is from SHAMDEG, SHAMCAT, SHAMDIP, and SHAMUDI.
Ceremony	Ceremony for the record. Displayed when detail is from SHAMUCA.
Ceremony Term	Term for the ceremony for the record. Displayed when detail is from SHAMUCA.
Hold	Check box used to indicate whether holds exist. This field is informational only and will not prevent updates.

Fields	Descriptions
Manually Added	Check box used to indicate whether the ID was added manually on a mass entry page.
Update Status (untitled)	Radio group that indicates whether changes for the record were successfully saved and the parent page was updated, were not successfully saved and the parent page was not updated, were partially saved and the parent page was partially updated, or that no processing of updates was considered for the record. Valid values are: Yes, No, Partial, None.
Message	Displays results related messages, for successful, partially successful, or unsuccessful updates. Use the **Edit** button to open the Edit window and view the full text.
Process Ind (Indicator)	Check box that indicates whether the student's updates were processed.
Conf (Confidential)	Check box used to indicate whether the student's information is confidential. This field is informational only and does not prevent updates.
Deceased	Check box used to indicate whether the student is deceased. This is informational only and will not prevent processing from taking place, unless the record is from SAAMAPP.

Open Learning Section Default Rules (SOAORUL) page

Updated: August 27, 2020

Use the Open Learning Section Default Rules (SOAORUL) page to create sections and section rules for open learning courses.

It is mandatory to enter the registration dates; however, the registration status codes, extension, and refund processing are optional. If extension and refunding rules are not defined here, it will be necessary to manually enter this information on SSARULE after the section has been created. Information in this page does not depend on part of term data, and does not rely on static processing dates.

Note: If revisions are made to the information in this page, those changes will only be reflected for new sections when they are created and will not impact existing sections that meet the course or course/section characteristics in addition to the section characteristics.

This page is composed of the following sections:

- Key block
- Registration Date Defaults
- Default Registration Status Code Definition
- Default Extension Processing Rules
- Default Refunding Rules Definition

Key block

Updated: August 27, 2020

Use the key block to enter the term for the section default rules. Use the **Copy** button to copy a set of rules to the term in the key block.

Fields/Buttons	Descriptions
Term	Term code and description of the term to be associated with the section default rules.
Copy	Button used to open the Copy Term window and copy rules from an existing term to a term that does not have any open learning section control information on SOAORUL.

Copy Term window

Updated: August 27, 2020

Use this window to duplicate open learning section controls from an existing term and copy them to a term that does not have any controls.

To open this window, enter a term in the key block and click the **Copy** button.

- The **Copy** button is enabled for a term that does not have any existing data.
- The **Copy** button is disabled for a term that has existing data.

Fields/Buttons	Descriptions
From Term	Term from which control information will be copied. The term entered must have existing information on SOAORUL.
Cancel	Button used to cancel the copy process.
Copy	Button used to copy control information for the term in the **From Term** field to the term in the key block.

Registration Date Defaults

Updated: August 27, 2020

The rules entered here act as a basis for registration status codes, refunding rules, and extension rules.

This section of the page is used to define the course and section characteristics, in addition to the dates to be defaulted into the **Registration Dates From**, **Registration Dates To**, **Learner Start Dates First, Learner Start Dates Last**, **Census One Freeze Date**, and **Census Two Freeze Date** fields on SSASECT when a new CRN is created. The default dates are associated with a department, campus, college, schedule type, and instructional method to create date range default rules for a distinct population of sections.

To associate registration status codes, extension rules, and refund rules, select the record with the appropriate course and section characteristics, and use the tabs for Default Registration Status Code Definition, Default Extension Processing Rules, or Default Refunding Rules Definition to access the child records in each section.

Fields	Descriptions
College	Course college code and description for the rule.
Department	Course department code and description for the rule.
Campus	Section campus code and description for the rule.
Schedule Type	Section schedule type code and description for the rule.
Instructional Method	Section instructional method code and description for the rule. Required.
Start Date	Date of the first day that registration will be open to students.
End Date	Date of the last day that registration for the section will be accepted.

Fields	Descriptions
Census Date 1	Census one date for the rule. Required.
Census Date 2	Census two date for the rule. Not required.
Override	Check box used to allow a user to override the start and end dates defined here when a new section record is created on SSASECT.

Default Registration Status Code Definition

Updated: August 27, 2020

Use this section of the page to define the various status codes that will be available to the registration processes.

The only enterable fields in this section are the **Status Code**, **Usage Cutoff From (Percentage)**, and **Usage Cutoff To (Percentage)**. The other fields display the corresponding data from the Course Registration Status Code Validation (STVRSTS) page. This section of the page displays child records for the record selected in the Registration Date Defaults section.

If extensions are permitted for this section, a status code defined for use in extension processing (where the **Extension Indicator** in STVRSTS is checked and the **Withdrawal Indicator** is unchecked) must be defined. If academic policy permits the drop of or withdrawal from extensions, it will be necessary to define a separate extension withdrawal code (where the **Extension Indicator** and the **Withdrawal Indicator** in STVRSTS are checked) and corresponding refunding rules.

Note: Status codes defined for use with extensions will not be enterable in any of the registration processes.

Fields	Descriptions
Status Code	Registration status code and description associated with the identifying criteria for the rule.
Usage Cutoff From (Percentage)	Usage cutoff from percentage. This field determines when this status code is available for use. As open learning processing is based on individual student progress in a course, the usage cutoff percentages as a range are used to determine if the status code will be available during the

Fields	Descriptions
	time elapsed since, or the time remaining until, the student's start date of the course. If pre-registration is permitted, and policy allows the use of a particular code from the day the student registers until a date specified by the **Usage Cutoff To** field as described below, enter NULL in this field. Negative values may be used in this field for those codes that are permitted for only a limited amount of time before the student starts class. For example, if a status code is to take effect one week before the student starts a ten week course, set the value of this field to -10. A value of 0 (zero) in this field signifies that the status code is available from the day the student starts class, until the date determined by the value in the **Usage Cutoff To** field. If a value is entered into this field, it is mandatory that a value be entered into the **Usage Cutoff To** field. It is not mandatory to define any of the usage cutoff fields. If not defined, the status code will always be available for use. For more examples of how to set the usage cutoff fields, please refer to the *Banner Open Learning Registration* content in the Ellucian Documentation site.
Usage Cutoff To (Percentage)	Usage cutoff to percentage. This field completes the usage cutoff percent range. This field is required when the **Usage Cutoff From** field is populated. Negative values may be used in this field for status codes that are permitted only before the student starts class. For example, if a status code is to be available from the date the student registers until one week before the student starts a ten week course, set the **Usage Cutoff From** field to NULL, and set this field to -10. A value of 0 (zero) in this field signifies that the code may be used

Fields	Descriptions
	until the day before the student starts class. For example, if a status code is to be available for the entire time before the student starts class, set the **Usage Cutoff From** field to NULL, and set this field to 0. It is not mandatory to define any of the usage cutoff fields. If not defined, the status code will always be available for use. For more examples of how to set the usage cutoff fields, please refer to the *Banner Open Learning Registration* content in the Ellucian Documentation site.
Effect by Student Status	Check box used to specify if this registration status code can be overwritten with a student enrollment status code.
Allow Entry	Check box that displays the setting of the **Allowed to Enter** check box on STVRSTS for the status code.
Count in Enrollment	Check box that displays the setting of the **Count in Enrollment** check box on STVRSTS for the status code.
Web Indicator	Check box that displays the setting of the **Web Indicator** check box on STVRSTS for the status code.
Withdrawal Indicator	Check box that displays the setting of the **Withdrawal Indicator** check box on STVRSTS for the status code.
Extension	Check box that displays the setting of the **Extension Indicator** check box on STVRSTS for the status code.
Print on Schedule	Check box that displays the setting of the **Print on Schedule** check box on STVRSTS for the status code.
Voice Response	Value of the **Status Type** field on STVRSTS for the status code.

Default Extension Processing Rules

Updated: August 27, 2020

Use this section of the page to define an extension processing rule. You can only access this section if the **Extension Indicator** is checked for the status code on STVRSTS. This section of the page displays child records for the record selected in the Default Registration Status Code Definition section.

Fields	Descriptions
Extension Percent	Used to calculate the amount of time the student's registration will be extended based on the duration and duration unit assigned to the original registration. Enter a number between 0 and 100. For example, a student is registered for a course with a duration of ten weeks. The student's expected completion date needs to be extended. If the extension rule is expressed as 100%, the student would be granted a ten-week extension. However, if the rule was defined as 50%, the completion date would only be extended by five weeks.
Detail Code	Detail code and description used to assess extension fees on the student's accounts receivable account.
Amount	Extension fee amount that will be assessed to the student based on the fee type specified on this page.If a detail code has been assigned an amount on TSADETC, that amount is defaulted in and can be overridden.
Fee Type	Fee type code and description to be used when calculating monies for the extension.
Override Indicator	Check box used by SSARULE to determine if the values defaulted from here can be changed.

Default Refunding Rules Definition

Updated: August 27, 2020

This section of the page is used to define refunding rules for status codes that will be available for drop or withdrawal processing. This section of the page displays child records for the record selected in the Default Registration Status Code Definition section.

Note: In the section level rules, there is a second refunding criteria, duration complete, that can be defined in place of the percent complete information entered here. As the duration is defined at the section level, and validation is required to ensure that the duration assigned in the rule corresponds to that defined at the section, the duration complete information cannot be defined at this time.

Fields	Descriptions
Percent Complete	Value used to determine the appropriate refund percentage. When applied to an individual registration, the student's elapsed time from the start date of the registration will be calculated and compared to this value. Enter a value between `–100` and `100`. For example, your institutional policy states that the learner is entitled to an 80% tuition refund if the course is dropped between 0 and 10% complete (exclusive). 10 would be entered in this field, and 80 would be entered in the **Tuition Refund** field. When the fee assessment process is triggered, if the student had completed less than 10% of the duration of the course, this rule would be invoked. This allows non-term-based courses to have registration start dates that span a date range, and it provides for flexible course durations. Refunding rules for traditional courses are used to control the amount of the refund the student will receive based on the drop/ withdrawal being processed between set dates. This is possible because all students in an individual class start on the same date. However, in the case of open learning course registration records, this is not possible, as registration start dates span a date range. To impose a set period of time for processing would penalize some learners. Therefore, using percent complete provides a means of equalizing the refunding rules, and providing for flexible course durations.
Tuition Refund	Used to calculate the tuition refund. Enter a value between 0 and 100 percent for the calculation of the

Fields	Descriptions
	tuition refund. This refund percentage will be used in determining the student's financial indebtedness to your institution.
Fee Refund	Used to calculate the fee refund. Enter value between 0 and 100 percent for the calculation of the fee refund. This refund percentage will be used in determining the student's financial indebtedness to your institution.
Extension Refund	Used to calculate the extension refund. Enter a value between 0 and 100 percent for the calculation of the extension fee refund. This refund percentage will be used in determining the student's financial indebtedness to your institution.
Override Indicator	Check box used by SSARULE to determine if the values defaulted from here can be changed.

Prior College (SOAPCOL) page

Updated: August 27, 2020

Enter information about a person's prior college experience.

The degree information including GPA, hours, honors, and attendance dates is also maintained on this form, along with majors, minors, and concentrations associated with the degrees. Multiple degrees may be created for a prior college. A person must be added to the system by the General Person Identification Page (SPAIDEN) before entering this form. If a student's degree information is updated, all corresponding majors, minors, and concentrations are updated with the new degree code.

Main window

Updated: August 27, 2020

The main window contains the Key block, the Prior College section, and the Degree Details section. You can access the main window from a secondary window using the

Prior College and Degree section.

Key block

Updated: August 27, 2020

Use this section to enter the ID for which you want to see prior college information.

Prior College section

Updated: August 27, 2020

Use this section to review the prior college information for the person in the key block.

Fields	Descriptions
Enrollment Planning Service Code	The value in the **Enrollment Planning Service Code** field is determined by the geographic region in which an institution resides.

Degree Details section

Updated: August 27, 2020

Use this section to review degree information for the person in the key block.

Fields	Descriptions
Primary Degree Indicator	The **Primary Degree Indicator** can be used to flag an attendance period as the person's primary prior college attendance. There is no validation of this field across prior college degree records for a person, and multiple prior college degree records can be flagged as primary for a single person. (Degree/attendance information associated with a person's primary prior college will be flagged as primary when prior college data is loaded using the AMCAS application data load.)
Goal	The **Goal** field can be used to record the goal the person was working toward at the prior college. Values are validated against the Educational Goal Validation (STVEGOL) page. (Prior College data loaded by the AMCAS application data load will place the person's program type in this field for each prior college attendance period.)

Admission Checklist window

Updated: August 27, 2020

Use this window to view checklist items for the ID in the key. Select Review Checklist from the Options Menu to access this window. You can access this window when you are in the Prior College section and checklist data exists for the ID in the key.

Majors, Minors, Concentrations window

Updated: August 27, 2020

Use this window to enter and view major, minor, and concentration information for the ID in the Key block. Select Major, Minor, Areas of Concentration Information from the Options Menu or use the Majors, Minors, Concentrations section to access this window.

Note: If a user attempts to delete a degree record that has attached majors, minors, or concentrations, the following message is displayed: Cannot delete Prior College Degree; Major/Minor/Area of Concentration data exists.

Majors section

Updated: August 27, 2020

Use this section to view major information for the student.

Minors section

Updated: August 27, 2020

Use this section to view minor information for the student.

Concentrations section

Updated: August 27, 2020

Use this section to view concentration information for the student.

Prior College Address window

Updated: August 27, 2020

Use this window to view prior college address information for the ID in the Key block. Select College Address from the Options Menu or use the Prior College Address section to access this window.

Fields	Descriptions
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1	Prior college address street line 1.
Street Line 2	Prior college address street line 2.
Street Line 3	Prior college address street line 3.
Street Line 4	Prior college address street line 4.
City	Prior college address city.
State or Province	Prior college address state or province.
ZIP or Postal Code	Prior college address ZIP or postal code.
County	Prior college address county.
Nation	Prior college address nation.

Prior College Summary (SOAPCOQ) page

Updated: August 27, 2020

This is a stand alone query page which is used to query information about a person's prior college experience, such as degrees, number of hours, and GPA. A person must be added to the system through the General Person Identification (SPAIDEN) page before querying this page.

Prior College Enrollment Summary (SOAPCSM) page

Updated: August 27, 2020

This page calls a view that generates the prior college data to be displayed. The view calculates the percentages for the appropriate fields. The page is entered in query mode.

The key block contains a source/background institution code, which is required.

The Source/Background Institution Summary Block contains the summary information for the institution in the key, such as a term code, a level code, a campus code, a college code, a program code, a major code, and a student type code, which are optional. The fields in this block are queryable.

If the term code is left blank, then the page displays all pertinent data for the source/ background institution code in the key for all available terms beginning with the most current term. If the term code is entered, the page displays all pertinent information for that term only.

Fields	Descriptions
Number of Prospects	Number of prospects for the term.
Number of Applicants	Number of applicants for the term.
Number Accepted	Number of applicants accepted for admission, (**Institution Acceptance** flag checked on STVAPDC).
Percentage of Acceptances	Percentage of acceptances, (number of acceptances to number of applicants).
Number of Confirmations	Number of student confirmations, (those having decision code of "applicant accept" selected). Students are added to this counter if they have the decision code that is entered in the **External Code** field of the GTVSDAX record with an **Internal Code** of DEPOPAID and a **Group (Code)** of DEPOSIT.
Percentage of Confirmations	Percentage of confirmations, number of confirmed students to number of accepted applicants.

At the bottom of the window, the totals for the query are listed by **Number of Prospects**, **Number of Applicants**, **Number (of Applicants) Accepted**, **Percentage of Acceptances**, **Number of (Student) Confirmations**, and **Percentage of Confirmations**.

Persona Rule Control (SOAPERS) page

Updated: August 27, 2020

The Persona Rule (SOAPERS) page is used to create and maintain rules for personas used with Banner Student Self-Service Registration. Personas rules control what pages can be accessed in Self-Service by a user and what tasks can be performed.

Fields	Descriptions
Persona	Persona code and description from STVPERS.
Web Tailor Role	Role from Banner Web Tailor that corresponds to the persona code.
Access Code	Radio group used to select the role designated when the user logs in to Self-Service. Values are: • Administrator (saved to the database as A) • Faculty (saved to the database as F) • Anonymous (saved to the database as N) • Proxy (saved to the database as P) • Student (saved to the database as S)
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked

Persona Release Hold Type (SOAPHLD) page

Updated: August 27, 2020

This page is delivered for use with a future release of Banner Student Advising Student Profile 9.x.

The Persona Release Hold Type (SOAPHLD) page is used to assign hold types to user roles (personas) so that specific types of holds can be released for a student. Only one record per hold type is allowed.

This page is used with the Banner Student Advising Student Profile application. It is not used with Banner Student 8.x processing.

Main window

Updated: August 27, 2020

The main window contains the data section.

Fields	Descriptions
Hold Type	Release hold type code and description. Hold types used must have the **Web Indicator** checked on the Hold Type Code Validation (STVHLDD) page. List Hold Type Code Validation (STVHLDD) page
Persona	Persona code and description for the code associated with the hold type. Supported role values are: `FACULTYINSTRUCTOR`, `FACULTYADVISOR`, `FACULTYBOTH`. List Persona Codes (STVPERS)
Active	Check box used to indicate whether the persona is active for the release hold type. The default value is checked.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.
User	ID of the user who last updated the record. Display only.

Communication Plan Assignment (SOAPLAN) page

Updated: August 27, 2020

Use this page to assign a communication plan to a person with a recruiting record, admissions application record, or general student record.

A communication plan follows a person through the recruiting and admissions cycle, and may be turned on or off online as processing changes, or as the plan changes according to the communication plan rules. Plans can be inactivated and deleted from this page.

A person may have multiple communication plans assigned to them which are differentiated by term code and application or sequence number. The term code is associated with recruiting or admissions status, while the application or sequence number identifies the specific recruiting record or admissions application.

Main window

Updated: August 27, 2020

Use this window to assign a communication plan.

Key block

Updated: August 27, 2020

Use the key block to select an ID.

Fields	Descriptions
ID	Identification number and description used to access the person online. This code comes from the **ID** field on the Identification (SPAIDEN) page.

Fields	Descriptions
	Perform an extensive name search before creating a new person record.

Assignment block

Updated: August 27, 2020

Use Assignment block to assign a communication plan to the person in the Key block.

Fields	Descriptions
Plan	Communication plan code and description for the actual plan(s) assigned to the prospect, applicant, or student. Plans are separated by term code and application, or by sequence number. Choices come from the Communication Plan Code Validation (STVCPLN) page. To query, add, or delete materials and groups of materials associated with a communication plan, use the Communication Plan (SOACPLN) page. Select Create Materials from the Options Menu or perform a Count Filter Hits function from the **Plan** field to create materials for a new communication plan for the person whose ID is in the Key block. The message Material Creation Completed appears when this is done.
Plan Type (untitled)	Provides additional information on how a record came to be part of a person's communication plan that is assigned in the Recruiting, Admissions, or General Student module. Choices are: Recruiting - A recruiting plan can originate from the Quick Recruit (SRAQUIK) page or the Prospect Information (SRARECR) page. Admissions - An admissions plan can originate from the Quick Entry (SAAQUIK) page or the Admissions Application (SAAADMS) page.

Fields	Descriptions
	Student - A student plan can originate from the General Student (SGASTDN) page.
Term	Term code associated with the recruiting record or application. This field defaults based on the term of the recruiting, admissions, and general student record from which the communication plan assignment was made. Choices come from the Term Code Validation (STVTERM) list of values.
Sequence Number	Sequence number associated with the specific recruiting record or application. This field defaults based on the sequence number of the recruiting, admissions, and general student record from which the communication plan assignment was made.
Active	Indicates whether the corresponding communication plan is active or not. Multiple communication plans may be active for a person, and multiple communication plans may be active for a person in a single module. Choices are: checked - The communication plan is active. The person has active materials for the associated communication plan ready to be processed on the Student Mail (SUAMAIL) page through Letter Generation. This value is stored in the database as Y. Y is the default. unchecked - The corresponding communication plan is inactive. The person no longer receives materials as part of that plan. This value is stored in the database as N.
Mail Exists	Indicates whether mail is pending or not. When the **Mail Exists** check box is checked, the materials are posted automatically to the Student Mail (SUAMAIL) page through Letter Generation based on the plan code that generated those materials. (Materials may be sent manually after a plan is assigned to a person, materials are created, and the rules for the materials meet the criteria for addition to SUAMAIL.) Choices are: checked - Pending mail exists. This value is stored in the database

Fields	Descriptions
	as Y. unchecked - No pending mail exists. This value is stored in the database as N. N is the default. Based on existence of mail on GURMAIL if the GURMAIL print date is blank, and mail is associated with the communication plan code assigned to the person.

Create a communication plan assignment

Updated: August 27, 2020

You can create a communication plan assignment.

About this task

Procedure

1. Access the Communication Plan Assignment (SOAPLAN) page.
2. Enter the student's ID.
3. Go to the Assignment section.
4. Enter the plan code.
5. Save.

   Note: Communication plans can only be created for valid recruiting or application record combinations.

HEA Regulatory Programme and Course Details (SOAPRCD) page

Updated: August 27, 2020

Use this page to store the faculty and course details for the Higher Education Authority

(HEA) programmes.

Note: This page is primarily intended to be used by institutions in Ireland who need to report the programme or course details to the HEA regulatory body.

Key Block

Updated: June 20, 2024

Use this block to enter the programme code for which you want to store the faculty and course details.

Field	Description
Programme	Programme Code. Click the drop-down list to select the programme code from the SMAPRLE pop-up window.
Rollover Program and Course	Copies all the latest program and course details from the SOAPRCD page to the current system academic year.

Base Block

Updated: August 27, 2020

Use this block to record the programme and course details for HEA.

Field	Description
PROGRAMME DETAILS section	
Anticipated Length	(Required). Anticipated duration of programme in years. The expected length of programme is an indication of the normal elapsed time from the commencement of study to the completion of the instance, even if the student instances have different lengths of study, due to the direct entry into the second year. The length study time includes holiday time and will include time for examinations. The anticipated length depends on the student's mode of study. If the student has more than one mode of study for a given programme the following rules apply:

Field	Description
	• Programme with a full-time mode of study, the anticipated length is based on full-time attendance • Programme with a part-time mode of study, the anticipated length is based on part-time attendance • Programme with a distance education mode of study, without full-time or part-time modes of study, the anticipated length of the programme is based on part-time attendance • Programmes of indeterminate length, for example, PhD programmes, an approximate estimate is made for the anticipated length
Programme Type	(Required). Structure of the programme, for example, Undergraduate Certificate and PhD. Click the LOV to select the code.
NQAI Award Level	(Required). NQAI Award Level that ranges from 1 to 10. Click the LOV to select the code.
Exclude from Reporting	Check box used to indicate whether the programme needs to be excluded for reporting.
FACULTY DETAILS section	
Faculty Code	(Required). Institution’s code for faculty. Click the LOV to select the code.
Faculty Title	Name of faculty or school that is operating the programme. Display only.
COURSE DETAILS section	
Course Code	(Required). Institution’s code for the course. **Note:** All major codes will be displayed in the STVMAJR page. All

Field	Description
	the attached the majors and minors that are associated to the selected programme will be displayed in the SOACURR page. Institutions can select the course code as desired. Click the LOV to select the code.
Academic Year	Academic year of the course. Ensure that you maintain the academic year of a course, every year, for the HEA report to fetch information that is relevant to an academic year.
ISCED Code	(Required). International Standard Classification of Education Code. Click the LOV to select the code.
CAO Code	Code of a Course (CAO) code.
Teacher Training	(Required). Identifies the teacher training courses. Click the LOV to select the code.
Co-ordinating Institution	Identifies coordinating bodies for courses. Click the LOV to select the code.
Awarding Body	(Required). Awarding body for the course. Click the LOV to select the code.
Funding Indicator	Identifies specially funded courses. Click the LOV to select the code.
Course Class	(Required). Course markers for general/vocational courses and academic/professional classifications as per the DES/EC grant scheme requirement.

Field	Description
	Click the LOV to select the code.
Course Completion Credits	(Required). Credits required for successful course completion.
Full Time Credits	(Required). Normal number of full-time credits required for the course per year.
Subject 1	First subject of the course. Click the LOV to select the code.
Subject 2	Second subject of the course. Click the LOV to select the code.
Subject 3	Third subject of the course. Click the LOV to select the code.
Subject 4	Fourth subject of the course. Click the LOV to select the code.
Outreach	Check box used to identify if the course is run in off-campus sites. Note: Courses that are run in off-campus sites involves a degree of attendance by the student.
Add-on Indicator	Check box used to identify if the course is an add-on course. Note: An add-on course is an undergraduate course accepting students who have received recognition and credit for a previously attained higher education award.
Structured PhD	Check box used to identify if the course is a structured PhD course.

Campus Security User Profile (SOAPROF) page

Updated: August 27, 2020

Use the Campus Security User Profile (SOAPROF) page to enter or display the users that are allowed to update the schedule information for a particular campus.

A user can be associated with only a single campus or can be allowed to modify all the schedule information, regardless of the campus. All forms in the Schedule module validate the user against this page before permitting changes; this prevents updates to any schedule information that is not associated with the campus assigned to the user's profile.

Main window

Updated: August 27, 2020

This window is composed of the User ID Campus section and the User ID Name section.

User ID Campus section

Updated: August 27, 2020

Use this section to associate a user ID with a campus.

Fields	Descriptions
Selected (untitled)	An asterisk is displayed in this field when a record is selected and you are in the User ID Name section. It identifies the user for which name information is being entered or displayed in the User ID Name section.
User ID	ID of the user permitted to modify schedule information for the campus specified in the **Campus** field. Select the **Search** button for this field to display the User Identification (GUAIDEN) page. List User Identification (GUAIDEN) page

Fields	Descriptions
Campus	Code of the campus for which the user is permitted to make schedule modifications. Leave this field blank if the user is permitted to make schedule modifications to all campuses. You cannot enter multiple records for the same user. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
Description	Description of the campus code, automatically displayed when a valid value is entered in the **Campus** field. Display only.
Activity Date	Date on which the record was last updated. Display only.

User ID Name section

Updated: August 27, 2020

Use this section to display the name(s) associated in the system with the user selected in the User ID Campus section.

Fields	Descriptions
User ID Name	Name(s) associated with the user. Display only.

Geographic Region Filter (SOAQGEO) page

Updated: August 27, 2020

The Geographic Region Filter (SOAQGEO) page is used to query all existing geographic region and division codes that have rules established on the Geographic Region Rules (SOAGEOR) page.

This page can be accessed from the Key block of SOAGEOR using Count Filter Hits or selecting the Filter Geographic Regions item in the Options Menu. An appropriate region/ division combination can be brought back to SOAGEOR to view or change the rules.

This page is updated whenever a region and division combination has a rule entered on the Geographic Region Rules (SOAGEOR) page.

Fields	Descriptions
Region	The **Region** field can be queried on SOAQGEO. This field specifies the geographic region code.
Division	The **Division** field can be queried on SOAQGEO. This field specifies the geographic region division for the region code.

External API Connection Information (SOAREST) page

Updated: August 27, 2020

The External API Connection Information (SOAREST) page is used to create and maintain external API codes and server connections used with third party products that need to talk to Banner Self-Service. This page should be set up and monitored by technical administrators.

This page can be used with registration planning to allow Banner Self-Service to connect with third party degree audit systems such as Degree Works. The Degree Works Student Educational Plan (SEP) information or other third party degree audit system plans are displayed in Banner Student Self-Service. External API codes for registration planning must exist on the External API Information Validation (STVREST) page. A system-required code of RPL has been delivered for use with registration planning and connections to Degree Works.

This page is composed of the External API Connection Information section.

External API Connection Information

Updated: August 27, 2020

Use the External API Connection Information to create and maintain the external API server connection codes and login data.

Fields	Descriptions
Code	External API information code and description.
Username	Username used to log in to the API server connection.
Password	Password used to log in to the API server connection. When a record is copied on this page, you need to supply a password. The password is not automatically copied. The field allows for a maximum of 30 characters. Passwords that are larger than 30 characters are truncated. Masking is used, so any truncation is not visible. Data entry is prevented after 30 characters have been entered. The Item Properties information for the field indicates a maximum of 128 characters. However, that number accounts for the password encryption when the record is saved.
URL	URL for the API server connection. The field allows for a maximum of 2,000 characters. URLs that are larger than 2,000 characters are truncated. Masking is not used, so any truncation is visible. The field does not expand to show the entire 2,000 character display, but this can be viewed in the SOBREST table. Enter the following for the URL:

Fields	Descriptions
	`serverURL:serverPort/DWPath/api/plans` For example: • http://myDWServer1.uni.com:8080/dwservice/planner/api/plans • http://myDWServer2.uni.com:8080/myservice/dwplannerservice/planner/api/plans
Timeout	Controls timeout until a connection is established or when waiting for data to be retrieved. When set to 0 or Null, the timeout is not used. In this case there is no limit on SOAREST, so the selected browser's default timeout is used.

Role Assignment (SOAROLE) page

Updated: August 27, 2020

Use the Role Assignment (SOAROLE) page to assign one or multiple roles to an individual.

The prerequisites for role assignment are: you must have a person record (SPRIDEN) in Banner®, and you must be defined on the Enterprise Access Control Table (GOBEACC). Role assignment allows Role-Based Security to include faculty and advisors, in addition to any individual identified by the institution.

Main window

Updated: August 27, 2020

The main window contains the key block and the Role Assignment block.

Key block

Updated: August 27, 2020

Enter values in the **ID** and **Term** fields. Use the **Search** feature to access SOAIDEN and search for an appropriate ID. Use Exit With Value to select an ID, or you may enter one directly. You may also search for an ID while in the **ID** field.

You can display a list of values from the **Term** field. Use Exit With Value to select a term, or you may enter one directly. Use Count Filter Hits to access the Enterprise Access Control (GOAEACC) page.

Perform a Scroll Down function to access the Role Assignment Block.

Role Assignment block

Updated: August 27, 2020

To update the information in this block, the term in the Key block should be equal to the value in the **From Term** field (the effective term).

At this point, the **Maintenance** button is not active. If the term in the Key block is between the values in the **From Term** and **To Term** fields, the **Maintenance** button is active, and you may modify or copy the existing entries to another effective term.

Use List from the **Role** field to display a list of valid values. You may use Exit With Value to select a code, or you may enter a code directly. If the role is active for the term range, check the **Active (Indicator)**.

Source/Background Access (SOASBGA) page

Updated: August 27, 2020

The Source/Background Access (SOASBGA) page is used to create institution-specific information that includes host name, remote directory, user name, and password information for the File Transfer Protocol (FTP) location for the XML transcript transmission.

The page also includes an indicator that controls whether the transcript transmission will use the specific information on SOASBGA or the default FTP location information on SHACTRL.

Note: Password information is encrypted when entered and is not accessible without being unencrypted.

Fields	Descriptions
Source or Background Institution	Source/background institution code of the institution sending the XML transcript. List Source or Background Institution Filter-Only (SOISBGI) page
Host Name	Host name to which the FTP process can connect to transmit the XML transcript, such as `ediserver.reg.utexas.edu`.
Remote Directory	Remote directory on the host to which the FTP process can connect to transmit the XML transcript, such as `/usr/local/tran/ftp/testftp`.
Username	Username of the host who is exporting the XML transcript to the remote system.
Password	Password of the host who is exporting the XML transcript to the remote system. The password is encrypted when entered and is not accessible without any unencryption.
Use Default Location	Check box used to indicate whether or not to use the default FTP location defined on SHACTRL for this institution. If the **Use Default (FTP) Location** check box is unchecked (set to N), then the FTP information in this page will be used for XML transcript transmissions. If no information is entered in SOASBGA, or if the **Use Default (FTP) Location** check box is checked (set to Y), then the FTP information on SHACTRL will be used to transmit the transcript file.

Source or Background Institution Base (SOASBGI) page

Updated: August 27, 2020

The Source or Background Institution Base Page is used to capture general information, such as address, comments, and contacts, about a source or background institution. Most of the information captured is not validated to allow for flexibility.

The address information provided on this page is displayed in Academic History and Admissions. The codes on the Source/ Background Institution Validation (STVSBGI) page must be established first. The validation page indicates the type of entity (high school or college) and whether the entity is a source for the institution.

When a valid ZIP or postal code is selected from the ZIP/Postal Code Validation (GTVZIPC) page and entered in the **ZIP or Postal Code** field, the combination of City, State/Province, and Nation information which exists in GTVZIPC will default into the appropriate fields. The related information does not default in when the ZIP/Postal Code is entered manually.

Fields	Descriptions
Comments	The **Comments** field is 4,000 characters long and has autowrap capability. Use the **Comments** edit button for easier entering, editing, and searching of text.

Source/Background Institution Summary (SOASBSM) page

Updated: August 27, 2020

This page calls a view that generates the high school data to be displayed. The view calculates the percentages for the appropriate fields. The page is entered in query mode.

The key block contains a source/background institution code, which is required.

The Source or Background Institution Summary Block contains the summary information for the institution in the key, such as a term code, a level code, a campus code, a college code, a program code, a major code, and a student type code, which are optional. The fields in this block are queryable.

If the term code is left blank, then the page displays all pertinent data for the source/

background institution code in the key for all available terms beginning with the most current term. If the term code is entered, the page displays all pertinent information for that term only.

Fields	Descriptions
Class Size	The number of seniors, obtained from `SORBDMO_NO_OF_SENIORS` on SOABGIY if available for the correct year. If no value exists in this field for the correct year, the program will try to use the **Class Size** field (`SORHSCH_CLASS_SIZE`) on SOAHSCH for any ID selected in the query. Regardless of which class size field is used, the **Graduation Date** field (`SORHSCH_GRADUATION_DATE`) must be filled in.
Number of Prospects	Number of prospects for the term.
Number of Applicants	Number of applicants for the term.
Percentage of Applicants	Percentage of applicants, rate of number of applicants to senior class or high school size.
Number Accepted	Number of applicants accepted for admission, (**Institution Acceptance** flag checked on STVAPDC).
Percentage of Acceptances	Percentage of acceptances, (number of acceptances to number of applicants).
Number of Confirmations	Number of student confirmations, (those having decision code of "applicant accept" selected). Students are added to this counter if they have the decision code that is entered in the **External Code** field of the GTVSDAX record with an **Internal Code** of DEPOPAID and a **Group (Code)** of DEPOSIT.

Fields	Descriptions
Percentage of Confirmations	Percentage of confirmations, number of confirmed students to number of accepted applicants.

At the bottom of the window, the totals for the query are listed by **Number of Prospects**, **Number of Applicants**, **Number (of Applicants) Accepted**, **Percentage of Acceptances**, **Number of (Student) Confirmations**, and **Percentage of Confirmations**.

HEA Student Course and Funding Details (SOASCFD) page

Updated: August 27, 2020

Use this page to store the student's course and funding details.

Note: This page is primarily intended to be used by institutions in Ireland who need to report the student details to the HEA regulatory body.

Key Block

Updated: August 27, 2020

Use this block to enter the student details for whom you want to record the course and funding details.

Field	Description
ID	(Required). Student ID.
Admit Term	(Required). Admit term code a learner was admitted to curriculum. Click the LOV to select a combination of programme and course (field of study) associated with the student in an admit term in the SGASTDN page.
Programme Code	Code of the Programme. Display only.
Course Code	Code of the course. Display only.

Base Block

Updated: June 28, 2023

Use this block to enter the student's course and funding details for the specific student record entered in the Key block.

Field	Description
YEAR ON COURSE DETAILS section	
Year on course	(Required). Year of the course the student is in. Click the LOV to select the code.
Description	Description of the course. Display only.
Academic Year	Academic year identifier. Click the LOV to select the academic year from the STVACYR page associated with the year on course of the student.
Description	Description of the year identifier. Display only.
Current Year Credits	Student's credits accumulated in the current academic year.
Accumulated Credits	Student's credits accumulated so far. **Note:** Institutions must maintain the current year credits and the accumulated credits for the HEA returns. Note:
STUDENT DETAILS – Student Information section	
Non-Standard Attendance	Identifies the non-standard attendance of incoming visiting students. Click the LOV to select the code.
Up-Skilling Initiative	Identifies whether the record relates to a student who has entered through a Government initiative to provide up-skilling training and support as identified by the institute admission records. Click the drop-down list to select the code.

Field	Description
Exchange	Identifiers for the following: • Incoming exchange students • Outgoing exchange students • Graduates that had a period of higher education-related study or training (including work placements) abroad (including Erasmus/other exchange programmes), representing a minimum of 15 ECTS credits or lasting a minimum of three months. Click the LOV to select the code.
COURSE INFORMATION section	
Grade	Classification of the award obtained by graduates. Click the LOV to select the code.
Non-Standard Award	An award code for graduates whose award obtained is different to the aim of the programme, as defined in the programme type field in the programme file.Click the LOV to select the code. **Note:** Institutions can use this field only for graduates whose actual award does not correspond with the aim of the programme. If populated, this field has the primacy over the Programme Type code in the SOAPRCD page.
Mode of Study	(Required). Mode of study for the course of the student. Click the LOV to select the code.
PREVIOUS ACADEMIC HISTORY section	
Highest Qualification	Highest qualification the student has attained before entry to this course. Click the LOV to select the code. **Note:** A student's highest qualification on entry is not necessarily that which was required for entry to the programme of study.

Field	Description
Entry Basis	Basis on which the student was accepted for entry to their course. Click the LOV to select the code. **Note:** Institutions must maintain the entry basis information for the HEA returns.
FEES AND FUNDING INFORMATION section	
Free Fees Initiative	Check box used to indicate where the student is in receipt of the free fees under the Free Fees initiative.
Non-EU Fee	Check box used to indicate whether the student is paying the non-EU fee (Economic fee). Note: Institutions can allow either Free Fees Initiative or Non-EU Fee to the students.
Fund for Students with Disability	Check box used to identify whether the record relates to a student who has funding through the Fund for Students with a Disability.
Student Grant/DES Grant Type	Identifies full-time students who are in receipt of: • A student grant through the Student Universal Support Ireland (SUSI) (applicable from 2012/2013 academic year)). • 2) Some assistance under Department of Education grant schemes (applicable for the 2011/2012 academic year and previous years) Click the LOV to select the code.

Student Centric Period Term Control (SOASCPT) page

Updated: August 27, 2020

Use the Student Centric Period Term Control (SOASCPT) page to define the terms and the financial aid year and process associated with student centric periods for a cycle.

You can also query on existing rules by student centric period code or student centric period cycle code. Existing student centric period codes are displayed in descending order in the Student Centric Period section of the page. Each period is associated with a cycle code from the Student Centric Period Cycle Validation (STVSCPC) page.

A unique combination of student centric period code, cycle designator code, and term code must exist. You cannot associate a specific term to the same cycle in two different student centric periods.

The Associated Term Codes section of the page displays the term codes associated with each record in ascending order. Multiple terms can be associated with a student centric period. You must save any changes in the Student Centric Period section before accessing the Associated Term Codes section.

When students are associated with the cycle and term in general student (SGBSTDN record) or academic history (SHRTTRM record), and you attempt to change the cycle code in the Student Centric Period section or delete a record from the Associated Term Codes section, an error will be displayed. The record cannot be changed or deleted.

Note: Term codes should be numeric, in the format YYYYTT, and the codes must be constructed so that they maintain the appropriate sequence of terms. Term codes are displayed in descending order, with the highest term first.

This page is composed of the following sections:

- Student Centric Period
- Associated Term Codes

Student Centric Period

Updated: August 27, 2020

Use this section of the page to view or enter student centric period rules or query on existing rules by student centric period code or student centric period cycle code.

Field	Description
Student Centric Period Code	Student centric period code for the rule.
Description	Description of the student centric period code for the rule.
Cycle	Student centric period cycle for the rule.
Student Centric Period Start Date	The beginning date of the student centric period. This defaults to the earliest start

Field	Description
	date for all terms within the student centric period. You can change the beginning date to any date.
Student Centric Period End Date	The end date of the student centric period. This defaults to the last end date for all terms within the student centric period. You can change to end date to any date.
Financial Aid Process Year	(optional) Code of the aid year with which this student centric period is associated. This defaults to the value from the (STVTERM) page for the controlling term, but you can change this to another financial aid year. This field is optional and not required for Banner Financial Aid processing.
Financial Aid Period	Code for the financial aid period, if applicable. This field is optional and not required for Banner Financial Aid processing.

Associated Term Codes

Updated: August 27, 2020

Use this section of the page to view the term records associated with the rules in the Student Centric Period section.

Field	Description
Term Code	Term code and description associated with the period term control rule in the Student Centric Period section of the page. Existing term codes cannot be changed, but new term codes can be added and associated with period term control rules.
Term Control	Check box used to indicate whether the

Field	Description
	associated term is the primary term used for the student centric period.

Application Supplemental Information (SOASUPL) page

Updated: August 27, 2020

Use this page to enter information that supplements the detail on the Admissions Application (SAAADMS) page. The American Medical College Application Service (AMCAS) load process updates certain fields on this page automatically. You can also enter data manually.

Before you can use SOASUPL, you must define the information on the Application User-defined Flags/Fields (SAAAUDF) page. The descriptions you enter for any of the ten flags on SAAAUDF also display on the User Defined Flags and Fields window in SOASUPL.

Main window

Updated: August 27, 2020

Use this window to enter supplemental information for an application.

Key block

Updated: August 27, 2020

All fields in the key block must contain values before you can access the main window containing the supplemental or agency data.

Fields	Descriptions
ID	ID for the application whose information is on this page.
Term	Term for with the application with which the supplemental data is associated. Valid values come from the Term Code Validation (STVTERM) page. Use Count Filter Hits to access SAASUMI and select an application. When an application is selected from SAASUMI, both the application number and the term code are retrieved. Both

Fields	Descriptions
	fields must exist for the application to be valid. (The only exception to this is if the application number is 00.) A valid combination of term and application must exist to be able to proceed to the next block of the page.
Application Number	Number of the application for which you want to enter additional information for the ID and term. Use Count Filter Hits to access SAASUMI and select an application. When an application is selected from SAASUMI, both the application number and the term code are retrieved. Both fields must exist for the application to be valid. (The only exception to this is if the application number is 00.) A valid combination of term and application must exist to be able to proceed to the next block of the page.

Supplemental or Agency Data section

Updated: August 27, 2020

The American Medical College Application Service (AMCAS) load process updates some fields on Supplemental/Agency Data section automatically. You can also enter data manually to allow for later matching to the same application or provide data not stored in Banner®.

Fields	Descriptions
Admission County	Applicant's county of residence at the time of admission. Choices come from the County Code Validation (STVCNTY) list.
Rural County Indicator	Check box that indicates whether the applicant's county of residence is classified as rural. Choices are: checked - Yes, this is a rural county. unchecked (default) - No, this is not a rural county.

Fields	Descriptions
Admission State	Applicant's state or province of residence at the time of admission. Choices come from the State/Province Code Validation (STVSTAT) list.
Admission Nation	Applicant's country of residence at the time of admission. Choices come from the Nation Validation (STVNATN) list.
Birth City	City in which the applicant was born. You can enter the name of any city. No list of values exists for this field.
Birth County	County in which the applicant was born. Choices come from the County Code Validation (STVCNTY) list.
Rural County Indicator	Check box that indicates whether the applicant's county of birth is classified as rural. Choices are: checked - Yes, this is a rural county. unchecked (default) - No, this is not a rural county.
Birth State	State or province where the applicant was born. Choices come from the State/Province Code Validation (STVSTAT) list.
Birth Nation	County where the applicant was born. Choices come from the Nation Validation (STVNATN) list.
Admit School	Institution listed as the primary undergraduate college from AMCAS or the primary high school. Choices come from the Source/Background Institution Filter-Only (SOISBGI) page.
Self-Reported Ethnicity	Applicant's self-described ethnic origin. Choices come from the Ethnicity Codes (STVETHN) list.
Special Consideration	Reason that the applicant is requesting special consideration at the time of admission. Choices come from the Special Consideration Codes (STVESEL) list.
AMCAS ID	ID used for AMCAS processing.
AMCAS Bio Number	Applicant's AMCAS biographical number.
Hispanic Indicator	Check box that indicates whether the applicant's race values equal Y in the AMCAS data file. Choices are:

Fields	Descriptions
	checked-Yes, the applicant's race values equal Y. unchecked-No, the applicant's race values do not equal Y.
Under-Represented Minority Indicator	Check box that indicates whether the applicant's ethnicity values equal Y in the AMCAS data file. Choices are: checked-Yes, the applicant's ethnicity values equal Y. unchecked-No, the applicant's ethnicity values do not equal Y.
Number of Dependents	Applicant's number of dependents at the time of admission. Choices are 0 - 99.
Agency File Number	A unique number assigned to each AMCAS applicant. You can change the value that displays in this field.
Agency Application Year	Year that the agency processed the admissions application. Choices are 0 - 99.
Year Applied 1	Most recent year that the applicant applied for admission. Choices are 0 - 99.
Year Applied 2	An earlier year that the applicant applied for admission. Choices are 0 - 99.
Year Applied 3	An earlier year that the applicant applied for admission. Choices are 0 - 99.
Year Applied 4	An earlier year that the applicant applied for admission. Choices are 0 - 99.
Agency Fee Waived	Check box that indicates whether the agency that processed the admissions application waived the processing fee. Choices are: checked - The agency waived the processing fee. unchecked (default) - The agency did not waive the processing fee.
Cycle Added	Agency processing cycle that the applicant was added for this

Fields	Descriptions
	school. Choices are 0 - 999.
Cycle Changed	Agency processing cycle that the application was changed. Choices are 0 - 999.
Last Agency Report Date	Last date that the agency received information about the application.
Effective Date	Date when the applicant's supplemental information was loaded from AMCAS. During the load process, the existing value in this field is compared with the effective date on the AMCAS data file: If the effective date on the incoming data is later than the effective date already in this field, then the incoming information is loaded. If the effective date on the incoming data is equal to or earlier than the effective date in this field, then the incoming information is not loaded. This value comes from the AMCAS load process. It cannot be changed.
Next MCAT Date	Date when the next MCAT test will be taken.
Application Type	AMCAS application type for this application.

User Defined Flags and Fields window

Updated: August 27, 2020

This section is used to define flags and fields.

Use this section to:

- Determine whether user-defined flags are relevant for this application.
- Display the value of any user-defined fields for this application.

User-defined flags and fields are set up on the Application User-defined Flags/Fields (SAAAUDF) page.

Fields	Descriptions
Flags 1 - 10	Fields that indicate whether user-defined flags are relevant for this application. When you position your cursor in one of these fields, the description of the associated flag appears to the right. User-defined flags are set up on the Application User-defined Flags/Fields (SAAAUDF) page. Choices are: N or blank (default) - The answer to an application-specific question is no. Y - The answer to an application-specific question is yes.
Flags Description	Description of the user-defined flags. When you position your cursor in one of the **Flags** fields, the description of the associated flag appears in this field. This description comes from the **Flag (Description)** fields in the main window of the Application User-defined Flags/Fields (SAAAUDF) page. It cannot be changed.
Description Number 1 - 20	Descriptions of user-defined fields. These descriptions come from the **Institutional Data (Description**) fields in the Application User Defined Field Description window on the Application User-defined Flags/Fields (SAAAUDF) page for the institutional data elements for the effective term of the flag/field description rules. They cannot be changed.
Value Number 1 - 20	Value of each user-defined field for this application for the institutional data element from SAAAUDF for the effective term of the flag/field description rules.

AMCAS Multiple Race/Ethnicity Codes window

Updated: August 27, 2020

Use this window to enter race and ethnicity codes for the applicant.

AMCAS Race Codes section

Updated: August 27, 2020

Use the AMCAS Race Codes section to enter race codes for the applicant.

Fields	Descriptions
1	Race code 1 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
2	Race code 2 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
3	Race code 3 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
4	Race code 4 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
5	Race code 5 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
6	Race code 6 for the applicant. Choices come from the Ethnicity Codes

Fields	Descriptions
	(STVETHN) list.
7	Race code 7 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
8	Race code 8 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
9	Race code 9 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
10	Race code 10 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.

AMCAS Ethnic Codes section

Updated: August 27, 2020

Use the AMCAS Ethnic Codes section to enter ethnic codes for the applicant.

Fields	Descriptions
1	Ethnic code 1 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
2	Ethnic code 2 for the applicant.

Fields	Descriptions
	Choices come from the Ethnicity Codes (STVETHN) list.
3	Ethnic code 3 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
4	Ethnic code 4 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
5	Ethnic code 5 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
6	Ethnic code 6 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
7	Ethnic code 7 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
8	Ethnic code 8 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.
9	Ethnic code 9 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.

Fields	Descriptions
10	Ethnic code 10 for the applicant. Choices come from the Ethnicity Codes (STVETHN) list.

Procedure - Add additional information for an applicant

Updated: August 27, 2020

You must define the fields on the Application User-defined Flags/Fields (SAAAUDF) page before you can enter values in the fields of the User Defined Flags and Fields window.

About this task

Procedure

1. Access the Application Supplemental Information (SOASUPL) page.
2. Enter the identifying number for the applicant in the **ID** field.
3. Enter the applicant's term in the **Term** field.
4. Use a Count Filter Hits from the **Application Number** field to access the Admissions Application Summary (SAASUMI) page and choose the application for which you want to add information.
5. Go to the Supplemental or Agency Data section.
6. Enter any new or changed information.
7. Go to the User Defined Flags and Fields window.

   Note: One way to do this is by selecting Scroll Down.
8. Enter any new or changed information.
9. Go to the AMCAS Multiple Race/Ethnicity Codes window.

   Note: One way to do this is by selecting Scroll Down.
10. Enter any new or changed information.

11. Save.

SUSI File Maintenance (SOASUSI) page

Updated: August 27, 2020

Use this page to display all the imported values from the Registration, Validation, and Verification file.

The SOASUSI page helps the administrator to display the imported values of various fields for the file type selected. The file types that SUSI application supports are as follows:

- Registration file
- Validation file
- Verification file

User can choose any of the above file type and perform the following operations:

- View the student details of the selected file in two views, which are single record view and multiple record view.
- Modify few fields based on the file type. If the fields impacts the third party contracts, the contracts will be updated/created on TSAACCT page as well.

There are certain fields in which user can make changes or edits. These fields for each file type are listed as follows:

Registration file:

- Registered & Progressing
- Eligible for Free Fees
- Fees Payable Amount
- Comments
- Other Funding

Validation file:

- Eligible for Free Fees
- Fees Payable Amount
- Comments
- Other Funding

Verification file:

- Registered and Progressing
- Fees Payable Amount
- Comments and Other Funding

Key Block

Updated: August 27, 2020

Use the key block to choose the imported file for which you want to display the imported values.

Note: Enter the file name without any file extension on the **File ID** field.

Field	Description
File ID	Enter the file name which you want to display the imported values or click on the ellipsis to select the required file from the list of values.
File Type	Shows the type of file you have selected.

SUSI file maintenance section

Updated: September 21, 2023

Use the SUSI file maintenance section to display the student records.

You can click on the Toggle button to select between two types of view for displaying all the records:

- Grid View - Displays multiple records in different rows in a tabular format.
- Detailed View - Singe record is displayed.

Registration and Verification files

The fields and their descriptions are common for the Registration and Verification files which are as follows:

Field	Description
Student ID	Unique identification number of the student.
Last Name	Last name of the student.
First Name	First name of the student.
Date of Birth	Date of birth of the student.
Status	This status indicates if the record is matched in Banner.
SUSI Application Number	Unique identification number for the SUSI application.
PPSN	Personal Public Service Number of the student.
CAO Number	Central Applications Office (CAO) number of student.
Graduate Type	The level of the student for the effective term.
Registered & Progressing	Status which indicates if the student is registered and progressing for the course in the current term.
Course Code	Code of the program.
Course Description	Description of the program.
Course Type	Indicates whether the student is a full or part-time student.
Previous Year of Course	The previous year of the course the student has attended.
Current Year of Course	The year of the course the student is currently attending
Course Level	Indicates the level of the course.
Eligible for free fees	Indicates the free fee eligibility of the student.
Previous SUSI Rate Code	Previous SUSI award rate code.
Current SUSI Rate Code	Current SUSI award rate code.
Fees Payable Percent	The percentage at which the award amount will be calculated for the student.
Fees Payable	The award amount payable to the student.

Field	Description
Amount	
Other Funding	Indicates if the student receives other funding or scholarship.
Comments	Text field for entering and displaying comments about the student record.
College Code	Unique college identification code.
Registration Last Updated	The date when the record was last updated by SUSI.
File ID	Unique file identification number for a file. The file ID is same for all the student record that are in the same file.

Validation file

Including most of the common fields present in the Registration and Verification files, the Validation file have some additional fields. The fields and descriptions for the Validation file are as follows:

Field	Description
Verified	Check box to verify if the Student Universal Support for Ireland (SUSI) record is verified.
Student ID	Unique identification number of the student.
Last Name	Last name of the student.
First Name	First name of the student.
Status	This status indicates if the record is matched in Banner.
SUSI Application Number	Unique identification number for the SUSI application.
Graduate Type	The level of the student for the effective term.
Course Code	Code of the program.
Previous Year of Course	The previous year of the course the student has attended.
Current Year of Course	The year of the course the student is currently attending
Eligible for free fees	Indicates the free fee eligibility of the student.
Previous SUSI Rate Code	Previous SUSI award rate code.

Field	Description
Current SUSI Rate Code	Current SUSI award rate code.
Fees Payable Percent	The percentage at which the award amount will be calculated for the student.
Eligible Maximum Amount	The eligible maximum award amount payable to the student.
Fees Payable Amount	The maximum award amount payable to the student.
Other Funding	Indicates if the student receives other funding or scholarship.
Comments	Text field for storing and displaying comments about the student record.
Decision	Decision from SUSI regarding the commitment to pay the grant for the student.
Comments to College	Comments indicating agreed fee amounts, further action required or in some cases explaining the decision status.
Processed by SUSI	Date when the student record was read by SUSI.
File ID	Unique file identification number for a file. The file ID is same for all the student record that are in the same file.

Student Term Break (SOATBRK) page

Updated: August 27, 2020

This page is used to provide a method for institutions to define break periods within the period of enrollment, student centric period, or term.

A break period less than five calendar days is considered part of the period of enrollment. A break period that is equal to or more than five calendar days is not counted as part of the period of enrollment. Banner® uses the break periods defined for the term to determine the percent attended when a student withdraws from the institution.

Break days will be determined as entered on SOATBRK and the SORTBRK table on a term basis. All consecutive calendar days (including weekends) must be entered within any vacation period for this feature to function correctly. (Example: Classes do not meet on weekends. Thanksgiving vacation days include Thursday, Friday, and the following Monday. A total of five calendar days – Thursday, Friday, Saturday, Sunday, and Monday – must be entered on SOATBRK.)

The page will not:

- permit an overlap in dates for break periods, (that is, the start date cannot be between start and end of another period),
- allow consecutive break periods (records) to be entered, (that is, the start date cannot be end date plus one of another period), or
- permit break days to be entered as start and end dates of term.

The Student Withdrawal (SFAWDRL) page, where the Title IV withdrawal date is entered, will display the appropriate break days (greater than or equal to five consecutive days), and this value will be used to calculate the attend percentage.

Key block

Updated: August 27, 2020

Enter a term during which you want to define the break rule.

Fields	Descriptions
Term	Enter the term in which you want to define the break period. Code of the term as defined on the Term Code Validation (STVTERM) page.
Start Date	Start date of the term. Display only.
End Date	End date of the term. Display only.

Break Rules section

Updated: August 27, 2020

Use this section to build the rules for the break periods.

Fields	Descriptions
Description	Description of the break period (for example, Spring Break). This field allows update, insert, and query.
Start	Start Date. First day of the break period.

Fields	Descriptions
	This field allows update, insert, and query.
End	End Date. Last day of the break period. This field allows update, insert, and query.
Total Days	Total number of days of the break period. Banner generates this value based on the values in the **Start** and **End** fields. You can change it only by changing the value in the **Start** and **End** fields. This is a calculated non-database field, calculated as the `END_DATE` minus the `START_DATE`, plus one.
User	ID of the user who created or last modified the break definition. This field is display-only.
Activity Date	Date on which the break period was created or last modified. This field is display-only.

Test Score Equivalency (SOATEQU) page

Updated: August 27, 2020

This page is term driven. It is used to associate an actual test code, test score, and test score source to its equivalent test code and test score.

The source of the test score is used to indicate whether the score should be considered official for use in the rating calculation. Multiple test score source codes can be defined to qualify as official. Because a prospective student may submit more than one set of test scores, the highest score is the one used in the calculation process.

Fields	Descriptions
Term	Enter the effective term for which this equivalency takes effect. This term is in effect until a new, greater term is created. This is a required field.

Fields	Descriptions
	List Term Code Validation (STVTERM)
Test Source	Enter the source of the test score. This is a required field. The incoming test record must have a source matching one defined on SOATEQU in order for an equivalent test record to be stored. List Test Source Code Validation (STVTSRC)
Test Code	Enter the test score code. This field is required. List Test Code Validation (STVTESC)
Test Score	Enter the test score. This value is validated against the minimum/ maximum ranges and the numeric position from STVTESC if they exist.
Equivalent Test Code	Enter the equivalent test code. This field is required. List Test Code Validation (STVTESC)
Equivalent Test Score	Enter the equivalent test score. This value is validated against the minimum/maximum ranges and the numeric position from STVTESC.
User ID	This is the ID of the user who created the record. This field is display only.
Activity Date	This is the date the record was created. This field is display only.

The equivalency lookup process uses the information on this page whenever test scores are loaded through the Banner® data load process, are entered on the Test Score Information (SOATEST) page, or are pushed to Banner by Web Admissions processing using SARETMT, SAAEAPS, or the Quick Start process.

Term Control Page (SOATERM)

Updated: August 27, 2020

Use the Term Control (SOATERM) page to establish controls for a specific term. These controls affect the following areas: catalog, schedule, registration, registration fee assessment, and telephone registration processing.

Before entering information on this page, a term must be created on the Term Code Validation (STVTERM) page. This page must be completed before the catalog and schedule can be built and before registration can take place.

This page is composed of the following sections:

- key block
- Term Information
- Base Part of Term
- Access Management
- Structured Registration Controls
- Projected Registration Controls

Key block

Updated: August 27, 2020

Use the key block to enter the term for which rules are to be created or maintained. Use the **Copy** button to copy a set of rules to the term in the key block.

Fields/Buttons	Descriptions
Term	Term code and description for the term controls.
Copy	Button used to open the Copy Term window and copy rules from an existing term to a term that does not have any term control information on SOATERM.

Copy Term window

Updated: August 27, 2020

Use this window to duplicate term controls from an existing term and copy them to a term that does not have any controls on SOATERM.

To open this window, enter a term in the key block and click the **Copy** button.

- The **Copy** button is enabled for a term that does not have any existing data.
- The **Copy** button is disabled for a term that has existing data.

Fields/Buttons	Descriptions
From Term	Term from which control information will be copied. The term entered must have existing information on SOATERM.
Cancel	Button used to cancel the copy process.
Copy	Button used to copy the control information for the term in the **From Term** field to the term in the key block.

Term Information

Updated: August 27, 2020

Use this section of the page to view and set up controls for a term.

Use the **Show All Options** button to expand all the sections of the Term Information. Use the **Hide All Options** button to close all the sections of the Term Information. Use the Term Management section to access this area of the page.

Fields/Buttons	Descriptions
CRN Starting Sequence Number	One-up starting sequence number for the course reference number for the term controls.
Show All Options	Button used to display all the sections of the page associated with the term information. When the show all choice is selected, the button name changes to **Hide All Options**.
Hide All Options	Button used to hide all the sections of the page associated with the term information. When the hide all choice is selected, the button name changes to **Show All Options**.

Term Information options are provided so you can quickly access the information you need. Click on the option (such as Registration) to view that section of the Term

Information. Click on the option again (such as Registration) to close that section of the Term Information.

The following options are available:

- Registration
- Registration Fee Assessment
- Title IV Date Source
- Error Checking
- Self-Service Options
- Registration Model
- Self-Service Fee Assessment
- Self-Service Planning
- Control Settings
- Class Option Change Controls
- Grade Display Controls
- Faculty and Advisor Controls
- WebCAPP Controls
- Catalog Search Controls
- Schedule Content Display Control

Registration

Updated: August 27, 2020

Use this section of the Term Information to view and set up overall registration controls.

Fields	Descriptions
In Progress	Check box used to indicate whether courses that are being taken during the current term can be used to fulfill prerequisite requirements. If you check the

Fields	Descriptions
	box, then an in progress course is treated as if the course is completed. After a course is graded, it is no longer considered an in-progress course, and it is then checked against the rules in SSAPREQ.
Permit	Check box used to indicate whether registration is permitted for the term in the Key block.
Calculate Time Status	Check box used to indicate whether the system performs time status calculations online and inserts or updates time status records when an update occurs on the Student Course Registration (SFAREGS) page, the Registration Mass Entry (SFAMREG) page, and in telephone registration processing, if it is in use.
Include Attempted Hours	Check box used to indicate whether to include the attempted hours (which were registered in a prior term) toward the class calculation displayed in the Student window of SFAREGS. Course sections with class restrictions use the class calculation value on SFAREGS to determine registration eligibility. You can select the Update Student's Term Information item in the Options Menu from the Status or Registration blocks on SFAREGS to access the Student window. Attempted hours are also used in conjunction with class requirements placed on reserve seats on SSASECT. Attempted hours are never included in the class calculation displayed on the General Student (SGASTDN) page. The hours considered as attempted hours

Fields	Descriptions
	in the class calculation for registration include the following: • courses registered in a prior term • graded or ungraded courses • graded courses not yet rolled to history After a course in a prior term has been graded and rolled to history, it will not be considered in attempted hours.
Future Terms for Repeats	Check box used to indicate whether registration records from future terms (SFRSTCR) should be included in repeat checking. Check (set to Y) to include records from both past and future terms. Clear (set to N) to only use records from past terms.
Study Path Required	Check box used to indicate whether the study path is required for registration.
Calculated Drop	The option to control Calculated Drop. If the Calculated Drop indicator is turned ON, then all traditional sections in that term will be evaluated against the Calculated Drop rules. When Calculated Drop is OFF, Calculated Drop rules are ignored. Calculated Drop may be OFF while setting up rules for the process. OLR Sections are excluded from Calculated Drop functionality. The Registration Mass Entry page (SFAMREG) is also excluded from Calculated Drop functionality.
Hold Password	Registration password used to override

Fields	Descriptions
	holds.
Re-Admit	Registration re-admit term. Enter the term the student must have attended to register for classes in this term. The system verifies that the student has a SFBETRM record with an enrollment status code where the **Affect Headcount (Indicator)** is checked (STVESTS) for the term code entered as the re-admit term or for a term code that is later than the term that was entered.

Registration Fee Assessment

Updated: August 27, 2020

Use this section of the Term Information to view and set up registration fee assessment controls.

Fields	Descriptions
On-line Fee Assessment	Check box used to indicate whether online registration fee assessment is active for the term.
Process Credits Online	Select this option when you have selected the Online Assessment option and you would like any credits the student has to be included in the calculation. Credits include exemptions, contracts, and deposits.
Track by CRN	Check box used to indicate whether tracking of charges by CRN is used for registration fee assessment.
Refund by Total	Check box used to turn on refund by total processing in registration fee assessment.
Allow Swapping	Check box used to turn on course/hours swapping on a term-by-term basis for registration fee assessment.
Section Fees by Study Path	Check box used to apply study path data to a section fees charge when a study path exists in registration.

Fields	Descriptions
	When a CRN has section fees in SSADETL, and the course in registration has an associated study path, and the **Section Fees by Study Path** check box is checked (set to Y), the following processing occurs. The fee assessment process stores the study path sequence number in the SFRFAUD table and displays it on the SFAFAUD page. The process posts the study path sequence number to the TBRACCD table with the section fee charge and displays it on the TSAAREV page with the section fee charge. When the no study path exists for the course in registration and the **Section Fees by Study Path** check box is unchecked (set to N), no study path information is populated in SFRFAUD or TBRACCD.
Reverse Non-Tuition/Fee Charges	Check box used to indicate whether registration fee assessment can reverse non-tuition or non-fee charges for detail codes with a category code other than TUI or FEE. This is for refunding using STVRSTS codes, not STVESTS codes. Using either the Registered, Not Paid Process (SFRRNOP) or performing a manual deletion of an SFBETRM record does not consider the indicator setting on SOATERM. The non-tuition/fee charges will be reversed, even if the FAREVNFR rule on GTVSDAX is enabled.
Effective Date	Date you want charges to become effective in accounts receivable, when using post-dated fees for a future date.
Original Charge Cutoff Date	Date through which all assessments are considered original charges on all student accounting transactions. This is not a null field and is defaulted to the `STVTERM_START_DATE` when creating a new record. The field can be updated. This information is used in Title IV processing.

Title IV Date Source

Updated: August 27, 2020

Use this section of the Term Information to view and set up the Title IV date source control.

Fields	Descriptions
Date Source	Radio group that indicates the Title IV date source. Choices are: Term Date or Part of Term Dates. The default is Term Date. Based on how the institution sets this, either the `STVTERM_START_DATE` and `END_DATE` will be used on SFAWDRL as the enrollment start and enrollment end dates, or the `min_start_date` (part of term) and `max_end_date` (part of term) that go with the student's course registrations for the term will be used for enrollment start and enrollment end dates. This information is used in Title IV processing.

Error Checking

Updated: August 27, 2020

Use this section of the Term Information to view and set the error checking controls for the term in the key.

You can set up error checking by Student Options, Section Options, or Section Restriction Options. Student Options can be set to Fatal or No Check. Section Options and Section Restriction Options can be set to Fatal, Warning, or No Check.

When No Check is selected for the **Links** radio group, the Unsatisfied Links Report (SRFLINK) can be run after registration is completed to produce a list of students who have unsatisfied or missing section links for the term. The report is a post-registration batch alternative to an online fatal check for unsatisfied or missing links during registration processing.

Fields	Descriptions
The following fields are in the Student Options information.	
Duplicates	Radio group used to set duplicate course warning severity to Fatal or No Check.
Links	Radio group used to set linked course warning severity to Fatal or No Check.
Corequisites	Radio group used to set corequisite course warning severity to Fatal or No Check.
Prerequisites	Radio group used to set prerequisite course warning severity to Fatal or No Check.
Minimum Hours	Radio group used to set minimum course hours warning severity to Fatal or No Check.
Maximum Hours	Radio group used to set maximum course hours warning severity to Fatal or No Check.
Time	Radio group used to set course time conflict warning severity to Fatal or No Check.
Mutual Exclusion	Radio group used to set course mutual exclusion warning severity to Fatal or No Check.
The following fields are in the Section Options information.	
Approval	Radio group used to set approval warning severity to Fatal, Warning, or No Check.
Capacity	Radio group used to set capacity warning severity to Fatal, Warning, or No Check.
Repeat Hours	Radio group used to set repeat hours warning severity to Fatal, Warning, or No Check.
Repeat Limit	Radio group used to set repeat limit warning severity to Fatal, Warning, or No Check.
Holds	Radio group used to set holds warning severity to Fatal, Warning, or No Check.
The following fields are in the Section Restriction Options information.	
Department	Radio group used to set department warning severity to Fatal, Warning, or No Check.
Field of Study	Radio group used to set field of study warning severity to Fatal, Warning, or No Check.

Fields	Descriptions
College	Radio group used to set college warning severity to Fatal, Warning, or No Check.
Level	Radio group used to set level warning severity to Fatal, Warning, or No Check.
Class	Radio group used to set class warning severity to Fatal, Warning, or No Check.
Campus	Radio group used to set campus warning severity to Fatal, Warning, or No Check.
Degree	Radio group used to set degree warning severity to Fatal, Warning, or No Check.
Program	Radio group used to set program warning severity to Fatal, Warning, or No Check.
Student Attribute	Radio group used to set student attribute warning severity to Fatal, Warning, or No Check.
Cohort	Radio group used to set cohort warning severity to Fatal, Warning, or No Check.

Self-Service Options

Updated: August 27, 2020

Use this section of the Term Information to view and set up Self-Service controls for class lookup, conditional add and drop, drop last class, automatic drop, and administrative drop.

Fields	Descriptions
Activate on the Web (Master Web Control)	Check box used to indicate whether you can look up classes for the term in Banner Self-Service.
Allow Student to Select Conditional Add Drop	Check box used to indicate whether students can use conditional adding and dropping during registration in Self-Service. This is used when an error occurs after the student submits registration selections.

Fields	Descriptions
	The entire registration process is cancelled, even if other classes submitted for registration do not have any errors. When this indicator is not checked, classes without errors can still be processed for registration. Values are saved to the database as Y or N. Select the check box for `Y` value, or clear the check box for `N` value.
Allow Student to Drop their last class	Check box used to indicate whether students can drop their last class during registration in Self-Service. Values are saved to the database as Y or N.
Auto Drop Connected Course Drop Errors	Radio group used to indicate how automatic drops should be processed during registration in Self-Service. When the student submits the registration selections and then tries to drop one class from a pair of classes with a link, corequisite, or prerequisite, an error is received, but other registration selections can still be processed. Choices are: • Drop Connected Course - Both classes are automatically dropped. Saved to the database as Y. • Do Not Drop, Display Error - The student receives an error, but there is no automatic action taken by the

Fields	Descriptions
	system. Saved to the database as N. • Confirm to Drop - The student receives a message asking if the other class in the pair can be automatically dropped. Saved to the database as C. • Allow Connected Drops - The student can drop any class, even if it is a linked course, a corequisite, or a prerequisite. No cross checking is performed for the missing connected class. Saved to the database as I.
Administration Drop Connected Course Errors	Radio group used to indicate how administrative drops should be processed during registration in Self-Service. When the student first comes into registration after selecting a term, if the student has registration errors that are from a connected class, the class is automatically dropped. The student has no control over this drop event. Choices are: • Drop - The class is automatically dropped. Errors are reported in the SFTRGAM table. Saved to the database as Y. • Do Not Drop, Report in Administrative Error Table - An error is reported, but there is no automatic action taken by the system. Errors are reported in the SFTRGAM table. Saved to the database as N.

Fields	Descriptions
	• Do Not Report and Do Not Drop - No error is reported, and no automatic action is taken by the system. Saved to the database as I.

Registration Model

Updated: August 27, 2020

Use this section of the Term Information to define which registration models are allowed for a term. Multiple models can be selected. At least one selection is required or an error is displayed. The settings can also be copied from one term to another.

Fields	Descriptions
Basic	Check box used to indicate that basic registration is in use for the term. This indicator is checked as the default.
Structured	Check box used to indicate that structured registration is in use for the term.
Projected	Check box used to indicate that projected registration is in use for the term.

Self-Service Fee Assessment

Updated: August 27, 2020

Use this section of the Term Information to view and set up the fee assessment control for Self-Service and Voice Response.

Fields	Descriptions
Fee Assessment Indicator	Radio group used to indicate the fee assessment option used by self-service and Voice Response for fee assessment processing. Choices are: Online Assessment (Y), Batch Only (N), and Not Available (Null).

Fields	Descriptions
Process Credits Online	Select this option when you have selected the Online Assessment option and you would like any credits the student has to be included in the calculation. Credits include exemptions, contracts, and deposits.

Self-Service Planning

Updated: August 27, 2020

Use this section of the Term Information to view and set up the registration plan controls for the Plan Ahead path and Register for Classes path in Self-Service.

You can update the indicators and save the changes. If you check and then later clear the **Term open for Self-Service planning** indicator to close the term for registration planning, other Self-Service planning settings may remain updated and will be checked by the system and processed accordingly.

For example, if the **Term open for Self-Service planning** indicator is cleared for the term, but the **Check third party degree audit system plans** indicator is checked, and the **Display third party degree audit system plans in registration** indicator is checked, planning in the Plan Ahead path will not be available for the term. However the degree audit system plans would continue to be displayed and be available for registration in the Register for Classes path in the Plans section

Also, if the term is closed for planning but the **Display Self-Service plans in registration** indicator is checked, any student registration plans that had been created before the close of planning will be displayed in the Register for Classes path in the Plans section.

Fields	Descriptions
Term open for Self-Service planning	Check box used to indicate whether the term is available to create or edit student registration plans in Self-Service. When checked, this makes the term code available from the Select a Term page in the Plan Ahead path.
Maximum plans for term	Maximum number of registration plans that can be created per login ID for the term.

Fields	Descriptions
	When the **Term Open for Self-Service planning** indicator is checked, the valid range is 1 - 999. You must select a value between 1 and 999 to save the record. When the **Term Open for Self-Service planning** indicator is not checked, the value can be 0.
Display Self-Service plans in registration	Check box used to indicate whether student registration plans are displayed in the Register for Classes path, so students can add sections from their plans to the registration summary. When this indicator is checked, the Plans section is displayed in Self-Service.
Allow adding course sections to plan	Check box used to indicate whether the student can add class sections to a registration plan in the Plan Ahead path. When checked, sections can be added to the student's registration plan. When cleared, only courses can be added to the student's plan.
Check third party degree audit system plans	Check box used to indicate whether the system will look for third party degree audit plans that can be used for the Plan Ahead or Register for Classes paths. When this indicator is checked, the system checks for third party data based on the SOAREST configuration.
Display third party degree audit system plans in registration	Check box used to indicate whether third party registration plans can be displayed in the Register for Classes path. This allows students to view and add class sections from the third party degree audit plans (such as Degree Works SEPs) to the registration summary. When this indicator is checked, the Plans section is displayed in Self-Service.

Add Authorizations

Updated: August 27, 2020

Use this section of the Term Control (SOATERM) page to set up Add Authorization processing.

To use the Add Authorization functionality, you must set the **Section Options Capacity** on the **Registration Error Checking** tab to `Fatal`.

Field	Description
Active for Term	Select this check box to turn on Add Authorization processing for the selected term.
Disable Before Start Date	Select this check box to start Add Authorization processing when the **Add Authorization Section Start Date** has been met for the section on SSASECT. The Census One date, Capacity and the Add Authorization Section Start Date and are checked at this time and in that order. De-Select Disable Before Start Date if Add Authorization processing should begin immediately. Add Authorization processing takes place in advance of the Add Authorization Section Start Date and will first check the Census One date and then Capacity to determine if an Authorization Code is required. After the Add Authorization Section Start Date is met, processing functions as if Disable Before Start Date is ON and the Census One date, Capacity and the Add Authorization Section Start Date and are checked at this time, in that order. All capacity errors will not necessarily present the Authorization Code Required message. Before the Authorization Code Start Date, when Disable is OFF, the system displays the baseline messages if the section has a waitlist maximum > zero. The Add Authorization process does not check waitlisted students after the Add Authorization Start Date is met.
Permit-Override Code	A Permit-Override code must be established on STVROVR and SFAROVR with Capacity selected at a minimum before it can be entered on SOATERM.

Field	Description
	On SOATERM, the Permit-Override Code validates against SFAROVR. Establish a Registration Permit-Override Code on SFAROVR to associate with Authorization Code processing. SFASRPO will be updated for the Term/CRN when the section when a student uses a valid Authorization Code to register for a section. It is highly recommended that the Permit-Override Code entered for Add Authorization processing on SOATERM be used ONLY by the Add Authorization process. If the SFASRPO Permit-Override Code defined for Add Authorization processing is pre-assigned, the permit will allow the student into the section without an Authorization Code if there is a capacity error.
Days Required Relative to Start Date	Valid values are -999 to 999. A value of 0 is valid. This is the number of days added to or subtracted from the **Add Authorization Start Date** for the section on SSASECT. This provides some flexibility related to the **Add Authorization Start Date** as to when Add Authorization processing will begin.
Days Reusable after Assignment	Valid values are 1-999. When an authorization code has been pre-assigned to a student on SFAAUTC or an authorization code has been assigned to a student upon registration for a class, a **First Assigned Date** is established. **Days Reusable after Assignment** is the number of days after the First Assigned Date that the Authorization Code remains active.

Control Settings

Updated: March 16, 2023

Use this section of the Term Information to view and set up the bill printing control for Self-Service and Voice Response.

Fields	Descriptions
Print Bill	Check box used to indicate whether bills

Fields	Descriptions
	can be printed from Self-Service and Voice Response.
Master Web Term Control	Check box used to indicate whether you can look up classes for the term on the web.

Section Term Overrides

Updated: June 20, 2024

Use this section of the **Term Control** page to authorize instructional method changes for the CRNs.

Field	Description
CRN Instructional Method Override	The **CRN Instructional Method Override** check box allows the instructional method changes for CRNs with enrollments in the term. • Select the check box to allow updates to the instructional method field for the CRNs with enrollments existing for the term. • Clear the check box to not permit updates to the instructional method field for the CRNs having enrollments for the term. **Note:** By default the check box will be in the cleared state for all terms.

Class Option Change Controls

Updated: August 27, 2020

Use this section of the Term Information to view and set up class change controls used to restrict or enable selected registration-related actions in Banner Self-Service.

Fields	Descriptions
Change Level	Check box that indicates whether the

Fields	Descriptions
	student may change the level associated with the course when a course has multiple levels available. This field is used by the Change Class Options page in the Registration Menu.
Change Grade Mode	Check box that indicates whether the student may change the grading mode when a course has multiple grading modes available. This field is used by the Change Class Options page in the Registration Menu.
Change Credit Hours	Check box that indicates whether the student may change the credit hours when a course has variable credits. This field is used by the Change Class Options page in the Registration Menu.
Change Study Path	Check box that indicates whether the student can change the study path associated with the course during registration when a course has multiple study paths available. This field is used by the Change Class Options page in the Registration Menu. This check box is not displayed when **Enable Study Paths** is unchecked on SOACTRL.

Grade Display Controls

Updated: August 27, 2020

Use this section of the Term Information to view and set up grade display controls used to restrict or enable selected grade-related actions in Banner Self-Service.

Fields	Descriptions
Display Grade Detail	Check box that indicates whether the grade

Fields	Descriptions
	detail for the selected term is displayed on the Display Grades page in the Administrative Functions Menu.
Display Midterm Grades	Check box that indicates whether the midterm grades for the selected term are displayed on the Display Grades page in the Administrative Functions Menu.
Display Final Grade	Check box that indicates whether the final grade for the selected term is displayed on the on the Display Grades page in the Administrative Functions Menu.

Faculty and Advisor Controls

Updated: August 27, 2020

Use this section of the Term Information to view and set up faculty and advisor controls used to restrict or enable selected faculty-related actions in Banner Self-Service.

Fields	Descriptions
Display Schedule	Check box that indicates whether the Faculty Schedule page is displayed in Banner Self-Service.
Display Class List	Check box that indicates whether Class List Detail and Summary pages are displayed in Banner Self-Service.
Allow Approval/ Overrides	Check box that indicates whether the Registration Approval Overrides page is displayed in Banner Self-Service.
Allow Add/Drop	Check box that indicates whether the Registration Add/Drop page is displayed in Banner Self-Service to allow faculty registration or add/drop activity.

WebCAPP Controls

Updated: August 27, 2020

Use this section of the Term Information to view and set up CAPP controls used to restrict or enable selected CAPP-related actions in Banner Self-Service.

Fields	Descriptions
Web Evaluation Term	Check box that indicates whether the term in the key should be available for selection in Banner Self-Service in viewing existing compliance reports or generating new compliance reports. This indicator may need to be updated for each term depending on the institution's policy on viewing/running older compliance reports.
Web Catalog Term	Check box that indicates whether the term displayed in the key is a valid term for the dynamic catalog for WebCAPP processing.

Catalog Search Controls

Updated: August 27, 2020

Use this section of the Term Information to view and set up catalog search controls. These controls are used to restrict or enable selected searching capabilities when a student performs a search for available courses in Self-Service.

SOATERM Schedule and Catalog Search Controls and Keyword Index

If you modify the Display Long Course Title, Display Long Section Title, Display Long Course Description, or Display Long Section Description on the SOATERM Web Processing Controls tab on the Term Control (SOATERM) page, you will need to drop the keyword index and re-run the index to reflect the changes to the hierarchy based on the new settings.

Note: The six 'Search by' indicators listed below are not used in Banner 9.x. This class search information is configured on SOAWSCR.

Fields	Descriptions
Search by Level	Check box that indicates whether the student is permitted to search for classes by the level of the course.
Search by Schedule Type	Check box that indicates whether the student is permitted to search for classes by the schedule type of the course.
Search by College	Check box that indicates whether the student is permitted to search for classes by the college through which the course is offered.

Fields	Descriptions
Search by Division	Check box that indicates whether the student is permitted to search for classes by the division through which the course is offered.
Search by Department	Check box that indicates whether the student is permitted to search for classes by the department through which the course is offered.
Search by Course Attribute	Check box that indicates whether course attributes will be used in the class search criteria in Self-Service.
Display Long Course Title	Check box that indicates whether long course titles have been defined for your catalog. You can choose to display that information in lieu of the course title.
Display Long Course Description	Check box that indicates whether long course descriptions have been defined for your catalog. You can choose to display that information in lieu of the course text.

Schedule Content Display Control

Updated: August 27, 2020

Use this section of the Term Information to view and set up schedule controls for display of long section title and descriptions, in addition to closed sections. These controls are used when a student performs a search for available sections in Self-Service.

Use the Overall Page and Field Configuration (SOAWSCR) page to maintain the registration page and field configuration definitions for your institution. You can specify a persona, a page, and an effective term related to the fields that are available for configuration on a Self-Service Registration page.

SOATERM Schedule and Catalog Search Controls and Keyword Index

If you modify the Display Long Course Title, Display Long Section Title, Display Long Course Description, or Display Long Section Description on the SOATERM Web Processing Controls tab on the Term Control (SOATERM) page, you will need to drop the keyword index and re-run the index to reflect the changes to the hierarchy based on the new settings.

Fields	Descriptions
Display Closed Section	Check box that indicates whether closed sections (sections with zero or fewer remaining seats) will be displayed when a student requests a listing of available sections.
Display Long Section Title	Check box that indicates whether long section titles have been defined. You can choose to display that information in lieu of the section title.
Display Long Section Description	Check box that indicates whether long section descriptions have been defined. You can choose to display that information in lieu of the section text.

Base Part of Term

Updated: August 27, 2020

This section of the page displays part of term records, Web registration start and end date ranges, and Faculty and Advisor Self-Service access dates. Use the Base Part of Term section to access this area of the page.

Use the Base Part of Term information to define part of term information for the full term in the key block. This includes the start and end dates, number of weeks in part of term, and census date.

At least one part of term must be established that is equal to the full term.

Note: Be very careful when altering part of term information, when scheduling of registration information exists.

Fields	Descriptions
Part of Term	Part of term code for the base part of term.
Description	Part of term description.
Start Date	Part of term start date.
End Date	Part of term end date.
Part of Term Schedule Calendar Default Date	Part of Term Schedule Calendar Default Dates are applied against a Part of Term and are optional.

Fields	Descriptions
	When Part of Term Schedule Calendar Default Dates exist for Last Date to Enroll, Last Date for Refund, Last Date to Record Academic History or Last Date to Drop Without Penalty, these dates default from the part of term assigned when the section is created on SSASECT and will display on SSAACCL. When the Copy From Term/Copy feature is used on SOATERM, any Part of Term Schedule Calendar Default Dates in the 'Copy From' term are NOT copied to the 'Copy To' term.
Number of Weeks	Length of the part of term in weeks.
Census One Date	Designates that census one enrollment be calculated for the part of term.
Census Two Date	Designates that census two enrollment be calculated for the part of term.
Incomplete Extension Date	Extension/expiration date when incomplete final grades become eligible to replace final grades during automated incomplete grade processing. This date serves as a default date when incomplete grades are assigned to a student. The date can vary by part of term, is optional, and can remain null. The date will be null for old term records and can be left null for all terms when automated incomplete grade processing is not in use. When the rules on SHAINCG indicate that automated incomplete grade processing is active for a term, with default grades on

Fields	Descriptions
	SHAGRDE that can be entered or overridden by faculty members, the extension date is also defaulted for the term or part of term that matches the CRN.
Section Override	Check box used to indicate whether the start and end dates and census one and two freeze dates can be updated on SSASECT for the part of term. • When checked, these dates can be overridden on SSASECT. • When unchecked, these dates cannot be overridden and will default to the dates associated with this part of term.
Faculty Web Midterm Grades	Check box that indicates whether mid-term grades are displayed on Web pages in Faculty and Advisors Self-Service.
Faculty Web Final Grades	Check box that indicates whether final grades are displayed on Web pages in Faculty and Advisors Self-Service.
Faculty Web Wait List	Check box that indicates whether waitlist information is displayed on Web pages in Faculty and Advisors Self-Service.

Access Management

Updated: August 27, 2020

Use this section of the page to set up date ranges when registration is available in Banner Self-Service and date ranges that limit access to and term display in Banner Faculty and Advisor Self-Service. Use the Access Management section to access this area of the page.

Web Registration Dates

Updated: August 27, 2020

Use the Web Registration Dates section to specify the date ranges during which registration through the Web is available for the term in the Key block. Web registration dates are established as follows.

Enter one or more start and end dates for Web registration periods. Note that the ability to enter more than one Web registration period allows the institution to turn Web registration access on and off during the term. The start and end dates entered should not fall outside (either before or after) the date ranges that are established for both student enrollment statuses on the Enrollment Status Control (SFAESTS) page and course registration statuses on the Course Registration Status (SFARSTS) page for the term, or errors will prevent a student from registering through the Web.

Fields	Descriptions
Start Date	Start date for Web registration for the term in the Key block.
End Date	End date for Web registration for the term in the Key block.

Faculty and Advisor Access Dates

Updated: August 27, 2020

This section is used to set up the date range used to limit faculty member and advisor access to the Banner Faculty and Advisor Self-Service main menu and control which terms are displayed for faculty and advisors in the Self-Service Select a Term pulldown list.

Faculty members and advisors will have access to the Banner Faculty and Advisor Self-Service main menu when one of two conditions exists: when the current date does not fall within any date range for any term and the person has an active status for any term on the Faculty/Advisor Information (SIAINST) page, or when the current date does fall within a date range and the person has an active status for the term on SIAINST. The term date rules use start and end dates.

All terms are displayed in the Self-Service **Select a Term** pulldown list when no date ranges have been defined on SOATERM, the person is active on SIAINST for the term, and the Faculty and Advisor Controls have been set on SOATERM.

When a date range is set up here, the Self-Service main menu for faculty members and advisors will only be displayed for terms where the current date falls within the defined date range. A term is displayed in the term selection list when no dates exist for a term, and the faculty member has an active status. A term will not be displayed when the current date does not fall into a date range set up for access or when the faculty member is inactive for the term.

Unique term records can exist, such as:

Term	Start
200443	01-JAN-2008
200443	01-AUG-2008

Term	Start

k2d08

But date ranges cannot overlap within the term for the menu access or for the term selection list.

The following fields are in this section of the page.

Field	Description
Start Date	Start date for faculty member and advisor access to Banner Faculty and Advisor Self-Service for the term.
End Date	End date for faculty member and advisor access to Banner Faculty and Advisor Self-Service for the term.
Menu	Check box used to indicate whether menu access is allowed in Banner Faculty and Advisor Self-Service for the date range.
Term Selection	Check box used to indicate whether term selection is allowed in Banner Faculty and Advisor Self-Service for the date range.

Structured Registration Controls

Updated: August 27, 2020

Use this section of the page to set up controls for structured registration processing. Use the Structured Registration section to access this information.

Error Severity

Updated: August 27, 2020

Use this field to define the error severity setting for structured registration.

Fields	Descriptions
Error Severity	Radio group used to select error severity. Choices are `Fatal`, `Warning`, `None`. `Fatal` - Registration changes are not saved until all structured registration requirements are met. `Warning` - Registration changes are saved. The student is warned when structured registration requirements have not been met. `None` - Registration changes are saved. The student is not informed when structured registration requirements have not been met.

Configuration Options

Updated: August 27, 2020

Use this section to indicate if you would like students' current, past, and future courses to be considered when requirements are displayed in structured registration.

When you set up structured registration each term, you have the option to evaluate the current, past, and future courses taken by the student. This enables students to know which program requirements they have already met.

Fields	Descriptions
Check Academic History	Use this indicator to select if you want the system to query academic history and update the display of program requirements that have already been met. Select one of these options: • No - (default) Do not query academic history to update the status for program requirements that have already been met. • Institutional only - Query only your institution's academic history records. • Institutional and Transfer - Query both your institution's academic history records and the transfer academic history records.
Check In Progress Courses	Use this check box to indicate that you want the system to update the status of students' requirements based on their currently enrolled classes when they are registering for a future term. This assumes that the students will pass the courses in which they are currently enrolled. The default is not to update students' program requirements based on their currently registered classes.
Evaluate Non-Rolled Grades on In Progress Courses	When the Check In Progress Courses check box is selected, use this check box to indicate if you want the system to evaluate grades assigned to in-progress courses that have not yet been rolled to academic history.

Fields	Descriptions
	If a current class has a failing grade, the system will display the program requirement as "Not met." The default is not to evaluate grades assigned to students' current classes.

Mandatory

Updated: August 27, 2020

Use these fields to set up the mandatory rule.

Fields	Descriptions
Mandatory Active	Check box used to indicate whether the mandatory requirements are presented to the student in Self-Service registration.
Mandatory Rule Key	Defines the rule under which mandatory requirements are found. Enter a key such as `MANDATORY`. When this field is blank, mandatory requirements are found attached directly to the area.

Optional

Updated: August 27, 2020

Use these fields to set up the optional rule.

Fields	Descriptions
Optional Active	Check box used to indicate whether the optional requirements are presented to the student in Self-Service registration.

Fields	Descriptions
Optional Rule Key	Defines the rule under which optional requirements are found. Enter a key such as `OPTIONAL`. When this field is blank, the optional rule cannot be active.

Elective

Updated: August 27, 2020

Use these fields to set up the elective rule.

Fields	Descriptions
Elective Active	Check box used to indicate whether the elective requirements are presented to the student in Self-Service registration.
Elective Rule Key	Defines the rule under which elective requirements are found. Enter a key such as `ELECTIVE`. When this field is blank, the elective rule cannot be active.

External API

Updated: August 27, 2020

Use this field to set up the external API.

Fields	Descriptions
External API	Name of the external API used for processing when CAPP is not in use.

Information Text

Updated: August 27, 2020

Use these fields to set up the information text.

Fields	Descriptions
Structured Print Type	Print type code and description used for structured registration information text to be displayed in Self-Service. Select a value from the list of print type choices.
Links Print Type	Print type code and description used for display of links/URLs in structured registration. Select a value from the list of print type choices.

Projected Registration Controls

Updated: August 27, 2020

Use this section of the page to set up controls for projected registration processing. Use the Projected Registration section to access this information.

Restrictions

Updated: August 27, 2020

Use these fields to set up restrictions.

Fields	Descriptions
Term open for Self-Service Projections	Check box used to indicate whether projected registration is in use for the term.
Restrict to Projected Courses	Check box used to indicate whether registration and planning are restricted to only projected courses.
Restrict to Null Projections	Check box used to indicate whether registration and planning are restricted when no projected courses are listed.

Student Projection

Updated: August 27, 2020

Use these fields to define student projection settings.

Fields	Descriptions
Include Failed Courses in Student Projections	Check box used to indicate whether failed courses are included in the projections.
Mark Failed Courses as Most Probable	Check box used to indicate whether failed courses can be marked as most probable in the projections.

Mandatory

Updated: August 27, 2020

Use this section to set up the mandatory rule and to enable students to register for mandatory classes.

Fields	Descriptions
Mandatory Rule Key	Value used to identify mandatory courses. Enter a key such as `MANDATORY`. When this field is blank, only independent courses listed in the area requirements are considered as mandatory
Mandatory Active	Select the check box when you want to make mandatory classes available to students for registration. If you do not select the check box, students will see the available classes, but will not be able to add them to their schedule.

Elective

Updated: August 27, 2020

Use this section to set up the elective rule, to set up which courses are displayed in projected registration, and to associate an attribute with an elective pool.

Fields	Descriptions
Elective Rule Key	Value used to identify elective courses. Enter a key such as `ELECTIVE`. When this is blank, the elective rule does not apply.
Elective Active	Select the check box when you want to make elective classes available to students for registration. If you do not select the check box, students will see the available classes, but will not be able to add them to their schedule.
Roll section attribute to Academic History	Select this check box when you want the attribute associated with the CRN to be included in the roll process. This includes the manual and mass update roll processes.
Hide transferred courses	When this check box is selected, students will not see their transferred courses in the list of available classes.
Hide in-progress courses	When this check box is selected, students will not see the courses they are currently taking in the list of available classes.
Hide passed courses	When this check box is selected, students will not see the courses they have already passed in the list of available classes.
Section Attribute for Elective Pool	If you would like to set up elective pools, use this field to assign the attribute that identifies the type of elective. Values come

Fields	Descriptions
	from the Degree Program Attribute Validation (STVATTR) table.

If you are setting up elective pools, enter a value in the **Section Attribute for Elective Pool** field on this page. That value is used by the Student Schedule Application Elective Pool (SSAPOOL) page and the Schedule Specific Section Attribute (SSASATR) page. Go to those pages to complete the elective pool setup.

External API

Updated: August 27, 2020

Use this field to set up the external API.

Fields	Descriptions
External API	Name of the external API used for processing registration projections when CAPP is not in use.

Test Score Information (SOATEST) page

Updated: August 27, 2020

Use this page to create and update test score information for an applicant. Test score information can be added or updated automatically through the data load process or manually.

If a test score is a checklist item on a student's admissions application, the checklist will be automatically updated with the most recent test date information (date taken) from SOATEST.

Prerequisite

The ID must exist before test scores can be entered. You can create an ID on the General Person Identification (SPAIDEN) page.The data load process will add the person before loading the scores, if the person does not exist.

Main window

Updated: August 27, 2020

Use this window to record test scores for the student whose ID you enter in the key block.

Key block

Updated: August 27, 2020

Use the key block to enter the ID of the student for whom test score information is being created or updated.

Select the Individual's Checklist Items option in the Options Menu to view checklist items for the ID in the key block by term and application number.

Fields	Descriptions
ID	ID and name of the student for whom test score information is being created or updated. The ID must exist before test scores can be entered. You can create an ID on the General Person Identification (SPAIDEN) page.

Test Score Information section (California Localization)

Updated: August 27, 2020

Use the Test Score Information section to record test scores. This section can be expanded using the Test Scores (1), Test Scores (2), Test Scores (3), and Percentiles tabs. Each section displays additional fields for each record in the section.

The Percentiles section contains fields used for test percentiles and percentile types from test score data load processing. Each percentile record has five rows so that percentiles with multiple types can be displayed. For example, an SAT verbal test score has a national percentile type and a state percentile type associated with it. If more than five percentiles are associated with a single test score, you can scroll through the records to view additional information.

Note: The percentiles reside in a different table (SORTSPC) than the test score information.

Select the Individual's Checklist Items option in the Options Menu to view checklist items for the ID in the Key section by term and application number.

Fields	Descriptions
Test Code	Test score code and description associated with the various tests (for example, SAT and ACT). Choices come from the Test Score Validation (STVTESC) page.
Test Score	Score for the test. The valid range for the test score is displayed at the bottom of the Display section. Information from the Test Score Validation (STVTESC) page appears at the bottom of the screen in the Display section, and displays when you move your cursor to this field.
Test Date	Date the test was taken. This date is entered automatically in the untitled **Comment** field associated with the test in the Checklist Summary window of the Admissions Application (SAAADMS) page. If a test score is a checklist item on a student's admissions application, the checklist is automatically updated with the most recent test date from the **Test Date** field on SOATEST.
Use the Test Scores (1) section to view these fields.	
Admission Request	Code that links test scores entered on this page with admissions request test scores in the Checklist Detail window on the Admission Application (SAAADMS) page. When this code matches the **Admissions Request (Checklist Item Code)** in the Checklist Detail window, the **Received Date** in the Checklist Detail window is updated if the date is blank. Choices come from the Admissions Request Code Validation (STVADMR) list. Information appears in this field automatically if the test score is defined in the **Admissions Checklist Request Item** field on the Test Code Validation (STVTESC) page. This value comes from STVTESC. It can be changed.
Source	Source used to enter the associated test score (for example, data load or self-reported). Choices come from the Admission Test Score Source (STVTSRC) list.
Equivalency	This check box is a not null field whose default value is N. If the

Fields	Descriptions
Indicator	check box is checked (Y), then the corresponding test record was created as the result of the equivalency processing function within SRKTEST. When a test score is inserted into SORTEST by the SRKTEST package, if an equivalency is created for that test score, the E**quivalency Indicator** check box will be checked (Y). In addition, the effective term code of the record from SOATEQU used in determining the equivalency score will be inserted into the **Term** field (`SORTEST_TERM_CODE_ENTRY`) of the equivalent test score record. This helps determine which equivalency record was used in calculating the equivalency for a specific test score.
Revised or Recentered	Code that indicates whether the SAT score is recentered, revised, or both. Choices are: X - The score is revised. R - The score is recentered. Z - The score is revised and recentered. Null - The score is not revised or recentered. This value is loaded during the data load process.
Use the Test Scores (2) section to view these fields.	
Administration Type	Method used to administer the test (for example, locally or nationally). Choices come from the Admissions Test Administration Type Validation list (STVTADM).
Purpose	Purpose or reason for taking the test. Choices come from the Test Purpose Validation (STVTEPR) list.
Page	Test page code. This field is informational only. Choices come from the Test Page Validation (STVTEFR) list.
Accommoda-tion	Special accommodations made for this test and student. Choices come from the Test Accommodation Validation (STVTEAC) list.
Instrument	Instrument used to take the test. Choices come from the Test Instrument Validation (STVTEIN) list.

Fields	Descriptions
Use the Test Scores (3) section to view these fields.	
Term	Term during which the test score information was recorded, or the term for which the applicant is applying. Choices come from the Term Code Validation (STVTERM) list or the Admissions Application Summary (SAASUMI) page. Test scores can be stand-alone or associated with an application. If association with an application is desired, the term and application number entered must represent a valid application. (Test scores added by the AMCAS application load process will associate the MCAT score with a specific application.)
Application Number	Application number. Use zero (0) for no specific application. Choices come from the Admissions Application Summary (SAASUMI) page. Test scores can be stand-alone or associated with an application. If association with an application is desired, the term and application number entered must represent a valid application. (Test scores added by the AMCAS application load process will associate the MCAT score with a specific application.)
Release Indicator	Check box that indicates that the person authorized release of information to other parties, for example, for search services use. (Test scores added by the AMCAS application load process will set the **Release Indicator** when Med/Mar processing is authorized by the person.) Choices are: checked - Release of information is authorized. unchecked - Release of information is not authorized.
Instrument ID	Instrument used to record the document number used by the person for a test. (Writing Sample test scores loaded by the AMCAS application load process use this field to store the Writing Sample Lithocode.)
SAT Essay ID	Web SAT Essay ID from the essay portion of the SAT test.
Use the Percentiles section to view these fields.	

Fields	Descriptions
Percentile	Percentile used for AMCAS processing. Range of values is 0 - 100.
Percentile Type	Percentile type used for AMCAS processing, such as local, national, GRE. List Test Score Percentile Types (STVTSPT)
Description	Description of percentile type, such as National Test Scores.
Percentile Date	The percentile effective date for tests where the percentile is subject to recalculation, such as the MCAT.
Percentiles are for test score	Code for test record selected that is used for percentile processing in AMCAS. Display only.
taken on	Date test was taken. Display only.

California Localization

The field and description in this section applies to California only.

Fields	Descriptions
Campus Code	Code of the campus at which the test was taken.

Display section

Updated: August 27, 2020

Use the Display section (untitled) to display information from the Test Code Validation (STVTESC) page.

The information displayed depends on the cursor location in the Test Score Information section. As you select each record in the Test Score Information section, the data associated with the selected test code is displayed in the Display section.

Fields	Descriptions
Test Type (untitled)	Test type of the selected test code. This value comes from the Test Code Validation (STVTESC) page.
Scores must be	Characteristics of the test score to be entered. This code begins

Fields	Descriptions
	with the length of the test score followed by the type of characters. This value comes from the Test Code Validation (STVTESC) page.
characters in range of	Range of numbers or letters between which the score must fall to be valid for the selected test code. This value comes from the Test Code Validation (STVTESC) page.

Enter test score information

Updated: August 27, 2020

You can enter the test score information.

About this task

Procedure

1. Access the Test Score Information (SOATEST) page.
2. Enter the student's ID.
3. Go to the Test Score Information section.
4. Enter the test code.
5. Enter the score.
6. Enter the date test was taken into the **Test Date** field.
7. Save.

Web Display List Customization (SOAWDSP) page

Updated: August 27, 2020

The Web Display List Customization (SOAWDSP) page is used to define the validation table codes that can be displayed on the Web for open learning courses and registration information.

Validation tables have only been included that are used in course and catalog Web searches and do not have a Web indicator defined. The validation tables are:

- Instructional Method Validation Table (GTVINSM)
- Attribute Validation Table (STVATTR)
- Building Code Validation Table (STVBLDG)
- Campus Code Validation Table (STVCAMP)
- College Code Validation Table (STVCOLL)
- Department Code Validation Table (STVDEPT)
- Division Code Validation Table (STVDIVS)
- Level Code Validation Table (STVLEVL)
- Part of Term Code Validation Table (STVPTRM)
- Schedule Type Code Validation Table (STVSCHD)
- Session Code Validation Table (STVSESS)
- Subject Code Validation Table (STVSUBJ)
- Test Code Validation Table (STVTESC)

This page is composed of the following sections:

- key block
- Web Display List Customization

Key block

Updated: August 27, 2020

Use the key block to enter a validation table name in the **Validation Table Name** field or select one from the list.

Fields	Descriptions
Validation Table	Seven letter validation table name and associated description for

Fields	Descriptions
Name	which you want to select codes for display on the Web.

Web List Display Customization

Updated: August 27, 2020

Use the Web List Display Customization section of the page to search on and display codes from a validation table in the Validation Table Values list and then select the codes to be displayed on the Web in the Web Display Values list.

Note: After a value has been moved from one list to the other, it is removed from the source list and cannot be re-selected or duplicated from that source list.

- Use the **Add** button to move a record from the Validation Table Values list to the Web Display Values list.
- Use the **Add All** button to move all records from the Validation Table Values list to the Web Display Values list.
- Use the **Remove** button to move records from the Web Display Values list to the Validation Table Values list.
- Use the **Remove All** button to move all records from the Web Display Values list to the Validation Table Values list.

  Note: You can use also drag and drop to move the records back and forth.

Fields	Descriptions
These fields are in the Validation Table Values information.	
Find (untitled)	Used to search on a known code or description.
Code	Code defined in the chosen validation table.
Description	Description associated with the validation table code.
These fields are in the Web Display Values information.	
Code	Code to be displayed on the Web.
Description	Description associated with the code.
Activity Date	Date the record was created or last updated.
User ID	User ID of the person who created or updated the record.

Waitlist Automation Term Control (SOAWLTC) page

Updated: August 27, 2020

This page is used to set up waitlist rules by term for general controls, error checking, course selection, priority reordering rules, and exclusion reordering rules.

This page is composed of the following sections:

- key block
- Waitlist Term Control and Waitlist Registration Error Checking
- Course Selection Criteria for Waitlist Priority Rules
- Waitlist Priority Reordering Rules
- Waitlist Exclusion Rules

Key block

Updated: August 27, 2020

Use the key block to enter the term for the waitlist automation controls. Use the **Copy** button to copy a set of rules to the term in the key block.

Fields/Buttons	Descriptions
Term	Term code and description of the term to be associated with the waitlist automation controls.
Copy	Button used to open the Copy Term window and copy rules from an existing term to a term that does not have any waitlist automation control information on SOAWLTC.

Copy Term window

Updated: August 27, 2020

Use this window to duplicate waitlist automation controls from an existing term and copy them to a term that does not have any controls.

To open this window, enter a term in the key block and click the **Copy** button.

- The **Copy** button is enabled for a term that does not have any existing data.
- The **Copy** button is disabled for a term that has existing data.

Fields/Buttons	Descriptions
From Term	Term from which control information will be copied. The term entered must have existing information on SOAWLTC.
Cancel	Button used to cancel the copy process.
Copy	Button used to copy control information for the term in the **From Term** field to the term in the key block.

Waitlist Term Control

Updated: August 27, 2020

Use this section of the page to set up notification controls by term for automatic waitlist processing and to display waitlist queue positions in Banner Student Self-Service. Use the Waitlist Term Control section to access this area of the page.

Fields	Descriptions
Automatic Waitlist Notification	Check box used to indicate if automatic waitlisting is active for the term. The default is checked (Y). Waitlist registration error checking will still take place (as defined in the Waitlist Error Checking section) when this indicator is unchecked (N).
Show Waitlist Position on Student Self-Service	Check box used to indicate if the student's waitlist queue position is displayed in Banner Student Self-Service. The default is checked (Y).
Waitlist Notification Deadline Hours	Time period in hours by which the waitlisted student must register for the course after being notified of an available seat. The default is 24 hours.
Resend Deadline Hours	Time period in hours for which the system will attempt to resend a failed email waitlist notification.

Fields	Descriptions
Online Waitlist Notification	Check box used to indicate that waitlist notification should occur during registration. The default is checked (Y). When this indicator is unchecked (N), only batch processing can be used for notification.

Notifications

Updated: August 27, 2020

Use this section of the page to set up notification controls for students, advisors, instructors, and the registrar, in addition to entry of the host email address to be used for automatic notification of available seats. Use the Waitlist Term Control section to access this area of the page.

Fields	Descriptions
Notify Student - Send Notification	Students will be notified of available seats when the **Send Notification** check box is checked. The default is checked (Y).
Notify Student - Email Letter	Letter code and description of notification letter for the waitlisted students. Use a letter code from SOAELTL with a module code of F (Registration). This field is required when the **Send Notification** check box is checked.
Notify Primary Instructor - Send Notification	The student's primary instructor will be notified of available seats when the **Send Notification** check box is checked. The default is checked (Y).
Notify Primary Instructor - Email Letter	Letter code and description of notification letter for the primary instructor. Use a letter code from SOAELTL with a module code of F (Registration). This field is required when the **Send Notification** check box is checked.
Notify Primary Advisor - Send Notification	The student's primary advisor will be notified of available seats when the **Send Notification** check box is checked. The default is checked (Y).
Notify Primary Advisor - Email Letter	Letter code and description of notification letter for the primary advisor. Use a letter code from SOAELTL with a module code of F (Registration). This field is required when the **Send Notification** check box is checked.

Fields	Descriptions
Notify Registrar - Send Notification	The registrar will be notified of available seats when the **Send Notification** check box is checked. The default is checked (Y).
Notify Registrar - Email Letter	Letter code and description of notification letter for the registrar. Use a letter code from SOAELTL with a module code of F (Registration). This field is required when the **Send Notification** check box is checked.
Registrar Banner ID	Identification number for an entity in Banner with an email address that is used as the from address for all notification emails. It is also the email address that notifications are sent to when the **Send Notification** check box is checked for the registrar, and the address that student emails are sent to if a student does not have an active email account. A value must be entered in this field when the **Automatic Waitlist Notification** check box in the Key block is checked (set to Y).
E-mail Host	Host name for email address to be used for available seat notification. This field is required when the **Automatic Waitlist Notification** check box in the Key block is checked (set to Y).

Waitlist Registration Error Checking

Updated: August 27, 2020

Use this section of the page to view or set the waitlist registration error checking for the term in the key. This section of the page is accessed using the Waitlist Term Control section.

You can control error checking for waitlisted courses using Student Options and Section Options.

- Student Options for waitlisted courses can be included in error checking. Check the **Include Waitlisted Courses in Error Checking** indicator (set to Y) for the specific option to include those courses in waitlist error checking along with enrolled courses. The default is unchecked (N).
- Section Options can be set to Fatal, Warning, or No Check. When a new record is created, the severity settings for the Section Options are determined by the severity

settings on SOATERM for the term.

The settings for the Student Options are defaulted in. If no waitlist control records have been defined for the term on SOAWLTC, the error checking process will use the settings on SOATERM.

Corequisites, prerequisites, and links for waitlisted coursework can be met by enrolled coursework, but waitlisted coursework cannot meet enrolled coursework requirements.

Note: The WLTIMECONT rule on GTVSDAX is no longer used for time conflict checking.

Fields	Descriptions
The following fields are in the Student Options section.	
Duplicates - Include Waitlisted Courses in Error Checking	Check the **Include Waitlisted Courses in Error Checking** indicator (set to Y) to include duplicate courses in waitlist error checking. The default is unchecked (N).
Links - Include Waitlisted Courses in Error Checking	Check the **Include Waitlisted Courses in Error Checking** indicator (set to Y) to include linked courses in waitlist error checking. The default is unchecked (N).
Corequisites - Include Waitlisted Courses in Error Checking	Check the **Include Waitlisted Courses in Error Checking** indicator (set to Y) to include corequisite courses in waitlist error checking. The default is unchecked (N).
Prerequisites - Include Waitlisted Courses in Error Checking	Check the **Include Waitlisted Courses in Error Checking** indicator (set to Y) to include prerequisite courses in waitlist error checking. The default is unchecked (N).
Time - Include Waitlisted Courses in Error Checking	Check the **Include Waitlisted Courses in Error Checking** indicator (set to Y) to include time conflicts for courses in waitlist error checking. The default is unchecked (N).
The following fields are in the Section Options section.	
Approval	Radio group used to set approval warning severity to Fatal, Warning, or No Check.
Capacity	Radio group used to set capacity warning

Fields	Descriptions
	severity to Fatal, Warning, or No Check.
Field of Study	Radio group used to set field of study warning severity to Fatal, Warning, or No Check.
Department	Radio group used to set department warning severity to Fatal, Warning, or No Check.
College	Radio group used to set college warning severity to Fatal, Warning, or No Check.
Level	Radio group used to set level warning severity to Fatal, Warning, or No Check.
Class	Radio group used to set class warning severity to Fatal, Warning, or No Check.
Campus	Radio group used to set campus warning severity to Fatal, Warning, or No Check.
Degree	Radio group used to set degree warning severity to Fatal, Warning, or No Check.
Program	Radio group used to set program warning severity to Fatal, Warning, or No Check.
Student Attribute	Radio group used to set student attribute warning severity to Fatal, Warning, or No Check.
Cohort	Radio group used to set cohort warning severity to Fatal, Warning, or No Check.

Course Selection Criteria for Waitlist Priority Rules

Updated: August 27, 2020

Use this section of the page to set up course selection criteria for the waitlist priority rules for the term in the key. The selection of courses is based on college, subject, course, CRN, and attributes. This section of the page is accessed using the Waitlist Course Selection section.

Fields	Descriptions
College	College code and description of course that can be waitlisted.
Subject	Subject code of the course that can be waitlisted.
Course	Course number and title of the course that can be waitlisted.
Course Alias	The Course Alias is similar to the Course. The Course Alias is updated only if the Course ID is updated on the SCACRSE page.
CRN	Course reference number of the course that can be waitlisted. If a value is entered in this field, no other field on the course record can be entered.
Attributes	Degree program attribute code and description of the course that can be waitlisted.

Waitlist Priority Reordering Rules

Updated: August 27, 2020

Use this section of the page to set up the priority rules for the term in the key.

The rules are used to provide various degrees of preferential treatment to students with characteristics matching the values entered on the rule. These rules are applied when a student is waitlisted for a CRN. Students that do not meet the criteria for any of the rules will receive the lowest priority. Waitlist priority rules only apply to courses that meet the course selection criteria. If no criteria have been set up, the waitlist priority rules are applied to all CRNs for the term. Use the Waitlist Priority Rules section to access this area of the page.

Fields	Descriptions
Priority	Priority number for the rule.

Fields	Descriptions
	The priority does not have to be unique. A priority of 1 is the highest priority. Students matching the characteristics of a priority 1 rule are notified first, on a first-come, first-served basis.
Level	Level code and description for the rule.
Campus	Campus code and description for the rule.
College	College code and description for the rule.
Degree	Degree code and description for the rule.
Program	Program code and description for the rule.
Field of Study Type	Field of study type code and description for the rule.
Field of Study Code	Major code and description for the rule.
Class	Class code and description for the rule.
Cohort	Cohort code and description for the rule.
Attribute	Student attribute code and description for the rule.
Minimum GPA	Minimum level GPA required for the rule.
Maximum GPA	Maximum level GPA required for the rule.
Academic Standing	Academic standing code and description for the rule.

Waitlist Exclusion Rules

Updated: August 27, 2020

Use this section of the page to set up the exclusion rules for the term in the key.

Students that match the characteristics defined for an exclusion rule are not allowed to be waitlisted for any courses. Exclusion rules are only applied if the **Automatic Waitlist Notification** check box in the Key block is checked. Use the Waitlist Exclusion Rules section to access this area of the page.

Fields	Descriptions
Level	Level code and description for the rule.
Campus	Campus code and description for the rule.
College	College code and description for the rule.

Fields	Descriptions
Degree	Degree code and description for the rule.
Program	Program code and description for the rule.
Field of Study Type	Field of study type code and description for the rule.
Field of Study Code	Major code and description for the rule.
Class	Class code and description for the rule.
Cohort	Cohort code and description for the rule.
Attribute	Student attribute code and description for the rule.
Minimum GPA	Minimum level GPA required for the rule.
Maximum GPA	Maximum level GPA required for the rule.
Academic Standing	Academic standing code and description for the rule.

Overall Page and Field Configuration (SOAWSCR) page

Updated: May 24, 2021

The Overall Page and Field Configuration (SOAWSCR) page is used to maintain the registration page and field configuration definitions for your institution.

Page elements are delivered as seed data. You can specify a persona, a page, and an effective term related to the fields that are available for configuration on a Self-Service Registration page. You can also define if an item is displayed, the display order of the fields on the page, and customized display text for the field labels. The customized label text is used instead of the delivered text. At least one item must be displayed for each Self-Service Registration page.

You cannot create or delete records on this page, but you can modify seed data records. All records are system required, but you can edit information for the **Display Number**, the **Displayed** indicator, the **Custom Display Text** field, and the **Required** indicator. When the **Displayed** indicator is unchecked, the **Display Number** is blank.

Note: If you enable the **Required** indicator for the **College** field on the Class Search Basic (#10) and/or the Course Search Basic (#310) pages, an asterisk (*) displays on the page, and the requirement to enter information in the College field is enforced. If you enable the Required indicator for any other field(s), an asterisk (*) does not display on the page, and users are not required to enter information for the field(s).

Note: You can use the Data Extract option to save your data to an Excel spreadsheet.

To use this page you need to set up page configuration codes on the Overall Configurable Page Validation (STVWSPG) page and page field configuration codes on the Overall Configurable Page Field Validation (STVWSFD) page.

This page is composed of the following sections:

- Key block
- Overall Page and Field Configuration

Key block

Updated: August 27, 2020

Use the Key block to enter the persona code, page code, and effective term code for which you want to see registration page and field configuration definitions.

The end term is populated based on the effective term entered. The records returned are ordered by display order and page code. You can copy data from one term to another and from one persona to another.

Field	Description
Persona	Persona code and description to which the configuration is applied.
Page	Page code and description of Self-Service Registration page to which the configuration is applied.
Effective Term	Effective term code and description in which the configuration of the page is active. You can view a list of all valid terms from STVTERM or a list of effective terms for persona and page, based on the persona and page entered.
End Term	Last term in the term range in which the configuration of the page is active.
Copy Term	Button used to open the Copy Term window and copy configuration rules for a persona, page, and from term combination to the effective term in the Key block.

Field	Description
Copy Persona	Button used to open the Copy Persona window and copy persona information from one persona to another persona, such as from STUDENT to FACULTYBOTH.

Copy Term window

Updated: August 27, 2020

Use this window to duplicate configuration rules from an existing term and copy them to a term that does not have any rules.

To open this window, enter a term in the key block and click the **Copy Term** button.

- The **Copy Term** button is enabled for a term that does not have any existing data.
- The **Copy Term** button is disabled for a term that has existing data.

Field	Description
From Term	Term from which configuration information will be copied. The term entered must have existing information on SOAWSCR.
Cancel	Button used to cancel the copy process.
Copy	Button used to copy configuration information for the term in the **From Term** field to the term in the key block.

Copy Persona window

Updated: August 27, 2020

Use this window to duplicate persona configuration information and copy the data to a new persona rule.

To open this window, enter a persona in the key block and click the **Copy Persona** button.

- The **Copy Persona** button is enabled for a persona that does not have any existing data.
- The **Copy Persona** button is disabled for a persona that has existing data.

Field	Description
From Persona	Persona rule from which configuration information will be copied. The persona entered must have existing information on SOAWSCR.
Cancel	Button used to cancel the copy process.
Copy	Button used to copy information for the persona in the **From** Persona field to the persona in the key block.

Overall Page and Field Configuration

Updated: August 27, 2020

Use the Registration Page and Field Configuration section of the page to view the records for the persona code, page code, and effective term code entered in the key block.

To set the display order, check the **Displayed** indicator for the field, then enter the display order number. When the changes are saved, the fields are reordered in this section of the page. You can then access Self-Service and view your changes on the Web page.

When a field is set to display on a Web page and has an associated display order number, you can remove it from the Web page display by unchecking the **Displayed** indicator and removing the order number from the **Display Number** field. When the changes are saved, the field is moved to the bottom of the field list on this page. The rest of the fields remain in order, and the used and removed display order number is skipped.

For example, if you had the LEVEL field item as display order 3, and you removed it, the field order would be reset to 1, 2, 4, 5, and so on. The 3 would be skipped. You do not need to update the remaining fields if their display order numbers have not changed.

You can add a display order number that had been used and removed back into the list and then save the changes to reorder the fields and include that field and display order number in the Web page display.

Field	Description
Display Number	Number that indicates the order in which the field is displayed on the Web page. This value can be changed. When the **Displayed** indicator is unchecked

Field	Description
	for the record, the **Display Number** becomes Null and must be reset when the **Displayed** indicator is checked again.
Field	Code and description for the field, such as COURSETITLE, Title.
Displayed	Check box used to specify if the field is displayed. This value can be changed. When this indicator is checked, the display number/order of the field can be changed. When this indicator is unchecked for the record, the **Display Number** value becomes Null. You must update the **Display Number** value when you reset the **Displayed** indicator to checked.
Baseline Display Text	Descriptive text to be displayed for the field. This is the text that is displayed for the **Persona** and **Effective Term** if the **Custom Display Text** is not specified.
Custom Display Text	Descriptive text to be displayed for the field. This is the text that can displayed for the **Persona** and **Effective Term** instead of the delivered **Baseline Display Text**. If this value is not specified, the **Baseline Display Text** value will be displayed.
Required	Check box used to specify whether the field is required for display in the user interface. When you enable this field on the administrative page, it will only work for the **College** field present in some specific

Field	Description
	Registration Self-Service pages as follows: • Register for Classes • Plan Ahead • Browse Classes • Browse Course Catalog.
System Required	Check box used to specify whether the code is required by the system. After this indicator is checked, it cannot be changed.

EDI Cross-Reference Curriculum Rules (SOAXCUR) page

Updated: August 27, 2020

This page is query only. Please use SOACURR for Web display maintenance.

When you access SOAXCUR (for the first time per Banner® session), the following message is displayed: Self-Service display controls are now maintained on SOACURR. This page now operates as a query only page. All fields in the main section are queryable.

Majors, minors, and concentrations are displayed in their own windows. Use the Cross-Reference Major Rules, Cross-Reference Minor Rules, and Cross-Reference Concentration Rules tabs to access those windows. Each window will display all the rows from the respective data tables (SORCMJR, SORCMNR, and SORCCON). You can enter queries in each window to view specific data.

Main window

Updated: August 27, 2020

The main window contains the key block, the Cross-Reference Major Rules block, the Cross-Reference Minor Rules block, and the Cross-Reference Concentration Rules block.

Key block

Updated: August 27, 2020

Use the key block to enter the term for the query.

Cross-Reference Major Rules section

Updated: August 27, 2020

This section displays the major rules from the SORCMJR table. Use the Cross-Reference Major Rules section to access this window.

Cross-Reference Minor Rules section

Updated: August 27, 2020

This section displays the minor rules from the SORCMNR table. Use the Cross-Reference Minor Rules section to access this window.

Cross-Reference Concentration Rules section

Updated: August 27, 2020

This section displays the concentration rules from the SORCCON table. Use the Cross-Reference Concentration Rules section to access this window.

Fields	Descriptions
Auto Student	When the **Auto Student** check box is checked for a record, it indicates that this curriculum (or plan on the Web) is allowed to have an automatic decision processed against it by Quick Start.

EDI Cross-Reference Rules (SOAXREF) page

Updated: August 27, 2020

This page is used to define valid values for incoming EDI or electronic (XML) data and the equivalent Banner® values.

It also serves as the source of the values for the pulldown lists which appear on the Web application. Rules entered here are used in electronic and Web data loads to validate incoming data and to translate EDI values into the appropriate Banner values.

EDI equivalents on Banner validation forms (for example, on STVSTAT) are used only when extracting data from Banner for transmission by EDI. In some instances, a single Banner value may be associated with a number of EDI values, or an EDI qualifier may further define the associated data value.

An example is college codes. In EDI transmissions, colleges are identified by both a qualifier and a code value. A college can be identified by FICE code or ETS code (and also a number of other coding sets), and both the qualifier (FICE or ETS) and the appropriate college code within the set are transmitted. In this example, two entire sets of Banner college codes would be defined, one for FICE and one for ETS, and each line of cross-reference rules would contain the appropriate qualifier.

In other instances, there is a one-to-one correspondence between EDI and Banner codes. For example, there is a single EDI code for each nation. In these instances, there would be a single cross-reference rule for each EDI nation code, and these rules would not contain a qualifier.

Use the List function for the **Banner Value** field to search the Banner validation table and exit with a value.

Use the Web search tool for High Schools and Colleges that pulls data from SOASBGI. The school search consists of three parts. The first step is to select the state/province or country in which the school exists; the second is to select the city; and the third is to select the school itself.

If no values exist on SOAXREF for a particular validation table (for example the legacy code from STVLGCY), the source of the pull down on the Web application will be the Banner validation table itself (in this case, STVLGCY). This also applies to the Web page pull down population logic and to the verification of the electronic application and push processes.

This page is not required if the you are not running the TS 189 Upload to Banner (SAR189U), and you want all values on all applicable validation tables to display on the Web.

Fields	Descriptions
XML	Check box used to indicate whether the EDI verification label code in the **Label** field is a PESC/XML standard code.

Administrator Assignment Search (SOIAROL) page

Updated: August 27, 2020

Use this page to query on roles and IDs from the Administrator Role Rules (SOAADAS) page.

This page is accessed using Count Filter Hits from the **ID** or **Role** fields in the Key block of SOAADAS or SOAAINF, or you may access the Option List from the **ID** or **Role** fields to select Admin Assign Search (SOIAROL) page.

Complementary Activities Submission Inquiry (SOICASA) page

Updated: June 17, 2021

View the complementary activity submission details.

Field	Description
Complementary Activities Submission Search block	
Program	Program code of the submitted complementary activity.
Term	Term code of the submitted complementary activity.
ID	Student's sequence identification number to uniquely identify a record.
Category	Category code of the submitted complementary activity.
Activity	Activity code of the submitted complementary activity.
Status	Status code of the submitted complementary activity.
College	College code of the primary curriculum for which the student submitted the complementary activity.
CA Request ID	Sequence number to uniquely identify a record.

Archived Learner Curriculum Filter (SOIHCUR) page

Updated: August 27, 2020

This page is used to query and display archived curriculum (SORHCUR) and field of study (SORHFOS) rows, for all learner module codes (RECRUIT, ADMISSIONS, LEARNER, OUTCOME), for a specified ID.

These records can provide historical data for the user, even after they have been purged from the main curriculum and field of study tables by the Learner Curriculum Purge Process (SOPLCPG).

You can select a learner module, term, or key sequence number in the Key block to define the query, or you may leave these Key block fields blank to select all archived curriculum records for the ID. When you initially access the page, all archived curriculum records are displayed for the ID in the Key block with the following sort order.

The sort order separates curriculum records by learner module (STVLMOD) unless a specific module is queried. The modules are sorted in the following order: Recruit, Admissions, Learner, Outcome, and then any user-defined modules in alpha, ascending order.

Main window

Updated: August 27, 2020

The main window contains the key block and the Archived Curriculum block.

Key block

Updated: August 27, 2020

This block is used to define the query for the learner's archived curriculum information.

Fields	Descriptions
ID	Enter the ID of the learner for which you want to see archived curriculum information. List Person Search (SOAIDEN) page
Summary	This field allows you to search on archived records in Recruiting, Admissions, General Student, and Academic History for the ID in the key. Select the type of summary you want to view, and query on the learner. You can then use Exit with Value to bring that record's curriculum data back into SOIHCUR. Choices are: Recruit Summary - Prospect Summary (SRASUMI) page

Fields	Descriptions
	Applicant Summary - Admissions Application Summary (SAASUMI) page Learner Summary - General Student Summary (SGASTDQ) page Learner Outcome Summary - Degree Summary (SHADGMQ) page
Module	This is the learner module for which you want to see archived curriculum information. List Learner Module Validation (STVLMOD)
Term	This is the term for which you want to see the archived curriculum information. List Term Code Validation (STVTERM)
Key Sequence	This is the sequence number for the module record, either recruiting, application, or degree.

Archived Curriculum section

Updated: August 27, 2020

This section is used to view all archived curriculum records associated with the host recruiting, admissions, learner, or outcome record for the learner. Use the Archived Curriculum section to access this area.

Fields	Descriptions
Record of	This field displays the number of archived curriculum records that exist for the ID based on the data entered in the Key section, for example **Record** 1 **of** 5. Mouse through the records. As you scroll through the records, the data in the Archived Curriculum and Field of Study blocks changes for each record.
Module	This is the learner module code for the curriculum and field of study.
Sequence Number	This field specifies the `SORLCUR_SEQNO` associated with the

Fields	Descriptions
	selected curriculum row.
Activity	This is the curriculum activity status code.
Key Sequence	This is the key sequence number of the module record that is associated with the archived curriculum record. This sequence number will be the same as either the recruiting, application, or degree sequence number. If the record is for a learner, the key sequence number will always be 99.
Term	This is the term code for the module's curriculum record.
Catalog Term	This is the catalog term code for the module's curriculum record.
Priority	This is the priority number that defines the curriculum rank.
Program	This is the program for the module's curriculum record.
Level	This is the level for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.
Admission Type	This is the admissions type code for the learner curriculum.
Admission Term	This is the term code for admittance for the learner curriculum.
Application	Sequence number from the application record from which the curriculum was derived. Display only. This field will not be populated if the learner record was generated from SAAQUIK.
Matriculated Term	This is the term code for matriculation for the learner curriculum.
Roll Learner	Radio group that shows whether the archived curriculum record has been rolled to a degree (outcome) record. Valid values are Yes, No, and Default.
Rolled to Outcome	Sequence number from the degree record to which the curriculum was rolled. Display only.
Graduation Sequence	Displays the graduation application sequence number on the curriculum record for the learner (SGASTDN, SFAREGS) and outcome (SHADEGR) curriculums. Display only.
User ID	This field displays the user ID of the person who created the record.
Activity Date	This field displays the date the record was created or modified.

Fields	Descriptions
Start Date	Start date of the archived curriculum. (This field is not used at this time.)
End Date	End date of the archived curriculum. (This field is not used at this time.)
End Term	Term code for the end of the archived curriculum. (This field is not used at this time.)
Student Type	Student type code entered specifically for the archived curriculum record.
Site	Site code entered specifically for the archived curriculum record.
Rate	Rate code entered specifically for the archived curriculum record.
Leave of Absence	Leave of Absence code entered specifically for the archived curriculum record.
From Date	Date from which the leave of absence code entered specifically for the archived curriculum record is in effect.
To Date	Date to which the leave of absence code entered specifically for the archived curriculum record is in effect.
Expected Graduation Date	Expected graduation date entered specifically for the archived curriculum record.
Graduation Term	Graduation term code entered specifically for the archived curriculum record.
Graduation Year	Graduation year entered specifically for the archived curriculum record.

Archived Field of Study window

Updated: August 27, 2020

This window is used to view the archived field of study details for the learner.

The window displays certain fields from the archived curriculum record and all archived field of study records. You can only access the Field of Study window from the Curriculum window. Use the Archived Field of Study section to access this window.

Archived Curriculum section

Updated: August 27, 2020

This section displays a summary of archived curriculum values. The following fields are displayed in this section.

Fields	Descriptions
Record of	This field displays the number of archived curriculum records that exist for the ID based on the data entered in the Key section, for example **Record** 1 **of** 5. Mouse through the records. As you scroll through the records, the data in the Curriculum and Field of Study blocks changes for each record.
Activity	This is the curriculum activity status code.
Term	This is the term code for the module's curriculum record.
Key Seq (Key Sequence)	This is the key sequence number of the module record that is associated with the archived curriculum record. This sequence number will be the same as either the recruiting, application, or degree sequence number. If the record is for a learner, the key sequence number will always be 99.
Seq Num (Sequence Number)	This field specifies the `SORLCUR_SEQNO` associated with the selected curriculum row.
Module	This is the learner module code for the curriculum and field of study.
Priority	This is the priority number that defines the curriculum rank.
Program	This is the program for the module's curriculum record.
Catalog	This is the catalog term code for the module's curriculum record.
Level	This is the level for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.

Archived Field of Study section

Updated: August 27, 2020

This section is used to display the archived field of study information. The following fields are in this section.

The **Attached Concentrations** button is enabled when the cursor is on a field of study record for a major with attached concentrations. Click on the button to display a list of the attached concentrations in a pop-up window. The button is not enabled if the cursor is on a record for a major with no attached concentrations, or if the record is for a minor or a concentration or another field of study type.

Fields	Descriptions
Seq Num (Sequence Number)	This field specifies the `SORLFOS_SEQNO` associated with the selected field of study row.
Rolled (Indicator)	Indicator that displays Y or N to show whether the archived field of study record has been rolled to a degree (outcome) record.
Activity	This is the curriculum activity status for the archived field of study.
Status	This is the curriculum status for the archived field of study.
Term	This is the term code for the archived field of study.
Type	This is the type code for the learner field of study. It identifies whether the row is for a MAJOR, MINOR, or CONCENTRATION.
Priority	This is the priority number that defines the archived field of study rank.
Catalog	This is the catalog term for the archived field of study.
End Term	This is the term code for the end term of the archived field of study. (This field is not used at this time.)
Field of Study	This is the major, minor, or concentration code for the archived field of study.
Department	This is the department code for the archived field of study.

Fields	Descriptions
Attached to Major	This is the major code associated with an attached concentration for an archived field of study row.
Full or Part Time	This is the time status code for the field of study.
Start Date	This is the start date for the archived field of study. (This field is not used at this time.)
End Date	This is the end date for the archived field of study. (This field is not used at this time.)
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Mouse	Keyboard	Result
Attached Concentra-tions	N/A	Lists concentrations attached to major

Learner Curriculum Filter (SOILCUR) page

Updated: August 27, 2020

This page is used to query on all fields contained within the SORLCUR and SORLFOS tables for all learner module codes (RECRUIT, ADMISSIONS, LEARNER, OUTCOME) for a specified ID.

This page is similar to the Curriculum window, but it contains all the data fields and is not dependent upon a specific module for processing.

You can select a learner module, term, or key sequence number in the Key block to define the query, or you may leave these Key block fields blank to select all curriculum records for the ID. When you initially access the page, all curriculum records are displayed for the ID in the Key block with the sort order described below.

The sort order separates curricula records by learner module (STVLMOD) unless a specific module is queried. The modules are sorted in the following order: Recruit, Admissions, Learner, Outcome, and then any user-defined modules in alpha, ascending order. Records can be sorted within module by current or all, depending on the setting of the **Current** field, which indicates if the curriculum displayed is the most current for the priority (Y) or is not the most recent for the priority (N).

Main window

Updated: August 27, 2020

The main window is comprised of the key block and the Curriculum block.

Key block

Updated: August 27, 2020

This block is used to define the query for the learner's curriculum information.

Fields	Descriptions
ID	Enter the ID of the learner for which you want to see curriculum information. List Person Search (SOAIDEN) page
Summary	This field allows you to search on existing records in Recruiting, Admissions, General Student, and Academic History for the ID in the key. Select the type of summary you want to view, and query on the learner. You can then use Exit with Value to bring that record's curriculum data back into SOILCUR. Choices are: Recruit Summary - Prospect Summary (SRASUMI) page Applicant Summary - Admissions Application Summary (SAASUMI) page Learner Summary - General Student Summary (SGASTDQ) page Learner Outcome Summary - Degree Summary (SHADGMQ) page
Module	This is the learner module for which you want to see curriculum

Fields	Descriptions
	information. List Learner Module Validation (STVLMOD)
Term	This is the term for which you want to see the curriculum information. List Term Code Validation (STVTERM)
Key Sequence	This is the sequence number for the module record, either recruiting, application, or degree.
View Current/Active Curricula	Check box used to limit the display of curriculum records in the Curriculum and Field of Study blocks to only those that are current and active.

Curriculum section

Updated: August 27, 2020

This section is used to view all curriculum records associated with the host recruiting, admissions, learner, or outcome record for the learner. Use the Curriculum section to access this area.

Note: Use the **View Current/Active Curricula (Indicator)** in the Key section to control if you want only current and active curriculum records to be displayed in the Curriculum section.

Fields	Descriptions
Record of	This field displays the number of curriculum records that exist for the ID based on the data entered in the Key section, for example **Record** 1 **of** 5. Mouse through the records. As you scroll through the records, the data in the Curriculum and Field of Study blocks changes for each record.
Current	This field specifies if the record is the most current for the priority or not. Valid values are checked (Current) or unchecked (Not Current). • Current (Y) displays the most recent row for each given

Fields	Descriptions
	priority (i.e., the highest sequence number for each priority). • Not Current (N) displays all rows for each priority that are not the most recent.
Seq Num	This field specifies the `SORLCUR_SEQNO` associated with the selected curriculum row.
Activity	This is the curriculum activity status code.
Key Sequence	This is the key sequence number of the module record that is associated with the curriculum record. This sequence number will be the same as either the recruiting, application, or degree sequence number. If the record is for a learner, the key sequence number will always be 99.
Term	This is the term code for the module's curriculum record.
End Term	This is the term code for the end term of the field of study. This field is populated with the SGBSTDN effective term when the curriculum stops being current. If there is no future SGBSTDN term, the field will be blank.
Catalog Term	This is the catalog term code for the module's curriculum record.
Priority	This is the priority number that defines the curriculum rank.
Program	This is the program for the module's curriculum record.
Level	This is the level for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.
Admission Type	This is the admissions type code for the learner curriculum.
Admission Term	This is the term code for admittance for the learner curriculum.
Application	Sequence number from the application record from which the curriculum was derived. Display only. This field will not be populated if the learner record was generated from SAAQUIK.
Matriculated Term	This is the term code for matriculation for the learner curriculum.

Fields	Descriptions
Module	This is the learner module code for the curriculum and field of study.
Roll Learner	Use this radio group to determine if the learner curriculum should be rolled to history (outcome). When the curriculum is rolled, the outcome record is created (SHADEGR), and the learner curriculum inserted for the outcome. A new outcome is not created if a previous outcome exists that has not been awarded and has a curriculum record with the same level, degree, college, and program. In this case, the curriculum is rolled to the existing outcome. The choices are Yes, No, or Default. The default value originates first from the setting of the **Primary (Indicator)** or the **Secondary (Indicator)** on SOACURR. If a curriculum has not been defined, the default value then originates from the **Create or Update Outcome Record with Primary Learner Curriculum** radio group or the **Create or Update Outcome Record with Secondary Learner Curricula** radio group on SOACTRL. • Select Yes to roll the learner record to academic history (outcome). • Select No to not roll the learner record. • Select Default to use the curriculum rules defined on SOACURR (**Primary** or **Secondary** checkboxes) and SOACTRL (**Create or Update Outcome Record with Primary Learner Curriculum** radio group or **Create or Update Outcome Record with Secondary Learner Curricula** radio group). All non-learner modules (Recruiting, Admissions, Academic History) will display a value of No in this field.
Rolled to Outcome	Sequence number from the degree record to which the curriculum was rolled. Display only.
User ID	This field displays the user ID of the person who created the record.
Activity Date	This field displays the date the record was created or modified.

Fields	Descriptions
Start Date	This is the start date of the curriculum. (This field is not used at this time.)
End Date	This is the end date of the curriculum. (This field is not used at this time.)
Student Type	Student type code entered specifically for the curriculum record.
Site	Site code entered specifically for the curriculum record.
Rate	Rate code entered specifically for the curriculum record.
Leave of Absence	Leave of Absence code entered specifically for the curriculum record.
From Date	Date from which the leave of absence code entered specifically for the curriculum record is in effect.
To Date	Date to which the leave of absence code entered specifically for the curriculum record is in effect.
Expected Graduation Date	Expected graduation date entered specifically for the curriculum record.
Graduation Term	Graduation term code entered specifically for the curriculum record.
Graduation Year	Graduation year entered specifically for the curriculum record.

Field of Study window

Updated: August 27, 2020

This window is used to view the field of study details for the learner.

The window displays certain fields from the curriculum record and all field of study records. You can only access the Field of Study window from the Curriculum window. Use the Field of Study section to access this window.

Note: Use the **View Current/Active Curricula (Indicator)** in the Key block to control if you want only current and active curriculum records to be displayed in the Field of Study window.

Curriculum section

Updated: August 27, 2020

This section displays a summary of curriculum values. The following fields are in the this section.

Fields	Descriptions
Record of	This field displays the number of curriculum records that exist for the ID based on the data entered in the Key section, for example **Record** 1 **of** 5. Mouse through the records. As you scroll through the records, the data in the Curriculum and Field of Study blocks changes for each record.
Current	This field specifies if the record is the most current for the priority or not. Valid values are checked (Current) or unchecked (Not Current). • Current (Y) displays the most recent row for each given priority (i.e., the highest sequence number for each priority). • Not Current (N) displays all rows for each priority that are not the most recent.
Activity	This is the curriculum activity status code.
Term	This is the term code for the module's curriculum record.
End Term	This is the term code for the end term of the field of study. This field is updated by the system and is not updateable on new curriculum records.
Key Seq (Key Sequence)	This is the key sequence number of the module record that is associated with the curriculum record. This sequence number will be the same as either the recruiting, application, or degree sequence number. If the record is for a learner, the key sequence number will always be 99.
Seq Num (Sequence Number)	This field specifies the `SORLCUR_SEQNO` associated with the selected curriculum row.
Module	This is the learner module code for the curriculum and field of study.
Priority	This is the priority number that defines the curriculum rank.

Fields	Descriptions
Program	This is the program for the module's curriculum record.
Catalog	This is the catalog term code for the module's curriculum record.
Level	This is the level for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.

Field of Study section

Updated: August 27, 2020

This section is used to display and update field of study information. The following fields are in this section.

The **Attached Concentrations** button is enabled and its name is displayed when the cursor is on a field of study record for a major with attached concentrations. Click on the button to display a list of the attached concentrations in a pop-up window. The button is not enabled if the cursor is on a record for a major with no attached concentrations, or if the record is for a minor or a concentration.

Fields	Descriptions
Current	This field specifies if the record is the most current for the priority or not. Valid values are Y (Current) or N (Not Current). • Current (Y) displays the most recent row for each given priority (i.e., the highest sequence number for each priority). • Not Current (N) displays all rows for each priority that are not the most recent.
Seq Num (Sequence Number)	This field specifies the `SORLFOS_SEQNO` associated with the selected curriculum row.

Fields	Descriptions
Activity	This is the curriculum activity status for the field of study.
Status	This is the curriculum status for the field of study.
Term	This is the term code for the field of study.
Type	This is type code for the learner field of study.
Priority	This is the priority number that defines the field of study rank.
Rolled (Indicator)	Check box used to indicate that the field of study record has been rolled to a degree record.
Catalog	This is the catalog term for the field of study.
End Term	This is the term code for the end term of the field of study. (This field is not used at this time.)
Field of Study	This is the major, minor, or concentration code for the field of study.
Department	This is the department code for the field of study.
Attached to Major	This is the major code associated with an attached concentration for a field of study row.
Full or Part Time	This is the time status code for the field of study.
Start Date	This is the start date for the field of study. (This field is not used at this time.)
End Date	This is the end date for the field of study. (This field is not used at this time.)
User ID	This field displays the user ID of the person who created the record.
Activity Date	This field displays the date the record was created or modified.

Source/Background Institution Filter Only (SOISBGI) page

Updated: December 12, 2024

Use this page to review **Source or Background** Institution codes information and its **Source Background Type** associated about an institution.

It is a stand alone, query only page that is called by other pages to print specific types (H for high school, C for college) of background information and **Source or Background Type** associated.

All source and background institutions and their **Source or Background Type** associated are displayed in SOISBGI page, the information of **Source or Background Institution** can be updated using SOASBGI page, and the **Source Background Institution** and their **Source Background Type** associated can be updated in STVSBGI page.

You can access SOASBGI page from this page to view source information.

Before you can view information on the Source/Background Institution Filter-Only (SOISBGI) page, you must first define values on the Source/Background Institution Code Validation (STVSBGI) page.

You can access SOISBGI from SOAPCOL, SOAHSCH, and SAAQKER to query **Source or Background** details for prior college, high school, or primary source information respectively.

Main window

Updated: December 12, 2024

This query-only section enables you to view **Source Background Type** information associated with the institution.

The Background Information section (untitled) displays specific types of sources and background institutions when called by another page. Because this page is a query-only page, you cannot update the database from this page. Values on this page come from the

Source/Background Institution Code Validation (STVSBGI) page.

The **Source Background Type** information section displays specific codes and values of **Source Background Type** that are associated to each institution listed (if any). Because this page is a query-only page, you cannot update the **Source Background Type** information from this page. Values in this section come from the Source/Background Institution Code Validation (STVSBGI) page, in the **Source Background Type** section for selected institutions. This section displays the **Source Background Type** information of the school that is being selected in **Source Background Type** section.

Field	Description
Code	"Source Background Type Validation" code configured in STVSBGI "Source Background Type" section.
Description	Description for "Source Background Type Validation" code configured in the STVSBGI "Source Background Type" section.
Value	The value of the "Source Background Type" code configured in STVSBGI "Source Background Type" section.

Filter an institution

Updated: December 12, 2024

You can query an institution to see source or background information about that institution.

Before you begin

Before you can view information on this page, you must first define values on the Source/Background Institution Code Validation (STVSBGI) page.

Procedure

1. Filter on prior college information for an ID from the **Prior College** field on the Prior College (SOAPCOL) page.
2. Filter on high school information for an ID from the **High School** field on the High School Information (SOAHSCH) page.
3. To search for a specific school, access SOISBGI page directly. Enter the search criteria, and select GO to display the results. These results will include the "Source

Background Type" code values that are associated with the school filtered in case they exist.

Note: SOISBGI page was enhanced so the filter can work both case insensitive and case sensitive, this affects specifically **Name** and **City** columns.

4. Select the way you want the filter to work previous performing search. The default is **Case Insensitive** but this can be changed each time you use the filters.

Continuant SCP Filter (SOQCSCP) page

Updated: August 27, 2020

This page is used to query on continuant student centric periods by student type. This page is accessed using a Count Filter Hits function from the **Student Type** field in the Key block of SOACSCP or by using the Continuant Student Centric Period Filter (SOQCSCP) item on the Options Menu.

Main window

Updated: August 27, 2020

This window displays the key block information from SOACSCP and the associated continuant student centric periods by student type.

Key block

Updated: August 27, 2020

This block is display only and contains term and student type from SOACSCP.

Field	Description
Term	Term code for the continuant student centric period rule. This value defaults in from SOACSCP. Display only.
Student Type	Student type code for the continuant student centric period rule. This value defaults in from SOACSCP. Display only.

Data section

Updated: August 27, 2020

This section displays the continuant student centric period rules available for the term and student type.

Field	Description
Student Type	Student type code for the continuant student centric period rule.
Description	Description of the student type code for the continuant student centric period rule.
Continuant Student Centric Period	Continuant student centric period for the rule.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Continuant Terms Filter (SOQCTRM) page

Updated: August 27, 2020

This page is used to display a listing of the continuant terms by student type. This is a query-only page.

You can access SOQCTRM from the SOACTRM page. To do so, use a Count Filter Hits function from the **Student Type** field.

Holds Query-Only (SOQHOLD) page

Updated: August 27, 2020

This page displays holds a person may have. When this page is called from an application page, it checks the values of the globals that are passed, and displays only those holds which are still active and have been flagged to affect the process being performed.

Hold information is used in the Registration, Accounts Receivable, and Academic History modules.

Learner Curriculum Activity Rules (SORCACT) page

Updated: August 27, 2020

This page is used to set up rules to designate which curriculum activity status codes are active.

Fields	Descriptions
Curriculum Activity Status	This is the code for the curriculum activity status, such as ACTIVE, INACTIVE, REMOVED. List Curriculum Activity Status (STVCACT)
Description	This is the description of the curriculum activity status code.
Active Indicator	Check this box to indicate that the curriculum activity status code is active. Clear this box to indicate that the curriculum activity status code is inactive.
System Required Indicator	The **System Required Indicator** check box is used to determine which values are required by the system. If the **System Required Indicator** check box is selected, the record cannot be deleted.
User ID	This field displays the user ID of the person who created the record.
Activity Date	This field displays the date the record was created or modified.

Curriculum Event Status Rules (SORCSTS) page

Updated: August 27, 2020

This page is used to record the translation of curriculum status codes during curriculum events. A common example is for a non-destructive update. The curriculum status of

CHANGED is added to the field of study with the INACTIVE curriculum activity.

Records that are designated as system required cannot be deleted. You can change the curriculum status code for the translation.

Fields	Descriptions
Curriculum Status	Curriculum status code and description. List Curriculum Status (STVCSTS)
Translation	Translated curriculum status code and description. List Curriculum Status (STVCSTS)
System Required Indicator	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Tape File Delimiter Type Rules (SORDLIM) page

Updated: August 27, 2020

Use this page to assign a delimiter or marker to a specific tape code. The delimiter or marker should match those contained in the delimited input file to be used with this tape code.

Fields	Descriptions
Tape Code	Enter the data file/tape code for the rule. List Electronic Datafile and Tape Validation (STVTAPE)

Fields	Descriptions
Description	This is the description of the tape code. It defaults in from the tape code selected from the Lookup button.
Delimiter	Enter the delimiter which indicates a new field on the file, such as a comma.
Marker	Enter the marker used in addition to the delimiter to enclose the field data, such as an apostrophe.
System Required	Check this box if the rule is system required.
User ID	This is the ID of the user who created or updated the rule.
Activity Date	This is the date the rule was created or updated.

Curriculum User Default (SORLCDF) page

Updated: August 27, 2020

This page is used to create default values used for the key curriculum and field of study fields when new curriculum and field of study (major) records are inserted.

The default values are defined for the user and the learner module, and are maintained in the SORLCDF table and on the SORLCDF page. These values include: user ID, learner module code, campus code, college code, level code, program, degree code, major code, and department code. The **User ID** value defaults to the ID of the person currently using the page. Data queried is displayed for that person. Multiple records may be inserted, one for each learner module code (STVLMOD).

On all the data entry forms where curriculum records are entered (SRAQUIK, SRARECR, SAAQUIK, SAAADMS, SGASTDN, SFAREGS, and SHADEGR), there is always an attempt made by the system to default values into all the curriculum fields based on the program rule in SMAPRLE. When the user default value rules for the Admissions, Recruiting, General Student, and Academic History modules are set up on their corresponding data entry forms, these rules may or may not override the default program rule on SMAPRLE.

Values defined on SAAQKER that are used on SAAQUIK, and values in the Default Value window on SRAQUIK will take precedence over these values. The user- defined default values will take precedence over defaulted values on the recruiting record on SRARECR when the level value equals to 00, the degree value equals to 000000, the college value equals to 00, and the primary major and department values equal 0000.

SORLCDF has been designed to assist with the default of curriculum data that was typically NULL when program information was entered in the curriculum data entry forms. For example, if an existing program of BA-HISTORY is entered on SRARECR, the curriculum values for program, degree, and campus may be defaulted in based on the BA-HISTORY rule on SMAPRLE. If rules exist on SORLCDF for RECRUIT that include a level, major, or department (the NULL values for the BA-HISTORY rule), those values will be defaulted in and complete the curriculum information.

Another example would be, if you have an existing program of BA-HISTORY, rules exist on SORLCDF for RECRUIT, and the values on SORLCDF do not correspond with the BA-HISTORY rule on SMAPRLE, the entry of the BA-HISTORY program on the data entry forms will still cause the system to attempt to default values in from the SMAPRLE rules and override the default values on SORLCDF. The system always attempts to meet the SMAPRLE rule before using the SORLCDF rule.

Note: There is no curriculum program validation from SMAPRLE for SORLCDF when data elements are entered, except to ensure that the program is valid on SMAPRLE.

Fields	Descriptions
User ID	ID of the person who last updated the record. Display only.
Learner Module	Learner module code used for the default curriculum values. List Learner Module Validation (STVLMOD)
Program	Program code used for the default curriculum values. List All Program Codes (SMAPRLE)
Level	Level code used for the default curriculum values.

Fields	Descriptions
	List Level Code Validation (STVLEVL)
Campus	Campus code used for the default curriculum values. List Campus Code Validation (STVCAMP)
Degree	Degree code used for the default curriculum values. List Degree Code Validation (STVDEGC)
College	College code used for the default curriculum values. List College Validation (STVCOLL)
Major	Major field of study code used for the default curriculum values. List All Major Codes (STVMAJR)
Department	Department code used for the default curriculum values. List Department Validation (STVDEPT)
Activity Date	Date on which the record was last updated. Display only.

SUSI Award Rules (SORSURL) Page

Updated: August 27, 2020

Use this page to map the Student Universal Support for Ireland (SUSI) award rate code to award amount.

Key block

Updated: August 27, 2020

Use this page to configure the award rate codes with the award amount for a particular Academic Year and Graduate Type.

Field	Description
Academic Year	Enter the academic year or click on the ellipsis to select a year from the Academic Year Validation (STVACYR) page.
Graduate Type	Select Undergraduate or a Postgraduate from the drop-down.
Copy From Academic Year	Copy the SUSI award rules data from one academic year to another academic year.
Copy From Graduate Type	Copy the SUSI award rules data from one graduate type to another/same graduate type of an academic year. **Note:** Ensure that you enter the Copy from Academic Year and Copy from Graduate Type values to roll over data in a new academic year and graduate type.
Copy	Click this button to copy the SUSI award rules data from one year to another year.

SUSI award rules section

Updated: August 27, 2020

Use the SUSI award rules section to define the award rate codes, contract number and free fees amount.

Field	Description
Grant Award Code	Enter a valid SUSI award rate code or click on the ellipsis to select a award rate code from the SUSI Award Code Validation (STVSURT) page.
Contract Number	The contract number associated to the SUSI award rate code.
Free Fees Payable Amount	The award amount associated to the SUSI award rate code.

Tape Code Conversion (SOTCNVT) page

Updated: August 27, 2020

This page is used to convert codes on interface tapes and files to valid Banner® values before data is added to the system during the data load process.

For example, if the SAT file has a major code of ENGL for English and your institution's code for English is 100, the table name would be MAJR, the file value would be ENGL and the converted value would be 100.

Use the **System Required** field to specify conversion values that are required for use with the Recruiter to Banner interface.

If there is a field on the file which is left blank, but which is required in Banner, then an asterisk (*) needs to be entered in the **Tape Value** field with the appropriate conversion value which will be assigned in Banner. For example, if the Major Code is blank on the file, then a Major Tape Value of * with a Converted Code of '0000' should be maintained.

A default in the **Tape Value** field may be used to load those values from the file which do not have a Converted Value. For example, if a major of Forestry comes from the file, and forestry is not a valid major at your institution, then a default value of 0000 Undeclared Major or some other code of Unavailable Major should be maintained.

Use the **Copy Values** button to copy values from one interface code to another. When you select the button, the Lookup button will display a row for each interface code which contains conversion values for the validation table entered in the key block. If no validation table name is entered, then the Lookup button will display all interface codes that contain conversion records.

For example, if you have an **Interface Code** of PCU, and that code has conversions for **Validation Table Name** INTS (interests) defined on SOTCNVT, and you want to copy that data to an **Interface Code** of SAT, do the following.

1. Enter `SAT` in the **Interface Code** field and `INTS` in the **Validation Table Name** field.
2. Select the **Copy Values** button.
3. Select **PCU** from the Interface Codes for the Table window that appears and select **OK**. The rows from PCU with the table name equal to INTS are copied back to SOTCNVT for the **Interface Code** of **SAT** and the **Validation Table Name** of **INTS**.

If you want all conversion values from one interface code (i.e, PCU) copied to another interface code (i.e, SAT), do the following:

1. Enter `SAT` in the **Interface Code** field, and leave the **Validation Table Name** field blank.
2. Select the **Copy Values** button.
3. The Interface Codes with Conversion Rules window will appear, displaying all the interface codes that contain any conversion records.

Alternate Personal Identification Number (SPAAPIN) page

Updated: August 27, 2020

The Alternate Personal Identification Number (SPAAPIN) page allows a term-specific, Alternate Personal Identification Number (PIN) to be assigned to students.

This term-specific PIN is called an alternate PIN because if required, it will need to be supplied by the student in addition to the regular login PIN before certain functions can be accessed.

The alternate PIN can be required before allowing entry to registration add/drop activities using self-service (Voice Response or Web) registration features. If alternate PINs are required, the alternate PIN will be requested and verified before allowing entry to registration add/drop functions.

Alternate PINs can, for example, be used to require contact between the student and the advisor by supplying the alternate PIN to the advisor and requiring the student to obtain the Alternate PIN from the advisor. Alternate PINs may also be required simply to add an additional level of security before performing add/drop actions.

This page is composed of the following sections:

- key block
- Alternate Personal Identification Number

Key block

Updated: August 27, 2020

Use the key block to enter the term and ID for which you want to add or view records for alternate PINs.

Fields	Descriptions
ID	ID and name of the person for whom you want to display or maintain alternate PINs.
From Term	Term code and description of the earliest term for which you want to display and maintain alternate PINs. Existing alternate PIN records are displayed only if their term code is equal to or greater than the term entered in the key.

Alternate Personal Identification Number

Updated: August 27, 2020

Use this section of the page to associate an alternate PIN record with the ID in the key. Each record uses a term, process name, and alternate PIN number.

Fields	Descriptions
Term	Code of the term for which the alternate PIN is valid.
Process Name	Process identifier for which the alternate PIN is valid. This value is not validated by the system. However, the value TREG must be used for alternate PINs which are used in Voice Response and Web registration. Alternate PINs are used in company-supported Voice Response and Web registration, and for these products, TREG is the only valid process name. The alternate PIN data structure and page can also be used to support other non-company processing. Alternate PINs with the process name TREG can be used for other processes, if your institution desires to have only one alternate PIN per student per

Fields	Descriptions
	term. If different alternate PINs are needed for other purposes, any other process name can be defined and used by your institution.
Alternate PIN	The Alternate Personal Identification Number being assigned to the student for the term. This value is not validated by the system. However, this value must be six numeric digits for alternate PINs used with the TREG process. If PINs are used for other non-Banner® processes, this requirement does not apply.

Person Comment (SPACMNT) page

Updated: August 27, 2020

Specify the comment information for the person, that can be short comments or long narrative comments.

Fields	Descriptions
Comment Type	The **Comment Type** field is used to add a comment type such as General Comment, Plagiarism Offense, or Phone Call. Valid values come from the Comment Type Code Validation (STVCMTT) page, and are set up to meet your institution's business processes.
Originator	The **Originator** field is used to show the office the comment was added by, for example, the Admissions Office or the Bursar's Office. Valid values come from the Originator Code Validation (STVORIG) page.
Contact	The **Contact** field is used to associate a contact type with the comment. It will trigger the Create Materials package to run when the contact is added and saved. Materials will be created if they are appropriate for the contact code entered. Valid values come from the Contact Type Code Validation

Fields	Descriptions
	(STVCTYP) page. If an appointment is entered that has a contact code, the contact code will not be updatable.
Contact Date	The **Contact Date** field displays the date the contact code was added to the comment record. If this date is populated using the **Appointments** button, it is the same as the appointment date.
Appointments (Maintenance button)	Displays a window of all appointments (set up on SOAAPPT) for the ID in the key block. You can select one of the appointments, and its contact code, appointment date (the same as the contact date), and time will populate the appropriate fields allowing comments to be associated with a specific appointment.
From Time	The **From Time** field indicates the start of the appointment set up on SOAAPPT. This information is populated when the user associates an appointment on SOAAPPT with the comment.
To Time	The **To Time** field indicates the end of the appointment set up on SOAAPPT. This information is populated when the user associates an appointment on SOAAPPT with the comment.
Confidentiality	The **Confidentiality** check box is used to indicate that the comment should be considered confidential.
Add Date	The **Add Date** field displays the original date when the comment was created. This date does not change.
Activity Date	The **Activity Date** field displays the date of the last update to the information. This date corresponds to the date when the record was last updated by a user.
Last Updated By	The **Last Updated By** field displays the user ID of the last person to update the Comment section.
Comments	The **Comments** field has autowrap capability and is used for entering short comment text. If you select the **Comments** edit button, the Editor window appears. From here you can insert and update short comments in addition to search and replace on the text within the comment.
Narrative Comments	The **Narrative Comments** field allows you to enter up to 32,760 characters per long comment. The comment text autowraps within its window. If you select the **Narrative Comments** edit

Fields	Descriptions
	button, the Editor window appears. From here you can insert and update comments in addition to search and replace on the text within the comment.
Application Details section You can view this section when the interview details from DfE comes to Banner.	
Admissions Application Number	Displays the admissions application number.
Interview ID	Interviewer's ID for the appointment.
Decision Code	Decision code that implies the decision applied for application (codes are displayed from the STVAPDC page).
Term	Term code.

Emergency Contact (SPAEMRG) page

Updated: March 16, 2023

You use the Emergency Contact Page to capture emergency contact information for persons.

The information you can enter here includes:

- contact name
- relationship to the person with the emergency,
- e-mail address of the emergency contact.
- address and phone information of the person to be contacted.

When a valid ZIP or postal code is selected from the ZIP/Postal Code Validation (GTVZIPC) page and entered in the **ZIP or Postal Code** field, the combination of City, State/Province, and Nation information which exists in GTVZIPC will default into the appropriate fields. The related information does not default in when the ZIP/Postal Code is entered manually.

General Person Identification (SPAIDEN) page

Updated: August 27, 2020

Use the General Person Identification page to capture biographic/demographic information for all persons/non-persons associated with the institution.

Persons/non-persons may belong to any or all of the installed applications (Banner Student, Banner Finance, etc.). All persons/non-persons are first entered into the database using this page. The information maintained in this page is specific to the person/non-person and does not relate to the person's/non-person's involvement at the institution. All other modules/applications are dependent on the information captured and maintained in this page. Any changes or additions to a person's/non-person's biographic/demographic information must be made in this page.

You can access the Common Matching Entry (GOAMTCH) page from SPAIDEN to enter information for a new ID and then execute the matching process before a new PIDM is created in Banner®. To do this, turn on Common Matching for the institution using the **Online Matching Process Enabled (Indicator)** on GUAINST. In addition, the user attempting to access GOAMTCH must not have been excluded from using it on GORCMUS. If user has been excluded from Common Matching on GORCMUS, the user can access GOAMTCH from the Banner menu system.

To open GOAMTCH from SPAIDEN: enter `GENERATED` in the **ID** field, select the **Generate ID** button, or enter an ID in the **ID** field that does not exist in Banner. The GOAMTCH page will automatically be displayed. If a person record is created using only the GOAMTCH page, the **Origin** field (on SPAIDEN and SPRIDEN) will be set to GOAMTCH. If the person record is created using SRRSRIN or SRIPREL, then the **Origin** field will be set to SRKPREL.

You can search on person last and first names and non-person names by text to see if similar names exist. Use the **Search** feature from the **Last Name** and **First Name** fields to view similar names on the Person Search (SOAIDEN) page. Use the **Search** feature from the Non-Person Name Information **Name** field to view similar names on the Non-Person Search (SOACOMP) page.

You can view the user ID and the page or process which created that name/ID record in the ID and Name Source section.

Main window

Updated: August 27, 2020

The main window contains the key block and the Current Identification section.

Key block

Updated: August 27, 2020

Use the key block to enter the ID of the person or to create a new ID record.

Field	Description
ID	ID and the name of the person or non-person you are identifying. To create a new ID using a predetermined number, enter that number. The system will display the associated name in the Key block after you complete the Current Information section and save your record. To create a new ID using a system-generated number, select the **GENERATE ID** button. The ID and associated name will be displayed in the Key block after you enter data in the **Current Information** window and save your record. To use an existing ID, enter the ID. You can enter the ID directly or by selecting the Search feature. The system displays the name of the selected ID.

Current Identification section

Updated: August 27, 2020

In the **Current Identification** window specify current identification data for the person or non-person you are identifying.

This window consists of the following sections:

- Identification
- Person

- Non-Person
- ID and Name Source

Specify the ID, Name, and Tax Number of the person or non-person. The ID and Name specified here are used to identify the person or non-person on all Banner pages.

Fields	Descriptions
ID (Current Identification)	Copies the ID specified in the Key block of SPAIDEN, or the word GENERATE. After the record has been created, you can change the ID by typing over the contents of this field and saving the record. This action causes the system to write an ID change and to record the old ID in the history.
Name Type	The name type to be associated with the name by which the person or non-person is identified on the **Main** window. For example, casual name, maiden name, and original name. The use of name types is optional. The name specified on the **Main** window is used to identify the person or non-person on all Banner pages. It appears on all paychecks and year-end regulatory pages issued for an employee. Alternate names for the person or non-person can be specified on the **Alternate Identification** window of SPAIDEN. Alternate names will not affect any Banner processes. The name type can be changed on SPAIDEN. Name-type changes are recorded and are displayed in the **Alternate Identification** window of SPAIDEN so you can search on a current or former name-type change. When you change the name of a person or non-person, you must assign a name type that has not previously been used for that person or non-person. This is true even if the name type associated with the original name was blank. If a Quick Hire page (PEAHIRE) was completed for the person, the

Fields	Descriptions
	name type in SPAIDEN comes from the **Name Type** field of PEAHIRE. The name type can be changed on SPAIDEN. List Name Type Validation page (GTVNTYP)
Last Name Prefix	Prefix that precedes a last name (for example, "Von" in the last name "Von Hintz").
Last Name	Last name of the person. The Last Name can be changed on SPAIDEN. Name changes are recorded and are displayed in the **Alternate Identification** window of SPAIDEN so you can search on a current or former name. If a Quick Hire page (PEAHIRE) was previously completed for the person, the name in SPAIDEN comes from the **Last Name** field of PEAHIRE.
First Name	First name person. Name changes are recorded and are displayed in the **Alternate Identification** window of SPAIDEN so you can search on a current or former name. If a Quick Hire page (PEAHIRE) was previously completed for the person, the name in SPAIDEN comes from the **First Name** field of PEAHIRE. The first name can be changed on SPAIDEN.
Middle Name	Middle name of the person. Name changes are recorded and are displayed in the **Alternate Identification** window of SPAIDEN so you can search on a current or former name. If a Quick Hire page (PEAHIRE) was previously completed for the person, the name (if any) in SPAIDEN comes from the **Middle Name** field of PEAHIRE. The Middle Name can be changed on SPAIDEN.

Fields	Descriptions
Prefix	Prefix associated with the person's name (for example, Mr., Mrs., or Dr.). If a Quick Hire page (PEAHIRE) was completed for the person, the prefix (if any) in SPAIDEN comes from the **Prefix** field of PEAHIRE. The prefix can be changed on SPAIDEN. The period following the prefix can be included or omitted based on the data entry rules at your institution.
Suffix	Suffix associated with the person's name (for example, Jr. or Sr.). If a Quick Hire page (PEAHIRE) was completed for the person, the suffix (if any) in SPAIDEN comes from the **Suffix** field of PEAHIRE. The suffix can be changed on SPAIDEN. The period following the suffix can be included or omitted based on the data entry rules at your institution.
Preferred First Name	Name (or nickname) by which the person prefers to be identified.
Full Legal Name	Full legal name of the person being identified.
Non-Person Name	Full name of the non-person.
The **Last Update** section in the ID and Name Source block displays the Current ID or name of the person or non-person being identified and the page on which the data was entered originally.	
Origin	Name of the Banner page on which the current name or ID was originally entered.
The **Original Creation** section in the ID and Name Source section displays the ID of the person or non-person who originally entered the data and the date on which the information was originally created.	
User	ID of the user who entered the original information.
Create	Date on which the information was first entered by the user.

Alternate Identification window

Updated: August 27, 2020

Use this window to enter or change information for an alternate ID and name.

Access this window in the corresponding section on SPAIDEN.

Complete the **Change** field before entering any other information in this window.

Fields	Descriptions
Name Type	Name type associated with the name that you are currently viewing or are entering for the person or non-person. Each alternate name of the person or non-person can be associated with a different name type. Only one name can, however, be entered for each name type. As part of this rule, a person or non-person can only have one name with a blank name type. **Note:** Complete the **Change** field before entering an alternate name. List Name Type Validation page (GTVNTYP)
Change Type	Indicate the type of change being entered as alternate information in this tab. You can change the ID or the name of a person or non-person. Choices include: • Name = An alternate name is to be specified. • ID = An alternate ID is to be specified.
ID	Current, previous, or alternate ID for the person or non-person. You can enter an alternate ID, or you can view previous or alternate IDs assigned to the person or non-person.
Last Name Prefix	Prefix that precedes a last name (for example, "Von" in the last name "Von Hintz").
Last Name	Current, previous, or alternate last name for a person; or the

Fields	Descriptions
	current, previous, or alternate name for a non-person. You can enter an alternate name, or you can view previous or alternate names assigned to the person or non-person.
First Name	Current, previous, or alternate first name of a person or view the previous or alternate names assigned to a person.
Middle Name	Current, previous, or alternate middle name of a person or view the previous or alternate names assigned to the person.
After saving the data entered in this section, information is displayed in the following fields:	
Origin	Name of the Banner page in which the alternate identification information was originally entered.
Create User	Banner ID of the user who created the information in this section.
Create Date	Date on which the information was created.

Address Information window

Updated: August 27, 2020

Use this window to enter address and delivery information for the person.

- Addresses can be classified into multiple address types.
  For example, Address Types such as Mailing, Permanent, or Campus are typically used during the course of payroll processing. Be sure to use institution standards when recording an address for a new employee.
- Multiple addresses of the same address type can also be entered and identified by effective dates.
- Multiple telephone numbers can be associated with each address.
- Only one telephone can be identified as the primary telephone for each address.
- A telephone number for a particular address will be displayed in the **Address Information** window only if the **Address Type**, **Address Sequence Number**, and the **Primary** check box fields have been specified on the **Telephone** window.

Enter at least one address. Otherwise, any mails to the person or non-person will be improperly processed.

Fields	Descriptions
From Date	First date that the address is effective. The default value is today's date. It can be changed. If an address was entered for the person on the Quick Hire page (PEAHIRE), the from date in SPAIDEN comes from the **From Date** field of PEAHIRE. This date can be changed on SPAIDEN.
To Date	Last date that the address is effective. If an address was entered for the person on the Quick Hire page (PEAHIRE), the To date (if any) in SPAIDEN comes from the **To Date** field of PEAHIRE. This date can be changed on SPAIDEN.
Address Type	Select the type of address displayed or to be defined from the pull-down list. Examples for address types are: home, business, and billing. To choose an address type, select Address Types from the Option List, and select one of the listed address types. List Address Type Code Validation page (STVATYP) To update a previously entered address, access the Address Inquiry page (PPIADDR) from the **Tools** menu and then select one of the listed addresses. If an address was entered for the person on the Quick Hire page (PEAHIRE), the address type in SPAIDEN comes from the **Associated Type** field of PEAHIRE. This information cannot be changed on SPAIDEN.
Sequence Number	Sequence number that the system assigns to the address. The system assigns 1 to the first address record of a particular type entered for the person (or non-person), 2 to the second address record of that type, etc.

Fields	Descriptions
	For example, if there are two billing addresses and one home address, the first billing address is assigned a sequence number of 1, and the second billing address is assigned a sequence number of 2. The home address is also assigned sequence number 1 as it has a different address type. Only one address of a particular address type can be active at one time.
House Number	Unique number assigned to the building on a street or in an area and used as part of the postal address.
Address	Street address portion of the address. The first line of the street address is required whereas the other lines are optional. To update a previously entered address, access the Address Inquiry page (PPIADDR) from the Option list associated with the **Type** field and then select one of the addresses for display on the **Address Information** window. Enter the ZIP code or postal code for an address immediately after entering the street address (in the Address fields). If the ZIP code or postal code has been defined on the ZIP/Postal Code Validation page (GTVZIPC), the system will then automatically enter all associated address information (i.e., the fields, **City**, **County, State or Province,** and **Nation**) specified on that page. You can change this address information if necessary. If an address was entered for the person on the Quick Hire page (PEAHIRE), the street address in SPAIDEN comes from the **Address** field of PEAHIRE. This information can be changed on SPAIDEN.
City	Name of the city in the address. If you entered a ZIP code or postal code immediately after

Fields	Descriptions
	entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the associated city (if any) specified on GTVZIPC is automatically displayed. You can change the city if necessary. If an address was entered for the person on the Quick Hire page (PEAHIRE), the city portion of the address in SPAIDEN comes from the **City** field of PEAHIRE. The city can be changed on SPAIDEN.
State or Province	Enter or select the name of the state or province from the pull-down list. This field is required if the **Nation** field is not complete. List State/Province Code Validation (STVSTAT) If you entered a ZIP code or postal code immediately after entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the associated state or province (if any) specified on GTVZIPC is automatically displayed. You can change the state or province if necessary. If an address was entered for the person on the Quick Hire page (PEAHIRE), the state or province portion of the address (if any) in SPAIDEN comes from the **State or Province** field on PEAHIRE. The state or province can be changed on SPAIDEN.
ZIP or Postal Code	ZIP code or the postal code portion of the address. This field is required if the **State or Province** field is complete. List ZIP/Postal Code Validation (GTVZIPC) Enter the Zip code or postal code for an address immediately after entering the street address (in the Address fields). If the ZIP code or postal code has been defined on the ZIP/Postal Code Validation page (GTVZIPC), the system will then automatically enter all associated address information (city, state or province, county, and nation) specified on that page. You can change the address

Fields	Descriptions
	information if necessary. If an address was entered for the person on the Quick Hire page (PEAHIRE), the ZIP code or postal code portion of the address in SPAIDEN comes from the **ZIP or Postal Code** field of PEAHIRE. The code can be changed on SPAIDEN.
County	Enter manually or select the name of the county associated with the address from the pull-down list. List County Code Validation (STVCNTY) If you entered a ZIP code or postal code immediately after entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the associated county (if any) specified on GTVZIPC is automatically displayed. You can change the county if necessary. If an address was entered for the person on the Quick Hire page (PEAHIRE), the county portion of the address (if any) in SPAIDEN comes from the **County** field of PEAHIRE. The code can be changed on SPAIDEN.
Nation	Enter the Nation code or select the nation code from the pull-down list. This field is required if the **State or Province** code field is *not* complete. List Nation Code Validation (STVNATN) You do not have to enter a nation code if the address is within the borders of your institution's country. If you entered a ZIP code or postal code immediately after entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the nation (if any) specified on GTVZIPC is automatically displayed. You can change the nation if necessary.

Fields	Descriptions
	If an address was entered for the person on the Quick Hire page (PEAHIRE), the nation portion of the address (if any) in SPAIDEN comes from the **Nation** field of PEAHIRE. The code can be changed on SPAIDEN.
Telephone Type	Select the type of telephone number entered for the person or non-person from the pull-down list. For example indicate if the telephone type is home or business. List Telephone Type Validation page (STVTELE) The default telephone type is the address type. It can be changed.
Country Code	Code that designates the region and country of the telephone number.
Area Code	Area Code This field maintains the area code of the phone number associated with address of person.
Phone Number	This field maintains the phone number associated with address of person.
Extension	This field maintains the extension of the phone number associated with address of person.
Inactivate Address	Indicates whether the address is currently inactive or not. Choices include: • Checked = The address is currently inactive. • Unchecked (default) = The address is currently active.
Source	Select the source of the address from the pull-down list, as an indication of how or from where your institution received the address information. List Address Source Code Validation (STVASRC) The system displays a description of the selected source.
Delivery Point	Delivery point information that can be used for bar coding.

Fields	Descriptions
Correction Digit	Correction digit information that can be used for bar coding.
Carrier Route	Carrier route information that can be used for bar coding.

Telephone window

Updated: August 27, 2020

This window displays information from the main section of SPATELE. You can view and update telephone records in this window.

Fields	Descriptions
Telephone Type	Enter manually or select the type of phone number being entered from a list of values. For example, Business Phone. List Telephone Type Validation page (STVTELE) The system displays a description of the selected code.
Country Code	Code that designates the region and country of the telephone number.
Area Code	Telephone number area code.
Phone Number	Telephone Number
Extension	Telephone Extension Number
International Access	Free-format international access code for an international telephone number by including the country and city code.
Primary	Indicate whether the telephone number is the primary telephone number for this address type. Only one entry per address type can be primary. When a telephone number is identified as a primary number on this page, it is displayed as the primary number on the Identification page (SPAIDEN) as long as the Address Type, Sequence Number, and the Telephone Type are the same on both pages. Choices are:

Fields	Descriptions
	• Checked = This is the primary telephone record for this address type, sequence number, and phone type. • Unchecked (default) This is not a primary phone number.
Unlisted	Indicate whether the phone number is unlisted. Choices are: • Checked = This telephone number is unlisted. • Unchecked (default) = This telephone number is *not* unlisted.
Inactivate	Indicate whether the telephone number is inactive. Choices are: • Checked = This telephone number is inactive. If a number is marked inactive, the system automatically removes the primary phone number indicator. • Unchecked (default) = This telephone number is active
International Access	Free-format international access code for an international telephone number by including the country and city code.
Comment	Comments relating to the telephone record.
Address Type	Enter or select the type of address to which this telephone record is attached from a list of values. List Address Summary page (SOADDRQ) The system displays a description of the selected code.
Sequence	Enter or select the address sequence number to which this address type is attached. List Address Summary page (SOADDRQ) The system displays a description of the selected code.

Biographical window

Updated: August 27, 2020

This window displays information from the main section of SPAPERS. You can view and update person records in this window.

Biographical Information section

Updated: July 20, 2023

Use this section to describe person/non-person biographical information.

Fields	Descriptions
Legal Sex	Indicates the legal sex of the person or non-person. You must complete this field to hire a person. The choices in the drop down list are: Male, Female, and Not Available. Not Available is the default and indicates that information on the person's legal sex is unavailable, unknown, or not reported for any reason. If a Quick Hire page (PEAHIRE) exists for the person, the legal sex in SPAIDEN comes from the **Gender** field of PEAHIRE. You can change this code on SPAIDEN. You can add more values to the drop down list on the Legal Sex Code Validation (GTVLGSX) page.
Gender Designation	Indicates the gender identity of the person.
Personal Pronoun	Indicates the pronoun that the person prefers when addressed by others.
Birth Date	Person's date of birth. The date of birth must be earlier than the system date (that is, today's date). You must complete this field to hire a person. If a Quick Hire page (PEAHIRE) was completed for the person, the date (if any) in SPAIDEN comes from the **Birthdate** field of PEAHIRE. You can change this code on SPAIDEN.
Age	Person's current age.

Fields	Descriptions
	Banner Student calculates this value based on the date entered in the **Birth Date** field. If a Quick Hire page (PEAHIRE) was completed for the person, the age in SPAIDEN comes from the **Age** field of PEAHIRE. You cannot change this value.
SSN/SIN/TIN	Person or non-person Social Security Number (SSN) if employed in the USA, Social Insurance Number (SIN) if employed in Canada, or Tax Filing Number (TFN) as applicable. If you set the **Nation** field on the Installation Rules (GUAINST) page to a value with an ISO code of CA, CAN, or 124 and you enter a SIN value that is not valid, the system issues an error or warning message. The system response depends on the **SIN Validation** field setting on GUAINST. Required field. The default value of this field is the ID. You can change this value. If the person was created on the Quick Hire (PEAHIRE) page, the number in SPAIDEN comes from the PEAHIRE **SSN/SFN/TFN** field. You can change the number on SPAIDEN.
Confidential	Indicates whether information about this person should remain confidential. Choices are: • Checked = Information about this person will be labeled as confidential. • Unchecked (default) = Information about this person will *not* be labeled as confidential.
Deceased	Indicates whether the person is deceased. Choices are: • Checked = Indicates that the person is deceased. • Unchecked (default) = Indicates that the person is not deceased.

Fields	Descriptions
Deceased Date	Date the person died. Required if the **Deceased** option is selected.
Citizenship	Indicates whether the person is a U.S. citizen. You must complete this field to hire the person. List Citizen Type Code Validation page (STVCITZ) The system displays a description of the selected code. If a Quick Hire page (PEAHIRE) was completed for the person, the citizenship data in SPAIDEN comes from the **Citizenship** field of PEAHIRE. You can change this field on SPAIDEN.
Marital Status	Enter or select the person's current marital status from a list of values. List Marital Status Validation page (STVMRTL) The system displays a description of the selected code.
Religion	Enter or select the person's religion from a list of values. Optional. List Religion Code Validation page (STVRELG) The system displays a description of the selected code.
Legacy	Enter or select one of the person's relatives who attended your institution from a list of values. List Legacy Code Validation page (STVLGCY) The system displays a description of the selected code.
Ethnicity	Enter or select the person's ethnic background from the list of values. List Ethnic Code Validation page (STVETHN) The system displays a description of the selected code.

Fields	Descriptions
	If a Quick Hire page (PEAHIRE) was completed for the person, the ethnicity data in SPAIDEN comes from the **Ethnicity** field of PEAHIRE. You can change this code on SPAIDEN.
New Ethnicity	Select the new ethnicity category from the following choices: • Not Hispanic or Latino • Hispanic or Latino • None (default)
Ethnicity and Race Confirmed	Select this option to indicate that the data has been confirmed by the concerned individual.
Confirmed Date	System date as the date of confirmation by default.
Veteran File Number	Veteran identification number associated with the person. This information is used in compiling data for the U.S. Veterans for various agencies.
Veteran Category	Indicates whether the person served in the armed forces and, if so, specifies the category in which to count them for the U.S. • None = Not a veteran • Not a Protected Veteran = V • Protected Veteran = B • Active Wartime or Campaign Badge Veteran = O
Armed Forces Services Medal Indicator	Indicates whether the person received a service medal in the armed forces.
Date of discharge	Date on which the individual separated or was discharged from active military duty. This date is used to determine veterans that are classified as for

Fields	Descriptions
	U.S. Veterans reporting primarily to account for veterans that have been recently hired.
Disabled Veteran	Indicates whether the person is a disabled veteran. This information is used in compiling data for the U.S. Veterans Report. • Checked = The person is a disabled veteran. • Unchecked (default) = The person is not a disabled veteran.

Race section

Updated: August 27, 2020

Use this section to enter and maintain race data for race/ethnicity processing.

Field	Description
Race Code	Code and description of the race code associated with the record. Values come from the Race Rules (GORRACE) page

Email window

Updated: August 27, 2020

This window displays information from the main section of GOAEMAL. You can view and update email records in this window.

Access this window from the E-mail section on the Identification page (SPAIDEN).

Fields of this window are identical to the fields of the E-mail Address page (GOAEMAL). For a detailed field description, refer to the *Banner General Use* content.

Emergency Contact window

Updated: March 16, 2023

This window displays information from the main section of SPAEMRG. You can view and update emergency contact records in this window.

Multiple emergency contact records can be listed by priority.

Use the Emergency Contact Information section to specify the names and addresses of people who can be contacted if the person you are identifying is involved in an emergency situation.

Fields	Descriptions
Priority	Number used to determine the order in which multiple emergency contacts are to be called. The contact with a priority of 1 will be called first.
Relationship	Emergency contact's relationship to the person being identified from a list of values. For example, indicate if the contact is the father or brother of the person. List Relationship Validation page (STVRELT) The system displays a short description of the selected code.
Last Name Prefix	Prefix that precedes a last name (for example, "Von" in the last name "Von Hintz").
Last Name	Last name of a person's emergency contact.
First Name	First name of a person's emergency contact.
Middle Initial	Middle initial of an emergency contact.
Relationship	Emergency contact's relationship to the person being identified from a list of values. For example, indicate if the contact is the father or brother of the person. List Relationship Validation page (STVRELT) The system displays a short description of the selected code.
Address Type	Select the address type of the emergency contact's address, from a list of values. For example, specify if the address type is that of a

Fields	Descriptions
	home or business. List Address Type Code Validation page (STVATYP) The default address is the address of this type (if any) entered on the **Address Information** window. If a contact's address matches an address entered on the **Address Information** window for the person being identified, you can access the Address Summary page (SOADDRQ), execute a search, and select the address from those listed on the page. (See below.) To choose an existing address, select Addresses (SOADDRQ) from the Option List, and select one of the listed addresses. The addresses are listed on the Address Summary page (SOADDRQ).
House Number	Unique number assigned to the building on a street or in an area and used as part of the postal address.
Address	Street address portion of the emergency contact's address. The first line of the street address is required. The other lines are optional. Enter the ZIP code or postal code for an address immediately after entering the street address (in the Address fields). If the ZIP code or postal code has been defined on the ZIP/Postal Code Validation page (GTVZIPC), the system will then automatically enter all associated address information (i.e., the fields, **City**, **State or Province**, **County**, and **Nation**) specified on that page. You can change the address information if necessary.
City	City portion of the emergency contact's address. If you entered a ZIP code or postal code immediately after entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the associated city (if any) specified on GTVZIPC is automatically displayed. You can change the city if necessary.

Fields	Descriptions
State or Province	State or province portion of the emergency contact's address. List State/Province Code Validation page (STVSTAT) The system displays a short description of the selected code. If you entered a ZIP code or postal code immediately after entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the associated state or province (if any) specified on GTVZIPC is automatically displayed. You can change the state or province if necessary.
ZIP or Postal Code	ZIP code or postal code portion of the emergency contact's address. List ZIP/Postal Code Validation page (GTVZIPC) The system displays a short description of the selected code. Enter the ZIP code or postal code for an address immediately after entering the street address (in the Address fields). If the ZIP code or postal code has been defined on the ZIP/Postal Code Validation page (GTVZIPC), the system will then automatically enter all associated address information (city, state or province, and nation) specified on that page. You can change the address information if necessary.
Nation	Nation portion of the emergency contact's address. This field is required if the **State or Province** code field is not complete. List Nation Code Validation page (STVNATN) The system displays a short description of the selected code. You do not have to enter a nation code if the address is within the borders of your institution's country.

Fields	Descriptions
	If you entered a ZIP code or postal code immediately after entering a street address, and the ZIP code or postal code was defined on the ZIP/Postal Code Validation page (GTVZIPC), the associated nation (if any) specified on GTVZIPC is automatically displayed. You can change the nation if necessary.
Country Code	Code that designates the region and country of the telephone number.
Area Code	Area code of phone number associated with emergency address.
Phone number	Phone number associated with emergency address.
Extension	Extension of phone number associated with emergency address.
E-mail Address	Email address of the emergency contact.

Additional Identification window

Updated: August 27, 2020

Use this window to enter Additional Identification details.

Field	Description
ID Type	Additional Identification Type Code.
Description	Description for the Additional Identification Type Code.
Additional Identification	Additional Identification Code

General Person (SPAPERS) page

Updated: August 27, 2020

After a person is established on the database, the General Person (SPAPERS) page is used to enter and maintain biographic information about a person. Types of data captured include gender, date of birth, marital status, legacy information, and whether or not the person is deceased.

SPAPERS shares personnel data with the H/R Identification (PPAIDEN) page with the exception of veteran disability, and driver's license number information. These items are not available on forms within the Student System.

Main window

Updated: August 27, 2020

The main window contains the key block, the Biographical Information section, and the Race section.

Key block

Updated: August 27, 2020

Use this block to enter the ID of the person.

Biographical Information section

Updated: July 20, 2023

Information on the biographical section.

Fields	Descriptions
Legal Sex	Indicates the legal sex of the person. Select the choices from the drop down list. Choices are: • Male • Female • Not Available is the default and indicates that information on the person's legal sex is unknown. You can add more values to the drop down list on the Legal Sex Code Validation (GTVLGSX) page.
Gender Designation	The Gender identity of the person.
Personal Pronoun	Personal pronoun of the person.
Birth Date	ID's birthdate. You may not enter a future birth date, i.e., one which is greater than the system date.

Fields	Descriptions
Age	ID's age. Calculated by the system based on the Date of Birth. The age is not stored in the database, but is calculated each time the page is called.
SSN/SIN/TIN	ID's Social Security Number, Social Insurance Number (Canada), or Tax Identification Number (non-person) as applicable. Institutions in other countries can use this field to store an identifier such as a TFN (Tax Form Number) for Australia. This field has a maximum of 15 digits. The autohint for this field and the length allowed changes based on the setting selected on GUAINST. The SSN/SIN/TIN is used by some reports and processes, instead of the ID, such as tax documents (W-20, T2202A, etc.). Data loads can match against either the ID or the SSN/SIN/TIN.
Confidential	Confidential Indicator. To indicate that information about this person should remain confidential, select the check box. If the box is selected, then the message `Confidential` displays on any forms with the ID in the key block. The **Confidential (Indicator)** does not control any other system processing.
Deceased	Select if the ID is deceased. Online processing is not prevented for deceased IDs; however, the message `Deceased` displays on any forms with the ID in the key block. You may request and run a transcript for a student who is deceased. However, the Grade Mailer Report (SHRGRDE) and associated processing are prohibited for a deceased person.
Deceased Date	Date of death if deceased. If you enter the deceased date, then the system automatically selects the **Deceased** check box.
Citizenship	ID's citizenship. List Citizen Type Validation list
Marital Status	ID's marital status.

Fields	Descriptions
	List Marital Status Validation List
Religion	ID's religion. List Religion Code Validation list
Legacy	ID's relationship to alumni of the institution. List Legacy Code Validation list
Ethnicity	ID's ethnic background. This is critical for IPEDs and additional reports. List Ethnic Code Validation list
New Ethnicity	Pulldown list used to select the new ethnicity for the person. Values are: • Hispanic or Latino • Not Hispanic or Latino • None (default)
Ethnicity and Race Confirmed	Check box that indicates whether the person's race and ethnicity have been confirmed.
Confirmed Date	Date on which the person's race and ethnicity were confirmed.
Veteran File Number	ID's Vietnam file number.
Veteran Classification	Indicates whether the ID is associated with one of the categories in the pulldown list, and therefore may be eligible for Veteran-related programs, if applicable. This field is also used in Banner Human Resources reporting. The values for the pulldown list are separated by category and employees included in that category. Choices are:

Fields	Descriptions
	• `Not a Veteran` • `Protected veteran` (choosing not to self-identify the classification) • `Not a Protected Veteran` • `Active Wartime or Campaign Badge Veteran`
Date of Discharge	This is the date the person was separated from active duty. Enter in DD-MON-YYYY format.
Armed Forces Service Medal Indicator	Check box that indicates whether the veteran was awarded a medal for service in the armed forces.
Disabled Veteran	Check box that indicates whether the veteran has a special disabled veteran status.
User	This is the ID of the user who created or updated the record.
Activity Date	This is the date the record was created or updated.

Race section

Updated: August 27, 2020

This section is used to enter and maintain race data for race/ethnicity processing.

Fields	Descriptions
Race Code	Code and description of the race code associated with the record. List Race Rules (GORRACE) page
User	ID of the user to create or update the record.
Activity Date	Date the record was created or updated

General Person Telephone (SPATELE) page

Updated: August 27, 2020

The purpose of the General Person Telephone Page is to allow the user to create an unlimited number of telephone numbers associated with a person.

These telephone numbers may be associated with an address type and sequence number. Telephone numbers consist of an international country code (if applicable), an area code, the phone number, and an extension, if needed.

Note: A phone number must be flagged as primary, with the **Primary (Indicator)** selected (set to Y), before it is displayed along with the address information.

Additional ID Search (SPIADID) page

Updated: March 18, 2021

The SPIADID page allows institutions to find the Banner ID of a person using any additional IDs stored in the GORADID table.

Note: The SPIADID page does not allow you to create a new Banner ID. Information about the person must exist in Banner before it can appear in this page.

If you know the additional ID (an ID that exists for a person apart from the Banner ID), use this page to search the person record. You can also use the search feature to find the associated Banner person record.

Field	Description
ID Type	Additional ID Type defined in the GTVADID page.
Additional ID	Additional IDs, apart from Banner generated ID.
ID	Banner ID.
Last Name	Last name of the person with the displayed Banner ID.
First Name	First name of the person with the displayed Banner ID.
Middle Name	Middle name of the person with the displayed Banner ID.
Birth Date	Birth date of the person with the displayed Banner ID.

Note: You can also directly access the SPIADID page from the SAAADMS, SPAIDEN, SAAQUIK, SAADCRV, and SAAQUAN pages.

Electronic Prospects Default Options (SRAPRED) page

Updated: August 27, 2020

Use this page to enter the default recruit values for Web-entered data. This page is also used in the data load process.

You can designate default values that can be used to populate the recruiting record (SRBRECR) or applicant record (SARADAP) when a record is created by the Migrate Electronic Prospects Process (SRRPREL) or by using the Create Recruit/Applicant item in the Options Menu on the Electronic Prospect Inquiry (SRIPREL) page.

Enter a code from the Electronic Prospect Validation (STVPREL) page in the **Electronic Prospect Code** field in the key, and use Go button to see the default values for the prospect code. The prospect codes on STVPREL must have the **Enter on WEB** check box selected to be displayed in the list of values for the **Electronic Prospect Code** field on SRAPRED.

The **Clear Defaults** button is used to remove the existing values so new ones can be entered for the code in the key block.

This page is optional for use in Web for Prospects processing. The **Level**, **Recruiting Term**, **Degree**, and **Major** are required in the Recruiting module. If those values are not entered here, and this data is not entered on the Web, the Banner® system required values will default into the recruiting records. If you do enter data on this page, the **Level (Code)** is required.

SRTLOAD uses the default values on SRAPRED if the corresponding parameter on SRTLOAD is blank. If the corresponding parameter on SRTLOAD is blank, SRTLOAD will use the data that exists on the incoming file for such fields as Term, Major, etc. (incorporating the use of SOTCNVT or the validation table if it is a straight conversion). If no value exists on the file, then SRTLOAD will use the data in the parameter. If no value exists in the parameter, SRTLOAD will use the value on SRAPRED. Certain fields (i.e., Tape Source, SBGI Source Code, etc.) will be populated from STVINFC if no value exists on SRAPRED.

SRAPRED rules will create an application when no recruiting record is created, based on the appropriate rule settings on SAAERUL. Fields that are required for applications (such as student type for AMCAS or other files that do not include this value in any way) need to be set up on SRAPRED for the level code for which SRTLOAD is run so that the application student type and other necessary fields are updated. Providing defaults for the application will create a value, as opposed to a null or 00000, for the program or college, etc., on the application.

When data loaded to the temporary tables by SRTLOAD, the following checks are made: a direct match to a validation table is checked, then SOTCNVT is checked for crosswalk/ conversion data, then the parameter values on SRTLOAD are checked, (in addition to the existence of a contact or source on STVINFC), and finally SRAPRED is checked. SRAPRED is the only place that provides data for student type, program, or college code for the applicant.

SRAPRED values for AMCAS *must* be used for loading various AMCAS application data because this information is not supplied on the incoming AMCAS file. Values such as student type (which is required for an application), college code, and program will only be added to an application when they have been added to SRAPRED for the level for which you are running SRTLOAD. Recruiting records may be generated, but institutions may choose to not load recruiting records and to only load applications (based on the appropriate SAAERUL rules). A specific rule for the electronic prospect code AMCS may be added to SRAPRED with minimal values updated for the level type, student type, college code, and program, if applicable.

Electronic Prospect Detail (SRAPREL) page

Updated: August 27, 2020

Use this page to view biographical and search or test score data for a person that has been loaded to the temporary tables.

The page allows you to view all search data load records for this ID which are present in the Search Tape View (SRVPREL). This page is accessed independently or from the Electronic Prospect Inquiry (SRIPREL) page using the Detail item in the Options Menu.

Main window

Updated: August 27, 2020

Use this window to enter a prospect ID and electronic prospect code, and then view detailed information for the prospect.

Key block

Updated: August 27, 2020

Use this block to enter the ID, prospect code, and data load ID for the prospect.

Electronic Prospect Detail section

Updated: August 27, 2020

Use this section to view personal and recruiting details about a prospect. This data comes from the SRTPERS table. Use the Electronic Prospect Detail section or the Electronic Prospect Detail item in the Options Menu to access this section from the secondary windows.

Curriculum, Type, Contact, Source and High School window

Updated: August 27, 2020

Use this window to view curriculum and student type data in addition to contact, source, and high school information for the prospect. Use the Curriculum, Type, Contact, Source and High School section or the Curriculum, Type, Contact, Source and High School item in the Options Menu to access this window.

Curriculum and Student Type section

Updated: August 27, 2020

Use this section to view the prospect's curriculum information and student type.

Fields	Descriptions
Student Type	Student type code for the electronic prospect. This code is used for PCU data load processing for student types of O (Other) based on the rule set up on SOTCNVT.

Contact and Source section

Updated: August 27, 2020

Use this section to view contact and source information for the prospect.

High School Information section

Updated: August 27, 2020

Use this section to view the prospect's high school and graduation date.

Test Scores and Percentiles window

Updated: August 27, 2020

Use this window to view test score and percentile information for the prospect. This data comes from the SRRTEST and SRTTSPC tables. Use the Test Scores/Interests item in the Options Menu or the Test Scores and Percentiles section to access this window.

Test Score section

Updated: August 27, 2020

Use this section to view test score information for the prospect such as score, recentering, page, and accommodation. Use the Test Scores and Percentiles item in the Options Menu to access this section.

Percentile section

Updated: August 27, 2020

Use this section to view percentile and percentile type information for the prospect and to track percentile types associated with a test score.

Fields	Descriptions
(test type) taken on (*date*) with administrative type	Displays test record information for test type, date taken, test location/test score administration type code (STVTADM) for the test records in the Test Score section.
Percentile Date	The percentile effective date for tests where the percentile is subject to recalculation, such as the MCAT.

Materials, Interests, Learned window

Updated: August 27, 2020

Use this window to view prospect materials, interests, and how the prospect learned about the school. Use the Materials, Interests, Learned section to access this window.

Materials section

Updated: August 27, 2020

This section is used to complement the collection of that data for prospects in the Web for Prospects module of Student Self-Service.

This window is used to list the materials requested by the student. The SRTMATL table is used to store the materials collected on the Web. Use the Requested Materials and Interests item in the Options Menu to access this section.

The SRKPREL package is used to migrate SRTMATL data to GURMAIL in Banner® production. The materials will not be migrated to GURMAIL if they fail the duplicate checking rules. A material is a duplicate if an existing GURMAIL row exists for the same material and has a blank print date, or the GURMAIL row exists for the same material with a non-blank print date, but the Allow Duplicate Entry rule on SOAMATL is not selected.

Use the rule on the Electronic Admissions Application Rules (SAAERUL) page where the **Group (Code)** is PREL and the **Label** is CREATEMATERIALS.

Interests section

Updated: August 27, 2020

Use this section to view interest information for the prospect.

Learned section

Updated: August 27, 2020

Use this section to view information for the prospect as to how the person learned about the school.

Fields	Descriptions
Code	The **(Learned About Institution) Code** in the (How I) Learned section is used by Web

Fields	Descriptions
	for Prospects to capture how the person learned about the school. The data is initially stored in Web for Prospects and is viewable from SRAPREL. After the prospect has been migrated to Banner Production, the data is available on SRARECR. The How I Learned data is migrated to the recruit record based on the rule value CREATELEARNED, which is stored on SAAERUL under the group PREL. If the CREATELEARNED rule is Y, the prospect How I Learned data is migrated to the recruit How I Learned data. The **(Learned About Institution) Code** is validated on the Web Prospect How I Learned About Validation (STVLEND) page.

Prior Colleges window

Updated: August 27, 2020

Use this window to view prospect information for prior colleges, degrees, and majors. This data comes from the SRTPCOL, SRTDEGR, and SRTMAJR tables. Use the Prior Colleges section to access this window.

Prior College section

Updated: August 27, 2020

Use this section to view prior college information for the prospect. Use the Prior Colleges item in the Options Menu to access this section.

Fields	Descriptions
Graduation Date	College graduation date from SRTPCOL. This allows users to see the correct date of graduation, which may be different than the degree date from SRTDEGC.

Degree Program section

Updated: August 27, 2020

Use this section to view prior degree/program information for the prospect.

Majors section

Updated: August 27, 2020

Use this section to view a list of majors for the prospect.

GPA and Course Summary window

Updated: August 27, 2020

Use this window to view data for high school GPA and course summary information for the prospect. This data comes from the SRTCRSS and SRTGPAT tables. Use the GPA and Course Summary section to access this window.

GPA section

Updated: August 27, 2020

Use this section to view GPA information for the prospect. Use the GPA and Course Summary item in the Options Menu to access this section.

Course Summary section

Updated: August 27, 2020

Use this section to view course summary information for the prospect.

Supplemental Data window

Updated: August 27, 2020

Use this window to view data for admissions, birth, ethnicity, institution, years applied, and applications for the prospect.

This data can be used for AMCAS processing, future data load processing needs, or customized data files used by your institution. This data comes from SRTSUPL. Use the Supplemental Data section or the Supplemental Data item in the Options Menu to access this window.

Fields	Descriptions
Misdemeanor	Value of flag 6 from SRTSUPL, which indicates if the prospect has a misdemeanor record.
Military Discharge	Value of flag 7 from SRTSUPL, which indicates if the prospect has been discharged from the military.
Military Honorable Discharge	Value of flag 8 from SRTSUPL, which indicates if the prospect has been honorably discharged from the military.

Ethnicity and Race window

Updated: August 27, 2020

Use this window to view ethnic and race data that is used with AMCAS processing. Use the Ethnicity and Race section or the Ethnicity and Race item in the Options Menu to access this window.

Biographical Ethnicity and Race section

Updated: August 27, 2020

This section is used to query and view ethnicity and race information that exists in the SRTPERS and SRTPRAC temporary tables. The **Race Code** field displays values that are loaded to SRTPRAC and then ultimately to GORPRAC.

AMCAS records will display the same data for race in this section (in SRTPRAC) that is displayed in the Supplemental Ethnicity and Race section (in SRTSUPL). Data for non-AMCAS records is displayed only in the in the Biographical Ethnicity and Race section.

Fields	Descriptions
Ethnicity	Ethnicity of the electronic prospect.
New Ethnicity	Pulldown list used to select the new ethnicity for the person. Values are: • Hispanic or Latino

Fields	Descriptions
	• Not Hispanic or Latino • None (default)
Race Code	Code and description of the race code associated with the record.

Supplemental Ethnicity and Race section

Updated: August 27, 2020

This section displays the **Ethnic** and **Race** field values that are loaded to SRTSUPL and then ultimately to SABSUPL.

AMCAS records display the same data in this section (in SRTSUPL) that is displayed in the Biographical Ethnicity and Race section (in SRTPRAC). Data for non-AMCAS records is not displayed in this section.

Quick Recruit (SRAQUIK) page

Updated: August 27, 2020

The Quick Recruit (SRAQUIK) page is designed to allow entry of new prospective students.

To enter a new ID or generate a new ID number when Common Matching is turned off globally or for a specific user ID, you may do one of the following:

1. Select **Generate ID** from the Options Menu, or enter `GENERATED` in the **ID** field to open the Current Identification window.
2. Perform a Count Query Hits function from the **ID** field to open the Current Identification window.
3. Enter a new ID number in the **ID** field manually, and press Enter to open the Current Identification window.
4. Select IDs, Names and Addresses from the Options Menu to access the General Person Identification (SPAIDEN) page.

When Common Matching `is` turned on, you will not use the Current Identification window. Instead, you will be taken to the Common Matching Entry (GOAMTCH) page to perform the matching process for the new ID when you enter `GENERATED` in the **ID** field, select the **Generate ID** button, or enter an ID in the **ID** field that does not exist in Banner®. You can also access GOAMTCH using the Common Matching (GOAMTCH) item in the Options Menu to enter information for a new ID and then execute the matching process before a new PIDM is created in Banner.

This page allows you to enter home address, high school, prior college, and all necessary recruiting information. You may not enter a future birth date, i.e., one which is greater than the system date, in the **Birth Date** field.

While multiple records may exist for a prospect for a term, SRAQUIK only displays information for a single term record at a time.

Because of the complex curriculum validation and communication plan processing that occurs when records are saved on this page, the creation of multiple records prompts you to save any changes. If you have made unsaved changes to one record, and try to access a different record, the box

```
Do you want to save the changes you have made? You must save your changes to
proceed to the next record. Yes or No
```

is displayed. If you choose Yes, the changes for the record you are working on will be saved, and the necessary validation and communication plan processing will occur. If you answer No, the above message displays until you either choose to save or leave the page.

In other words, you will not be permitted to create a new record without saving changes to the one you are currently working on. This eliminates confusion over the record for which curriculum checking and communication plan processing are occurring.

Use the Quick Recruit section to access the main window from secondary windows on the page.

Fields	Descriptions
Enter Address	Check this box to quickly access the Addresses window. The check box will only be active when address data exists for the ID.
Enter Biographical	Check this box to quickly access the Biographical window. The check box will only be active when biographical data

Fields	Descriptions
	exists for the ID.
Sequence Number	The **Sequence Number** field displays the system-assigned recruiting record sequence number for each record. You can scroll through the records.
Student Type	**Student Type** allows the user to assign this admissions required value during the recruiting cycle.
Recruit Type	The **Recruit Type** may be defined at the recruit level and may follow the prospect forward to the Admissions and General Student modules. The code itself is defined as up to two characters on the supporting Recruit Type Validation (STVRTYP) page. An example of a recruit type may be Senior in High School, Junior in High School, Sophomore in High School, Academic Excellence Prospect, etc.
Applied	The **Applied** field in the Prospect Information section is an option group with the following choices for matching a recruiting record to an application or a general student record. • Level = Indicates that only the level and term match on an application. (Y in the database) • All = Indicates that the degree, level, major, and term match. (E in the database) • None = Indicates that the application or general student record does not exist for same term, level, major, and degree. (N in the database)
Accepted	The **Accepted** field in the Prospect

Fields	Descriptions
	Information section is an option group with the following choices for matching a recruiting record or an application to a general student record. • Level = Indicates that only the level and term match. (Y in the database) • All= Indicates that the degree, level, major, and term match. (E in the database) • None = Indicates that the application or general student record does not exist for same term, level, major, and degree. (N in the database)
Registered	The **Registered** field displays as selected (Y) or cleared (N) to indicate whether the recruit is registered for classes. When selected, an SFBETRM record exists for the recruit.

You can also track information on SRAQUIK about the administrators assigned to each recruit. The definition of an administrator is determined by the institution and is defined on the Administrative Role Code Validation (STVRADM) page. Examples of possible administrator codes are: alumni recruiter, student recruiter, etc.

Note: If a recruiting level is not defined during the Electronic Prospect Load Process (SRTLOAD), the default value of level 00 will be assigned to each of the added recruiting records. If you choose to use this default level value and intend to use communication plan processing, you need to create communication plan rules for the 00 level on the Communication Plan Rules (SOACOMM) page. Otherwise, your newly created recruits will not be assigned to a communication plan. It is also important to note that the default level value of 00 is also used when initially creating recruiting records on the Recruit Prospect Information (SRARECR) page and the Quick Recruit (SRAQUIK) page.

Current Identification window

Updated: August 27, 2020

Use this window to enter the name information for either a new ID entered by a user or a system-generated ID. This window is accessed from the key block using the Generate ID item in the Options Menu or the **Generate ID** button.

When the window is displayed, allowing you to enter a name for the new recruit, the message will indicate that the `Person is being associated with Displayed ID`. A message is displayed at the bottom of this window indicating that `Generated ID Being Used for Addition of New Person`.

When Common Matching is turned on globally or for a specific user ID, you will not use the Current Identification window. Instead, you will be taken to the Common Matching Entry (GOAMTCH) page to perform the matching process for the new ID. GOAMTCH will be displayed if the user does not have the **Exclude User** check box selected on GORCMUS. If **Exclude User** is selected, then the Current Identification window will be used to create the new person.

Curriculum section

Updated: August 27, 2020

Use this section to enter curriculum information for the recruit. This section contains the key fields required to create a curriculum record and allows you to enter or delete curriculum data quickly. This section is a mini-version of the Curriculum section in the Curriculum window on SRARECR.

Data entered in this section updates the SORLCUR and SORLFOS tables. You can use the Options Menu to access SOILCUR and view curriculum information for all modules.

The following fields are in this section.

Fields	Descriptions
Record of	This field displays the number of curriculum records that exist for the ID based on the data entered in the key block, for example **Record 1 of 5**. You can scroll through the records. As you scroll through the records, the data in the Curriculum and

Fields	Descriptions
	Field of Study sections changes for each record.
Term	This is the term code for the module's curriculum record. List Term Code Validation (STVTERM)

Field of Study section

Updated: August 27, 2020

Use this section to enter field of study information for the recruit.

This section contains the key fields required to create a curriculum record and allows you to enter or delete curriculum data quickly. This section is a mini-version of the Field of Study section in the Curriculum window on SRARECR.

Data entered in this section updates the SORLCUR and SORLFOS tables. You can use the Options Menu to access SOILCUR and view curriculum information for all modules.

The following fields are in this section.

Fields	Descriptions
Priority	This is the priority number that defines the field of study rank.
Type	This is the type code for the learner field of study. It identifies whether the row is for a major, minor, or concentration. List Learner Field of Study Types (GTVLFST)
Status	This is the curriculum status for the field of study. List Curriculum Status (STVCSTS)
Field of Study	This is the major, minor, or concentration code for the field of study. List All Major, Minor, or Concentration Codes Help Attached Majors, Minors, or Concentrations
Attached to Major	This is the code for the attached major for the field of study. This field indicates to which major a concentration is attached, if appropriate. This field is only enabled if the field of study type is CONCENTRATION. List All Major Codes Help Attached Majors Edit Curriculum Rules (SOACURR)
Department	This is the department code for the field of study.

Communication Plan Change window

Updated: August 27, 2020

When items such as campus, level, college, or degree are entered or changed for a recruit, this may affect their communication plan, depending on the rules for the institution set up on the Communication Rules (SOACOMM) page.

When this is the case, the Communication Plan Change window will display, and you can make changes to the communication plan. The window also displays when a new recruit is added to SRAQUIK, or you may also access the window through the Options Menu.

All changes must be saved before exiting the Communication Plan Change window.

Note: To exit from the window, you must make some change to the record (such as remove a plan and Save, change a plan and Save) or simply save the existing/assigned plans. Use the **Return** button to return to the main window of the page.

Fields

Updated: August 27, 2020

The window contains the fields listed in the table below.

Fields	Descriptions
Communication Plan	The communication plan code. List Communication Plan Validation (STVCPLN)
Description	Description of the plan code.
Recruit, Applicant, Learner	Option group which displays the module the plan exists in: Recruit, Applicant, or Learner.
Term	The recruit term or the admissions term for the plan.

Fields	Descriptions
	If the plan is in Recruiting (option group is set to Recruit), the List function accesses the Prospect Summary (SRASUMI) page. If the plan is in Admissions (option group is set to Applicant), the List function accesses the Admissions Application Summary (SAASUMI) page. If the plan is in General Student (option group is set to Learner), the List function accesses the General Student Summary (SGASTDQ) page. List Prospect Summary (SRASUMI) page List Admissions Application Summary (SAASUMI) page List General Student Summary (SGASTDQ) page
Sequence Number	The sequence number or the application number for the plan. If the plan is in Recruiting (option group is set to Recruit), the List function accesses the Prospect Summary (SRASUMI) page. If the plan is in Admissions (option group is set to Applicant), the List function accesses the Admissions Application Summary (SAASUMI) page. If the plan is in General Student (option group is set to Learner), the List function accesses the General Student Summary (SGASTDQ) page. List Prospect Summary (SRASUMI) page List Admissions Application Summary (SAASUMI) page List General Student Summary (SGASTDQ) page
Active Plan	Check box indicates when selected that the communication plan is active. Only active communication plans display in this window. You can inactivate a plan by clearing the **Active Plan** check box.

Fields	Descriptions
Pending Mail	Indicates whether mail exists for the plan. When the communication plan is first added, the field is blank, because the materials have not been created. This value cannot be changed. Choices are: Selected = Unsent mail exists for the communication plan. This value is stored in the database as Y. Cleared = No pending mail exists for the plan. This value is stored in the database as N.
Delete Mail	Indicate whether to delete mail for the communication plan. This field can be changed to Y (selected) if there is pending mail for the plan and the **Active Plan** check box has been cleared. This field cannot be changed when the **Active Plan** check box is selected because of processing that takes place when materials are created. Missing materials are created for all active communication plans. If you delete the mail on an active plan, the materials are recreated when you save the plan. If the **Active Plan** check box is selected, and the **Delete Mail** field is selected, the communication plan is deleted from the Communication Plan Assignment (SOAPLAN) page, along with any existing mail on the Student Mail (SUAMAIL) page. Choices are: • Selected = Delete communication plan mail. This value is stored in the database as Y. • Cleared = Do not delete communication plan mail. This value is stored in the database as N.

Options

Updated: August 27, 2020

The following navigation options are available on the Communication Plan Change window.

Option	Description
Student Mail	Use the Student Mail item in the Options Menu to access the Student Mail (SUAMAIL) page to update/view mail for the current ID in the key block of the application page.
Return	Use the **Return** button or the Return to (Applicant, Recruit, or Prospect) item in the Options Menu to go back to the **Term** field on the main window of the application page. If the plan was initiated when a record was removed, the process will continue. This option will not return you to the main window if there are pending changes in the window. All changes must be saved before returning.
Start Over	Use the Start Over function to clear the page and return to the key block. This function will not return you to the main window if there are pending changes in the window. All changes must be saved before returning. To access the Communication Plan Change window, all changes must have been saved on the application page, except in the case of the record being removed. If you do not make any changes in the Communication Plan Change window, you will not be prompted to save your changes.

Functions and Updatable Fields window

Updated: August 27, 2020

You may use Oracle functions to modify communication plan records.

Action	Description
Delete old plans	Use the Remove Record function. This will also automatically delete pending materials.
Insert new plan	Use the Insert Record function. You must enter the plan code and select the module. If the module is Recruiting or Admissions, you must also enter a term and sequence number.
Update plan	Change the active status and delete pending mail by changing the value of the **Active Plan** check box to selected or cleared and the **Pending Mail** check box to selected or cleared.
Next and Scroll Up	These functions are not allowed in the Communication Plan Change window. To navigate back to the main window of the application page, press the **Return** button**,** select the Return to (Applicant, Recruit, or Prospect) item in the Options Menu, or use the Duplicate Item function. All changes must be saved before exiting the Communication Plan Change window.

Assigned Administrators window

Updated: August 27, 2020

The Assigned Administrators window is accessed using the Administrator Assignments item in the Options Menu from the Recruit Data section of the main window.

This window allows you to view or update the administrator assigned to a specific recruit. The definition of an administrator is determined by the institution and is defined on the Administrative Role Code Validation (STVRADM) page. Examples of possible administrator codes are: alumni recruiter, student recruiter, etc.

To calculate or update the administrators assigned to this recruit, select the Assign Administrators item in the Options Menu. This will cause the Administrator Assignments Process (SORAINF) to run for this recruit. The process selects the appropriate records from the SOAADAS rules page that match the data for the PIDM in the key of the page, the term, and the module type (R for recruit on SRARECR or SRAQUIK).

Use the **Return** button or the Return to Recruit item in the Options Menu to return to the main window of SRAQUIK.

Addresses window

Updated: August 27, 2020

Use this window to enter address, mail delivery, and phone information for the recruit. This window is accessed using the Address Review item in the Options Menu, by selecting the **Enter Address** check box in the main window, or by selecting the Addresses section.

Addresses are displayed in the following order: all active or current addresses in address type order, followed by all inactive addresses ordered by address type, from date, to date, and status.

When the cursor is in the **Address Type**, the user may perform a Next Primary Key function to navigate directly to the **ZIP or Postal Code** field.

When a valid ZIP or postal code is selected from the ZIP/Postal Code Validation (GTVZIPC) page and entered in the **ZIP or Postal Code** field, the combination of City, State/Province, and Nation information which exists in GTVZIPC will default into the appropriate fields. The related information does not default in when the ZIP/Postal Code is entered manually.

Biographical window

Updated: August 27, 2020

This window displays information from the main section of SPAPERS. You can view and update person records in this window. This window is accessed by the Biographical section or the Biographical Information item in the Options Menu. Use the Bio/Demo Information [SPAPERS] item to access SPAPERS.

Biographical Information section

Updated: July 20, 2023

Information on the biographical section.

Fields	Descriptions
Legal Sex	Indicates the legal sex of the person or non-person. From the drop down list select `Male`, `Female`, or `Not Available` if the gender is unknown. You can add more values to the drop down list on the Legal Sex Code Validation (GTVLGSX) page.
Birth Date	ID's birth date. You may not enter a future birth date, that is, one which is greater than the system date.
Age	ID's age. Calculated by the system based on the Date of Birth. The age is not stored in the database, but is calculated each time the page is called.
SSN/SIN/TIN	ID's Social Security Number, Social Insurance Number (Canada), or Tax Identification Number (non-person) as applicable. Institutions in other countries can use this field to store any 9-digit identifier, such as a TFN (Tax Form Number) for Australia. The autohint for this field and the length allowed changes based on the setting selected on GUAINST. SSN/SIN/TIN is used by some reports and processes, instead of the ID, such as tax documents (W-20, T2202A, etc.). Data loads can match against either ID or SSN/SIN/TIN.
Confidential	Confidential Indicator. To indicate that information about this person should remain confidential, select the check box. If the box is selected, then the message `Confidential` displays on any forms with the ID in the key block. The **Confidential (Indicator)** does not control any other system processing.
Deceased	Select if the ID is deceased. Online processing is not prevented for deceased IDs; however, the message `Deceased` displays on any forms with the ID in the key block. You may request and run a transcript for a student who is deceased. However, the Grade Mailer Report (SHRGRDE) and associated processing are prohibited for a deceased person.
Deceased Date	Date of death if deceased. If you enter the deceased date, then the system automatically selects the **Deceased** check box.

Fields	Descriptions
Citizenship	Used to display the citizen type code of the recruit, i.e, citizen, non-citizen, native, etc. Valid values come from the Citizen Type Code Validation (STVCITZ) page. If this value is entered in SPAPERS, it will default into SRAQUIK. If this value is entered on SRAQUIK, it will default into SPAPERS. List Citizen Type Validation list
Marital Status	ID's marital status. List Marital Status Validation List
Religion	ID's religion. List Religion Code Validation list
Legacy	ID's relationship to alumni of the institution. List Legacy Code Validation list
Ethnicity	ID's ethnic background. This is critical for IPEDs and additional reports. List Ethnic Code Validation list
New Ethnicity	Pulldown list used to select the new ethnicity for the person. Values are: • Hispanic or Latino • Not Hispanic or Latino • None (default)
Ethnicity and Race Confirmed	Check box that indicates whether the person's race and ethnicity have been confirmed.
Confirmed Date	Date on which the person's race and ethnicity were confirmed.
Veteran File Number	ID's Vietnam file number.

Fields	Descriptions
Veteran Category	If the ID is associated with one of the categories in the pulldown list, the person may be eligible for Veteran-related programs, if applicable. This field is also used in Banner Human Resources VETS-100 reporting. The values for the pulldown list are separated by category and employees included in that category. Choices are: • None - Non-veterans • Other Protected Veteran Only - Other protected veterans who did not serve in Vietnam • Vietnam Veteran Only - Vietnam veterans who do not meet the criteria for Other Protected Veteran Only Both Vietnam and Other Eligible Veterans - Vietnam veterans who meet the criteria for Other Protected Veteran Only
Active Duty Separation Date	This is the date the person was separated from active duty. Enter in DD-MON-YYYY format.
Special Disabled Veteran	Check box that indicates whether the veteran has a special disabled veteran status.
User	This is the ID of the user who created or updated the record.
Activity Date	This is the date the record was created or updated.

Race section

Updated: August 27, 2020

This section is used to enter and maintain race data for race/ethnicity processing.

Fields	Descriptions
Race Code	Code and description of the race code associated with the record. List Race Rules (GORRACE) page
User	ID of the user to create or update the record.

Fields	Descriptions
Activity Date	Date the record was created or updated

Interests, Sources, Contacts window

Updated: August 27, 2020

This window allows the user to enter outside interest information in addition to source and contact data. This window is accessed using a Go button from the main window or by selecting the Interests, Sources, Contacts section.

The Source Code must exist on the Source/Background Institution Code Validation (STVSBGI) page and be flagged as a valid source with the **Source Indicator** selected (set to Y).

Default Options window

Updated: August 27, 2020

This window allows the user to set up default options if a large number of recruits with the same information are to be entered. This will save time for data entry personnel.

For example, using these default options will speed the data entry process when a batch of recruits from a local high school, all recruits from the same prior college, or a group of recruits with the same academic interests are being processed together.

This window is accessed using the Default Options item in the Options Menu or the Default Options section.

Mouse	Keyboard	Result
Clear Defaults	A(ll)	Clear All Items in window
Clear Defaults	C(urriculum)	Clear Items in Curriculum Items section of window

Note: When you select the **Clear Defaults** button, a window is displayed where you may select an **All Items** button or a **Curriculum** button, or you may cancel the action.

Recruiter Appointments/Visits (SRARAPT) page

Updated: August 27, 2020

The Recruiter Appointments/Visits (SRARAPT) page is used to schedule and record daily appointments on campus and visits to other sources.

Appointments and visits can be viewed for a given day, a period of days, or an entire term, This page can be used to reschedule appointments and visits in the case of an emergency or the absence of a recruiter. To add appointments or visits for a prospect, the prospect must first be established on SRARECR.

Visits window

Updated: August 27, 2020

Use this window to view visits for a given term, date, and source. To access this window, select Visits from the Options Menu.

The Source Code must exist on the Source/Background Institution Code Validation (STVSBGI) page and be flagged as a valid source with the **Source Indicator** selected or (set to Y).

Recruit Prospect Information (SRARECR) page

Updated: August 27, 2020

The Recruit Prospect Information (SRARECR) page provides the information necessary for all recruitment-related activities.

This page captures and validates information on prospective applicants. This information includes sources (high schools, groups, alumni, and individuals), intended degrees and majors, outside interests, and contacts, cohorts, and attributes. This page is the basis for all related recruiting forms.

While in the key block, you may select the Prospect Information Summary item in the Options Menu or perform a Duplicate Record function to navigate to the Prospect Summary (SRASUMI) page. While viewing information on SRASUMI, you may place the cursor on the record that you would like to view in full and perform a Select function to return to SRARECR and view all prospect sequences associated with that term and level.

While multiple records may exist for a prospect for a term, SRARECR only displays information for a single term record at a time.

Because of the complex curriculum validation and communication plan processing that occurs when records are saved on this page, the creation of multiple records prompts you to save any changes. If you have made unsaved changes to one record, press **Enter**, the box

```
Do you want to save the changes you have made? You must save your changes to
proceed to the next record. Yes or No
```

is displayed. If you chooses Yes, the changes for the record you are working on will be saved, and the necessary validation and communication plan processing will occur. If you answer No, the above message displays until you either choose to save or leave the page.

Scroll down to the Recruit Data section.

Key block

Updated: August 27, 2020

Use the key block to enter the ID, term, and level for the recruit, and to select all or only current and active curriculum records.

Fields	Descriptions
Level	The **Level** is optional, and if it is left blank, recruiting records of all levels will be displayed on this page. If a value is entered in this field, only those recruiting records with the same level will be displayed.
View Current/Active Curricula	Check box used to limit the display of curriculum records in the Curriculum and Field of Study blocks to only those that are current and active.

Recruit Data section

Updated: August 27, 2020

Use this section to enter and view detailed data about the recruit.

Fields	Descriptions
Selected	The **Selected** check box allows the user to specify which record is the current or most

Fields	Descriptions
	recent recruiting record. Only one record may have a selected indicator per term, and this field is informational only; valid values are selected for Yes and cleared for Null.
Recruit Type	The **Recruit Type** may be defined at the recruit level and may follow the prospect forward to the Admissions and General Student modules. The code itself is defined as up to two characters on the supporting Recruit Type Validation (STVRTYP) page. An example of a Recruit Type may be Senior in High School, Junior in High School, Sophomore in High School, Academic Excellence Prospect, etc.
Sequence Number	The **Sequence Number** field displays the system assigned recruiting record sequence number for each record. You can scroll through the records.
Full or Part Time	The **Full or Part Time** button specifies the prospect's intended load of study. Valid values are Full Time, Part Time, and None.
Withdrawal Reason	The **Withdrawal Reason** field specifies the reason the prospect has decided not to attend your institution. Performing a List function from this field will display the Withdrawal Reason Code Validation (STVWRSN) page. Please note that entering a value in this field indicates that the record is no longer active. If this field is entered for a prospect record, it may not be rolled forward to Admissions; however, other changes may be made to the record.
Institution Attending	The **Institution Attending** field tracks the institution a recruit has decided to attend, if that institution is not your home institution. Please note that entering a value in this field indicates that the record is no longer

Fields	Descriptions
	active. If this field is entered for a prospect record, it may not be rolled forward to Admissions; however, other changes may be made to the record.
Add Date	The **Add Date** for the recruiting record defaults to the date the record is initially added to your database and will not be updated. This will provide your institution with an historical record of when recruiting records were added to the database.
Applied	The **Applied** field in the Prospect Information section is an option group with the following choices for matching a recruiting record to an application or a general student record. • Level = Indicates that only the level and term match on an application. (Y in the database) • All = Indicates that the degree, level, major, and term match. (E in the database) • None = Indicates that the application or general student record does not exist for same term, level, major, and degree. (N in the database)
Accepted	The **Accepted** field in the Prospect Information section is an option group with the following choices for matching a recruiting record or an application to a general student record. • Level = Indicates that only the level and term match. (Y in the database)

Fields	Descriptions
	• All = Indicates that the degree, level, major, and term match. (E in the database) • None = Indicates that the application or general student record does not exist for same term, level, major, and degree. (N in the database)
Registered	The **Registered** field can be selected (Y) or cleared (N) to indicate that the recruit is registered for classes.

Note:

If a recruiting level is not defined during the Electronic Prospect Load Process (SRTLOAD), the default value of level 00 will be assigned to each of the added recruiting records. If you choose to use this default level value and intend to use communication plan processing, you need to create communication plan rules for the 00 level on the Communication Plan Rules (SOACOMM) page. Otherwise, your newly created recruits will not be assigned to a communication plan.

It is also important to note that the default level value of 00 is also used when initially creating recruiting records on the Recruit Prospect Information (SRARECR) page and the Quick Recruit (SRAQUIK) page.

You can also track information on SRARECR about the administrators assigned to each recruit. The definition of an administrator is determined by the institution and is defined on the Administrative Role Code Validation (STVRADM) page. Examples of possible administrator codes are: alumni recruiter, student recruiter, etc.

Curricula Summary section

Updated: August 27, 2020

This section is query only for the ID in the Key section and displays a summary of curricula data. You need to access the Curriculum window to insert or delete curriculum records.

This section displays the most recent curriculum data for each priority if the curriculum row is ACTIVE. The section displays the critical curriculum fields so that users can quickly determine what curricula the learner is pursuing. In order to make it easier for users to identify which curriculum records have been back-filled into the primary and secondary curriculum fields, the key words Primary or Secondary are displayed next to the Curricula Summary section title to identify these two rows.

This section will only display the appropriate fields for curriculum rows for the module from which it is being called. For example, if the window is called from SAAADMS, then only curriculum rows where the module code is ADMISSIONS would be returned. Access the Learner Curriculum Query (SOILCUR) page to see all the possible fields that exist for curriculum information. You can use the Options Menu access SOILCUR and view curriculum information for all modules.

The following fields are in this section.

Fields	Descriptions
Priority	This is the priority number that defines the curriculum rank.
Term	This is the term code for the module's curriculum record.
Program	This is the program for the module's curriculum record.
Catalog	This is the catalog term code for the module's curriculum record.
Level	This is the level for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.

Field of Study Summary section

Updated: August 27, 2020

This section is query only for the ID in the Key section and displays a summary of field of study data. You need to access the Curriculum window to insert or delete field of study records.

This section will only display the appropriate fields for curriculum rows for the module from which it is being called. For example, if the window is called from SAAADMS, then only curriculum rows where the module code is ADMISSIONS would be returned. Access the Learner Curriculum Query (SOILCUR) page to see all the possible fields that exist for curriculum information. You can use the Options Menu access SOILCUR and view curriculum information for all modules.

The **Attached to Major** button is enabled when the cursor is on a field of study record for a major with attached concentrations. Click on the button to display a list of the attached concentrations in a pop-up window. The button is not enabled if the cursor is on a record for a major with no attached concentrations, or if the record is for a minor or a concentration.

The following fields are in this section.

Fields	Descriptions
Priority	This is the priority number that defines the field of study rank.
Term	This is the term code for the field of study. This value defaults from the Curriculum section.
Type	This is the type code for the learner field of study. It identifies whether the row is for a major, minor, or concentration.
Field of Study	This is the major, minor, or concentration code for the field of study.
Department	This is the department code for the field of study.
Attached to Major	This is the code for the attached major for the field of study. This field indicates to which major a concentration is attached, if appropriate. This field is only enabled if the field of study type is CONCENTRATION.

Mouse	Keyboard	Result
Attached to Major	N/A	Lists concentrations attached to major

Assigned Administrators window

Updated: August 27, 2020

The Assigned Administrators window is accessed using the Administrator Assignments selection in the Options Menu from the Recruit Data section.

This window allows you to view or update the administrator assigned to a specific recruit. The definition of an administrator is determined by the institution and is defined on the Administrative Role Code Validation (STVRADM) page. Examples of possible administrator codes are: alumni recruiter, student recruiter, etc.

To calculate or update the administrators assigned to this recruit, select Assign Administrators in the Options Menu. This will cause the Administrator Assignments Process (SORAINF) to run for this recruit. The window selects those records from the SORAROL table which match the PIDM in the key of the page, the term, and the module type (R for recruit on SRARECR or SRAQUIK).

Use the **Return** button or the Return to Prospect selection in the Options Menu to return to the main window of SRARECR.

Communication Plan Change window

Updated: August 27, 2020

When a recruiting record is added to the system, if the prospect's information qualifies them for a communication plan according to the institution's rules defined on the Communication Rules (SOACOMM) page, the Communication Plan Change window displays.

The window also displays when a new prospect is added to SRARECR, or you may access the window through the Options Menu.

All changes must be saved before exiting the Communication Plan Change window.

Note: To exit from the window, you must make some change to the record (such as remove a plan and Save, change a plan and Save) or simply save the existing/assigned plans. Use the **Return** button to return to the main window of the page.

Fields

Updated: August 27, 2020

The window contains the fields listed in the table below.

Fields	Descriptions
Communication Plan	The communication plan code. List Communication Plan Validation (STVCPLN)
Description	Description of the plan code.
Recruit, Applicant, Learner	Option group which displays the module the plan exists in: Recruit, Applicant, or Learner.
Term	The recruit term or the admissions term for the plan. If the plan is in Recruiting (option group is set to Recruit), the List function accesses the Prospect Summary (SRASUMI) page. If the plan is in Admissions (option group is set to Applicant), the List function accesses the Admissions Application Summary (SAASUMI) page. If the plan is in General Student (option group is set to Learner), the List function accesses the General Student Summary (SGASTDQ) page. List Prospect Summary (SRASUMI) page List Admissions Application Summary (SAASUMI) page List General Student Summary (SGASTDQ) page
Sequence Number	The sequence number or the application number for the plan. If the plan is in Recruiting (option group is set to Recruit), the List function accesses the Prospect Summary (SRASUMI) page. If the plan is in Admissions (option group is set to Applicant), the List function accesses the Admissions Application Summary

Fields	Descriptions
	(SAASUMI) page. If the plan is in General Student (option group is set to Learner), the List function accesses the General Student Summary (SGASTDQ) page. List Prospect Summary (SRASUMI) page List Admissions Application Summary (SAASUMI) page List General Student Summary (SGASTDQ) page
Active Plan	Check box indicates when selected that the communication plan is active. Only active communication plans display in this window. You can inactivate a plan by clearing the **Active Plan** check box.
Pending Mail	Indicates whether mail exists for the plan. When the communication plan is first added, the field is blank, because the materials have not been created. This value cannot be changed. Choices are: • Selected = Unsent mail exists for the communication plan. This value is stored in the database as Y. • Cleared = No pending mail exists for the plan. This value is stored in the database as N.
Delete Mail	Indicate whether to delete mail for the communication plan. This field can be changed to Y (selected) if there is pending mail for the plan and the **Active Plan** check box has been cleared. This field cannot be changed when the **Active Plan** check box is selected because of processing that takes place when materials are created. Missing materials are created for all active communication plans. If you delete the mail on an active plan, the materials are recreated when you save the plan. If the **Active Plan** check box is selected, and the **Delete Mail** field is selected, the communication plan is deleted from the Communication Plan

Fields	Descriptions
	Assignment (SOAPLAN) page, along with any existing mail on the Student Mail (SUAMAIL) page. Choices are: • Selected = Delete communication plan mail. This value is stored in the database as Y. • Cleared = Do not delete communication plan mail. This value is stored in the database as N.

Options

Updated: August 27, 2020

The following navigation options are available on the Communication Plan Change window.

Option	Description
Student Mail	Use the Student Mail item in the Options Menu to access the Student Mail (SUAMAIL) page to update/view mail for the current ID in the key block of the application page.
Return	Use the **Return** button or the Return to (Applicant, Recruit, or Prospect) selection in the Options Menu to go back to the **Term** field on the main window of the application page. If the plan was initiated when a record was removed, the process will continue. This option will not return you to the main window if there are pending changes in the window. All changes must be saved before returning.

Option	Description
Start Over	Use the Start Over function to clear the page and return to the key block. This function will not return you to the main window if there are pending changes in the window. All changes must be saved before returning. To access the Communication Plan Change window, all changes must have been saved on the application page, except in the case of the record being removed. If you do not make any changes in the Communication Plan Change window, you will not be prompted to save your changes.

Functions and Updatable Fields window

Updated: August 27, 2020

You may use Oracle functions to modify communication plan records.

Action	Description
Delete old plans	Use the Remove Record function. This will also automatically delete pending materials.
Insert new plan	Use the Insert Record function. You must enter the plan code and select the module. If the module is Recruiting or Admissions, you must also enter a term and sequence number.
Update plan	Change the active status and delete pending mail by changing the value of the **Active Plan** check box to selected or cleared and the **Pending Mail** check box to selected or cleared.
Next and Scroll Up	These functions are not allowed in the Communication Plan Change window. To navigate back to the main window of the application page, press the **Return** button**,** select Return to (Applicant, Recruit, or Prospect) in the Options Menu, or use the Duplicate Item function.

Action	Description
	Note: All changes must be saved before exiting the Communication Plan Change window.

Curriculum window

Updated: August 27, 2020

This window is used to enter and view the curriculum details for the recruit, applicant, learner, or learner outcome record. This window is accessed using the Curriculum item in the Options Menu or by selecting the Curricula section.

Note: Use the **View Current/Active Curricula (Indicator)** in the key block to control if you want only current and active curriculum records to be displayed in the Curriculum and Field of Study windows.

Three buttons are used in this window:

- The **Replace** button is used to copy the curriculum record and set the curriculum activity status to INACTIVE and the curriculum status to CHANGED. It then inserts a new blank curriculum record. If user defaults have been set up on SORLCDF, those values will fill in the appropriate fields.
- The **Update** button is used to perform the non-destructive update and copy the curriculum record in question. This allows the user to make changes without re-entering all of the data, as the record is populated with the current record values.
- The **Duplicate** button is used to copy the curriculum record (with the field of study) as it is. The duplicated record is now ready for the user to make the needed changes. This function does not consider the curriculum user defaults in the duplication process. If the user uses the Insert function and then the Duplicate Key function, the curriculum user defaults will fill the newly inserted record before the record duplication occurs.

If the **Recruiting**check boxin the Enable Curriculum Start and End Dates check box group is checked on SOACTRL, this function also captures the original curriculum start and end date information from the current active record and displays those dates in the Curriculum Start and End date entry window on SRARECR. The date entry window allows you to update the start and end dates when changing curriculum or field of study records.The dates are only saved to the non-current active program record. Current active program records are not updated. Additionally, if any of the field of study start and end date fields are null, they will also be updated with the dates from the entry window. Users have the option of using the dates captured when running the Clearing House Extract report (SFRNLSC) and the NSLDS SSCR Process (SFRSSCR) only. The dates are not used by any other processes.

This window will only display the appropriate fields for curriculum rows for the module from which it is being called. For example, if the window is called from SAAADMS, then only curriculum rows where the module code is ADMISSIONS would be returned. The fields displayed will differ, depending on the module referenced. Access the Learner Curriculum Query (SOILCUR) page from the Options menu to view curriculum information for all modules.

You can perform a query to select only the most current records for each priority for the ID in either the Curriculum or Field of Study windows by entering Y in the **Current** field. You can enter N to see records that are not current. You can also select all records by leaving the **Current** field blank.

Update a record

Updated: August 27, 2020

You can insert and delete records in this window. You cannot update existing records, as the history of the curriculum and field of study data needs to be preserved.

About this task

If you want to change data in a curriculum record, you must use the **Replace**, **Update**, or **Duplicate** buttons to copy the existing row and make the change on the new row. For example, to inactivate a record, use **Duplicate** button to duplicate the row to be inactivated. On the duplicated row, change the activity status, and if applicable, the curriculum status, to INACTIVE. Then use the curriculum status to identify why the record is being deactivated. Insert the new row that you want to be active, and save the changes.

Additionally, if the **Recruiting**check box in the Enable Curriculum Start and End Dates check box group is checked on SOACTRL, and Replace, Duplicate, or Update is selected, the Curriculum Start and End date entry window on SRARECR will appear. The start date and end date in the entry window will pre-populate with the values from the original record if they exist. If the values on the original record do not exist, the start date field will be null and the end date field will reflect the current system date. Dates in the fields are editable or can remain null. After you click 'Ok' the dates from the date entry window will populate the non-current active record. You can then update program dates directly on the current active record before saving the new record.

Sort Order for Curriculum Records

Updated: August 27, 2020

Records can be sorted by current or not current, depending on the setting of the **Current** field, which indicates if the curriculum is the most current for the priority (Y) or is not the most current (N).

The default for the Curriculum window is to display all curriculum records for the given ID, term, and key sequence number.

The following sort order is used to determine how records will be displayed after the population to be displayed has been determined. This sort order applies to all places where curriculum data is displayed.

For SORLCUR:

- Module (On SOILCUR only; as module is a default value on all other forms, and each page only displays data for its module.)
- Term Code (if the module is not LEARNER or OUTCOME)
- Key Sequence
- Current and Active
- Priority number, in ascending order (As the lowest priority number is the most important, it is displayed first.)
- SORLCUR sequence number, in descending order (This is so the most recently entered records are displayed first.)

For SORLFOS:

- Field of study type: major, minor, and then concentration
- Current and Active
- Priority, in ascending order
- SORLFOS sequence number, in descending order

Fields	Descriptions
Record of	This field displays the number of curriculum records that exist for the ID based on the data entered in the key block, for example **Record 1 of 5**. You can scroll through the records. As you scroll through the records, the data in the Curriculum and Field of Study blocks changes for each record.
Current	This field specifies if the record is the current row for the priority. Valid values are selected (Current) or cleared (Not Current). • Current = Displays the most recent row for each given priority (i.e., the highest sequence number for each priority). This assumes you are only displaying rows for the given learner module and key sequence number. • Not Current = Displays rows for the given learner module and key sequence number that are not the most recent.
Activity	This is the curriculum activity status code. List Curriculum Activity Status (STVCACT)
Key Sequence	This is the key sequence number of the module record that is associated with the curriculum record. This sequence number will be the same as either the recruiting, application, or degree sequence number, or it will be 99 for a learner sequence record.
Term	This is the term code for the module's curriculum record. List Term Code Validation (STVTERM)
Catalog Term	This is the catalog term code for the module's curriculum record. List Term Code Validation (STVTERM)
Priority	This is the priority number that defines the curriculum rank.
Program	This is the program for the module's curriculum record. List All Program Codes (SMAPRLE)

Fields	Descriptions

Field of Study window

Updated: August 27, 2020

This window is used to enter and view the field of study details for the recruit, applicant, learner, or learner outcome. It displays certain fields from the curriculum record and all field of study records.

You can only access the Field of Study window from the Curriculum window. Use the Field of Study section to access this window when you are in the Curriculum window.

Note: Use the **View Current/Active Curricula (Indicator)** in the key block to control if you want only current and active curriculum records to be displayed in the Curriculum and Field of Study windows.

The **Attached Concentrations** button is enabled when the cursor is on a field of study record for a major with attached concentrations. Click on the button to display a list of the attached concentrations in a pop-up window. The button is not enabled if the cursor is on a record for a major with no attached concentrations, or if the record is for a minor or a concentration.

The **Inactivate** button is used to insert a copy of that field of study record with values of INACTIVE in the **Activity** field and REMOVED in the **Status** field.

Additionally, if the **Recruiting** check box in the Enable Curriculum Start and End Dates check box group is checked on SOACTRL, and you select the Inactivate button to inactivate a major, the Field of Study Start and End Date entry window will appear. If dates currently exist for the field of study record, the dates will prepopulate the fields in the date entry window. If they do not exist, the start date will be null and the end date will reflect the current system date. Dates in the fields are editable or can remain null. The dates are only saved to the non-current active field of study record. Current active field of study records are not updated.

Fields	Descriptions
The following fields default in from the Curriculum window and are not updateable.	
Record of	This field displays the number of curriculum records that exist for the ID based on the data entered in the key block, for example **Record 1 of 5**. You can scroll through the records. As you scroll through the records, the data in the Curriculum and Field of Study sections changes for each record.
Current	This field specifies if the record is the current row for the priority. Valid values are selected (Current) or cleared (Not Current). • Current = Displays the most recent row for each given priority (i.e., the highest sequence number for each priority). This assumes you are only displaying rows for the given learner module and key sequence number. • Not Current = Displays rows for the given learner module and key sequence number that are not the most recent.
Priority	This is the priority number that defines the curriculum rank.
Activity	This is the curriculum activity status code.
Program	This is the program for the module's curriculum record.
Term	This is the term code for the module's curriculum record.
Catalog	This is the catalog term code for the module's curriculum record.
Key Seq (Key	This is the key sequence number of the module record that is

Fields	Descriptions
Sequence)	associated with the curriculum record. This sequence number will be the same as either the recruiting, application, or degree sequence number, or it will be 99 for a learner sequence record.
Level	This is the level for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.
The following fields are updateable, except for the **Current** field.	
Current	This field specifies if the record is the current row for the priority. Valid values are Y (Current) or N (Not Current). Display only. • Current = Displays the most recent row for each given priority (i.e., the highest sequence number for each priority). This assumes you are only displaying rows for the given learner module and key sequence number. • Not Current = Displays rows for the given learner module and key sequence number that are not the most recent.
Activity	This is the curriculum activity status for the field of study. List Curriculum Activity Status (STVCACT)
Status	This is the curriculum status for the field of study. List Curriculum Status (STVCSTS)
Term	This is the term code for the field of study. This value defaults from the Curriculum section.
Type	This is the type code for the learner field of study. It identifies whether the row is for a major, minor, or concentration. List Learner Field of Study Types (GTVLFST)
Priority	This is the priority number that defines the field of study rank.
Catalog	This is the catalog term for the field of study.

Fields	Descriptions
	List Term Code Validation (STVTERM)
End Term	This is the term code for the end term of the field of study. (This field is not used at this time.) List Term Code Validation (STVTERM)
Field of Study	This is the major, minor, or concentration code for the field of study. List All Major, Minor, or Concentration Codes Help Attached Majors, Minors, or Concentrations
Department	This is the department code for the field of study. List All Department Codes Help Attached Departments
Attached to Major	This is the code for the attached major for the field of study. This field indicates to which major a concentration is attached, if appropriate. This field is only enabled if the field of study type is CONCENTRATION. List All Major Codes Help Attached Majors Edit Curriculum Rules (SOACURR)
Full or Part Time	This is the time status code for the field of study. List Time Status Code Validation (STVTMST)
Start Date	This is the start date for the field of study.
End Date	This is the end date for the field of study.
User ID	This field displays the user ID of the person who created the

Fields	Descriptions
	record.
Activity Date	This field displays the date the record was created or modified.

Mouse	Keyboard	Result
Attached Concentra-tions	N/A	Lists concentrations attached to major
Inactivate	N/A	Inserts copy of field of study record with *INACTIVE* activity and *REMOVED* status. Displays a Field of Study Start and End Date entry window which allows you to enter field of study start and end dates. To enable this functionality, go to Curriculum Rules (Processing Controls) SOACTRL page and check the Recruiting check box in Enable Curriculum Start and End Dates check box group.

Sources and Interests window

Updated: August 27, 2020

Use this window to gather the source information for a prospect, along with outside interests. This window is accessed by selecting the Sources and Interests section.

The source code must exist on the Source/Background Institution Code Validation (STVSBGI) page and be flagged as a valid source with the **Source Indicator** selected (or set to Y).

Contacts, Cohorts, Attributes window

Updated: August 27, 2020

Use this window to set up and maintain the person contact information, cohort codes which support tracking, and attribute codes. This window is accessed by selecting the Contacts, Cohorts, Attributes section.

Comments and Learned window

Updated: August 27, 2020

Use this window to enter comments about the prospect and to view information on how the person learned about the school. This window is accessed by selecting the Comments and Learned section.

Fields	Descriptions
Comments	The **Comments** field is 4,000 characters long and has autowrap capability. Use the **Comments** edit button for easier entering, editing, and searching of text.
Learned	The **(How I) Learned (About Institution Code)** in the (How I) Learned section is used by Web for Prospects to capture how the person learned about the school. The data is initially stored in Web for Prospects and is viewable from SRAPREL. After the prospect has been migrated to Banner® Production, the data is available on SRARECR. The How I Learned data is migrated to the recruit record based on the rule value CREATELEARNED, which is stored on SAAERUL under the group PREL. If the CREATELEARNED rule is Y, the prospect How I Learned data is migrated to the recruit How I Learned data. The **(How I) Learned (About Institution Code)** is validated on the Web Prospect How I Learned About Validation (STVLEND) page.

Recruiter Integration Curriculum Crosswalk (SRARICC) page

Updated: August 27, 2020

The Recruiter Integration Curriculum Crosswalk (SRARICC) page is used to maintain academic programs and the associated curriculum values. These values are used to load curriculum data into Banner for prospects and applications that are sent from the Recruiter product.

Fields	Descriptions
ID	Academic program ID.

Fields	Descriptions
Academic Program Name	Recruiter academic program name.
Level	Curriculum level for the Recruiter academic program. List Level Code Validation (STVLEVL)
Program	Curriculum program from CAPP for the Recruiter academic program. List Existing Program (SMRPRLE)
College	Curriculum college for the Recruiter academic program. List College Validation (STVCOLL)
Degree	Curriculum degree for the Recruiter academic program. List Degree Code Validation (STVDEGC)
Major	Curriculum major for the Recruiter academic program. List Major, Minor, Concentration (STVMAJR)
Activity Date	Date on which the record was last updated. Display only.

Recruiter's Prospect (SRARINF) page

Updated: August 27, 2020

The Recruiter's Prospect (SRARINF) page is a query-only page that displays all of the prospects that a recruiter is responsible for in a given term.

The current status of the prospect and the prospect's name and ID are provided. The recruiter may use this page as a starting point by saving the prospect's ID and transferring to the Recruit Prospect Information (SRARECR) page.

Use the Remember ID item in the Options Menu or perform a Count Query Hits function from a record to 'remember the ID'. Exit from SRARINF and then access SRARECR to view additional information about that prospect. The 'remembered' ID will default to SRARECR.

Recruiter Integration Test Code Crosswalk (SRARITC) page

Updated: August 27, 2020

The Recruiter Integration Test Code Crosswalk (SRARITC) page is used to maintain the test code crosswalk for the interface.

These values are used to load test data into Banner for prospects and applications that are sent from Recruiter. A Banner test can be mapped to multiple combinations of Recruiter test types and subtest types.

Fields	Descriptions
Recruiter Test Name	Name of test sent from Recruiter, such as SAT.
Recruiter Subtest Name	Name of subtest associated with the test, such as Verbal or Math.
Test Code	Test code from Banner that is used for the crosswalk, such as S01 or S02. List Test Code Validation (STVTESC)
Description	Description of the test code such as SAT Verbal or SAT Mathematics. Display only.
Activity Date	Date on which the record was last updated. Display only.

Source Visits/Prospects (SRASRCE) page

Updated: August 27, 2020

The Source Visits/Prospects (SRASRCE) page displays the activity in the Recruiter Appointments/Visits (SRARAPT) page and the Recruit Prospect Information (SRARECR) page from the source point of view.

The visits that have taken place at the source, and the prospects identified from the source are displayed. Additional visits may be entered for the source.

Visits entered on this page will be displayed on the Recruiter's Appointments/Visits (SRARAPT) page.

The Source Code in the **Source or Background Institution** field must exist on the Source/Background Institution Code Validation (STVSBGI) page and be flagged as a valid source with the **Source** indicator selected (set to Y).

Use the Remember ID item in the Options Menu or a Count Query Hits function from the **ID** field in the Prospect Information to remember the ID and default it to the next page accessed.

Prospect Summary (SRASUMI) page

Updated: August 27, 2020

This is a standalone query page used to display a summary of recruiting records for a prospect whether the records are active or inactive.

A record is considered to be inactive if an institution attending or withdrawal reason code has been entered. Only active recruiting records are carried forward into admissions to create new admissions applications. The records are displayed in descending order by term or for the term entered in the key block. If neither the term or level are entered, all records will display. If a term is entered, all records for that term and prior terms will be queried, and if a level is entered, only those records with an equal level will be displayed.

This page is called from the Recruit Prospect Information (SRARECR) page and the Admissions Application (SAAADMS) page for selection of the desired recruiting record. It may also be accessed from the *RECRUITP Menu. To access this page from SRARECR, select the Prospect Information Summary item in the Options Menu or use a Duplicate Record function from the **ID** field.

Main window

Updated: August 27, 2020

Use this window to query on existing prospect records.

Key block

Updated: August 27, 2020

Use the key block to enter the ID and term for the prospect query in addition to curriculum information.

Fields	Descriptions
Confidential (Confidential Message)	Message displays when the **Confidentiality (Indicator)** check box is selected on the General Person (SPAPERS) page. Confidentiality may be requested by the student or determined by institution policy.
Deceased (Deceased Message)	Message displays when the **Deceased (Indicator)** check box is selected on the General Person (SPAPERS) page. You may process data for a person who is deceased.
ID	ID of the student for whom you want to query existing prospect records.
Term	Term to query for which prospect records exist. Choices come from the Term Code Validation (STVTERM) list.
Level	Level code for the curriculum on the prospect record. Examples include graduate, medical, law, transfer. List All Level Codes (STVLEVL)
Campus	Campus code for the curriculum on the prospect record. Examples include main, north, downtown. List All Campus Codes (STVCAMP)
College	College code for the curriculum on the prospect record. Examples include College of Arts and Sciences, College of Business. List All College Codes (STVCOLL)
Degree	Degree code for the curriculum on the prospect record. Examples include BA, BS, MBA, PHD. List All Degree Codes (STVDEGC)

Fields	Descriptions
Program	Program code for the curriculum on the prospect record. Examples include BA in English, BS in Math. List All Program Codes
Field of Study Type	Field of study type for the curriculum on the prospect record. List Learner Field of Study (GTVLFST)
Field of Study Code	Code for the field of study. This is the primary major selected for the prospect record. Examples include Liberal Arts, Biology, Accounting. List All Major Codes (STVMAJR)

Prospect Summary section

Updated: August 27, 2020

Use the Prospect Summary section to view prospect records and to query specific information for the prospects. An ID may have multiple prospect records. Records are sorted by term in descending order and then by sequence number in descending order within each term.

Fields	Descriptions
Term	Term code for the recruiting record.
Sequence	The **Sequence Number** field displays the system-assigned recruiting record sequence number for each record.
Selected Primary	The **Selected Primary** indicator allows the user to specify the current or most recent recruiting record with a Y. Only one record may be selected for a term.
Recruiter	Recruiter assigned to the prospect.
Recruit Type	Type of recruiter, such as high school, college, main campus.

Fields	Descriptions
Admission Type	Type of admission processed on the admissions application. Examples include early decision, early admission, standard.
Student Type	Type of student processed on the admissions application. Examples include first-time freshman, continuing education student, transfer student.
Residence	Residence code for the application.
Withdrawal Reason	Code for reason of withdrawal from an institution by the prospect.
Institution Attending	Code of institution attended by the prospect.

Curricula Summary section

Updated: August 27, 2020

This section is display only for the ID in the Key section and displays a summary of curricula data. This section displays the most recent curriculum data for each priority if the curriculum row is ACTIVE.

The section displays the critical curriculum fields so that users can quickly determine what curricula the learner is pursuing. The curricula summary information comes from the general student record. The summary blocks are populated when the SGBSTDN record for the person is queried.

To make it easier for users to identify which curriculum records have been backfilled into the primary and secondary curriculum fields, the key words Primary or Secondary are displayed next to the Curricula Summary section title to identify these two rows. This section will only display the appropriate fields for curriculum rows for the module from which it is being called.

The following fields are in this section.

Fields	Descriptions
Priority	This is the priority number that defines the curriculum rank.
Term	This is the term code for the module's

Fields	Descriptions
	curriculum record.
Program	This is the program for the module's curriculum record.
Catalog	This is the catalog term code for the module's curriculum record.
Campus	This is the campus for the module's curriculum record.
College	This is the college for the module's curriculum record.
Degree	This is the degree for the module's curriculum record.

Field of Study Summary section

Updated: August 27, 2020

This section is display only for the ID in the key block and displays a summary of field of study data. This section will only display the appropriate fields for curriculum rows for the module from which it is being called.

The **Attached to Major** button is enabled when the cursor is on a field of study record for a major with attached concentrations. Click on the button to display a list of the attached concentrations in a pop-up window. The button is not enabled if the cursor is on a record for a major with no attached concentrations, or if the record is for a minor or a concentration.

The following fields are in this section.

Fields	Descriptions
Priority	This is the priority number that defines the field of study rank.
Term	This is the term code for the field of study. This value defaults from the Curriculum section.
Type	This is the type code for the learner field of study. It identifies whether the row is for a major, minor, or concentration.

Fields	Descriptions
Field of Study	This is the major, minor, or concentration code for the field of study.
Department	This is the department code for the field of study.
Attached to Major	This is the code for the attached major for the field of study. This field indicates to which major a concentration is attached, if appropriate. This field is only enabled if the field of study type is CONCENTRATION.

Mouse	Keyboard	Result
Attached to Major	N/A	Lists concentrations attached to major

Tape Field Position Rule (SRATPFD) page

Updated: August 27, 2020

Use this page to define either the exact positions in which each field exists on a search or test score file or the relative position of each field and then to assign the value in those positions to the appropriate Banner® fields.

This page, in combination with the Electronic Prospect Load (SRTLOAD), the Electronic Prospect Match (SSRSRIN), and the Migrate Electronic Prospects Process (SRRPREL), allows institutions to set up data loads that are not supported by the company, such as AP (Advanced Placement exams) or other search or test score data sets.

This page displays two sets of information. It displays fields for a default positional layout (such as SAT or ACT) or for a sequential layout (such as AMCAS or a comma delimited file). The layout displayed is determined by the tape code entered in the key block. If the tape code has been defined on the Tape File Delimiter Type Rules (SORDLIM) page, then the fields required to define a sequential delimited file will be displayed. If the tape code has not been defined on SORDLIM, then the fields required to define a positional layout will be displayed.

Main window

Updated: August 27, 2020

The main window contains two sections. The Rules section can be displayed in a default positional layout or a sequential layout, depending on the type of tape code entered in the key block.

Key block

Updated: August 27, 2020

The following fields are in the key block.

Fields	Descriptions
Tape Code	Enter the tape code for the tape field position rule. List Tape Codes (STVTAPE)
Record Number	Enter the record number for the rule. List Tape Record Number

Rules section - Default Positional Layout

Updated: August 27, 2020

The default positional layout contains the following fields.

Fields	Descriptions
Field Name	This is the tape field name for the tape in the key block. List Tape Field Names (STVTPFD)
Start Position	This is the starting position of the field on the tape/file.
End Position	This is the ending position of the field on the tape/file.
Occurrence	This is the occurrence of the data item on

Fields	Descriptions
	the tape/file. It can be used to accommodate those file values that may occur multiple times such as test scores for different test dates. The fields defined in this page are delivered.
Activity Date	This is the date the record was created or updated.

Rules section - Sequential Layout

Updated: August 27, 2020

Use the **Re-sequence and Save** button to automatically re-sequence the data fields and then save the changes. Use this button if it becomes necessary to insert an additional row into the page.

The sequential layout contains the following fields.

Fields	Descriptions
Field Name	This is the tape field name for the tape in the key block. List Tape Field Names (STVTPFD)
Sequence Number	This is the relative position of the tape field on the data file. The sequence numbers must be sequential (i.e., 1, 2, 3, etc.).
Occurrence	This is the occurrence of the data item on the tape/file. It can be used to accommodate those file values that may occur multiple times such as test scores for different test dates. The fields defined in this page are delivered.
Activity Date	This is the date the record was created or updated.

Mouse	Keyboard	Result
Re-sequence and Save	N/A	Add row, re-sequence data fields, save changes.

Tape File Test Score Controls (SRATPTS) page

Updated: August 27, 2020

Use this page to map the test code which contains the date taken to all the other test codes for which that date taken applies.

For example, the date taken for one set of SAT I scores is contained in only one place, even though that date applies to both the SAT Verbal and Math scores.

Fields	Descriptions
Test Code	Enter the test code to which a date origin will be assigned. List Test Code Validation (STVTESC)
Description	This is the description of the test code. It defaults in from the tape code selected from the Lookup button.
Test Code Date Origin	Enter the test code date origin for the test code. List Test Code Validation (STVTESC)
System Required	Check this box if the rule is system required.
User ID	This is the ID of the user who created or updated the rule.
Activity Date	This is the date the rule was created or updated.

Web for Prospects Acknowledgement Letter (SRAWACK) page

Updated: August 27, 2020

Use this page to customize the acknowledgement letter. The acknowledgement letter will appear on the Web page after the student presses the **Submit** button.

Enter a code from STVPREL in the **Web Electronic Prospect Code** field in the key, and use Go button to see the sequence numbers and variables for the letter. The prospect codes on STVPREL must have the **Enter on WEB** check box selected to be displayed in the list of values for the **Web Electronic Prospect Code** field on SRAWACK.

Fields	Descriptions
Sequence	The **Sequence** field determines the order of the rows in the letter. When you first type in your letter, you can leave the sequence number blank, and the sequence will automatically fill in when you save the letter. Or, you can type in a sequence number incrementing each line by five, just in case you need to add new lines at a later time.
Formatting	The **Formatting** field is a pulldown list where you can select an HTML command. The values for the field are blank, New Paragraph, New Line, or Horizontal Rule. The only time the formatting is ignored is when the **Text** and the **Prospect Data** fields are blank. This prevents blank lines from appearing in the middle of your letter.
Prospect Data	The **Prospect Data** field is used for data elements from the Electronic Prospect System. These variables are stored on the Web Acknowledgement Validation (STVWACK) page.
Text	The **Text** field is a free format field where you can include HTML commands in the text for additional formatting. Use the **Comments** button to display the Editor

Fields	Descriptions
	window and enter your text.

Web for Prospects Display Rules (SRAWPDS) page

Updated: August 27, 2020

Use this page to reduce the number of choices the student can select from or to change the descriptions that will display on the Web.

About this task

This is accomplished by customizing the pulldown lists with specific values from Banner® validation tables. All list boxes in the Web for Prospects Web pages are populated from Banner validation tables.

To use this page:

Procedure

1. Enter a code from STVPREL in the **Web Electronic Prospect Code** field in the key, and use Go button to see the table names and rules used with the prospect code. The prospect codes on STVPREL must have the **Enter on WEB** check box selected to be displayed in the list of values for the **Web Electronic Prospect Code** field on SRAWPDS.
2. You may enter the last four characters of a validation table name in the **Validation Table Name** field in the key to see only the rules for that validation table and the prospect code, or leave the **Validation Table Name** blank to view all the rules for the prospect code. For example, enter TERM for STVTERM, CITZ for STVCITZ, and RESD for STVRESD.
3. Enter the validation code value in the **Code Value** field. The description from the validation table will default, but you can type over the description to customize it.

Results

The student will never see codes on the Web for Prospects Web page. They will only see descriptions. If you do not enter data on this page, all entries in the Banner validation table will be listed.

This page uses GORRACE for validation against the **Race** field in Student Self-Service on the Web for Prospects page. All GORRACE values that are listed on this page will be displayed on the Web. If there are no values from GORRACE listed on SRAWPDS, then all values and associated descriptions will be visible for race/ethnicity in Web for Prospects.

High School and Prior College Lists

Updated: August 27, 2020

The Web for Prospects Web page allows you to search for a high school or prior college.

The search process will first prompt the student to select the state, province, or nation from pulldown lists. The student is next prompted to select the name of the city where the school is located. The last selection is for the school itself.

The requirement for this search is that address data be present for the schools included in the search. School addresses are maintained on the Source or Background Institution Base (SOASBGI) page.

The High School entry section has an alternative check box that can be selected to indicate that the student was home schooled. The STVSBGI value for the Home School must be stored on the SAAERUL rule for HOMESCHOOL.

If the student cannot find the school in the selection, yet enters the name of the school, or any of the self reported data (including GPA, graduation date, rank, or class size), the school code will default in the value on the SAAERUL rule for UNKNOWNHSCH. If the student enters a school code that is not included in your STVSBGI table, that value will still be stored in the SRTHSCH or SRTPCOL table in the `SBGI_CODE_INVALID` column.

Web for Prospects Selection Rules (SRAWPRO) page

Updated: August 27, 2020

Use this page to identify the selections for display on the Web and the order in which they display.

Enter a code from STVPREL in the **Web Electronic Prospect Code** field in the key, and use Go button to see the selection codes used with the prospect code. The prospect codes on STVPREL must have the **Enter on WEB** check box selected to be displayed in the list of values for the **Web Electronic Prospect Code** field on SRAWPRO.

When you first enter this page with a new prospect code from STVPREL, the selection codes for NAME and ADDRESS1 will automatically default.

If you have not entered any selection codes on this page for a prospect code from STVPREL, the prospect code will not be available on any Web page in Web for Prospects.

Fields	Descriptions
Selection Code	The values in the **Selection Code** field are created on the Web Prospect Information Selection Validation (STVWPIC) page and are system required. Each selection is equated to data elements in the Web for Prospects module of the Student Self-Service product.
Address Code	Use the **Address Code** and **EMAIL (Code)** fields to enter the values to be used. These values are required for the selection codes ADDRESS1, ADDRESS2, and EMAIL.
Display Order on Web	The **Display Order on Web** field is used to designate the order of the modules on the Web page that fits your requirements.
Response Required on Web	The **Response Required on Web** check box, when selected, is used to force the prospect to enter data on the Web page. **Warning!** Depending on your locale, it might be illegal to require users to provide ethnicity and race information. Do not select the **Response Required on Web** check box on SRAWPRO for the ETHNICITY (Prospect Ethnicity/Race) Web prospect selection code if requiring users to provide ethnicity and race information is prohibited. If such a regulation applies to your

Fields	Descriptions
	institution, you must also review your existing Web selection definitions and clear this check box for any selections for which it is currently selected.

Electronic Prospect Inquiry (SRIPREL) page

Updated: August 27, 2020

This page is used to query and view records in the Search Tape View (SRVPREL). This page is also used in conjunction with the Search Tape Matching Process (SRRSRIN) and the Migrate Electronic Prospects Process (SRRPREL).

About this task

You can access the Common Matching Entry (GOAMTCH) page using the Match (GOAMTCH) item in the Options Menu to display information for a prospect ID and then execute the matching process before a new PIDM is created in Banner®. SRIPREL uses GOAMTCH and the Common Matching algorithm for data load processing to determine if the incoming record matches an existing Banner record.

Use the following steps to resolve suspended records or to match and load new records from SRIPREL.

Procedure

1. Query for prospect records (where the **Match Status** is S for suspended), or by other parameters.
2. If you want to view details about the selected record, choose the Details (SRAPREL) item from the Options Menu. If you want to use the matching algorithm against the selected record, then choose the Match (GOAMTCH) item from the Options Menu.
3. Before you can access GOAMTCH, you will be asked to assign an ID to the new user, either a generated ID or the person's SSN. When the data is saved, you will be taken to GOAMTCH.

4. When you enter GOAMTCH, the **ID** field will contain either the word GENERATED or the selected record's SSN. The **Matching Source** field will contain the matching source code that has been assigned to the interface code, which is also assigned to the electronic prospect code of the selected record on STVPREL.

   If no matching source code has been assigned to the interface code, then the **Matching Source** field will contain the default matching source code that has been assigned to the user ID on GORCMUS. If no default source code has been assigned on GORCMUS, then you will be able to select any matching source code from the Lookup button.

5. Perform a Go button to populate the Data Entry section with all of the data for the incoming prospect record that is present in the temporary tables.
6. You can update or adjust the data in the Data Entry section if it does not meet your institution's data standards. These updates will be copied back to the temporary tables and used when the prospect's record is created.
7. Perform a Go button to run the matching algorithm. The algorithm will determine if the incoming record is new, matched, or a potential match.
8. Determine if the record is to be new or matched, and select the appropriate button.
9. The user will be automatically returned to SRIPREL. The match status will always be Matched, as the person has now been created in Banner by GOAMTCH. Continue with regular SRIPREL load processing.

   The new match status, *Matched*, is displayed under that person's record on SRIPREL. When you exit the page or requery against the data in the SRVPREL view, these highlighted values disappear, and the **Match Status** field is updated appropriately.

   The Migrate Electronic Prospects Process (SRRPREL) can then be used to load those records with a match status M (Match) to Banner production. Or, you can use the Create Recruit/Applicant item in the Options Menu to create Banner records individually.

   All fields on this page are searchable and can be used in combination to locate specific data loads or populations.

   .

Fields	Descriptions
Student Type	Student type code for the electronic prospect. This code is used for PCU data load processing for student types of O (Other) based on the rule set up on SOTCNVT.
Match Status	This field displays the match status created by either the Search Tape Matching Process (SRRSRIN) or the Common Matching Entry (GOAMTCH) page, based on the rules on the Common Matching Rules (GORCMRL) page.
Load Status	This field indicates that the record for this person has already been created or updated in Banner. A person may be present on multiple search or test score files, so they may have multiple records in SRVPREL. This flag, if set to C, indicates that this record has been loaded into Banner.

This page also allows you to perform the following three tasks:

10. For a selected record, use the Detail item in the Options Menu to access the Electronic Prospect Detail (SRAPREL) page to view the detailed search or test score data for the person.
11. Use the Match item in the Options Menu to access the Common Matching Entry (GOAMTCH) page to determine if this person already exists in Banner, and then match the person.
12. Use the Create Recruit/Applicant item in the Options Menu to create or update the following Banner records for a person who is either new or has been matched to a Banner record.

    - SPAPERS – demographic information
    - SPAIDEN – address information
    - SPATELE – telephone information
    - GOAINTL - international information
    - SOAPCOL – prior college information
    - SOAHSCH – high school information
    - SRARECR – source, contact, and interests
    - SOATEST – test scores (for test score data loads only, including percentiles for

SAT and GRE files)

- SAAADMS – application information
- SOASUPL – applicant supplemental information, for AMCAS only

Schedule Calendar (SSAACCL) page

Updated: August 27, 2020

Use the Schedule Calendar (SSAACCL) page to enter or display academic calendar information associated with a particular section. Academic calendar information can include census one and two dates in addition to registration dates that are informational only.

The section must first be created on the Schedule (SSASECT) page before creating or updating the academic calendar information. The academic calendar rules default from the Schedule Academic Calendar Rules (SSAACRL) page for the academic calendar type entered.

Support for (California localization)

Updated: August 27, 2020

Use this page to enter or display the last date for refunds. The **Last Date to Record Academic History**, **Last Date to Drop without a Penalty**, and **Last Date for Refund** fields are used by the Registration module with the Computed Drop Code functionality.

To support apportionment reporting, the warning displayed by the system when a CRN with no SSRMEET records is closed has been changed to: `CRN has no meetings and will be excluded from apportionment reporting`.

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to enter or display calendar information. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.

Fields/Buttons	Descriptions
CRN	Course reference number.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Course title assigned on the Schedule (SSASECT) page. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Schedule Calendar (California Localization)

Updated: August 27, 2020

Use this section of the page to enter or display calendar information for the term and CRN specified in the key block.

Fields	Descriptions
Academic Calendar Type	Code of the academic calendar type associated with the CRN. The academic calendar type cannot be changed after enrollments exist for the CRN.
Enrollment	Number of students enrolled in the CRN. Display only.
Section Begin Date	First date on which the CRN meets. Display only.
Section End Date	Last date on which the CRN meets. Display only.
Number of Weeks	Number of weeks the session lasts. Display only. This defaults from the **Number of Weeks** field in the Base Part of Term section of the Term Control (SOATERM) page.
Part of Term	Code for the part of term for the CRN. Display only.
Calculated Section Start Date	This date is calculated and displayed from the section on SSASECT and represents the first day the class meets.
Census One Date	First date on which the enrollment numbers for the course are

Fields	Descriptions
	frozen for statistical reporting. This defaults from the **Census One Date** field in the Base Part of Term section of SOATERM, but you can change it.
Census One Enrollment	Number of students enrolled on the census one date.
Census Two Date	Second date on which the enrollment numbers for the course are frozen for statistical reporting. This defaults from the **Census Two Date** field in the Base Part of Term section of SOATERM, but you can change it.
Census Two Enrollment	Number of students enrolled on the census two date.
Last Date to Enroll	Last date on which students can enroll for the CRN. The system will automatically change the date in the field, if applicable, when there is a change to any of the following: • Academic calendar type • CRN's start or end date • Meeting's session start or end date Any of the meetings' selected days
Last Date to Record Academic History	Last date on which a student can withdraw from the CRN without it appearing in academic history. This field is used with the Computed Drop Codes functionality in Registration to compute the applicable “Record Academic History Cutoff” drop code (as defined on SVADROP). It is no longer informational only. The system will automatically change the date in the field, if applicable, when there is a change to any of the following:

<table>
<tr><th>Fields</th><th>Descriptions</th></tr>
<tr><td></td><td>Academic calendar type
CRN's start or end date
Meeting's session start or end date
Any of the meetings' selected days</td></tr>
<tr><td>Last Date to Drop without a Penalty</td><td>Last date on which a student can drop the CRN without being assessed a failing grade penalty.

This field is used with the Computed Drop Codes functionality in Registration to compute the applicable “Drop without Penalty Cutoff” drop code (as defined on SVADROP). It is no longer informational only.

The system will automatically change the date in the field, if applicable, when there is a change to any of the following:
Academic calendar type
CRN's start or end date
Meeting's session start or end date
Any of the meetings' selected days</td></tr>
<tr><td>Session Begin Date</td><td>Earliest start date of all meetings defined for the CRN. Display only.</td></tr>
<tr><td>Session End Date</td><td>Latest end date of all meetings defined for the CRN. Display only.</td></tr>
<tr><td>Number of Weeks</td><td>Number of weeks the session lasts. This is calculated by taking the difference between the session begin date and session end date and dividing this by seven (7). Display only.</td></tr>
<tr><td>Number of Days</td><td>Calculated number of days the session meets. Display only.</td></tr>
</table>

California Localization

The fields and description in this section apply to California only.

Fields	Descriptions
Last Date to Enroll	After a value is saved in the **Academic Calendar Type** field, this field will no longer be updateable. Enrollment limitations are enforced by the Registration Add Authorization Codes functionality.
Last Date for Refund	Last date on which students can get a refund when dropping from the CRN. After a value is saved in the **Academic Calendar Type** field, this field will no longer be updateable. This field is used with the Computed Drop Codes functionality in Registration to compute the applicable Refund Cutoff drop code (as defined on the Term Computed Registration Drop Codes Page [SFADROP]). The system will automatically change the date in the field, if applicable, when there is a change to any of the following: • Academic calendar type • CRN's start or end date • Meeting's session start or end date • Any of the meetings' selected days
Last Date to Record Academic History	After a value is saved in the **Academic Calendar Type** field, this field will no longer be updateable.
Last Date to Drop without a Penalty	After a value is saved in the **Academic Calendar Type** field, this field will no longer be updateable.
Number of Days	The calculations for what is displayed in this field have been localized to support CALB. Refer to the 'Enhanced Academic Calendar and Computed Drop Code/Fee Refund' chapter of the *Banner California Community College Baseline Handbook* for more information.

Schedule Academic Calendar Rules (SSAACRL) page

Updated: August 27, 2020

Use the Schedule Academic Calendar Rules (SSAACRL) page to enter or display the rules associated with the academic calendar type for a term.

These rules are used in the Schedule (SSASECT) page when an academic calendar type is associated with a section on the Schedule Calendar (SSAACCL) page. Rules can be specified for either a date, percentage of days into a term, or number of days into the term. Rules can also be copied from one calendar type to another calendar type within a term.

The academic calendar types must first exist on the Academic Calendar Type Validation (STVACCL) page before rules being created.

This page is composed of the following sections:

- Key block
- Schedule Academic Calendar Rules

Key block

Updated: August 27, 2020

Use the key block to specify the term and calendar type for which you want to enter or display rules.

You can access the Default Calendar Rules window from the key block by selecting **Default Calendar Rules** button. This allows you to default values from another calendar type to the one specified in this section of the page.

Fields/Buttons	Descriptions
Term	Code and description of the term.
Calendar Type	Code and description of the calendar type.
Default Calendar Rules	Button used to open the Default Calendar Rules window and default values from another calendar type to the one specified in this section of the page.

Default Calendar Rules window

Updated: August 27, 2020

Use this window to process the default type for the term and calendar type specified in the key block.

Use the **Default Calendar Rules** button to access this window. Enter the default calendar type, and then select the **Process Default** button or the **Cancel** button. You cannot process the default if the calendar type rules have already been defined for a term and calendar type.

Fields/Buttons	Descriptions
Calendar Type	Code and description of the calendar type from which you want to default values.
Process Default	Button used to process information associated with the default calendar type.

Copy To section (California localization)

Updated: August 27, 2020

Use this section to copy the calendar rules from the term and calendar type specified in the key block to another one.

Fields	Descriptions
Term	Code of the term to which calendar rules are to be copied.
Calendar Type	Code of the calendar type whose rules are to be copied.
Copy button	Copies computed registration drop codes to the specified term.

Schedule Academic Calendar Rules (California Localization)

Updated: August 27, 2020

Use this window to define the calendar rules for the term and calendar type specified in the key block.

For each type of date (such as census one, census two, enrollment, record academic history, and drop without penalty), you can enter a value in only one of the fields (**Number of Days**, **Percentage of Days**, or **Date**). You cannot enter values in more than one of these fields for a type of date.

Fields	Descriptions
Census One Number of Days	Number of days into the term when the first census occurs.
Census One Percentage of Days	Percentage of days into the term when the first census occurs.
Census One Date	Date on which the first census occurs.
Census Two Number of Days	Number of days into the term when the second census occurs.
Census Two Percentage of Days	Percentage of days into the term when the second census occurs.
Census Two Date	Date on which the second census occurs.
Enrollment Number of Days	Number of days into the term until which students can enroll.
Enrollment Percentage of Days	Percentage of days into the term until which students can enroll.
Enrollment Date	Last date on which students can enroll for the term.
Record Academic History Number of Days	Number of days into the term for which course information will not appear in academic history.
Record Academic History Percentage of Days	Percentage of days into the term for which course information will not appear in academic history.
Record Academic History Date	Last date for which a student my process a course without it appearing in academic history.
Drop Without Penalty Number of Days	Number of days into the term before which a student can drop a section without incurring a penalty.
Drop Without Penalty Percentage of Days	Percentage of days into the term before which a student can drop a section without incurring a penalty.
Drop Without Penalty Date	Date after which a student will incur a penalty for dropping a section.

California Localization

The fields and description in this section apply to California only.

Fields	Descriptions
Refund Date Number of Days	Number of days into the term until which students can receive refunds after dropping or withdrawing from the course.
Refund Date Percentage of Days	Percentage of days into the term until which students can receive refunds after dropping or withdrawing from the course.
Refund Date	Date until which students can receive refunds after dropping or withdrawing from the course.

Block Schedule Control (SSABLCK) page

Updated: August 27, 2020

Use the Block Schedule Control (SSABLCK) page to enter or display a set of sections related to a block code for a term.

This code can then be assigned to a student on the General Student (SGASTDN) page, the Student Course Registration (SFAREGS) page, or by the Student Block Load Process (SGPBLCK). This code can be used by the Student Course Registration (SFAREGS) page to default the sections related to the student's block code or in batch by Course Request and Scheduling processing.

This page is composed of the key block and the Block Schedule Control section.

Key block

Updated: August 27, 2020

Use the key block to specify the term and block code for which you are entering or displaying block schedule information.

Fields	Descriptions
Term	Code and description of the term.
Block	Code and description of the block schedule.

Block Schedule Control

Updated: August 27, 2020

Use this section of the page to create the sets of sections (blocks) to be used in registration. A section can be added by entering a valid CRN, or by entering a valid subject, course, and section number combination for the term.

If a section included in the Block Schedule Control section of the page is an open learning course, the instructional method and registration from/to dates will be displayed.

Fields	Descriptions
The following fields are in the Course and Section information.	
CRN	CRN of the course that is associated with the block code.
Multiple Block	Check box used to indicate whether the section of the course belongs to multiple blocks of courses. Valid values are selected (`Y`) and cleared (`Null`). Display only. This field is informational only and is not stored in the database.
Subject	Subject code associated with the CRN.
Course Number	Course number is a LOV and linked to the SSASECQ page.
Section	Section number associated with the CRN.
Status	Code of the status of the CRN. Display only.
Part of Term	Code of the part of term for the CRN. Display only.
The following fields are in the Hours information.	
Credit Hours	Credit hours associated with the CRN. The value in this field is the value that will be used in registration when the block is processed. The value defaults as follows: • If section level credit hours are defined

Fields	Descriptions
	on the Schedule (SSASECT) page, that value is entered in this field. • If no section level credit hours are assigned in SSASECT, the low end of the range of credit hours from the Basic Course Information (SCACRSE) page is entered in this field. If you enter a value, this is considered an override and will be used in registration. You can use this field to restrict a section to a single credit-hour value if the course is defined with variable credit hours on SCACRSE. The value entered must fall between the variable values.
Billing Hours	Billing hours associated with the CRN. The value in this field is the value that will be used in registration when the block is processed. The value defaults as follows: • If section level billing hours are defined on SSASECT, that value is entered in this field. • If no section level billing hours are assigned in SSASECT, the low end of the range of billing hours from SCACRSE is entered in this field. If you enter a value, this is considered an override and will be used in registration. You can use this field to restrict a section to a single billing-hour value if the course is defined with variable billing hours on

Fields	Descriptions
	SCACRSE. The value entered must fall between the variable values.
The following fields are in the Details information.	
Grade Mode	Grading mode associated with the CRN. The value in this field is the value that will be used in registration when the block is processed. The value defaults as follows: • If a section level grading mode is defined on SSASECT, that value is entered in this field. • If no section level grading modes are assigned in SSASECT, the low end of the range of grading modes from SCACRSE is entered in this field. If you enter a value, this is considered an override and will be used in registration. You can use this field to restrict a section to a single grading-mode value if the course is defined with variable grading modes on SCACRSE. The value entered must fall between the variable values.
Special Approval	Check box used to indicate whether special approval was required for the CRN and has been granted for students in the sections that were processed by block scheduling. Valid values are selected (`Y`) and (`Null`). Display only.
Campus Code	Code of the campus associated with the CRN. Display only.
Link Identifier	User-defined code to link two sections that must be taken concurrently. Display only.

Fields	Descriptions
Cross List	Code for the cross list group identifier associated with the CRN. Display only.
Schedule Type	Code of the schedule type associated with the CRN. Display only.
Instructional Method	Code of the instructional method code associated with the CRN, used with open learning. Display only.
The following fields are in the Registration information.	
Registration From Date	First date in the registration date range for the CRN, used with open learning. Display only.
Registration To Date	Last date in the registration date range for the CRN, used with open learning. Display only.
The following fields are in the Enrollment information.	
Maximum	Maximum enrollment for the CRN. Display only.
Actual	Actual enrollment for the CRN. Display only.
Remaining	Number of seats available for enrollment for the CRN. Display only.
The following fields are in the Totals information.	
Total Hours Credit	Total credit hours for the block of courses. Display only.
Total Hours Billing	Total billing hours for the block of courses. Display only.

Block Schedule Query (SSABLKQ) page

Updated: August 27, 2020

Use the Block Schedule Query (SSABLKQ) page to display all block schedule codes created for a term. If desired, you can enter a CRN to limit the display of block schedule codes to those to which the CRN belongs. A section can be assigned to multiple block schedules.

CRNs must have been assigned to a block schedule code on the Block Schedule Control (SSABLCK) page in order for the block schedule codes to be displayed on this page. You can access this page from SSABLCK.

The page is composed of the key block and the Block Schedule Query section.

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN on which you want to filter the data. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
CRN	CRN on which you are filtering.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Course title assigned on the Schedule (SSASECT) page. Display only.

Block Schedule Query

Updated: August 27, 2020

Use this section of the page to view the results of your filter.

Fields	Descriptions
Block Code	Code and description of the block.

Block Schedule Section Query (SSABSCQ) page

Updated: August 27, 2020

Use the Block Schedule Section Query (SSABSCQ) page to display all sections created for a block schedule code for a term. Sections are assigned to the block schedule code by the Block Schedule Control (SSABLCK) page.

This page is composed of the key block and the Block Schedule Section Query section.

Key block

Updated: August 27, 2020

Use the key block to specify the term and block code on which you are filtering the data.

Fields	Descriptions
Term	Code and description of the term.
Block	Code and description of the block.

Block Schedule Section Query

Updated: August 27, 2020

Use this section of the page to view the results of your filter.

Fields	Descriptions
The following fields are in the Course and Section information.	
CRN	CRN of the course that is associated with the block code.
Multiple Block	Check box used to indicate whether the section of the course belongs to multiple blocks of courses. Valid values are selected (`Y`) and cleared (`Null`).
Subject	Subject code associated with the CRN.
Course	Course number associated with the CRN. Display only.
Section	Section number associated with the CRN.
Status	Code of the status of the CRN.
Part of Term	Code of the part of term for the CRN.
The following fields are in the Hours information.	
Credit Hours	Credit hours associated with the CRN.
Billing Hours	Billing hours associated with the CRN.
The following fields are in the Details information.	

Fields	Descriptions
Grade Mode	Grading mode associated with the CRN.
Special Approval	Check box used to indicate whether special approval was required for the CRN and has been granted for students in the sections that were processed by block scheduling. Valid values are selected (`Y`) and (`Null`). Display only.
Campus Code	Code of the campus associated with the CRN.
Link Identifier	User-defined code to link two sections that must be taken concurrently.
Cross List	Code for the cross list group identifier associated with the CRN.
Schedule Type	Code of the schedule type associated with the CRN.
Instructional Method	Code of the instructional method code associated with the CRN, used for open learning.
The following fields are in the Registration information.	
Registration From Date	First date in the registration date range for the CRN, used for open learning.
Registration To Date	Last date in the registration date range for the CRN, used for open learning.
The following fields are in the Enrollment information.	
Maximum	Maximum enrollment for the CRN.
Actual	Actual enrollment for the CRN.
Remaining	Number of seats available for enrollment for the CRN.

Section Labor Distribution (SSACLBD) page

Updated: August 27, 2020

The Section Labor Distribution (SSACLBD) page is used to build and maintain job labor distribution data at the section level (CRN) for adjunct faculty assignments.

Labor distribution data is entered in Banner® Human Resources. The use of labor distribution information is optional. If this information is not entered on SSACLBD, the FOAPAL (fund, organization, account, program, activity, location) distribution for the associated position is used. The data on SSACLBD is used to override the budget factors associated with the funding of a specific position in Banner Human Resources that has been assigned to the employee on SIAASGN.

Note: The class section must first have been created using the Schedule (SSASECT) page, before using the Schedule Labor Distribution (SSACLBD) page.

Schedule labor distribution data defaults into the Class Schedule module (SSACLBD) based on the course labor distribution information defined in the Course Catalog module (SCACLBD). The defaulted information can be overridden to create section specific labor distribution records. Overrides take place when FOAPAL information exists on SSACLBD, and the **Use Schedule Labor Distributions** check box is selected on the Faculty Load Contract Type Control Rules (PTRFLCT) page in Banner Human Resources. When this box is selected to use overrides with course-based faculty, a unit method is used to determine the appropriate FOAPAL distribution. However, unit method processing is *not* advised for job labor distribution overrides. FOAPAL overrides do not apply to non-instructional assignments.

Processing takes place as follows:

- If the FOAPAL exists on SSACLBD for the CRN, and the **Use Schedule Labor Distributions** check box is selected (Y), the Faculty Load Extract Process (PEPFLAC) will use the FOAPAL for the CRN, and it will be defaulted to the job.
- If the FOAPAL exists on SSACLBD for the CRN, but the **Use Schedule Labor Distributions** check box is cleared (N), the Faculty Load Extract Process (PEPFLAC) will use the FOAPAL for the position, and it will be defaulted to the job.
- If the FOAPAL does not exist on SSACLBD for the CRN, but the **Use Schedule Labor Distributions** check box is selected (Y), the Faculty Load Extract Process (PEPFLAC) will use the FOAPAL for the position, and it will be defaulted to the job.
- If Banner® Finance is not installed, the positions are funded through external account codes.

The page displays one of two sets of data, one if Banner Finance is installed and the other if Banner Finance is not installed. When Banner Finance is installed, FOAPAL data is validated by part of term or the effective term end date on STVTERM if no part of term exists. This ensures that the FOAPAL elements are valid until that date. If Banner Finance is not installed, the **External Account Code** field must be entered, and no validation takes place.

Note: Banner Finance requires a timestamp. A midnight timestamp will be associated with the end date when the date is submitted for validation.

From this page you can access SIAASGN and view faculty assignments, access SSASECT and view term section details, and access SSACLBD and view schedule labor distribution information.

Banner Finance installed view

Updated: August 27, 2020

This page contains the key block and the Schedule Labor Distribution section. This following page view is displayed when Banner Finance is installed.

Key block

Updated: August 27, 2020

Use the key block to enter the term, CRN, subject, and course for the course labor distribution. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term associated with the subject and course for the labor distribution record.
CRN	CRN of the section.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject of the course for the labor distribution record.
Course	Course number for the labor distribution record.
Title	Title of the selected course.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Schedule Labor Distribution

Updated: August 27, 2020

Use this section of the page to enter the Chart of Accounts information for the labor distribution record.

Fields	Descriptions
COA	Chart of Accounts code for the record from FTVCOAS.
Index	Account index code for the record from FTVACCI.
Fund	Fund code for the record from FTVFUND. The grant data is not available in the lookup for the field.
Organization	Organization code for the record from FTVORGN.
Account	Account code for the record from FTVACCT.
Program	Program code for the record from FTVPROG.
Activity	Activity code for the record from FTVACTV.
Location	Location code for the record from FTVLOCN.
Project	Project code for the record from FTVPROJ.
Cost	Cost code for the record from FTMCTYP.
Percent	Amount of distribution percentage. The total of all percentage distributions must equal 100%. If total does not equal 100%, an error message is displayed when you try to save the record.
Total Percent	Total of percentage of contract value. This field is populated when the records are saved and must equal 100%.

Banner Finance not installed view

Updated: August 27, 2020

This page contains the key block and the Schedule Labor Distribution section. This following page view is displayed when Banner Finance is `not` installed.

Key block

Updated: August 27, 2020

Use the key block to enter the term, CRN, subject, and course for the course labor distribution. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term associated with the subject and course for the labor distribution record.
CRN	CRN of the section.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject of the course for the labor distribution record.
Course	Course number for the labor distribution record.
Title	Title of the selected course.

Schedule Labor Distribution

Updated: August 27, 2020

Use this section of the page to enter the account code information for the labor distribution record, for non-Banner Finance users.

Fields	Descriptions
External Account Code	Free form account code that allows updates to an accounting system other than Banner Finance.
Percent	Amount of distribution percentage. The total of all percentage distributions must equal 100%. If total does not equal

Fields	Descriptions
	100%, an error message is displayed when you try to save the record.
Total Percent	Total of percentage of contract value. This field is populated when the records are saved and must equal 100%.

Scheduling Tool Interface Control (SSACTRL) page

Updated: August 27, 2020

Use the Scheduling Tool Interface Control (SSACTRL) page to enter or display the control file parameters necessary to run Schedule25 auto scheduling processing.

Main window

Updated: August 27, 2020

The main window is composed of the key block and the Processing Parameters section.

Key block

Updated: August 27, 2020

Use this block to enter the required term and campus code for which you want to enter or display Schedule25 parameter information.

The term in the key block is an effective start term when you are creating new control rules. It is possible for the institution to carry the same parameter values for multiple terms without having to enter each term individually.

Fields	Descriptions
Term	Code of the term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list.

Fields	Descriptions
	List Term Code Validation (STVTERM) Duplicate Item View Existing Control Records List
Campus	Code of the campus. If you leave this field blank, the parameters will apply to all campuses for that effective term. Select the **Search** button for this field to display the Campus Code Validation (STVCAMP) list. List Campus Code Validation (STVCAMP)

Processing Parameters section

Updated: August 27, 2020

Use this section to enter or display Schedule25 parameters for the term and campus (if one is entered) specified in the key block.

Use a Go button function or select Processing Parameters from the Options Menu to access this section.

The **Maintenance** button allows you to copy all control file values from one effective term range to another or to terminate the term range. The term range represented on the page should be read as the **From Term** up to but not including the **To Term** (or the end of time if the **To Term** is displayed as 999999).

The **Maintenance** button is activated only when the term entered in the key block is between the from and to terms on the corresponding database record. Otherwise, the button is inactive. If you select the button when it is active, the Option List that is displayed allows you to copy control file parameters or end control file parameters.

For more information on how these control values influence the scheduling of classes, see the third party *Schedule25 Processing Manual*.

Fields	Descriptions
The following fields are in the Processing Parameters section.	
Number of Weeks in Term	Number of weeks in the term for Schedule25 processing. Valid values are whole numbers from `1` to `54`. The default value is `20`.
Maximum Length of Descriptor Record	Maximum length of the descriptor record for Schedule25 processing. Valid values are whole numbers from `80` to `253`. The default is `80`.
Mini-Classes	Indicator for whether mini-classes are allowed for Schedule25 processing. Valid values are `YES`, `NO`, and `DATES`. The default value is `NO`.
Sum Cross-listed Enrollments	Indicator for whether cross-listed enrollments are to be summed for Schedule25 processing. Valid values are `YES` and `NO`. The default value is `NO`.
Earliest Start Time	First time of day at which sections can begin meeting, used for Schedule25 processing. The value must be entered in 24-hour time and cannot be greater than the value in the **Latest Finish Time** field. The default value is `0001`.
Latest Finish Time	Last time of day at which sections can end meeting, used for Schedule25 processing. The value must be entered in 24-hour time and cannot be less than the value in the **Earliest Start Time** field. The default value is 2400.
Extra Finish Minutes	Additional time added to the class time in minutes for Schedule25 processing.

Fields	Descriptions
	Valid values are `null` and whole numbers from `0` to `30`. The default is `0`.
Default Enrollment	Default enrollment allowed for a course for Schedule25 processing. A valid value is any combination of up to four numbers. The default is `35`. If no enrollment is defined for the section (`SSBSECT_MAX_ENRL`), this value is used when building the Class Descriptor data file in SSRSCRM.
Default Enrollment Indicator	Designated default enrollment for a course for Schedule25 processing. The default is `****`.
Enrollment Adjuster	Percentage of enrollment adjustments for Schedule25 processing. A valid value is any percentage in `9.99` format; for example, 20% is expressed as `0.20`. The default value is `0.90`.
Minimum Correct Input Fraction	Percentage of minimum corrections to enrollment for Schedule25 processing. A valid value is any percentage in `9.99` format; for example, 20% is expressed as `0.20`. The default value is `0.10`.
Enrollment/Seats	Percentage of minimum possible ratio of enrollments to seats for Schedule25 processing. A valid value is any percentage in `9.99` format; for example, '20%' is expressed as `0.20`. The default value is `0.20`.
The following fields are in the Abbreviations section and identify the abbreviations used for the days of the week. This section is display only.	

Fields	Descriptions
Warning! Warning! It is critical that these values remain consistent with those defined in the meeting time record. This data will be used to reintegrate the scheduled classroom information back into Banner®.	
Sunday	Abbreviation to be used for Sunday for Schedule25 processing. The default value is U.
Monday	Abbreviation to be used for Monday for Schedule25 processing. The default value is M.
Tuesday	Abbreviation to be used for Tuesday for Schedule25 processing. The default value is T.
Wednesday	Abbreviation to be used for Wednesday for Schedule25 processing. The default value is W.
Thursday	Abbreviation to be used for Thursday for Schedule25 processing. The default value is R.
Friday	Abbreviation to be used for Friday for Schedule25 processing. The default value is F.
Saturday	Abbreviation to be used for Saturday for Schedule25 processing. The default value is S.

Class Descriptor File Definition Parameters window

Updated: August 27, 2020

Use this window to define the parameters to be used for the Class Descriptor file.

Use a Go button function or Select File Definition Parameters from the Options Menu to access this window.

Use extreme caution in changing the values in this window, as they represent the placement of the Banner data in the Class Descriptor file. This could result in the overlaying of data over an existing data element, thereby causing exceptions or errors in Schedule25 processing.

Fields	Descriptions
The following fields are in the First Column section.	

Fields	Descriptions
Start Week	Start week of the class for the Class Descriptor file. A valid value is any two-digit number greater than zero. The default value is `50`.
Start Hours	Start hours of the class for the Class Descriptor file. A valid value is any two-digit number. The default value is `62`.
Start Minutes	Start minutes of the class for the Class Descriptor file. A valid value is any two-digit number. The default value is `64`.
Finish Week	Week the class ends for the Class Descriptor file. A valid value is any two-digit number greater than zero. The default value is `56`.
Finish Hours	Hours the class has met when completed for the Class Descriptor file. A valid value is any two-digit number. The default value is `66`.
Finish Minutes	Minutes the class has met for the Class Descriptor file. A valid value is any two-digit number. The default value is `68`.
Begin Month	Month the class begins for the Class Descriptor file.

Fields	Descriptions
	This field is required if the **Mini-Classes** field in the Processing Parameters section has been set to `DATES`. A valid value is any two-digit number. The default value is `52`.
Begin Day of Week	Day of the week the class begins for the Class Descriptor file. This field is required if the **Mini-Classes** field in the Processing Parameters section has been set to `DATES`. A valid value is any two-digit number. The default value is `54`.
End Month	Month the class ends for the Class Descriptor file. This field is required if the **Mini-Classes** field in the Processing Parameters section has been set to `DATES`. A valid value is any two-digit number. The default value is `58`.
End Day of Week	Day of the week the class ends for the Class Descriptor file. This field is required if the **Mini-Classes** field in the Processing Parameters section has been set to `DATES`. A valid value is any two-digit number. The default value is `60`.
A/P Designator	AM/PM designator for the Class Descriptor

Fields	Descriptions
	file. A valid value is any two-digit number. The default value is `76`.
Enrollment	Enrollment for the class for the Class Descriptor file. A valid value is any two-digit number less than or equal to 73. (The value entered here plus 4 cannot total more than 77.) The default value is `72`.
The following fields are in the First Column and Length section.	
Room Name First Column	First column of room name for the Class Descriptor file. A valid value is any two-digit number. The default value is `21`.
Days First Column	First column of days for the Class Descriptor file. A valid value is any two-digit number. The default value is `38`.
Departmental ID First Column	First column of departmental ID for the Class Descriptor file, which consists of the concatenated values of the section's subject, CRN, and term. A valid value is any two-digit number. The default value is `1`.
Room Name Length	Length of room name for the Class Descriptor file.

Fields	Descriptions
	A valid value is any two-digit number. The default value is `16`.
Days Length	Length of days for the Class Descriptor file. A valid value is any two-digit number from `7` to `14`. The default value is `7`.
Departmental ID Length	Length of the departmental ID for the Class Descriptor file. A valid value is any two-digit number. The default value is `19`.
Activity Date	Date on which the record was last updated. Display only.

Schedule Detail (SSADETL) page

Updated: August 27, 2020

Use the Schedule Detail (SSADETL) page to enter or display detail schedule information, according to the definitions and restrictions created in the Course Catalog. You must have first created sections using the Schedule (SSASECT) page, before they can be accessed using SSADETL.

The page is composed of the following sections:

- key block
- Section Links
- Corequisites
- Section Fees
- Degree Program Attributes
- Section Contracts

- Block Schedules

Key block

Updated: August 27, 2020

Use the key block to specify the section for which you want to enter or display detail schedule information. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
CRN	CRN of the section.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Title of the course, automatically displayed when valid values have been entered in all of the key block fields. Display only.

Section Links

Updated: August 27, 2020

Use this section of the page to enter or display link connector(s) associated with the section specified in the key block. Use the Section Links section to access this section of the page.

The link connectors are used by the Registration module to link the section with the section identifier. If section links are created, a student must register in all the sections concurrently. The system displays an error message if a student tries to register in only part of a linked set of sections.

Note: Registration link errors must be defined for the term in the Term Control (SOATERM) page in order for the system to generate error messages for linked courses at registration.

Fields	Descriptions
Link Connector	User-defined code to identify the linked sections.

Corequisites

Updated: June 15, 2023

Use this section of the page to enter or display section corequisites for the section specified in the key block. Use the Section Corequisites Tools menu option to access this section of the page.

The Registration module uses section corequisites to ensure that students register for all sections that must be taken concurrently. A section corequisite need not be a subset of the course-level corequisites; however, it must already exist for the term. Corequisites are entered by CRN.

Course-level corequisites define which courses must be taken concurrently with a specified course, that is, any section of the corequisite course will satisfy the course-level corequisite.

Section-level corequisites specify which specific sections must be taken concurrently with the section in the key block.

Fields	Descriptions
CRN	CRN of the section corequisite for the section.
Description (untitled)	Description of the CRN, automatically displayed when a valid value is entered in the **CRN** field. Display only.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Section	Section number associated with the CRN. Display only.

Section Fees

Updated: August 27, 2020

Use this section of the page to enter or display section fee information associated with the section specified in the key block. Use the Section Fees section to access this section of the page.

The section fee information will default from the course level fee information established in the Course Detail Information (SCADETL) page when the section is added. Fees can be either flat charges or per-credit hour charges. The section fees are used in processing fee assessment within the Registration module to determine the cost for a student.

Note: If changes are made to section fees after students have enrolled in the section, a message is displayed that fees need to be re-assessed. In addition, a record is written to the Batch Fee Assessment Collector Table (SFRBTCH) for each student enrolled in the section. The Registration Fee Assessment Process (SFRFASC), run with a batch type of C (Collector mode), can be used to correct the fee assessments for all students in the section.

Information can also be maintained in this section for student curriculum rules and student rules for registration fee assessment processing for course sections.

Fields	Descriptions
These fields are in the Section Fees information.	
Course Level	Code and description of the course level associated with the fee.
Detail Code	Code and description of the detail code associated with the fee.
Amount	Amount associated with the detail code, automatically displayed when a valid value is entered in the **Detail** field, although you can change it.
Fee Type	Code of the fee type, such as flat fee, per credit hour, per billing hour, per duration unit, used in the fee assessment calculation for a student's registration fees for a section/course. • If a code of `FLAT` is assigned, no calculation will be made. The fee in the **Amount** field will be applied to the student's account. • If a code of `CRED` is entered, the amount entered will be multiplied by

Fields	Descriptions
	the credit hours of the section. • If a code of BILL is entered, the amount entered will be multiplied by the billing hours of the section. • If a code of `DURN` is entered, the amount will be multiplied by the duration units assigned to the section. If fees are to be assessed based on a duration unit, this information must be defined for the section before entering fee rules.
Duration Unit	Duration units defined for the section on SSASECT. Fees can be charged based on the section duration units. If you choose to assess fees based on the duration units, the course must be defined with duration information. Otherwise, an error message is displayed if the per duration unit (`DURN`) fee type is used, and duration information has not been created for the section in SSASECT.
These fields are in the Student Curriculum information.	
Student Level	Student level for the fee assessment rule.
Campus	Campus for the fee assessment rule.
College	College for the fee assessment rule.
Degree	Degree for the fee assessment rule.
Program	Program for the fee assessment rule.
Field of Study Type	Learner field of study type for the fee assessment rule from GTVLFST.
Field of Study Code	Field of study code for the fee assessment

Fields	Descriptions
	rule.
Department	Department for the fee assessment rule.
Admission Term	Admission term for the fee assessment rule.
Curricula Rate	Fee assessment rate code on the curriculum record for the fee assessment rule.
Curricula Student Type	Student type code on the curriculum record for the fee assessment rule.
Curricula	Curriculum for the fee assessment rule. Valid values are Primary, Secondary, Any.
These fields are in the Student information.	
Residency	Residency for the fee assessment rule.
Student Attribute	Student attribute for the fee assessment rule.
Student Rate	Fee assessment rate for the fee assessment rule.
Student Type	Student type for the fee assessment rule.
Cohort	Cohort for the fee assessment rule.
Class	Class for the fee assessment rule.
Visa Type	Visa type for the fee assessment rule. The visa type is required for processing visa type rules. The matching visa type and visa number must also exist on GOAINTL.

Degree Program Attributes

Updated: August 27, 2020

Use this section of the page to enter or display degree program attributes associated with the section specified in the key block. Use the Degree Program Attributes section to access this section of the page.

Fields	Descriptions
Attribute	Code and description of the attribute associated with the section. If any attributes were created at the course level, they will default here. Defaulted attributes can be deleted and other attributes can be added.

How degree attributes move from catalog to academic history

Updated: August 27, 2020

Information on how to move degree attributes from catalog to academic history.

About this task

Procedure

1. Degree attributes are entered in the Course Catalog module (SCADETL).
2. A new schedule record is created in the Class Schedule module, and the catalog attributes populate the schedule attributes (SSADETL).

   Note: This is the reason that degree attributes exist on the catalog record, so they can be defaulted into the schedule record.
3. A student registers for the section, and the section is graded and rolled to history.
4. For the first student that is rolled in the section, the schedule degree attributes are used to populate the history degree attributes (SHRATTC table).
5. The History Course Section Attribute Table (SHRATTR), which is used in CAPP, is populated from SHRATTC.
6. Other students register for the section and have grades rolled. The contents of SHRATTC are used to populate the student's degree attributes.
7. You can view the rolled section degree attributes (SHRATTC) on SHADEGR and SHATCKN, although they are not updateable.
8. To customize the degree attributes on a student's record (SHRATTR), you can insert

or delete data from on SHADEGR.

Section Contracts

Updated: August 27, 2020

Use this section of the page to enter or display contract information for the section specified in the key block. No processing is performed with this information. Use the Contracts section to access this section of the page.

Fields	Descriptions
Contract	Code and description of the company or other entity that has contracted for the section.
Percentage	Total percentage of the contract.
Primary Indicator	Check box used to specify that this is the primary contract for the course if multiple contracts exist.

Block Schedules

Updated: August 27, 2020

Use this section of the page to enter or display block schedule information, which will be used during registration. Use the Block Schedules section to access this section of the page.

The special approval override will be established here if a special approval code has been assigned to the section. Low hours for variable credit sections and the default grading mode for sections with multiple grading modes will be assigned to this CRN for the block schedule code. If overrides are desired for the entire block schedule code, the data must be altered on the Block Schedule Control (SSABLCK) page. If overrides are desired for an individual student, these defaults must be changed on the Student Course Registration (SFAREGS) page. Sections may be added to or deleted from blocks at any time. If the section is deleted, all block relationships to that section will also be deleted.

Fields	Descriptions
Block	Code and description of the block schedule for the section.

Fields	Descriptions
Special Approval	Check box used to indicate that special approval exists for overrides. Display only.

Grading in SSADETL

Updated: March 21, 2024

Use SSADETL - Grading to enable anonymous grading for a specific CRN in a specific term.

Field	Description
Grading by Anonymous ID	To enable anonymous grading for a section for a specific term, click **Yes**; otherwise, click **No**.

Section Fee Assessment Control (SSADFEE) page

Updated: August 27, 2020

Use the Section Fee Assessment Control (SSADFEE) page to enter or display the rules for tuition charges that vary based on the course level, type of course, and instructional expenses related to the course.

Checking is done by term, schedule type, level, and detail code. You can also view student curriculum rule and student rule data.

Note: Before information can be entered on this page, the levels must be established on the Level Code Validation (STVLEVL) page, schedule types must be defined on the Schedule Type Code Validation (STVSCHD) page, and detail codes must exist on the Detail Code Control (TSADETC) page.

Use this page to define section level fees to be defaulted into the SSRFEES table when a new section is created. You can perform mass population of section level fees for existing sections. Additional section characteristics allow you to provide more criteria for the determination of appropriate courses to receive the fee rules.

The section/course characteristic and associated fee definitions are defined by the user. To insert the level, detail code(s), amount, fee type, and rule information into the SSRFEES table for existing sections, you must run a batch process that will also produce an exception report if processing errors are encountered.

The fields on SSADFEE represent section/course characteristics and should be considered optional. These fields will be used only for the identification of the appropriate section records and not for use in the fee assessment process itself.

The SSADFEE rules roll automatically when SSRROLL is run in Update mode.

This page is composed of the following sections:

- key block
- Section Fees

Key block

Updated: August 27, 2020

Use the key block to specify the term for which you want to enter or display section level fees.

Fields	Descriptions
Term	Code and description of the term.

Section Fees Assessment Control

Updated: August 27, 2020

Use this section of the page to define the section level fees for fee assessment for the term specified in the key block. You can also maintain student curriculum rules and student rules for registration fee assessment processing for course sections.

Fields	Descriptions
These fields are in the Section Characteristics & Fees information.	
Section College	College code assigned to sections using the course record.
Section Department	Department code assigned to sections using the course record.
Section Campus	Campus code assigned to sections using the course record.
Schedule Type	Code of the schedule type assigned to sections using the course record.
Instructional Method	Instructional method code assigned to sections using the course record.
Section Level	Code of level assigned to sections using the course record.
Detail Code	Code and description of the detail code assigned to sections using the course record.
Amount	Monetary amount of the charge associated with the detail code. The system defaults in the amount, but you can change it.
Fee Type	Code of fee type of the course section fee, such as flat fee, per credit hour, per billing hour, per duration unit, and so on. This field represents the basis for registration fee assessment. • If a code of `FLAT` is assigned, no calculation will be made in the fee assessment process. • If a code of `CRED` is entered, the amount entered will be multiplied by the billing hours of the section. • If a code of `DURN` is entered, the amount will be multiplied by the duration units assigned to the section.
These fields are in the Student Curriculum information.	
Level	Level for the fee assessment rule.
Campus	Campus for the fee assessment rule.
College	College for the fee assessment rule.
Degree	Degree for the fee assessment rule.
Program	Program for the fee assessment rule.
Field of Study Type	Learner field of study type for the fee assessment rule from GTVLFST.

Fields	Descriptions
Field of Study Code	Field of study code for the fee assessment rule.
Department	Department for the fee assessment rule.
Admission Term	Admission term for the fee assessment rule.
Curricula Student Type	Student type code on the curriculum record for the fee assessment rule.
Curricula Rate	Fee assessment rate code on the curriculum record for the fee assessment rule.
Curricula	Curriculum for the fee assessment rule. Valid values are Primary, Secondary, Any.
These fields are in the Student Rule information.	
Residency	Residency for the fee assessment rule.
Student Attribute	Student attribute for the fee assessment rule.
Student Rate	Fee assessment rate for the fee assessment rule.
Student Type	Student type for the fee assessment rule.
Cohort	Cohort for the fee assessment rule.
Class	Class for the fee assessment rule.
Visa Type	Visa type for the fee assessment rule.

Schedule Evaluation (SSAEVAL) page

Updated: August 27, 2020

Use the Schedule Evaluation (SSAEVAL) page to enter or display evaluation information for a section by instructor.

If more than one instructor exists for a section, individual instructors will have their own evaluation information. This is displayed in the Instructors section of the page, and when the instructor record is selected, the evaluation information for that instructor is displayed in the Section Evaluation section of the page.

The evaluation questions are defined to the system using the Evaluation Code Validation (STVEVAL) page. Sections and instructors must be defined using the Schedule (SSASECT) page. All evaluation questions defined in STVEVAL will be used in SSAEVAL.

Scores entered in SSAEVAL should reflect a summary score of all evaluation forms completed for the section.

This page is composed of the following sections:

- key block
- Instructors
- Section Evaluation

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to enter or display evaluation information. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
CRN	Course reference number.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Title of the selected course. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Instructors

Updated: August 27, 2020

Use this section of the page to select the instructor for whom you want to enter or display evaluation information.

When an instructor record is selected, the section evaluation information for that record is displayed in the Section Evaluation section of the page. Use the **Section Comments** button to access SSATEXT and enter or review short or long comment text for the section.

Fields	Descriptions
Section Comments	Button used to access SSATEXT and enter short and long comment information.
ID	ID of the faculty member whose evaluation information you want to enter or display. Display only.
Name	Name associated with the ID. Display only.
Primary Indicator	Check box used to indicate whether the instructor is the primary instructor for the section. Display only.

Section Evaluation

Updated: August 27, 2020

Use this section of the page to enter or display course evaluation information for the instructor selected in the Instructors section of the page. The records in this section are child records of the master records in the Instructors section.

Fields	Descriptions
The following fields are in the Question information.	
Question	Number associated with the question, as defined on STVEVAL, such as 1, 2, 3, and so on.
Description	Text of the question, as defined on STVEVAL, such as `Rate the course overall`, `Rate instructor`, and so on.
The following fields are in the Low - - Score - - High information.	
1	Number of students who provided a section evaluation score of 1 for the specific question, such as Rate the course, Rate the instructor, Rate the course texts, Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
2	Number of students who provided a section evaluation score of 2 for the

Fields	Descriptions
	specific question, such as Rate the course, Rate the instructor, Rate the course texts, Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
3	Number of students who provided a section evaluation score of 3 for the specific question, such as Rate the course, Rate the instructor, Rate the course texts, Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
4	Number of students who provided a section evaluation score of 4 for the specific question, such as Rate the course, Rate the instructor, Rate the course texts, Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
5	Number of students who provided a section evaluation score of 5 for the specific question, such as Rate the course, Rate the instructor, Rate the course texts, Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
6	Number of students who provided a section evaluation score of 6 for the specific question, such as Rate the course, Rate the instructor, Rate the course texts, Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
7	Number of students who provided a section evaluation score of 7 for the specific question, such as Rate the course, Rate the instructor, Rate the course texts,

Fields	Descriptions
	Rate the effectiveness of exams, Rate lab content, and so on. Ratings are on a scale of 1 to 7, with `1` being low and `7` being high.
The following fields are in the Summary information.	
1	Summary of ratings totals for the evaluation questions.
2	Summary of ratings totals for the evaluation questions.
3	Summary of ratings totals for the evaluation questions.
4	Summary of ratings totals for the evaluation questions.

Schedule Exclusion Rules (SSAEXCL) page

Updated: August 27, 2020

The Schedule Exclusion Rules (SSAEXCL) page provides the dates within a calendar year and for each part of term that are excluded from the class meeting information.

Holidays, in-service days, and breaks within the part of term can be specified here to prevent these days from being counted in the number of section meetings. Rules should be defined on SSAEXCL, before sections are created on SSASECT.

This page is composed of the following sections:

- key block
- Schedule Exclusion Rules

Key block

Updated: August 27, 2020

Use the key block to specify the calendar year and part of term for which you want to enter or display excluded dates. To default dates from another part of term, complete the key block and select the **Default** button while still in the key block.

Fields/Buttons	Descriptions
Year	Calendar year for the excluded dates.
Part of Term	Code and description of the part of term code for the excluded dates.
Default	Button used to access the Default Schedule Exclusions window. This button is enabled when part of term values exist for the year, and no exclusion dates are defined for the year/part of term combination.

Default Schedule Exclusions window

Updated: August 27, 2020

Use this window to specify a part of term from which the system should default values to the part of term specified in the key block.

Use the **Default** button to access this window while you are in the key block and after you have entered the year and part of term. Use the **Process Default** button to process information associated with the **(Default) Part of Term** value.

Fields/Buttons	Descriptions
(Default) Part of Term	Code and description for the part of term whose date exclusions are to be defaulted.
Process Default	Copies all date exclusions to the part of term specified in the key block.

Schedule Exclusion Rules

Updated: August 27, 2020

Use this section of the page to specify the dates that are excluded from the class meeting information for the year and part of term combination specified in the key block.

Fields	Descriptions
Exclude Date	Date to be excluded from scheduling.
Day	Day of week on which the date falls, automatically displayed when a valid value is entered in the **Date** field. Display only.

Fields	Descriptions
Description	Free form text field (up to 30 characters) for the reason for excluding the associated date from scheduling.

Building/Room Schedule (SSAMATX) page

Updated: August 27, 2020

Use the Building/Room Schedule (SSAMATX) page to display information about buildings and rooms scheduled for events, functions, and courses.

You can filter data for all scheduled buildings and rooms, or you can filter data for specific selection criteria. The page is run in filter only mode, and no changes can be made to any fields. Data is not returned to a calling page from this page.

This page helps you resolve building, room, and time conflicts by answering the following kinds of questions:

- When is a building or room scheduled for use?
- What is the meeting pattern for a building or room?
- What events, functions, and courses are scheduled for a building or room?

Information comes from the page where the event, function, or course was scheduled:

- Event (SLAEVNT) page
- Event Function (GEAFUNC) page
- Schedule (SSASECT) page

This page uses advanced filtering for queries. You can filter data on the default **Term** field and add elements to the filter criteria as needed.

This page contains the Advanced Filter section and the Query Results section.

Advanced Filter

Updated: August 27, 2020

Use this section of the page to specify the criteria for which you want to display building and room information. You can add elements to the advanced filter criteria as needed to refine the query. Each element has an operator defined in the **Contains** field.

Use the **Delete** (-) button or the **Clear All** button to remove added fields from the filter or the **Go** button to view the results of the filter.

Fields	Descriptions
Term	Code and description of the term. The term is not required.
Contains	Displays a list of operators for each field in the advanced filter.
Add Another Field...	Displays a list of fields that can be added to the advanced filter.
Clear All	Button used to remove added fields. The advanced filter can then be re-entered.
Go	Button used to view the advanced filter results.

Query Results

Updated: August 27, 2020

Use this section of the page to review the data for the buildings and rooms returned for the criteria in the Advanced Filter section. The number of records found is displayed. You can sort on the fields in this section of the page.

Fields/Buttons	Descriptions
Filter Again	Button used to return to the Advanced Filter section to perform another filter.
The following fields are in the Query Results information.	
Building	Building scheduled at your institution for courses, events, or functions.

Fields/Buttons	Descriptions
	This value comes from the **Building** field on the page where the building was scheduled. The source cannot be changed.
Room	Room scheduled at your institution for courses, events, or functions. This value comes from the **Room** field on the page where the room was scheduled. The source cannot be changed.
Campus	Campus where the scheduled building is located. This value comes from the **Campus** field on SLABLDG. The source cannot be changed.
Monday	Check box used to specify that the building or room is scheduled for Mondays. The value comes from the applicable day of the week field on the page where the building or room was scheduled. The source cannot be changed.
Tuesday	Check box used to specify that the building or room is scheduled for Tuesdays. The value comes from the applicable day of the week field on the page where the building or room was scheduled. The source cannot be changed.
Wednesday	Check box used to specify that the building or room is scheduled for Wednesdays. The value comes from the applicable day of

Fields/Buttons	Descriptions
	the week field on the page where the building or room was scheduled. The source cannot be changed.
Thursday	Check box used to specify that the building or room is scheduled for Thursdays. The value comes from the applicable day of the week field on the page where the building or room was scheduled. The source cannot be changed.
Friday	Check box used to specify that the building or room is scheduled for Fridays. The value comes from the applicable day of the week field on the page where the building or room was scheduled. The source cannot be changed.
Saturday	Check box used to specify that the building or room is scheduled for Saturdays. The value comes from the applicable day of the week field on the page where the building or room was scheduled. The source cannot be changed.
Sunday	Check box used to specify that the building or room is scheduled for Sundays. The value comes from the applicable day of the week field on the page where the building or room was scheduled. The source cannot be changed.
Start Time	Start time for the scheduled course, event,

Fields/Buttons	Descriptions
	or function. Displayed in 24-hour time; for example, 10:30 AM is displayed as `1030`, and 7:00 PM is displayed as `1900`. The value comes from the **Start Time** field on the page where the building or room was scheduled. The source cannot be changed.
End Time	End time for the scheduled course, event, or function. Displayed in 24-hour time; for example, 11:00 AM is displayed as `1100`, and 9:30 PM is displayed as `2130`. The value comes from the **End Time** field on the page where the building or room was scheduled. The source cannot be changed.
Term	Term associated with the displayed scheduling information. For a course, the term code for the course is displayed. For an event or function, the word EVENT is displayed. For courses, this value comes from the **Term** field SSASECT. The source cannot be changed. For events and functions, the word EVENT is displayed. The source cannot be changed.
Start Date	Start date for the scheduled course, event, or function.

Fields/Buttons	Descriptions
	This value comes from the **Start Date** field on the page where the building or room was scheduled. The source cannot be changed.
End Date	End date for the scheduled course, event, or function. This value comes from the **End Date** field on the page where the building or room was scheduled. The source cannot be changed.
Subject	Subject or event scheduled for the building or room. For courses, this value comes from the **Subject** field on SSASECT. The source cannot be changed. For events and functions, this value comes from the **Event** field on SLAEVNT or GEAFUNC. The source cannot be changed.
Course Number	Course number scheduled for the building or room. This value comes from the **Course Number** field SSASECT. The source cannot be changed.
Course Alias	The values in the Course Alias field are read-only and populated if Course Alias is defined on SCACRSE page for the appropriate Subject, Term and Course combination.
CRN	Reference number of the course scheduled

Fields/Buttons	Descriptions
	for the building or room. This value comes from the **Course Reference Number** field SSASECT. The source cannot be changed.
Cross List	Cross list group code. This value comes from the **Cross List** field on SSASECT. The source cannot be changed.
Function	Function scheduled for the building or room. This value comes from the **Function** field on SLAEVNT or GEAFUNC. The source cannot be changed.
The following buttons are at the bottom of the page.	
Cancel	Button used to cancel the filter.
Select	Button used to return a selected record to the calling page.

Schedule Override (SSAOVRR) page

Updated: August 27, 2020

Use the Schedule Override (SSAOVRR) page to override catalog values at the section level.

You can override the following:

- college code
- division code
- department code

- taxonomy of program code

This page is composed of the following sections:

- key block
- Schedule Override

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to enter or display override information. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
CRN	Course reference number.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Title of the course, as maintained on the Basic Course Information (SCACRSE) page. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Schedule Override

Updated: August 27, 2020

Use this section of the page to enter or display override information for the term and CRN specified in the key block.

Fields	Descriptions
College	Code and description of the college for the section catalog override.
Division	Code and description of the division for the section catalog override.

Fields	Descriptions
Department	Code and description of the department for the section catalog override.
Taxonomy of Program	Code and description of the taxonomy of program for the section catalog override.

Elective Pool (SSAPOOL) page

Updated: August 27, 2020

Use the Elective Pool page to add multiple classes to the elective pool at one time.

Before you begin

Use the **Section Attribute for Elective Pool** field on SOATERM to assign an attribute for an elective in a specific term.

Procedure

1. Enter a value for **Term** and any other fields that match the search criteria for the CRNs that you want to add to the elective pool. You must enter at least a term to perform a search. If you select the **Pool** check box, only the CRNs that are already in the pool will be displayed.

   Result: The system will display a list of CRNs that meet your search criteria.

2. Select the check box next to the CRNs that you want to include in the elective pool.

   Result: The attribute for the elective pool has been assigned to each of those CRNs. You will see it on the Schedule Detail (SSADETL) page under **Degree Program Attributes** for the CRN.

Schedule Prerequisite and Test Score Restrictions (SSAPREQ) page

Updated: August 27, 2020

The Schedule Prerequisite and Test Score Restrictions (SSAPREQ) page is used to enter or display prerequisite restrictions at the schedule level.

Course level prerequisite restrictions default to each section of a course created using the Schedule (SSASECT) page. During registration processing, prerequisite checking enforces prerequisite restrictions defined `at the section level only`. Course level prerequisite restrictions are `never` checked during registration processing.

This page is composed of the following sections:

- key block
- Section Information
- Section Test Score and Prerequisite Restrictions
- Section CAPP Area Prerequisite Restrictions

Key block

Updated: August 27, 2020

Use the key block to specify the course reference number, effective term, subject, and course for which you want to enter or display schedule level prerequisite restrictions. Use the **Search** button to access SSASECQ.

Each field in the key block must have a valid value, entered individually. When you attempt to leave the key block to display or maintain prerequisite information, the fields must represent a valid schedule which exists for the specified effective term.

Fields/Buttons	Descriptions
Term	Code and description of the effective term for the prerequisite information to be viewed or maintained. The effective term is used to select the correct version of the schedule-level prerequisite information. If no prerequisite information exists for the specified term, the term you enter will be used as the beginning effective term for any prerequisite information you enter.
CRN	Course reference number.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject code of the course for which you want to view or maintain section level prerequisite information. Display only.

Fields/Buttons	Descriptions
Course	Number of the course for which you want to view or maintain section level prerequisite information. Display only.
Title	Title of the section, as maintained on the Basic Course Information (SCACRSE) page. Display only.

Section Information

Updated: August 27, 2020

Use this section of the page to indicate whether test score and prerequisite restrictions, CAPP area restrictions, or DegreeWorks prerequisite restrictions are effective for the section. Use the Section Information section to access this section of the page.

Test score and prerequisite restrictions and CAPP area restrictions can be displayed and maintained at any time, but only one type can be effective for a section, and it is the setting of the **Prerequisite Check Method** option group that controls which are in effect. Only the type that is effective will be listed in the Bulletin Report (SCRBULT).

When selecting the setting of the **Prerequisite Check Method** option group, be aware of the following scenarios.

- When the **Prerequisite Check Method** is set to Basic or None and CAPP area prerequisites exist, a warning is displayed when the user saves, starts over, or exits from the page. The warning message is: `WARNING: CAPP area prerequisites exist, but the CAPP prerequisite check method is not selected.` The user must acknowledge this message to continue.
- When the **Prerequisite Check Method** is set to CAPP and no CAPP area prerequisites exist, an error message is displayed when the user saves, starts over, or exits from the page. The error message is: `No CAPP area is associated with this section. You must first add a CAPP area prerequisite to the section to save this value.` The user cannot leave the page until the prerequisite is added or the option group setting is changed.

DegreeWorks prerequisite restrictions are created in the DegreeWorks product. When DegreeWorks prerequisite checking is in use, the **View DegreeWorks Prerequisite Description** button is used to open the Prerequisite Information window and view a description of the prerequisite or a prerequisite error.

When no information exists for the prerequisite description, the message `No prerequisite was defined for this course. Please contact the Registrar's Office is delivered` is displayed. This message text is delivered and can be customized in DegreeWorks version 4.1.0.

When the PREREQCHK rule on GTVSDAX is set to a begin term that is before the availability of DegreeWorks prerequisite checking, the **View DegreeWorks Prerequisite Description** button is not displayed.

For more information on using CAPP area prerequisites, refer to the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site. For more information on using DegreeWorks prerequisites, refer to the 'Registration' chapter of the *Banner Student Use* content.

Fields/Buttons	Descriptions
Prerequisite Check Method	Option group used to select the registration prerequisite checking method for the course for the effective term. Values are Basic or None (use existing prerequisites), CAPP (use CAPP area prerequisites), and DegreeWorks (use DegreeWorks prerequisites). The default value is Basic or None. Values saved to the database are B, C, or D. When DegreeWorks is installed, the CAPP option is not available. When CAPP prerequisite checking is in use, the DegreeWorks option is not available.
View DegreeWorks Prerequisite Description	Button used to open the Prerequisite Information window.
Course Number	The Course Number is a display only field, and you cannot edit the field.

Section Test Score and Prerequisite Restriction

Updated: August 27, 2020

Use this section of the page to enter or display course test scores and prerequisite restrictions for prerequisite requirements. Use the Section Test Score and Prerequisite Restrictions section to access this section of the page.

If prerequisite requirements are more complicated than can be defined using this area, CAPP areas can be used to define the more complicated requirements. For example, if a requirement is to take three out of four specified courses, that requirement could not be defined using test score and prerequisite restrictions, but could be defined using a CAPP area. Both test score and prerequisite restrictions and CAPP area restrictions can be defined for the same time period, but only one set of restrictions will be effective, based on the value of the **Prerequisite Check Method** option group in the Section Information section of the page.

Test score and prerequisite restrictions can be edited using an SQL Editor that parses the entered data in the same format used to apply the restrictions within the registration process. This allows you to know immediately if the syntax of the statement you created will be executable and so prevents possible prerequisite execution errors.

Fields/Buttons	Descriptions
And | Or (Connector)	Option group that shows the relationship between multiple test score and prerequisite records. Multiple conditions can be specified using the **And | Or** connector value. It is not necessary to establish an And | Or connector when defining prerequisites with stacked parentheses (that is, parentheses on a line without test score or prerequisite information). Values are: `And` - saved to the database as A `Or` - saved to the database as O
'('	Left parenthesis. Beginning of a set of test score and prerequisite conditions that are to be contained within parentheses. Parentheses can be stacked, but all open sets of parenthesis *must* be closed when creating test score and prerequisite restrictions. Example of stacked parentheses: ((MATH 100 AND S01 400) OR (MATH 300)) AND STAT 200
Test Code	Code for the test that is a prerequisite requirement for the course.
Score	Minimum test score the student must receive for the test type entered in the **Test Code** field to satisfy the restriction for the course.

Fields/Buttons	Descriptions
Subject	Subject of the prerequisite course.
Course Number	Course number of the prerequisite course. A list of valid courses is available, but you can enter any value, whether it represents a valid course or not. This allows you to define prerequisite restrictions for a course without having to define the prerequisite course first.
Level	Required level of the prerequisite course. This field is used with the **Grade** field to determine if the student has achieved the required minimum grade to satisfy the prerequisite.
Grade	Minimum grade required for the prerequisite course. This field is used with the **Level** field to determine if the student has achieved the minimum grade required to satisfy the prerequisite. While a minimum grade is not required to define a prerequisite restriction, if not entered, a course that has been failed or withdrawn from will satisfy the prerequisite restriction.
Concurrency	Pulldown list used to specify that the prerequisite requirement may be fulfilled if the prerequisite course exists, but has not yet been graded (in either academic history or registration), for the `same` registration term (but not future terms). If concurrency is allowed and a student is enrolled in the prerequisite course during the same term, restriction checking will ignore level and grade if they have been specified. However, if the course is taken in the `same` term and has already been graded, minimum grade checking will be performed. Values are None, Yes, No.
‘)'	Right parenthesis. End of a set of test score and prerequisite conditions that are to be contained within parentheses. Parentheses can be stacked, but all open sets of parenthesis

Fields/Buttons	Descriptions
	`must` be closed when creating test score and prerequisite restrictions. Example of stacked parentheses: ((MATH 100 AND S01 400) OR (MATH 300)) AND STAT 200
View Statement	Button used to open a window where the user can enter and validate the SQL statement.

Section CAPP Area Prerequisite Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display the CAPP area(s) that include prerequisite restrictions for the course specified in the key block. Use the CAPP Area Prerequisite Restrictions section to access this section of the page.

If prerequisite requirements are more complicated than can be defined using the fields in the Section Test Score and Prerequisite Restrictions section of the page, CAPP areas can be used to define the more complicated requirements. For example, if a requirement is to take three out of four specified courses, that requirement could not be defined using test score and prerequisite restrictions, but could be defined using a CAPP area.

Both test score and prerequisite restrictions and CAPP area restrictions can be defined for the same time period, but only one set of restrictions will be effective, based on the value of the **Prerequisite Check Method** option group in the Section Information section of the page. If more than one area is indicated, the requirements of all listed areas will be applied.

For more information on using CAPP area prerequisites, refer to the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site. For more information on using DegreeWorks prerequisites, refer to the *Registration* chapter of the *Banner Student Use* content.

Fields	Descriptions
Area	Code and description of the CAPP area that includes the prerequisite restrictions for the course.

Academic Calendar Rule Query (SSAQCRL) page

Updated: August 27, 2020

Use the Academic Calendar Rule Query (SSAQCRL) page is to display the calendar types for which rules have been created for the term. This page is used to filter data, and all fields are display only.

The academic calendar rules must first exist on the Schedule Academic Calendar Rules (SSAACRL) page before they appear on this page.

This page is composed of the following sections:

- key block
- Academic Calendar Rule Query

Key block

Updated: August 27, 2020

Use the key block to specify the term on which you want to filter data.

Fields	Descriptions
Term	Code and description of the term.

Academic Calendar Rule Query

Updated: August 27, 2020

Use this section of the page to view the results of your filter.

Fields	Descriptions
Calendar Type	Code for the calendar type.
Description	Description of the calendar type code.

Schedule Restrictions (SSARRES) page

Updated: August 27, 2020

Use the Schedule Restrictions (SSARRES) page to enter and maintain registration restrictions for specific sections of a course.

The section registration restriction information defaults from the course level registration restriction information established in the Course Registration Restrictions (SCARRES) page. The default restriction information can be overridden to create section specific restrictions. Only the schedule level restrictions will be checked by the registration module.

A section must have been created using the Schedule (SSASECT) page. No new sections can be created using this page.

This page is composed of the following sections:

- key block
- Department Restrictions
- Field of Study Restrictions
- Class Restrictions
- Level Restrictions
- Degree Restrictions
- Program Restrictions
- Campus Restrictions
- College Restrictions
- Student Attribute Restrictions
- Cohort Restrictions

Key block

Updated: August 27, 2020

Use the key block to specify the section for which you want to enter or display registration restrictions. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
CRN	CRN of the section.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Title of the course, automatically displayed when valid values have been entered in all of the key block fields. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Department Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display specific department restrictions for the section specified in the key block. Use the Department section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the department of the primary or secondary curriculum, as displayed for the registration term in the General Student (SGASTDN) page, is included in the list of departments specified.
- An exclusion restriction prohibits a student from registering for the section if the department, as displayed for the registration term in SGASTDN, is included in the list of departments specified.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their associated departments. Valid values are:

Fields	Descriptions
	`Include` - Students whose curriculum is associated with the specified department will be permitted to register for the course, without override, when the **Department** option group is set to Fatal in the Section Options on the Term Control (SOATERM) page. All error flags can be overridden on the Student Course Registration (SFAREGS) page. `Exclude` - Students whose curriculum is associated with the specified department will not be permitted to register in the course when the **Department** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Department	Code and description of the department being restricted. The **Include/Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Field of Study Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display specific field of study (major) restrictions for the section specified in the key block. Use the Field of Study section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the major 1 or major 2 of either the primary or secondary curriculum, as displayed for the current registration term on SGASTDN and SFAREGS, is included in the list of fields of study specified.

- An exclusion restriction prohibits a student from registering for the section if the major 1 or major 2 of either the primary or secondary curriculum, as displayed for the current registration term in SGASTDN and SFAREGS, is included in the list of fields of study specified.

Field of study type restrictions use AND conditions, not OR conditions. For example, when a section has MAJOR, MINOR, and CONCENTRATION field of study types set to include MATH, all three field of study types have to be satisfied for the student to register for the course. When the **All Field of Study Types** check box is selected and the field of study types include MATH, the student would only have to have MATH as a MAJOR, MINOR, or CONCENTRATION to register for the course.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their majors. Valid values are: `Include` - Students whose curriculum is associated with the specified field of study will be permitted to register for the course, without override, when the **Field of Study** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified field of study will not be permitted to register in the course when the **Field of Study** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
All Field of Study Types	Check box used to indicate that all field of study types should be considered. When this box is selected, the **(Field of Study) Type** field is inactive, and the user is taken

Fields	Descriptions
	to the **(Field of Study) Code** field to select the field of study value.
Field of Study Type	Code and description of the learner field of study type, such as MAJOR, MINOR, CONCENTRATION from GTVLFST. The **Include/Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Field of Study Restrictions (second section)

Updated: August 27, 2020

Use this section of the page to enter or display field of study codes associated with the restricted records in the main/master Field of Study Restrictions section.

The records in this section are child records of the records in that section. You must enter a field of study code when the **All Fields of Study Types** check box is not selected.

Fields/Buttons	Descriptions
Field of Study Code	Code and description of the field of study being restricted.

Class Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display class restrictions for the section specified in the key block. Use the Class and Level section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the class that has been calculated and displayed for the registration term on SGASTDN and SFAREGS is included in the list of classes specified.
- An exclusion restriction prohibits a student from registering for the section if the class that has been calculated and displayed for the registration term in SGASTDN and SFAREGS is included in the list of classes specified.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their classes. Valid values are: `Include` - Students whose curriculum is associated with the specified class will be permitted to register for the course, without override, when the **Class** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified class will not be permitted to register in the course when the **Class** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Class	Code and description of the class being restricted. The **Include/ Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Level Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display specific level restrictions for the section specified in the key block. Use the Class and Level section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the level code of the primary or secondary curriculum, as displayed for the registration term on SGASTDN, is included in the list of levels specified.
- An exclusion restriction permits a student from registering for the section if the level code of the primary or secondary curriculum as displayed for the registration term in SGASTDN is included in the list of classes specified. Level restrictions do not check the level specified in dual degree information in SGASTDN when a student registers for a section. The information in the Level Restrictions section defaults from the

course level restrictions established in the Course Registration Restriction (SCARRES) page when a new section is created online on SSASECT, but can be changed.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their level. Valid values are: `Include` - Students whose curriculum is associated with the specified level will be permitted to register for the course, without override, when the **Level** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified level will not be permitted to register in the course when the **Level** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Level	Code and description of the level being restricted. The **Include/ Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Degree Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display specific degree restrictions for the section specified in the key block. Use the Degree and Program section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the degree of the primary or secondary curriculum, as displayed for the current registration term on SGASTDN, is included in the list of degrees specified.
- An exclusion restriction prohibits a student from registering for the section if the

degree of the primary or secondary curriculum, as displayed for the current registration term in SGASTDN, is included in the list of degrees specified.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their degree. Valid values are: `Include` - Students whose curriculum is associated with the specified degree will be permitted to register for the course, without override, when the **Degree** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified degree will not be permitted to register in the course when the **Degree** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Degree	Code and description of the degree being restricted. The **Include/ Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Program Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display specific program restrictions for the section specified in the key block. Use the Degree and Program section to access this section of the page.

Note: Only curriculum-dependent program codes can be entered.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the program, as displayed for the current registration term on SGASTDN, is included in the list of programs specified.

- An exclusion restriction prohibits a student from registering for the section if the program, as displayed for the current registration term in SGASTDN, is included in the list of programs specified.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their program. Valid values are: `Include` - Students whose curriculum is associated with the specified program will be permitted to register for the course, without override, when the **Program** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified program will not be permitted to register in the course when the **Program** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Program	Code and description of the program being restricted. The **Include Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Campus Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display campus restrictions for the course specified in the key block. Use the Campus and College section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the campus of the primary or secondary curriculum, as displayed for the current registration term on SGASTDN, is included in the list of campuses specified.
- An exclusion restriction prohibits a student from registering for the section if the

campus of the primary or secondary curriculum, as displayed for the current registration term in SGASTDN, is included in the list of campuses specified.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their associated campus. Valid values are: `Include` - Students whose curriculum is associated with the specified campus will be permitted to register for the course, without override, when the **Campus** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified campus will not be permitted to register in the course when the **Campus** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Campus	Code and description of the campus being restricted. The **Include/ Exclude** option group specifies whether the restrictions are inclusions or exclusions.

College Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display specific college restrictions for the section specified in the key block. Select the Campus and College section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section if the college of the primary or secondary curriculum, as displayed for the registration term in the General Student (SGASTDN) page, is included in the list of colleges specified.
- An exclusion restriction prohibits a student from registering for the section if the

college, as displayed for the registration term in the SGASTDN, is included in the list of colleges specified.

For college restrictions, the system does not check the college specified in dual degree information in SGASTDN when a student registers for a section.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their associated colleges. Valid values are: `Include` - Students whose curriculum is associated with the specified college will be permitted to register for the course, without override, when the **College** option group is set to Fatal in the Section Options on the Term Control (SOATERM) page. All error flags can be overridden on the Student Course Registration (SFAREGS) page. `Exclude` - Students whose curriculum is associated with the specified college will not be permitted to register in the course when the **College** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
College	Code and description of the college being restricted. The **Include/Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Student Attribute Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display student attribute restrictions for the section specified in the key block. Student attributes are maintained in the Additional Student Information (SGASADD) page. Use the Student Attribute and Cohort section to access this section of the page.

You can include or exclude restrictions.

- An inclusion restriction permits a student to register for the section of the course if the student is associated with an attribute that is included in the list of student attributes specified and the student's attribute is active for the term.
- An exclusion restriction prohibits a student from registering for the section of the course if the student is associated with an attribute that is included in the list of student attributes specified and the student's attribute is active for the term.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their associated student attributes. Valid values are: `Include` - Students whose curriculum is associated with the specified student attribute will be permitted to register for the course, without override, when the **Student Attribute** option group is set to Fatal in the Section Options on SOATERM. All error flags can be overridden on SFAREGS. `Exclude` - Students whose curriculum is associated with the specified student attribute will not be permitted to register in the course when the **Student Attribute** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Attribute	Code and description of the student attribute being restricted. The **Include/Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Cohort Restrictions

Updated: August 27, 2020

Use this section of the page to enter or display cohort restrictions for the section specified in the key block. Select the Student Attribute and Cohort section to access this section of the page.

You can either include or exclude restrictions.

- An inclusion restriction permits a student to register for the section of the course if the student belongs to one of the cohorts included in the list of cohorts specified and the student's cohort is active for the term.
- An exclusion restriction prohibits a student from registering for the section of the course if the student belongs to one of the cohorts included in the list of cohorts specified and the cohort is active for the term.

Fields	Descriptions
Include/Exclude	Indicates whether the restrictions are to be inclusions or exclusions. This controls which students can register for the specific course based on their associated cohorts. Valid values are: `Include` - Students whose curriculum is associated with the specified cohort will be permitted to register for the course, without override, when the **Cohort** option group is set to Fatal in the Section Options on the Term Control (SOATERM) page. All error flags can be overridden on the Student Course Registration (SFAREGS) page. `Exclude` - Students whose curriculum is associated with the specified cohort will not be permitted to register in the course when the **Cohort** option group is set to Fatal in the Section Options on SOATERM. The default value for this field is `Exclude`.
Cohort	Code and description of the cohort being restricted. The **Include Exclude** option group specifies whether the restrictions are inclusions or exclusions.

Schedule Processing Rules (SSARULE) page

Updated: August 27, 2020

Use the Schedule Processing Rules (SSARULE) page to enter or display rules for registration status codes, refunding, and extension processing at the section level, independent of part of term or static dates, that can be administered based on an individual learner.

This page can be used only for open learning sections and is composed of the following sections:

- Key block
- Section Registration Status Codes
- Section Refunding Rules
- Section Extension Processing Rules

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to update, enter, or review registration status codes, extension processing rules, and section refunding rules.

Fields	Descriptions
Term	Code and description of the term.
CRN	Course reference number.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Title of the course, automatically displayed when valid values have been entered in all of the key block fields. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Section Registration Status Codes

Updated: August 27, 2020

Use this section of the page to enter or display registration status code information that defaults from the Open Learning Section Default Rules (SOAORUL) page.

Note: If students are permitted to register for this course through the Banner Self-Service products, it is imperative that the registration status code defined on the WEBRSTSREG record in the Crosswalk Validation (GTVSDAX) page also be defined for the section.

Rule Defaulting

Updated: August 27, 2020

When a new section is created, the SOBODTE table and associated repeating tables are searched to find the most applicable rules based on course or section characteristics for the section being generated. The rule with the most matching criteria should be used.

Example of rules setup

Updated: August 27, 2020

Rules setup examples.

Rule	Department	
Rule 1	AA	B B
Rule 2		C C
Rule 3		D D
Rule 4		E E
Rule 5		

Section and course information

Updated: August 27, 2020

Information on the section and course section.

	- - - - - - - - Course - - - - - - - -		- - - - - - - - - - - - Section - - - - - - - - - - - - -		
Section Number	**Department**	**College**	**Campus**	**Schedule Type**	**Instructional Method**
11111	AA	BB	CC	DD	EE
22222	GG	GG	CC	TT	ZZ
33333	HH	HH	MM	DD	FF
44444	AA	BB	NN	DD	EE
55555	JJ	BB	PP	XX	EE

Section	Description
Section 11111	This section matches the criteria created in Rules 1 through 4. However, Rule 1 would be most applicable, because all of the identifying criteria matches.
Section 22222	Rule 2 would be selected, because the campus codes of the rule and the section match.
Section 33333	No rules would be applicable.
Section 44444	Rule 3 would be applicable, because schedule types and instructional methods of both the rule and section match.
Section 55555	Rule 4 matches the instructional method of the section.

Direct Entry of Rules

Updated: August 27, 2020

If generic rules have not been established in SOAORUL or if additional rules are required, you can enter the information directly. The only enterable information is the status code and usage cutoff details. The remaining information is display only and is retrieved from the associated STVRSTS validation table entry.

Fields	Descriptions
The following fields are in the Status and Usage Information.	

Fields	Descriptions
Status Code	Code and description of the registration status for the CRN.
Usage Cutoff% (Percentage) From	Usage cutoff from percentage. This field determines when this status code is available for use. As open learning processing is based on individual student progress in a course, the usage cutoff percentages as a range are used to determine if the status code will be available during the time elapsed since, or the time remaining until, the student's start date of the course. If pre-registration is permitted, and policy allows the use of a particular code from the day the student registers until a date specified by the **Usage Cutoff% (Percentage) To** field as described below, enter Null in this field. Negative values may be used in this field for those codes that are permitted for only a limited amount of time before the student starts class. For example, if a status code is to take effect one week before the student starts a ten week course, set the value of this field to -10. A value of 0 (zero) in this field signifies that the status code is available from the day the student starts class, until the date determined by the value in the **Usage Cutoff% (Percentage) To** field. If a value is entered into this field, it is mandatory that a value be entered into the **Usage Cutoff% (Percentage) To** field.

Fields	Descriptions
	It is not mandatory to define any of the usage cutoff fields. If not defined, the status code will always be available for use. For more examples of how to set the usage cutoff fields, please refer to the *Banner Open Learning Registration* content in the Ellucian Documentation site.
Usage Cutoff% (Percentage) To	Usage cutoff to percentage. This field is required when the **Usage Cutoff% (Percentage) From** field is populated. Negative values may be used in this field for status codes that are permitted only before the student starts class. For example, if a status code is to be available from the date the student registers until one week before the student starts a ten week course, set **Usage Cutoff% (Percentage) From** field to Null, and set this field to -10.
Usage Cutoff% (Percentage) To (continued)	A value of 0 (zero) in this field signifies that the code may be used until the day before the student starts class. For example, if a status code is to be available for the entire time before the student starts class, set the **Usage Cutoff% (Percentage) From** field to Null, and set this field to 0. It is not mandatory to define any of the usage cutoff fields. If not defined, the status code will always be available for use. For more examples of how to set the usage cutoff fields, please refer to the *Banner Open Learning Registration* content in the Ellucian Documentation site.

Fields	Descriptions
Usage Cutoff Duration From	Usage cutoff from duration. This field determines when this status code is available for use. As open learning processing is based on individual student progress in a course, the usage cutoff durations as a range are used to determine if the status code will be available during the time elapsed since, or the time remaining until, the student's start date of the course. If pre-registration is permitted, and policy allows the use of a particular code from the day the student registers until a date specified by the **Usage Cutoff Duration To** field as described below, enter Null in this field. Negative values may be used in this field for those codes that are permitted for only a limited amount of time before the student starts class. For example, if a status code is to take effect one week before the student starts a ten week course, set the value of this field to -1. A value of 0 (zero) in this field signifies that the status code is available from the day the student starts class, until the date determined by the value in the **Usage Cutoff Duration To** field. If a value is entered into this field, it is mandatory that a value be entered into the **Usage Cutoff Duration To** field. It is not mandatory to define any of the

Fields	Descriptions
	usage cutoff fields. If not defined, the status code will always be available for use. For more examples of how to set the usage cutoff fields, please refer to the *Banner Open Learning Registration* content in the Ellucian Documentation site.
Usage Cutoff Duration To	Usage cutoff to duration. This field is required when the **Usage Cutoff Duration From** field is populated. Negative values may be used in this field for status codes that are permitted only before the student starts class. For example, if a status code is to be available from the date the student registers until one week before the student starts a ten week course, set **Usage Cutoff Duration From** to Null, and set this field to -1. A value of 0 (zero) in this field signifies that the code may be used until the day before the student starts class. For example, if a status code is to be available for the entire time before the student starts class, set the **Usage Cutoff Duration From** field to Null, and set this field to 0. It is not mandatory to define any of the usage cutoff fields. If not defined, the status code will always be available for use. For more examples of how to set the usage cutoff fields, please refer to the *Banner Open Learning Registration* content in the Ellucian Documentation site.
Affected by Student Status	Check box used to indicate whether the registration status code will be updated to

Fields	Descriptions
	reflect a change in the student enrollment status.
The following fields are in the Registration Status Information.	
Allow Entry	Check box used to indicate whether this status code can be applied to an individual course. Display only. This check box represents the value defined for the status code in STVRSTS.
Count in Assessment	Check box used to indicate whether a course with this status will be included in fee assessment processing. Display only. This check box represents the value defined for the status code in STVRSTS.
Count in Enrollment	Check box used to indicate whether a course with this status will be included in the enrollment counts displayed on various forms and reports. Display only. This check box represents the value defined for the status code in STVRSTS.
Web	Check box used to indicate that this course registration status is available for processing in Banner® Self-Service registration. Display only. For more information on the use of these statuses and procedures for Web setup, please refer to the *Registration* chapter of the *Banner Student Use* content. In addition to the system-required status codes, other course registration status

Fields	Descriptions
	codes may be Web-enabled at the discretion of the institution. This check box will default to cleared (or N) when a new course registration status record is added, but it can be changed at any time. This check box represents the value defined for the status code in STVRSTS.
Withdraw	Check box used to indicate whether the registration status code is used for a course withdrawal or a dropped course, which affects refunding and student fee assessment. Display only. This check box represents the value defined for the status code in STVRSTS.
Extension	Check box used to indicate whether the registration status code is used for a course with extension processing rules, which affects refunding and student fee assessment. Display only. This check box represents the value defined for the status code in STVRSTS.
Print on Schedule	Check box used to indicate whether a course with that status code will be printed on the student's schedule, schedule/bill, and so on. Display only. This check box represents the value defined for the status code in STVRSTS.
Type	Status type assigned to describe the course registration status code for baseline, Self-Service, and telephone

Fields	Descriptions
	applications. Valid values are: • R - Registered • D - Dropped • L - Waitlisted • W - Withdrawn This field represents the value defined for the status code in STVRSTS.

Section Refunding Rules

Updated: August 27, 2020

Use this section of the page to display refund rule information. This information is defaulted from SOAORUL when the section is created.

The records in this section are child records of the master records in the Section Registration Status Codes section of the page. Use the Section Refunding Rules section to access this section of the page.

Rule Defaulting

Updated: August 27, 2020

When a new section is created, the SOBODTE table and associated repeating tables are searched to find the most applicable rules for the section being generated. The rule with the most matching criteria will be used.

Direct Entry of Rules

Updated: August 27, 2020

If changes are permitted to the defaulted information or no rules have been established on SOAORUL, edit checks are performed in this section of the page.

Fields	Descriptions
Status Code	Registration status code, from the Block

Fields	Descriptions
	Registration Status Codes section of the page, to which the refunding rules will be applied. Display only.
Percent Complete	Value used to determine the appropriate refund percentage. When applied to an individual registration, the student's elapsed time from the start date of the registration will be calculated and compared to this value. Enter a value between `–100` and `100`. For example, your institutional policy states that the learner is entitled to an 80% tuition refund if the course is dropped between 0 and 10% complete (exclusive). 10 would be entered in this field, and 80 would be entered in the **Tuition Refund** field. When the fee assessment process is triggered, if the student had completed less than 10% of the duration of the course, this rule would be invoked. This allows non-term-based courses to have registration start dates that span a date range, and it provides for flexible course durations. You can enter a value in this field only if the **Duration Complete** field is blank. Either the **Duration Complete** or **Percent Complete** field should be used to define the allowable interval for refund processing.
Duration Complete	Value used to calculate the number of duration units expired because the start date of the registration.

Fields	Descriptions
	Where the **Percent Complete** field determines the elapsed time between the learner's start date and withdrawal date based on the overall registration time frame, the **Duration Complete** field assesses the number of duration units that have expired after the start date. Enter a value between the negative number of duration units defined for the section and the number of duration units defined for the section. For example, your institutional policy states that the learner is entitled to an 80% tuition refund if the course is dropped (duration complete) between 0 and 1 week complete (exclusive). 1 would be entered in this field, and 80 would be entered in the **Tuition Refund** field. When the fee assessment process is triggered, if the student had completed less than 1 week of the duration of the course, this rule would be invoked. You can enter a value in this field only if the **Percent Complete** field is blank. Either **Duration Complete** or **Percent Complete** should be used to define the allowable interval for refund processing.
Duration	Number of duration units established for this section on the Schedule (SSASECT) page. Display only.
Tuition Refund	Percentage of the original charge to be refunded to a student when the associated registration status code is applied to the student's registration record.

Fields	Descriptions
	The percentage entered in this field will be multiplied by the total tuition (detail codes assigned a category of `TUI` on the Detail Code Control (TSADETC) page) assessed for the individual section to arrive at the monetary amount to be refunded to the student. Enter a value between `0` and `100` for the calculation of the tuition refund.
Fee Refund	Percentage of the assessed fees to be refunded to a student when the associated registration status code is applied to the student's registration record. The percentage entered in this field will be multiplied by the total fees (detail codes assigned a category of `FEE` on TSADETC) assessed for the individual section to arrive at the monetary amount to be refunded to the student. Enter a value between `0` and `100` for the calculation of the fee refund.
Extension Refund	Percentage of the extension fees to be refunded to a student when the associated registration status code is applied to the student's registration record. Percentage entered in this field will be multiplied by the total tuition (detail codes assigned a category of `TUI` on TSADETC) assessed for the individual section to arrive at the monetary amount to be refunded to the student.

Fields	Descriptions
	Enter a value between `0` and `100` for the calculation of the extension fee refund.
Override	Check box used to indicate whether the defaulted rule information contained in the section of the page may be overridden.

Section Extension Processing Rules

Updated: August 27, 2020

Use this section of the page to display extension processing rule information. This information is defaulted from the Open Learning Section Default Rules (SOAORUL) page when the section is created.

The records in this section of the page are child records of the master records in the Section Registration Status Codes section of the page. Use the Section Extension Processing Rules section to access this section of the page.

Note: You can only access this section of the page if the **Extension** check box is selected for the status code.

Rule Defaulting

Updated: August 27, 2020

When a new section is created, the SOBODTE table and associated repeating tables are searched to find the most applicable rules for the section being generated. The rule with the most matching criteria will be used.

Direct Entry of Rules

Updated: August 27, 2020

If changes are permitted to the defaulted information or if no rules have been established on SOAORUL, edit checks are performed in this section of the page.

Fields	Descriptions
Status Code	Registration status code, from the Block

Fields	Descriptions
	Registration Status Codes section of the page, to which the extension rule applies.
Extension % (Percent)	Value used to calculate the allowable extension period based on the duration and duration unit assigned to the original registration. Enter a number between `0` and `100`. For example, a learner is registered for a course with a duration of ten weeks. The learner's expected completion date needs to be extended. The extension rule defined in this page for the corresponding instructional method was 100%, so the student would be granted a ten-week extension. If, however, the rule was defined as 50%, the completion date would be extended only by five weeks.
Detail Code	Code and description of the detail code used to assess extension fees on the student's accounts receivable account.
Amount	Monetary amount of the extension fee to be assessed to the learner (based on the fee type specified on this page). If a detail code has been given a default value in TSADETC, that amount defaults to this field, but you can change it.
Fee Type	Code and description of the fee type to be used when calculating monies for the extension.
Override	Check box used to indicate whether the rule information in the section of the page can be overridden at the time the extension is applied to an individual student.

Schedule Specific Section Attribute (SSASATR) page

Updated: August 27, 2020

Use the Schedule Specific Section Attribute page to assign attributes to a specific group of CRNs. This can be used for adding an attribute to an elective pool or adding an attribute to a group of CRNs that match your search criteria.

Before you begin

If using an elective pool, you must use the **Section Attribute for Elective Pool** field on SOATERM to assign an attribute to the elective pool. Then you must select the CRNs that will be in the elective pool on SSAPOOL.

If you are not using an elective pool, all CRNs will be considered.

Procedure

1. Enter the values for any fields that match the search criteria for the CRNs that you want to assign an attribute. You must enter at least a term to perform a search to see a list of CRNs that are in the elective pool for that term.

   Result: The system will display a list of CRNs that meet your search criteria.

2. **Optional:** Further refine your search results by using the **Filter** function.
3. Select the value from the **Assigned Attribute** field for the attribute you want to assign to the CRNs
4. Select a value for **Program** if you want to know which CRNs are associated with a specific program.

   Result: If you enter a value for **Program**, the **In program** check box for the CRN will be selected for those CRNs that are in the program.

5. Select the check box next to the CRNs that you want to assign the attribute to, and click **Save**.

   Result: The attribute has been assigned to each of those CRNs. You will see it on the Schedule Detail (SSADETL) page under **Degree Program Attributes** for the CRN.

Key block

Updated: August 27, 2020

Use the key block to assign attributes to a specific group of CRNs.

Field	Description
Term	Code and description of the effective term for the section linked to Term Code Validation (STVTERM).
Subject	Subject associated with the CRN linked to Subject Validation (STVSUBJ).
Course	Course number associated with the CRN
Campus	This is a LOV field linked to Campus Validation (STVCAMP).
Session	This is a LOV field linked to Session Validation (STVSESS).
Attribute	This is a LOV field linked to Degree Program Attribute Validation (STVATTR).
Course Alias	The Course Alias is a LOV field and is linked with the Existing Courses. Enter the exact Course Alias value to populate values in all the fields, or, click the ellipsis icon to open the Existing Courses pop up window. If you select a course from the Existing Courses list, the system automatically enters the appropriate values in the Subject, Term, Course and Course Title fields.

Subject Scheduling Rules (SSASBSH) page

Updated: August 27, 2020

Use the Subject Scheduling Rules (SSASBSH) page to enter or display partition and room attribute preferences at the subject level.

These preferences default to the Basic Course Information (SCACRSE) page in the Course Catalog module whenever a new course is created. Changes to or additions of attribute or partition information on the subject record will not result in changes to existing course, section, or meeting time records.

Partition codes for a subject are not assigned to a newly added course even when the course subject code matches one found on SSASBSH for the term. The Schedule 25 Work File Creation Process (SSRSCRM) checks the rules on SSASBSH and loads them to the working catalog it builds within the Schedule25 process to default partition codes and preferences.

This page is composed of the following sections:

- key block
- Partition Preferences
- Room Attribute Preferences

Key block

Updated: August 27, 2020

Use the key block to specify the subject and term for which you want to enter or display partition or room attribute preferences.

Fields	Descriptions
Subject	Code and description of the subject.
Term	Code and description of the term.

Partition Preferences

Updated: August 27, 2020

Use this section of the page to define partition preferences for the subject and term specified in the key block. Use the **End Term** button to end the partition preferences information by term and the **Copy Term Data** button to copy the partition preferences information by term.

Note: When a change needs to be made to an existing partition record, you must delete the record and add a new record that contains the change.

Fields/Buttons	Descriptions
From Term	First term in which this set of preferences is in effect. If you are defining partition preferences for the first time, the value defaults to the term

Fields/Buttons	Descriptions
	entered in the key block.
To Term	Last term in which this set of preferences is in effect. If you are defining partition preferences for the first time, the value defaults to term code `999999` (the end of time).
End Term	Button used to end the partition preferences for a term.
Copy Term Data	Button used to copy the partition preferences to a new term.
Partition	Code and description of the partition from GTVPARS.
Preference	Preference number for the partition. Enter a value from 0 - 99. Multiple records can be entered for the same preference number. A message is displayed when the value is not 01, 02, 03, or 04, as those values are used with auto scheduling. A preference number of 01 is considered highest priority by the scheduling software.

Room Attribute Preferences

Updated: August 27, 2020

Use this section of the page to define room attribute preferences for the subject and term specified in the key block. Use the **End Term** button to end the room attribute preferences information by term and the **Copy Term Data** button to copy the room attribute preferences information by term.

Fields/Buttons	Descriptions
From Term	First term in which this set of preferences

Fields/Buttons	Descriptions
	is in effect. If you are defining partition preferences for the first time, the value defaults to the term entered in the key block.
To Term	Last term in which this set of preferences is in effect. If you are defining partition preferences for the first time, the value defaults to term code `999999` (the end of time).
End Term	Button used to end the room attribute preferences for a term.
Copy Term Data	Button used to copy the room attribute preferences to a new term.
Room Attribute	Code and description of the room attribute.
Preference	Preference number for the room attribute. Enter a value from 0 - 99. Multiple records can be entered for the same preference number. A message is displayed when the value is not 01, 02, 03, or 04, as those values are used with auto scheduling. A preference number of 01 is considered highest priority by the scheduling software.

Scheduler Work (SSASCHW) page

Updated: August 27, 2020

Use the Scheduler Work (SSASCHW) page to view the data from Banner® before being submitted to Schedule 25, and preview the results of Schedule25 before its integration into Banner.

Note: Preference records are not viewable.

The page is entered in Query mode, and all fields are can be queried.

Before the integration of the Schedule25 output into Banner, you can manipulate the data as follows.

- The **Building**, **Room**, **Status**, and **Update** fields can be changed.
- An existing entry can be deleted.

However, on the initial extraction of this data, it is strongly recommended that any changes be made in Banner and the extract process re-run, as this information is contained in a temporary work table and can be purged at the successful completion of the class scheduling process using the Schedule Work Table Purge Process (SSRSCPR).

Some classes in the initial extract may already have a building and room attached to the record. This indicates that the scheduling status code assigned to that class is one that denotes it as pre-assigned or manually assigned. This information is critical to ensure that Schedule25 does not double-book classes in the same classrooms.

When viewing data processed by the scheduler, the scheduling status code will change a code of NSM to 5SM and NXM to 5XM if the class was successfully assigned.

You may notice class records with an unusual or not valid subject code. These records represent the dummy records created during the extract process to signal to the scheduler that a room in unavailable for scheduling for a particular period of time. These records will not be returned to Banner.

Fields	Descriptions
Update	Indicator for whether assignments have been scheduled and Banner has been updated. This field is most meaningful when displaying the results of the Schedule25 process.Values are: Y Classroom assignments have been scheduled, but Banner has not been updated. (This value is derived from the `sortdp.dat` file.) N Classroom assignments cannot be scheduled. (This value is derived from the `notposs.dat` file.)

Fields	Descriptions
	L Classroom assignments have not been scheduled. (This value is derived from the `losers.dat` file.) U Banner has been updated with this information. (This value represents Y records modified in the SSRSCMT process.) `null` Schedule 25 processing has not been performed yet.
Term	Code of the term. Select the **Search** button for this field to display the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
Subject	Code of the subject. Select the **Search** button for this field to display the Subject Code Validation (STVSUBJ) list. List Subject Code Validation (STVSUBJ)
Course Number	Number associated with the course.
Course Alias	The values in the Course Alias field are read-only and populated if Course Alias is defined on SCACRSE page for the appropriate Subject, Term and Course combination.
CRN	CRN of the section. Select the **Search** button for this field to display the Schedule Section Query (SSASECQ) page. List Schedule Section Query (SSASECQ) page
Start Date	Date on which the section begins. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.

Fields	Descriptions
Start Time	Time at which the section begins, in 24-hour format.
End Date	Date on which the section ends. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
End Time	Time at which the section ends, in 24-hour format.
Campus	Code of the campus associated with the section. Select the **Search** button for this field to display the Campus Validation (STVCAMP) list. List Campus Validation (STVCAMP)
Building	Code of the building associated with the section. Select the **Search** button for this field to display the Building Query (SLAQBRY) page. List Building Query (SLAQBRY) page
Room	Code of the building associated with the section. Select the **Search** button for this field to display the Room Query (SLQROOM) page. List Room Query (SLQROOM) page
Status	Code of the status associated with the section. Select the **Search** button for this field to display the Scheduler Status Code Validation (GTVSCHS) list. List Scheduler Status Code Validation (GTVSCHS)
Monday	Check box used to indicate that class is held on Monday. In a query, multiple days can be specified.

Fields	Descriptions
Tuesday	Check box used to indicate that class is held on Tuesday. In a query, multiple days can be specified.
Wednesday	Check box used to indicate that class is held on Wednesday. In a query, multiple days can be specified.
Thursday	Check box used to indicate that class is held on Thursday. In a query, multiple days can be specified.
Friday	Check box used to indicate that class is held on Friday. In a query, multiple days can be specified.
Saturday	Check box used to indicate that class is held on Saturday. In a query, multiple days can be specified.
Sunday	Check box used to indicate that class is held on Sunday. In a query, multiple days can be specified.

Section Seat Control (SSASEAT) page

Updated: March 17, 2022

Use the Section Seat Control (SSASEAT) page to enable the Seat Assignment functionality and to set the time limit that seat assignment records can remain in a pending status.

The Registration module uses the **Enable Indicator** on this page to determine where to track enrollment counts. When you select the check box, the system tracks enrollment counts in the seat assignments tables (SSRSEAT and SSRSEAW) rather than in the section table (SSBSECT). Consequently, you will also want to run the Section Seat Enrollment Update (SSPSEAT) process in sleep/wake mode to synchronize the enrollment counts between the seat assignments and section tables. This process also removes pending seat assignments that have expired.

The **Pending Assignment Time limit in Minutes** field allows you to specify how many minutes seat assignment records can remain in a pending status before becoming finalized with a registered or waitlisted status. The Section Seat Enrollment Update (SSPSEAT) process uses this value to determine when to remove pending seat assignment records that have expired. These records are defined as those having a pending status without a corresponding registration record (SFRSTCR) and where the difference between the assignment date time stamp and the registration access (SFRRACL) date time stamp is greater than the time limit.

Enable Seat Assignment Functionality

Updated: October 21, 2021

You can enable the seat assignment functionality.

Procedure

1. Enter a term in the **Term** field in the key block.
2. Click **Go**.
3. Select the **Enable Indicator** check box.
4. Enter a value in the **Pending Assignment Time Limit in Minutes** field.
5. Click **Save**.

Schedule Section Query (SSASECQ) page

Updated: August 27, 2020

Use the Schedule Section Query (SSASECQ) page to display all existing sections or to filter data for specific section criteria. The page is run in filter only mode, and no changes can be made to any fields.

This page uses advanced filtering for queries. You can filter data on the default **Term** field and add elements to the filter criteria as needed. This page can be accessed directly or from the **Search** button on the SSASECT page and other Class Schedule pages.

- When a new section record has been created on SSASECT but not saved, and a filter is performed on SSASECQ, the subject, course number, course title, and sequence number values are returned to SSASECT.

- When a new section record has been saved on SSASECT, and a filter is performed on SSASECQ, no values are returned to SSASECT.

This page contains the Advanced Filter section and the Query Results section.

Advanced Filter section

Updated: August 27, 2020

Use this section of the page to specify the criteria for which you want to display section information. You can add elements to the advanced filter criteria as needed to refine the query. Each element has an operator defined in the **Contains** field.

Use the **Delete** (-) button or the **Clear All** button to remove added fields from the filter or the **Go** button to view the results of the filter.

Fields	Descriptions
Term	Code and description of the term. The term is required.
Contains	Displays a list of operators for each field in the advanced filter.
Add Another Field...	Displays a list of fields that can be added to the advanced filter.
Clear All	Button used to remove added fields. The advanced filter can then be re-entered.
Go	Button used to view the advanced filter results.

Query Results

Updated: August 27, 2020

Use this section of the page to review the data for the sections returned for the criteria in the Advanced Filter section. The number of records found is displayed. You can sort on the fields in this section.

Fields/Buttons	Descriptions
Filter Again	Button used to return to the Advanced Filter section to perform another filter.
The following fields are in the Section Detail Information.	
Term	Code of the term for the section.
CRN	CRN associated with the section.
Subject	Subject associated with the section.
Course Number	Course number associated with the section.
Sequence	Section sequence number.
Course/Section Title	Complete or partial course/section title (using wildcards) associated with the section. This field is populated with the section title assigned to the sections in SSBSECT or if Null, with the course title in SCBCRSE when the filter results are displayed.
Course Alias	The values in the Course Alias field are read-only and populated if Course Alias is defined on SCACRSE page for the appropriate Subject, Term and Course combination.
Campus	Code of the campus associated with the section.
Schedule Type	Code of the schedule type associated with the section.
Instructional Method	Code of the instructional method (from GTVINSM) associated with an open learning section. This field is populated with the instructional method assigned to open learning sections in SSBSECT when the filter results are displayed.

Fields/Buttons	Descriptions
Status	Code of the section status associated with the section.
The following fields are in the Credit Hours information.	
Low	Minimum number of credits for which the course can be offered.
Options	Relationship between low and high credit hours. • None = No existing credit hours • Or = Existing credit hours for two specific offerings • To = Existing credit hours within a range
High	Maximum number of credits for which the course can be offered.
The following fields are in the Schedule Type information.	
Part of Term	Code for the part of term associated with the section.
Duration	Number of duration units associated with the section. This field is populated with the number of duration units assigned to open learning sections in SSBSECT when the filter results are displayed.
Units	Code for the duration unit (from GTVDUNT) associated with the section. This field is populated with the duration units assigned to open learning sections in SSBSECT when the filter results are displayed.

Fields/Buttons	Descriptions
Registration From	First date that registration will be available for open learning sections. If you enter a date and term in the filter, only open learning courses for the referenced term will be displayed. Do not use a part of term for the filter. This field is populated with the registration from date assigned to open learning sections in SSBSECT when filter results are displayed.
Registration To	Last date that registration will be available for open learning sections. If both registration from and to dates are entered in the filter, the page will display sections where the from and to dates match the registration dates in SSBSECT. If you enter a date and term in the filter, only open learning courses for the referenced term will be displayed. Do not use a part of term for the data filter. This field is populated with the registration to date assigned to open learning sections in SSBSECT when filter results are displayed.
The following fields are in the Enrollment information.	
Maximum	Maximum enrollment for the section.
Actual	Actual enrollment for the section.
Remaining	Number of available seats for the section.
The following fields are in the Waitlist information.	
WL Maximum	Maximum waitlist for the section.

Fields/Buttons	Descriptions
WL Actual	Actual waitlist for the section.
WL Remaining	Number of available waitlisted seats for the section.
The following fields are in the Miscellaneous information.	
Reserved Seats	Check box used to indicate whether seats have been reserved for a section. • *Y* - displays the sections for reserved seats. • *N* - displays the sections for non reserved seats.
Long Section Title	Check box used to indicate whether sections have long section titles defined in the syllabus. This field is populated with a check mark for all sections with long section titles defined in the SSBSYLN table when the filter results are displayed.
Comments	Check box used to indicate whether section comments have been entered on SSATEXT. This field is populated with a check mark for all sections with comments defined in the SSRTEXT table when the filter results are displayed.
Syllabus	Check box used to know if syllabus information exists for the section. The sections that have been assigned learning objectives, required materials, or technical requirements will be displayed.

Fields/Buttons	Descriptions
	This field is populated with a check mark for all sections with values defined in the either the SSBSYLO, SSBSYRM, or SSBSYTR tables when the filter results are displayed.
Cross List	Identifier for the cross-list group associated with the section.
Link	User-defined code to identify the link associated with the section.
Block	Check box used to indicate whether a section has been assigned to a block schedule.
The following buttons are at the bottom of the page.	
Cancel	Cancels the filter.
Select	Returns a selected record to the calling page.

Schedule (SSASECT) page

Updated: April 17, 2025

Use the Schedule (SSASECT) page create or display sections for the courses that were created in the Course Catalog module, according to the definitions and restrictions that were set up there.

The Registration module then uses the sections to register students. A course catalog record must exist before the creation of sections for that course. Sections can be set up for traditional terms or for open learning.

You can add a new section, or you can copy an existing section within the term or from one term to another term. However, if a campus restriction exists on a section (from SCASRES), and the current campus is not valid, the user is not permitted to enter or update information in any sections of information on SSASECT.

Note: When you add a new section by entering ADD in the **CRN** field in the key block, the new CRN is displayed in the **Course Reference Number** field in the Course Section Information, which is located below the key block. The **CRN** field in the key block still displays ADD at this point. When you save the changes, the new CRN value replaces the ADD value in the key block.

To add a new section, do the following.

1. Enter a term in the **Term** field in the key block.
2. Enter `ADD` in the **CRN** field.
3. Click the **Create** button.
4. Click **Go**.
5. Continue in the Course Section Information section of the page.

   Note: You can also enter the term and click the **Create** button to populate `ADD` in the **CRN** field.

To copy a section from one term to another, or to the same term, do the following.

1. Enter term, CRN, subject, and course values in the key block.
2. Click the **Copy** button.
3. The Copy from Default Term and CRN window opens.
4. Use the defaulted term or enter a new term.
5. Enter the CRN.
6. Click the **Copy** button.
7. Click **Go**.
8. Continue in the Course Section Information section of the page.

Additional navigation from this page includes:

- You can access the Schedule Section Query (SSASECQ) page using the **Search** button and perform an advanced filter on section data.
- You can access the Course Labor Distribution (SCACLBD) page and the Schedule Labor Distribution (SSACLBD) page from this page, when using automated faculty load and compensation processing with Banner® Human Resources.

- You can access the Waitlist Automation Section Control (SSAWLSC) page from this page, when using automated waitlist processing.

Clock to credit hour conversion service application

You will see the following behavior on the **SSASECT** page when you set the **Clock Hours Flag** to *Y* on the Basic Course Information (**SCACRSE**) page for a specific **Term**, **Subject**, and **Course Number** combination.

- The **SSASECT** page disables the **Credit Hours** (SSBSECT_CREDIT_HOURS) and **Billing Hours**(SSBSECT_BILLING_HOURS) fields to prevent manual input or validation.
- The clock to credit hour conversion service application uses the same API key as the Student Aid Index (SAI) and Pell service applications. For details on how to obtain an API key, see Create an SAI Pell service application in Ethos Integration.
  You will see the following behavior related to the financial aid service integration:
    - When you enter a value in the **Course Number** field on the **SSASECT** page, the system sends course details and contact hours to the financial aid service to calculate **Credit Hours** and **Billing Hours**.
    - The system calls the financial aid service API with the following required parameters: **contactHours**, **hoursType**, **numberOfWeeks** (if applicable), and **roundingIndicator** (if applicable).
    - The **Contact Hours** (SSBSECT_CONT_HR) field is automatically populated with the **Contact Hour - Low** value from the **SCACRSE** page. The **SSASECT** page then populates the **Credit Hours** and **Billing Hours** fields with the values returned from the financial aid service.
- When you enter a new value in the **Contact Hours** field for an existing **CRN** of a clock hour course and section and execute the inputs, you will see the following behavior.
    - The **SSASECT** page calls the financial aid service again to recalculate credit and billing hours.
    - The **SSASECT** page then updates the **Credit Hours** and **Billing Hours** fields with the recalculated values.

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to enter or display section information. You can also create new CRNs, duplicate existing CRNs within the term, and copy existing CRNs to different terms.

Fields/Buttons	Descriptions
Term	Code and description of the term associated with the section you want to define or display.
CRN	CRN of the section. CRNs can be added or copied in this section of the page.
Search	Button used to access SSASECQ to filter data for sections.
Create	Button used to define a new section. Enter ADD in the **CRN** field and click the **Create** button.
Copy	Button used to duplicate a section within the same term or copy an existing section to a different term. Enter the term and CRN, and click the **Copy** button to access the Copy from Default Term and CRN window.
Subject	Subject of the course.
Course	Course reference number.
Title	Title of the course.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Copy from Default Term and CRN window

Updated: August 27, 2020

Use this window to duplicate a section within the same term or copy a section from one term to another. To open this window, enter a term and CRN in the key block, and click the **Copy** button.

Fields/Buttons	Descriptions
Term	Default code and description of the term from which to copy section information.
CRN	Default CRN from which to copy section information.
Copy	Button used to copy the section information to another term.

Course Section Information

Updated: August 27, 2020

Use this section of the page to define or display a section of a course. Use the Course Section Information section to access this section of the page.

You can define a section as traditional or open learning using the **Section Type** option group. When the field is set to Open Learning Section, additional fields are displayed in the Section Dates information for:

- **Duration**
- **Duration Unit**
- **Maximum Extensions**
- **Registration Dates From**
- **Registration Dates To**
- **Learner Start Dates First**
- **Learner Start Dates Last**

The **OLR Rules** button is also displayed. Use this button to access SSARULE and view section level registration code, refunding, and extension rule information for open learning sections.

When you set up an open learning section, the **Instructional Method**, **Registration Dates From**, **Registration Dates To**, **Duration**, and **Duration Unit** fields should be considered as a unit of data and should be used in place of the **Part of Term**, **Part of Term (From and To Dates)**, and **Part of Term (Weeks)** fields. The absence of a part of term defines an open learning course, and the section level rule processing will be invoked in registration and fee assessment processing for open learning sections. The **Part of Term** field is not required if the registration dates and duration information have been entered. When creating traditional sections, an appropriate part of term number should be manually entered.

Change traditional section to open learning section

Updated: August 27, 2020

You can redefine an existing traditional section as an open learning section. However, you *cannot* redefine an open learning section as a traditional section. The open learning section must be manually deleted and recreated as a traditional section.

Before you update an existing traditional term section to be an open learning section, make sure all section-related rules and validation codes have been defined in Banner.

When you change a traditional section to an open learning section, remember the following:

- After you change the **Section Type** option group from Traditional Term Section to Open Learning Section, you *cannot* go back and forth between the two settings.
- If you change a traditional section to an open learning section, and you want to discard your changes, *and* you have not saved the changes, you can start over on the page.
- After you have saved the changes, you have updated the section to an open learning section. If you want to change the section back to a traditional section, you *must* create a new traditional section.
- When a waitlist maximum has been set on the traditional section, you *must* remove the waitlist maximum before switching the section to open learning. Otherwise, an error is displayed, as waitlisting is not available for an open learning course, and you cannot save the changes.

Setting the Prerequisite Check Method option group

Updated: August 27, 2020

When selecting the setting of the Prerequisite Check Method option group, be aware of the following scenarios.

- When the **Prerequisite Check Method** is set to CAPP for a section and no CAPP area prerequisites exist, and the user makes a change to the record and saves the record, an error message is displayed: `No CAPP area is associated with this section. You must first add a CAPP area prerequisite to the section to save this value.` The user must acknowledge the message to continue.

- When the **Prerequisite Check Method** is set to CAPP for a section and no CAPP area prerequisites exist, and the Copy button is used to copy data to a new section, an error message is displayed: `No CAPP area is associated with this section. You must first add a CAPP area prerequisite to the section to save this value.` The user must acknowledge the message to continue.
- When the term in the key block is the same term from which the section is being copied, the associated prerequisites and the setting of the **Prerequisite Check Method** option group are copied from the section records on SSASECT and SSAPREQ.
  However, when the term in the key block is different than the term from which the section is being copied, the associated prerequisites and the setting of the **Prerequisite Check Method** option group are copied from course records on SCACRSE and SCAPREQ that are active for the term in the key block.

Main Window

Updated: June 20, 2024

Use this section to enter course information.

Fields/Buttons	Descriptions
Subject	Code and description of the subject associated with the section.
Course Number	Number of the course.
Title	Short title of the course, up to 30 characters. When valid values have been entered in the **Section** and **Course Number** fields, the system automatically displays the course title defined on the **Basic Course**

Fields/Buttons	Descriptions
	Information (SCACRSE) page. If you want to change the title for this section only, you can do so.
Section	Section number associated with the subject/course combination. A section number can be used only one time to identify a subject/course number combination in a term, with the exception of `0` (zero). `0` can be shared by multiple sections.
Cross List	Code and description of the cross list identifier used for cross listed courses.
Campus	Code and description of the campus associated with the section.
Status	Code and description of the status for the section. The **Allow Registration** check box on the **Section Status Code Validation (STVSSTS)** page controls whether the status entered will prevent or allow registration for this section.
Schedule Type	Code and description of the instructional type for the section. Data elements on this page are used in faculty load processing.
Instructional Method	Code and description of the instructional method for the section from GTVINSM. This field is required for open learning sections. There are two ways to attach an

Fields/Buttons	Descriptions
	instructional method to a section: • Attach the instructional method directly to the section in SSASECT. Enter a code or select one from list of valid values for an open learning section. • Use defaulted information from the catalog record (SCRSCHD). An instructional method may or may not have been assigned to the course. You can change the instructional method after processing the registration records (that is, when enrollments exist), after you select the **CRN Instructional Method Override** check box for the term on the SOATERM page. **Note:** If you change the instructional method after enrolling, it can affect fee assessment, financial aid, faculty load and compensation. You cannot modify the instructional method when enrollments exist,and if the instructional method is used by Elevate, Cross Registration, or an Open Learning Class. In such cases, the check box will be disabled. When fee rules are defined for the old or new instructional methods using the SFARGFE page, and the instructional method is modified for the CRN, the collector records in the SFRBTCH table get created for the fee adjustments. Or when section fee rules are created in the SSADETL page, the collector records are created whenever the Instructional Method

Fields/Buttons	Descriptions
	is changed for a CRN with enrollments. To compute fee adjustments after changing the Instructional Method, run the SFRFASC process to compute the fees. Ellucian recommends you to run the SFRFASC process before any updates to the Instructional Method for any CRN in a term. If the **CRN Instructional Method Override** check box is disabled for the term on the SOATERM page, you will not be able to modify the instructional method for the CRN with enrollments in the term using SSASECT. After registration records for the CRN are processed, the **Instructional Method** field will be disabled in this scenario.
Integration Partner	Code and description of the integration partner. Use this field to designate that the section can be used for integration with a third party partner system, such as WebCT. Integration codes are defined and maintained on the **Integration Partner Rules (GORINTG)** page and are used in extract processing and event processing. If a section is flagged for integration, the system will check if the section will be extracted. You can add, update, or delete a valid integration partner system code that has been defined on GORINTG, as required by business practices. Changes to this code will produce an LDISECTION event.

Fields/Buttons	Descriptions
	This code is associated with the user integration code. Only course sections that contain a valid partner system code will be communicated to an LMS partner system. All course sections will be communicated to the portal as required.
Grade Mode	Code for the grading mode for the section. Grades can be set up on the **Grade Code Maintenance (SHAGRDE)** page.
Session	Code for the session in which the section is scheduled, such as evening, weekend, and so on.
Special Approval	Code for the type of special approval a student must have to register, if applicable. The **Approval** option group in the Section Options on SOATERM controls how this is checked at registration.
Duration	
Override duration	

Class Type section

Updated: August 27, 2020

Use this section to enter class type.

Field	Description
These fields are in Traditional Class section	
Part of Term	Code and description of the part of term in which the section is offered.

Field	Description
	The value entered here must be valid as defined for the term on SOATERM. The default is `1`. For non-open learning sections, this field is used to designate the length of the term for which the section is to be offered. If meeting times already exist, you cannot change the value in this field unless you first delete the meeting information, then change this field, and finally re-enter the meeting information. This allows you to change the part of term without changing the days on which the course is scheduled and avoids possibly creating inaccurate room assignments.
Part of Term Start Date (untitled)	Start date for the part of term that is used when students register for the section. This defaults from the **Start Date** field in the Base Part of Term section of SOATERM, based on term in the key block and the value in the **Part of Term** field.
Part of Term End Date (untitled)	End date for the part of term that is used when students register for the section. This defaults from the **End Date** field in the Base Part of Term section of SOATERM, based on term in the key block and the value in the **Part of Term** field.
Part of Term Weeks (untitled)	Number of weeks in the term. This defaults from the **Number of Weeks** field in the Base Part of Term section of SOATERM, based on term in the key block and the value in the **Part of Term** field.
These fields are in Open Learning Class section	
Registration Dates (First)	First date that registration is open to the learner for this section for an open learning course.

Field	Description
	This date comes from Registration Date Defaults data of the applicable rule on the Open Learning Section Default Rules (SOAORUL) page. If the **Override (Indicator)** is cleared for the corresponding rule on SOAORUL, you cannot navigate to the **Registration Dates** fields. This functionality imitates that associated with the part of term dates in conjunction with the **Section Override (Indicator)** on the part of term record in SOATERM. If no rules or no applicable rules exist on SOAORUL for the course or section characteristics, you will not be permitted to create the section record. This date cannot be changed after registration records have been processed for the section. This field is displayed when the **Section Type** option group is set to Open Learning Section.
Registration Dates (Last)	Last date that registration is open to the learner for this section for an open learning course. This date comes from Registration Date Defaults data of the applicable rule on SOAORUL. If the **Override (Indicator)** is cleared for the corresponding rule on SOAORUL, you cannot navigate to the **Registration Dates** fields. This functionality imitates that associated with the part of term dates in conjunction with the **Section Override (Indicator)** on the part of term record in SOATERM. If no rules or no applicable rules exist on SOAORUL for the course or section characteristics, you will not be permitted to create the section record. This date cannot be changed after registration records have been processed for the section.

Field	Description
	This field is displayed when the **Section Type** option group is set to Open Learning Section.
Processing rules	This is used to go to Schedule Processing Rules (SSARULE)
Maximum Extension	Maximum number of extensions permitted for this open learning section for a learner who is actively registered. Enter a value from `0` to `999`. When a new section is created, this field will be populated with `0` (zero). The value in this field cannot be changed after registration records have been processed for the section. This field is displayed when the **Section Type** option group is set to Open Learning Section.

Credit Hours

Updated: August 27, 2020

Use this section to enter credit hours.

Field	Description
Credit Hours	Credit Hours indicate the minimum and maximum number of credits for which a course section (CRN) may be offered. If only a minimum number is present, the CRN may only be offered for that amount of credits.
Credit Hours Indicator	This field defines whether the course section can be offered for variable credit. OR/TO is used to specify the relationship between low and high credit hours. An OR/TO value must exist to enter Credit Hours High.
Billing Hours	Billing Hours is used to designate the section billing hours, if the course was defined with variable billing hours. **Billing Hours** must match **Credit Hours**.
Billing Hours Indicator	This field defines whether the course can be billed for variable credit. OR/TO is used to specify the relationship between the

Field	Description
	low and high billing hour values. An OR/TO value must exist to enter Billing Hours High.
Contact Hours	This field is the column that contains the sum of low lecture, lab and others hours. Contact hours divided by 10 are the continuing education units for a continuing education section. This calculated value is stored in the credit hour field.
Contact Hours Indicator	This column contains the literal TO or OR to define the relationship between the low and high contact hours.
Lecture	This field is used to specify the lecture hours specific to this section.
Lecture Indicator	This field defines whether the course can be offered for variable lecture hours. OR/TO is used to specify the relationship between the low and high lecture hour values. An OR/TO value must exist to enter Lecture Hours High.
Lab	This field is used to specify the lab hours specific to this section.
Lab Indicator	This field defines whether the course can be offered for variable lab hours. OR/TO is used to specify the relationship between the low and high lab hour values. An OR/TO value must exist to enter Lab Hours High.
Other	This field is used to specify the other hours specific to this section.
Other Indicator	This field defines whether the course can be offered for variable other hours. OR/TO is used to specify the relationship between the low and high other hour values. An OR/TO value must exist to enter Other Hours High.

Class Indicators (California Localization)

Updated: August 27, 2020

Use this section to enter class indicators.

Field	Description
Prerequisite Check	Option group used to select the registration prerequisite

Field	Description
Method	checking method for the course for the effective term. Values are Basic or None (use existing prerequisites), CAPP (use CAPP area prerequisites), and DegreeWorks (use DegreeWorks prerequisites). The default value is Basic or None. Values saved to the database are B, C, or D. When DegreeWorks is installed, the CAPP option is not available. When CAPP prerequisite checking is in use, the DegreeWorks option is not available. For more information on using CAPP area prerequisites, refer to the *Banner Student CAPP* content in the *Banner Student Use* content in the Ellucian Documentation site. For more information on using DegreeWorks prerequisites, refer to the *Registration* chapter of the *Banner Student Use* content.
CEU Indicator	Check box used to indicate that the section is a continuing education section. Display only.
Link Identifier	User-defined code which links two sections that must be taken concurrently. You must enter the same code in this field for all sections that are linked. You must also enter the same code in the **Section Links** field on the Schedule Detail (SSADETL) page for each of the sections. This action links sections together, so that an error message is displayed during registration if a student tries to register for only one of the linked sections. Registration link errors must be defined for the term by SOATERM for the system to generate error messages for linked courses at registration.
Attendance Method	Code for the attendance accounting method for the section. For open learning sections, the independent study attendance method can be used.

<table>
<tr><th>Field</th><th>Description</th></tr>
<tr><td>Weekly Contact Hours</td><td>Weekly contact hours for the section. Number of hours the section meets per week.</td></tr>
<tr><td>Daily Contact Hours</td><td>Daily contact hours for the section. Number of hours the section meets per day.</td></tr>
<tr><td>Print</td><td>Check box used to indicate whether the class is to be printed on the Class Schedule Report (SSRSECT).</td></tr>
<tr><td>Gradable</td><td>Check box used to indicate whether the section is gradable.

If you have multiple sections that are graded as a single section (for example, a lab and lecture combination), only one of the sections should be defined as gradable and the other section(s) should be defined as not gradable, and the credit hours/billing hours must be changed to `0` (zero). This also involves defining the course as a variable credit course in the Basic Course Information (SCACRSE) page.</td></tr>
<tr><td>Tuition and Fee Waiver</td><td>Check box used to indicate whether the section has the option of being offered for a tuition or fee waiver as defined in the Registration Fee Assessment Rules (SFARGFE) page.

• When selected, all rules on SFARGFE that are overrideable will be ignored during registration fee assessment.
• When cleared, all rules on SFARGFE will be applied.

This check box does not update or affect existing sections or registration records. When a record is initially created on SSASECT and the indicator is cleared, the value is set to Null. If the indicator is then selected, the value is set to Y. If the selected indicator is subsequently cleared, the value is set to N.</td></tr>
<tr><td>Voice Response and Self-Service Available</td><td>Check box used to indicate whether the section should be available on Voice Response and in the Banner Self-Service applications.

Registration processing uses this check box.</td></tr>
</table>

Field	Description
	• When selected, the section is available for registration and add/drop purposes in Voice Response and Banner Self-Service. • When cleared, the section is not available for registration or add/drop purposes in Voice Response and Banner Self-Service. This check box is interpreted as follows in Banner Self-Service. When using the Look-Up Classes to Add Web page: • When selected, the section will be displayed if selected by search criteria. • When cleared, the section will not be displayed if selected by search criteria. When using the Add/Drop Classes Web page: • If the student has not registered for the section and enters the CRN using the worksheet, the error `Section not available for web add/drop` will be displayed. An audit trail of the registration attempt will also be written. • If the student is already registered for a section whose **Voice Response and Self-Service Available** check box is cleared, the error `Section not available for web add/drop` will be displayed, and the drop will not be processed. However, an audit trail record will be written. If the student attempts to make changes on the Change Class Options page, the same error will be displayed. The `CRNDIRECT` internal code on the Crosswalk Validation (GTVSDAX) page allows you to specify whether a class that is not available for Voice Response or Banner Self-Service can be registered for or updated on the Add or Drop Classes or Change Class Options pages in Banner Self-Service if the CRN is known.

Field	Description
Long Title	Check box used to indicate whether a long title exists as part of the section syllabus information on the Section Syllabus (SSASYLB) page. Display only.
Comments	Check box used to indicate whether section comments exist in the SSRTEXT table for the section. Display only.
Syllabus	Check box used to indicate whether learning objectives, required materials, or technical requirements have been defined on SSASYLB. Display only.

California Localization

The field and description in this section applies to California only.

Field	Description
Attendance Method	Code for the attendance accounting method for the section. Required.
Weekly Contact Hours	The value in this field is the sum of all meetings' **Hours per Week** values if the attendance method code is defined as one of the following: • Weekly • Actual • Independent Study combined with Weekly • Independent Study combined with Actual • Independent Study Lab • Non-apportionment-reported (all accounting method check boxes are cleared on STVACCT) With the other attendance method code settings, this field is left blank.
Daily Contact Hours	Daily contact hours for the section. Number of hours the section meets per day. The value in this field is the first meeting's **Hours per Day** values (since all meetings should be the same if it is daily) if the attendance method code is defined

Field	Description
	as one of the following: • Daily • Actual • Independent Study combined with Daily • Independent Study Actual • Non-apportionment-reported (all accounting method indicators are cleared on STVACCT) With the other attendance method code settings, this field is left blank.

Hours

Updated: August 27, 2020

Use this section of the page to enter low and high hours for credit, billing contact, lecture, lab, or other types of sections. You can also specify the relationship between the hour ranges. Use the Course Section Information section to access this section of the page.

Fields	Descriptions
Credit Hours Low	Minimum number of credits for which the course can be offered. Display only.
Credit Hours Options	Relationship between low and high credit hours. Display only. • None = No relationship exists • Or = Sets the credit hours at two specific offerings, such as 3 or 4 credit hours • To = Sets the credit hours within a range, such as 2 to 6 credit hours
Credit Hours High	Maximum number of credits for which the course can be offered. Display only.
Credit Hours	Exact number of CEU or credit hours for which the section can be

Fields	Descriptions
(untitled)	offered. This is used if the course was set up with a variable CEU or credit hour range but you want to limit this particular section to only one choice. The value specified must fall between the variable credit range specified in the **Course Hours Low** and **Course Hours High** fields. This field is located under the **Credit Hours Low** field.
Billing Hours Low	Minimum number of hours for which the course can be billed based on defined registration fee assessment rules. Display only.
Billing Hours Options	Relationship between low and high billing hours. Display only. • None = no relationship exists • Or = Sets the billing hours at two specific offerings, such as 3 or 4 billing hours • To = Sets the billing hours within a range, such as 2 to 6 billing hours
Billing Hours High	Maximum of hours for which the course can be billed. Display only.
Billing Hours (untitled)	Exact number of billing hours for which the section can be offered. This is used if the course was set up with a variable billing hour range but you want to limit this particular section to only one choice. The value specified must fall between the variable credit range specified in the **Billing Hours Low** and **Billing Hours High** fields. This field is located under the **Billing Hours Low** field.
Contact Hours Low	Minimum number of contact hours for which the course can be offered. Display only.
Contact Hours Options	Relationship between low and high contact hours. Display only. • None = No relationship exists • Or = Sets the contact hours at two specific offerings, such as

Fields	Descriptions
	3 or 4 contact hours • To = Sets the contact hours within a range, such as 2 to 6 contact hours
Contact Hours High	Maximum of contact hours for which the course can be offered. Display only.
Contact Hours (untitled)	Exact number of contact hours for which the section can be offered. This is used if the course was set up with a variable contact hour range but you want to limit this particular section to only one choice. The value specified must fall between the variable credit range specified in the **Contact Hours Low** and **Contact Hours High** fields. This field is located under the **Contact Hours Low** field.
Lecture Hours Low	Minimum number of lecture hours for which the course can be offered. Display only.
Lecture Hours Options	Relationship between low and high lecture hours. Display only. • None = no relationship exists • Or = Sets the lecture hours at two specific offerings, such as 3 or 4 lecture hours • To = Sets the lecture hours within a range, such as 2 to 6 lecture hours
Lecture Hours High	Maximum of lecture hours for which the course can be offered. Display only.
Lecture Hours (untitled)	Exact number of lecture hours for which the section can be offered. This is used if the course was set up with a variable lecture hour range but you want to limit this particular section to only one choice. The value specified must fall between the variable credit range specified in the **Lecture Hours Low** and **Lecture Hours High** fields.

Fields	Descriptions
	This field is located under the **Lecture Hours Low** field.
Lab Hours Low	Minimum number of lab hours for which the course can be offered. Display only.
Lab Hours Options	Relationship between low and high lab hours. Display only. • None = No relationship exists • Or = Sets the lab hours at two specific offerings, such as 3 or 4 lab hours • To = Sets the lab hours within a range, such as 2 to 6 lab hours
Lab Hours High	Maximum of lab hours for which the course can be offered. Display only.
Lab Hours (untitled)	Exact number of lab hours for which the section can be offered. This is used if the course was set up with a variable lab hour range but you want to limit this particular section to only one choice. The value specified must fall between the variable credit range specified in the **Lab Hours Low** and **Lab Hours High** fields. This field is located under the **Lab Hours Low** field.
Other Hours Low	Minimum number of other hours for which the course can be offered. (Other hours are defined by your institution.) Display only.
Other Hours Options	Relationship between low and high other hours. Display only. • None = No relationship exists • Or = Sets the other hours at two specific offerings, such as 3 or 4 hours • To = Sets the other hours within a range, such as 2 to 6 hours
Other Hours High	Maximum of other hours for which the course can be offered. (Other hours are defined by your institution.) Display only.
Other Hours	Exact number of other hours for which the section can be offered.

Fields	Descriptions
(untitled)	This is used if the course was set up with a variable other hour range but you want to limit this particular section to only one choice. The value specified must fall between the variable credit range specified in the **Other Hours Low** and **Other Hours High** fields. This field is located under the **Other Hours Low** field.

Enrollment Details

Updated: March 17, 2022

Use this section of the page to review the displayed registration information for the section specified in the key block. Use the Section Enrollment Information section and then the Enrollment Details section to access this section of the page.

For an open learning section, the SOAORUL populates the **Census One Freeze Date** and **Census Two Freeze Date** fields with the census dates, as opposed to the census date fields associated with the part of term record in SOATERM.

Note: The system tests for reserved seating each time the Enrollment Details section of the page is entered. You can only delete reserved seating when no enrollment exists for the reserved seating. When enrollment exists that meets the reserved seating requirement, you will not be allowed to delete reserved seating.

Fields	Descriptions
These fields are in the Enrollment Details information.	
Maximum	Maximum enrollment for the section. This field is used in Location Management when a user is attempting to assign classrooms large enough to satisfy the section enrollment. When the **Capacity** option group is set to `Warning` on the Term Control (SOATERM) page, the system issues a warning when enrollment exceeds this number.
Waitlist Maximum	Maximum number of students allowed to be waitlisted for the section.

Fields	Descriptions
Projected	Anticipated enrollment in the section. This field is informational only, and it controls no system processing.
Actual	Actual enrollment for the section. Display only.
Waitlist Actual	Actual number of students waitlisted for the section. Display only.
Prior	Number of students enrolled in the section in the previous term. Display only.
Remaining	Remaining number of seats available for the section. Display only.
Waitlist Remaining	Remaining number of waitlist seats available for the section. Display only.
Reserved	Check box used to indicate that reserved seats exist for the section. The default is checked (Y) when a section is created. Select the **Active for Term** check box in the Add Authorizations section of the Term Control (SOATERM) page must be selected to edit this field.
Registered Pending Finalization	Number of students who have successfully registered in the section and the number of students whose registration is still pending, respectively
Waitlisted Pending Finalization	Number of students who have successfully waitlisted for the section and the number of students whose waitlist status is still pending, respectively
Authorization Codes Active For Section	Check box used to indicate if Authorization codes are active for the section. The default is selected (Y) when a section is created. The **Active for Term** check box in the Add Authorizations section of the Term Control (SOATERM) page must be selected to edit this field
Generated Credit Hours	Total credit hours of enrolled students. Display only.
These fields are in the Census One section.	
Enrollment Count	Census one enrollment count. Display only.
Freeze Date	Date on which to freeze the enrollment count for use in census one statistical reporting.

Fields	Descriptions
	The value in this field is used to capture the enrollment data for the designated date.
These fields are in the Census Two section.	
Enrollment Count	Census two enrollment count. Display only.
Freeze Date	Date on which to freeze the enrollment count for use in census two statistical reporting. The value in this field is used to capture the enrollment data for the designated date.
These fields are in the Add Authorization Registration Dates section	
Calculated Section Start Date	Date the class first meets for the term based on meeting times defined on the Meeting Times and Instructors tab. If no meeting times are defined, the first date of the date range defined for the Part of Term displays. For Open Learning sections, the field displays no information.
Add Authorization Start Date	Date that an Authorization code becomes required to register for the section. It is determined by adjusting the **Calculated Section Start Date** by the value in the **Days Required Relative to Start Date** field in the Add Authorizations section of the Term Control (SOATERM) page. This value can be positive or negative, which would adjust the date later or earlier, respectively.
Waitlist Notification Ending Date	Date and time that the system will stop sending waitlist notifications for available seats in this section. It is determined by subtracting the value in the **Waitlist Notification Deadline** field of the Waitlist Automation Section Control (SSAWLSC) or Waitlist Automation Term Control (SOAWLTC) page from the **Add Authorization Start Date**.

California Localization

The fields and descriptions in the section apply to California only.

Fields	Descriptions
Census One Freeze Date	To support CALB localizations, if the CRN's **Academic Calendar Type** field on the Schedule Calendar (SSAACCL) page is not null, and you cannot update this field. The baseline restriction to prevent changes when enrollment exists has been removed.
Census Two Freeze Date	To support CALB localizations, if the CRN's **Academic Calendar Type** field on the Schedule Calendar (SSAACCL) page is not null, and you cannot update this field. The baseline restriction to prevent changes when enrollment exists has been removed.

Reserved Seats

Updated: August 27, 2020

Use this section of the page to enter or display data for reserved seating for the section specified in the key block.

Data is specified as curriculum, student, and enrollment data. Data is displayed for total reserved maximum, actual, and remaining seats in addition to the waistlisted and original totals for the section. Use the Section Enrollment Information section and then the Reserved Seats section to access this section of the page.

The numbers for reserved and waitlisted seating are defaulted in from the Enrollment Details section of the page. To add seats, use a new row, and save to update the totals in each column. Use the **Delete Reserved Seats** button to delete seating data if each reserved rule has zero (0) actual seats taken.

The reserved seating check for a student's major examines only the Major 1 (highest priority major) of the student's primary curriculum (highest priority curriculum). The reserved seating check for a student's level examines only the level of the student's primary curriculum (highest priority curriculum).

Reserved seating does *not* check for a valid combination of field of study type and field of study code.

Note: The system tests for reserved seating each time the Reserved Seats section of the page is entered. You can only delete reserved seating when no enrollment exists for the reserved seating. When enrollment exists that meets the reserved seating requirement, you will not be allowed to delete reserved seating.

Fields/Buttons	Descriptions
These fields are in the Curriculum information.	
Level	Student level associated with the section for the reserved seats rule.
Campus	Campus associated with the section for the reserved seats rule.
College	College associated with the section for the reserved seats rule.
Degree	Degree associated with the section for the reserved seats rule.
Program	Program associated with the section for the reserved seats rule.
Field of Study Type	Learner field of study type code (from GTVLFST) associated with the section for the reserved seats rule.
Field of Study Code	Field of study code associated with the section for the reserved seats rule.
Department	Department associated with the section for the reserved seats rule.
Curricula	Curriculum associated with the section for the reserved seats rule. Valid values are Primary, Secondary, Any.
These fields are in the Student information.	
Class	Class code associated with the section for the reserved seats rule.
Attribute	Student attribute associated with the section for the reserved seats rule.
Cohort	Cohort associated with the section for the reserved seats rule.
Admission Term	Admission term associated with the section for the reserved seats rule.
Matriculation Term	Matriculation term associated with the section for the reserved seats rule.

Fields/Buttons	Descriptions
Graduation Term	Graduation term associated with the section for the reserved seats rule.
These fields are in the Enrollment information.	
Overflow	Check box used to indicate when selected (set to Y), that processing will check unreserved available seats when seats on the reserved rule are full. Students who were previously unable to register can now register for those unreserved available seats. The field can be selected (set to Y) to allow the use of overflow seating or cleared (set to N) to not allow the use of overflow seating. The default setting for the **Overflow** check box is cleared or N.
Reserved Max	Maximum number of reserved seats for the rule.
Actual	Number of actual reserved seats taken for the rule.
Remaining	Number of reserved seats available for the rule.
Waitlist Max	Maximum number of waitlisted seats for the rule.
Waitlist Actual	Number of actual waitlisted seats taken for the rule.
Waitlist Remaining	Number of waitlisted seats available for the rule.
These fields are in the Totals information.	
Total Reserved Maximum	Maximum number of reserved seats for the rule.
Total Reserved Actual	Number of reserved seats taken for the rule.
Total Reserved Remaining	Number of reserved seats available for the

Fields/Buttons	Descriptions
	rule.
Delete Reserved Seats	Button used to delete reserved seats for the rule.
Total Waitlist Maximum	Maximum number of waitlisted seats for the rule.
Total Waitlist Actual	Number of waitlisted seats taken for the rule.
Total Waitlist Remaining	Number of waitlisted seats available for the rule.
Original Section Total Reserved	Original number of reserved seats for the rule.
Original Section Total Waitlist	Original number of waitlisted seats available for the rule.

Meeting Times (California Localization)

Updated: August 27, 2020

Use this section of the page to assign meeting time data for the section specified in the key block. This section contains information for meeting dates and times and meeting location and credits. You can access this section of the page using the Meeting Times and Instructor section.

The meeting location and credits information is used to set up auto scheduling for the building, room, schedule type, weekly hours, and session credit hours in addition to indicate that partition and room attribute details exist.

Meeting times with a pre-assigned status are processed without regard for blackout times in the pre-assigned room.

For open learning sections, it is not necessary to define meeting times to assign faculty members to the section.

Use the **Cross List Meeting Time/Instructor Query** button to access SSAXMTI and retrieve meeting time and instructor information for the other sections that are cross-listed together. This button is displayed when the section is cross-listed.

Use the **View Building/Room Schedule** button to access SSAMATX and filter on building and room schedule data.

California Localization

If you change anything on SSASECT that impacts the instructor assignment FTE calculation on an assignment, the system recalculates the FTE. However, 'redisplays' without changes do not trigger recalculations.

Example (California localization)

Updated: August 27, 2020

This is an example of error handling that generates a warning.

Let's say you have set all error handling to `Warning`, and you save an entry on SSASECT that generates a warning. If you go back and lower the FTE (for example, by lowering the value in the **Percent of Responsibility** field), when you save, the limits are re-evaluated. If warning still applies, it is displayed again. If the total load is now below the limit, the warning is cleared.

CALB localizations affect contact hours calculations For detailed information about these calculations, see *Banner Open Learning Registration* content in the Ellucian Documentation site.

Meeting Location and Credits Window (California localization)

Updated: August 27, 2020

This window is used to set up auto scheduling for the building, room, schedule type, weekly hours, and session credit hours, and indicate that partition and room attribute details exist.

This window is a sub window of the Meeting times window and contains the Meeting location credits block and the Instructor block. You can access this window using the Meeting Times and Instructor tab, then the Times and Instructor tab, and then the Meeting location and Credits tab.

Fields/Buttons	Descriptions
Cross List Meeting Time/Instructor Query	Button used to access SSAXMTI and retrieve meeting time and instructor information for the other sections that are cross-listed together.

Fields/Buttons	Descriptions
	This button is displayed when the section is cross-listed. (**Cross List** field in the Course Section Information section of the page is populated.)
View Building/Room Schedule	Button used to access SSAMATX and filter on building and room schedule data.
These fields are in the Meeting Dates information.	
Meeting Time	Code for the meeting time for the section. Codes definitions include the days of week and begin and end times. The meeting time code values will default in the Meeting Times section of the page if a meeting time code is entered. Using this field also helps prevent instructors from being attached to non-existent session identifiers.
Meeting Type	Meeting type code (from GTVMTYP) assigned to this meeting time of the section. You can create multiple meeting records to create meeting times for regularly scheduled activities such as chat rooms, video/audio conferences, and so on, for display on the student's schedule. The default value for this field is CLAS, but you can change it.
Start Date	First date on which the section meets for the meeting type.
End Date	Last date on which the section meets for the meeting type.
Monday	Check box used to specify that the section meets on Mondays.
Tuesday	Check box used to specify that the section meets on Tuesdays.
Wednesday	Check box used to specify that the section meets on Wednesdays.
Thursday	Check box used to specify that the section meets on Thursdays.
Friday	Check box used to specify that the section meets on Fridays.
Saturday	Check box used to specify that the section meets on Saturdays.
Sunday	Check box used to specify that the section meets on Sundays.
Start Time	Begin time of day at which the section meets for the meeting type. This must be entered in 24-hour time; for example, 10:30 AM

Fields/Buttons	Descriptions
	would be entered as `1030`, and 7:00 PM would be entered as `1900`. This field is an important data element for assigning a classroom using Location Management.
End Time	End time of day at which the section meets for the meeting type. This must be entered in 24-hour time; for example, 11:00 AM would be entered as `1100`, and 9:30 PM would be entered as `2130`. This field is an important data element for assigning a classroom using Location Management.
Number of Days	Calculated number of days the session meets. If **Override Hours Indicator** check box is selected and if none of the day check boxes have been checked, this is the **Total Contact Hours** value / **Hours per Day** value. Otherwise, this is a count of the days the meeting meets by the date range and days checked (minus SSAEXCL excluded days).
Session Indicator	User-defined identifier for the session, such as a session number.
These fields are in the Meeting Location and Credits information.	
Automatic Scheduler	Scheduling status code for the meeting time from GTVSCHS. This code reflects the assignment code, whether the meeting time should be scheduled by Schedule25, and the scheduling needs of the class, such as a cross-listed class.
Building	Code of the building in which the section will meet.
Room	Code of the room in which the section will meet.
Schedule Type	Code of the schedule type of the section.
Include Break Time	Check box used to specify whether break minutes are to be included in the contact hours calculations. This defaults to checked on new and existing entries, but it can be changed. If you wanted a meeting scheduled from 8:00 to 8:50

Fields/Buttons	Descriptions
	without a break to have 1 contact hour, you would clear this check box. If you wanted a meeting scheduled from 8:00 to 10:50 with two breaks to have 3 contact hours, you would check this check box.
Calculated Break Minutes per Day	Total number of break minutes within one meeting day. Display only. A value is displayed in this field when the **Include Break Time** check box is selected. This calculation is based on the follow assumptions: the "last partial hour" rule is used to skip a break in the last partial hour, and the number of 10-minute breaks included is based on the whole hours.
Override Break Minutes per Day	Number of break minutes if the calculated number is incorrect. If you enter a value in this field, it replaces the calculated number of break minutes. You can use this field in special circumstances when the calculated break is not correct, for example, when a continuous class time is split into multiple meetings for contract or pay purposes.
Override Hours Indicator	Check box used to indicate whether override hours are to be calculated. • When selected, values are entered manually. • When cleared, values are system calculated.
Hours per Day	One-day contact-hour value (before multiplying by the number of Day fields checked).
Hours per Week	Number of hours the section meets per week for the meeting type. If a value is defaulted in, it can be changed. The valid value range is `0` to `999.99`. The value is entered in minutes that represent an hour of class time. If the beginning time, end time, and days of the week have been entered, the system calculates the value as follows:

Fields/Buttons	Descriptions
	(End Time - Start Time) * Days Per Week/Duration Factor The duration factor used is the value entered on the Faculty Load Term Control (SIATERM) page. The value entered here is multiplied by the values in the **Percent of Responsibility** and **Percent of Session** fields in the Instructor section of the page, and the resulting value is automatically entered in the **Weekly Contact** field in the Faculty Instructional Assignment section of the Faculty Assignment (SIAASGN) page. The following details support CALB localizations. When the **Override Hours Indicator** check box is selected, a value entered manually in this field is checked for reasonableness to the **Hours per Day** value. If the value is outside delivered parameters, an error message is displayed. When the **Override Hours Indicator** check box is cleared, the calculation of this field on a single meeting has been revised to match the CCCCO Attendance Accounting Manual standards for 50-minute class hour calculations.
Total Contact Hours	Total contact hours for all meetings and meeting days. If the **Override Hours Indicator** check box is selected and if none of the day checkboxes have been selected, a value can be entered in this field; otherwise, the value is calculated and display only. After a value has been entered manually, if the **Override Hours Indicator** check box is cleared or if at least one of the day checkboxes is checked, the value for this field is calculated and becomes display only. • For a CRN with any accounting method signifying weekly, the calculated value is the term's term length multiplier * the **Hours per Week** value. • For a CRN with any accounting method signifying weekly

Fields/Buttons	Descriptions
	independent study, the calculated value is the term's independent study term length multiplier * the **Hours per Week** value. • For all other accounting methods, calculated value is the **Number of Days** value * the **Hours per Day** value.
Override Indicator	Check box used to indicate that schedule conflict errors can be overridden. This allows the scheduling of two or more sections in the same room at the same time.
Session Credit Hours	Number of credits associated with the section for this meeting type, not to exceed the total number of section credits. This value is automatically entered in the **Session Credit** field in SIAASGN. It is used when calculating the following instructor credits and generated credit hours on other Banner forms.

Partition Preferences

Updated: August 27, 2020

Use this section of the page to define partition preferences for meeting days and times for auto scheduling (Schedule25).

The records in this section of the page are child records of the master records in the Meeting Times section of the page. You can access this section of the page using the Meeting Times and Instructor section and then the Partition Preferences section.

If the partition preference code in the section is blank, the Catalog preferences are displayed. If the Catalog preferences are blank, the preferences defined for the subject are displayed. You can change any defaults.

Fields	Descriptions
Code	Code and description of the code for the meeting entry from GTVPARS.
Preference Number	Preference number for the partition. Enter a value from 0 - 99. Multiple records can be

Fields	Descriptions
	entered for the same preference number. A message is displayed when the value is not 01, 02, 03, or 04, as those values are used with auto scheduling. A preference number of 01 is considered highest priority by the scheduling software.

Room Attribute Preferences

Updated: August 27, 2020

Use this section of the page to define room attributes (such as blackboard, projector, overhead) that are required to facilitate the needs of the instructor for auto scheduling (Schedule25).

The records in this section of the page are child records of the master records in the Meeting Times section of the page. You can access this section of the page using the Meeting Times and Instructor section and then the Room Attributes section.

If the room attribute preference code in the section is blank, the Catalog preferences are displayed. If the Catalog preferences are blank, the preferences defined for the subject are displayed. You can change any defaults.

Fields	Descriptions
Code	Code and description of the building/ attribute code for the meeting entry.
Preference Number	Preference number for the room attributes. Enter a value from 0 - 99. Multiple records can be entered for the same preference number. A message is displayed when the value is not 01, 02, 03, or 04, as those values are used with auto scheduling. A preference number of 01 is considered highest priority by the scheduling software.

Instructor (California Localization)

Updated: August 27, 2020

Use this section of the page to perform instructor tasks.

Instructor tasks include:

- assign faculty to traditional sections
- assign tutors to open learning sections
- determine the instruction workload
- individual faculty member's responsibility levels

Use the **Faculty/Advisor Query** button to filter information about faculty members. Use the **Available Faculty Query** button to filter data and determine which faculty members are available for the section. You can access this section of the page using the Meeting Times and Instructor section.

If the section has been defined with no part of term, you can assign an instructor or tutor, even if no meeting time record has been created in the SSRMEET table. Traditional sections (that is, those defined with part of term information) require the creation of meeting time records before an instructor assignment can be completed.

Fields/Buttons	Descriptions
Session Indicator	Session indicator associated with the instructor assignment. This is used to assign a faculty member to a session, as defined in the Meeting Times section of the page.
ID	User ID and name of the faculty member assigned to instruct the session/section. You can access SIAFAVL, SIAIQRY, and SIAASGQ from this field and filter information on faculty members and advisors.
Instructional Workload	Hours assigned to the instructor for the course. Display only.
Percent of Responsibility	Percentage of the instructional workload and session credits for which this instructor is responsible.

Fields/Buttons	Descriptions
	This field is used to designate the instructional workload and the session credits. The percent of responsibility assigned to an individual instructor cannot exceed 100%, but the total responsibility for multiple instructors can exceed 100%. The total percentage of responsibility cannot be less than100%. The values entered here are used on the Faculty Assignment (SIAASGN) page.
Primary Indicator	Check box used to indicate whether this instructor is the primary instructor for the section. A primary instructor must exist for each section, and there can only be one primary instructor for each section.
Percent of Session	Percentage of the session for which this instructor is responsible. This field is used to designate the percentage of faculty responsibility for a section during a session. The percent of responsibility assigned to an individual instructor cannot exceed 100%, but the total responsibility for multiple instructors can exceed 100%. The total percentage of responsibility cannot be less than100%. The values entered here are used on SIAASGN.

California Localization

The fields and description in this section apply to California only.

Fields/Buttons	Descriptions
Conflict Indicator	Check box used to indicate whether the system should override conflicts in the faculty member's schedule. When selected (value of O), instructor conflicts are overridden. When cleared (Null), conflicts are checked but not overridden.
Faculty Load	Indicator for the faculty load limits error handling level specified

Fields/Buttons	Descriptions
Override	for the faculty staff type code (defined on the Faculty Staff Type Code Validation Page [STVFSTP]) associated with the faculty member. The only value that can be entered in this field by a user is `U`, and this can be entered only if user overrides are in use. The other values are display only. Values are: • W = Warning only; the system issues a message after saving a new assignment if the saved record surpasses the load limit. • U = User override; the system issues a message requiring a user override before the transaction can be saved. • A = Administrative override; the system issues a message requiring an administrative override before the transaction can be saved. This field was added to support CALBSTU localizations.
Faculty Load Message	Message associated with the faculty load limit for the faculty member. No message is displayed if the load limit has not been reached. This field was added to support CALBSTU localizations.

Partition Preferences

Updated: August 27, 2020

This section of the page is used to define partition preferences for the section specified in the key block and the record selected in the Meeting Times section of the page. Use the Section Preferences section to access this section of the page.

If the partition preference code in the section is blank, the Catalog preferences are displayed. If the Catalog preferences are blank, the preferences defined for the subject are displayed. You can change any defaults.

Fields	Descriptions
Code	Code and description of the partition used for the meeting entry from GTVPARS.
Preference Number	Preference number for the partition. Enter a value from 0 - 99. Multiple records can be entered for the same preference number. A message is displayed when the value is not 01, 02, 03, or 04, as those values are used with auto scheduling. A preference number of 01 is considered highest priority by the scheduling software.

Room Attribute Preferences

Updated: August 27, 2020

Use this section of the page to define room attributes (such as blackboard, projector, overhead) that are required to facilitate the needs of the instructor.

Attributes are for the section specified in the key block and the record selected in the Meeting Times section of the page. Use the Section Preferences section to access this section of the page.

If the room attribute preference code in the section is blank, the Catalog preferences are displayed. If the Catalog preferences are blank, the preferences defined for the subject are displayed. You can change any defaults.

Fields	Descriptions
Code	Code and description of the building/ attribute used for the meeting entry.
Preference Number	Preference number for the room attribute. Enter a value from 0 - 99. Multiple records can be entered for the same preference number. A message is displayed when the value is not 01, 02, 03, or 04, as those values are

Fields	Descriptions
	used with auto scheduling. A preference number of 01 is considered highest priority by the scheduling software.

Scheduling Region Code Rules (SSASRGN) page

Updated: August 27, 2020

Use the Scheduling Region Code Rules (SSASRGN) page to set up data used in the Plan Ahead option to display course sections based on the location associated with a student's primary program of study or study path.

About this task

By default, students will be able to select from all of the course sections your institution offers. If you have multiple campus locations, this includes the sections at each location. You have the option to limit the sections displayed to the student by the geographic region associated with their primary program of study or their selected study path. When you do this, students will see the sections offered at the location you've defined for the area they are in and all online courses. If a student wants to see sections offered at another location, they can do so by selecting the specific Campus Code for that location.

To enable this functionality, complete these steps.

Procedure

1. On the **Scheduling Region Code Validation (STVSRGN)** page, define a code for each region that your institution covers. For example, if your institution has city and suburb campuses, you could create the following.

Code	Description
CITY	The campuses in the city proper.
SBRB	The campuses located outside of the city.

2. On the **Scheduling Region Code Rules (SSASRGN)** page, associate a region to every

campus associated with your institution. Do not assign online courses to a region. For example, if your institution has multiple courses in the CITY region, your SSASRGN entry would be similar to the following.

Campus Code	Campus Description	Scheduling Region	Scheduling Region Description
MHT	Manhattan	CITY	The campuses in the city proper.
BKLN	Brooklyn	CITY	The campuses in the city proper.
QNS	Queens	CITY	The campuses in the city proper
WEST	Westchester	SBRB	The campuses located outside of the city.

Warning! Every physical campus must be assigned to a region. If a campus is not assigned to a region, all courses will be displayed.

3. On the **Crosswalk Validation (GTVSDAX)** page, set the External Code for CAMPCODE to Y.

Section Syllabus (SSASYLB) page

Updated: August 27, 2020

Use the Section Syllabus (SSASYLB) page to enter or display a section's syllabus, including descriptions of student learning objectives, required materials, and technical requirements.

This information is displayed in Self-Service to aid students in selecting and registering for course sections. The course syllabus information can be copied to the section level at the user's request. All syllabus information is optional.

This page is composed of the following sections:

- Key block
- Section Long Title
- Learning Objectives
- Required Materials
- Technical Requirements

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN of the section for which you want to enter or display syllabus information. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the effective term for the section.
CRN	Course reference number.
Search	Button used to access SSASECQ and filter data on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Course Title	Course title assigned on the Schedule (SSASECT) page. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Section Long Title

Updated: August 27, 2020

Use this section of the page to enter a long section title for the section specified in the key block.

You can copy this title from the Course Catalog module, if desired, and make any necessary revisions. If no long section title is defined here, the course long title will, if defined, be used for those sections where applicable. This long title information is primarily for use in Self-Service.

Use the **Copy From Course** button to copy the section long title by term. Use the Section Long Title section to access this section of the page.

Fields/Buttons	Descriptions
Copy From Course	Button used to copy the long section title to a new term.
Long Title	Free form field for the long title of the

Fields/Buttons	Descriptions
	course, up to 100 characters. You can also edit existing text.
URL	URL, up to 100 characters, for Web-based course content or course materials. This value must begin with `http://` to allow for proper navigation on the Web. This will be displayed to Banner Self-Service users as an active hypertext link.

Learning Objectives

Updated: August 27, 2020

Use this section of the page to enter or display the learning objectives information for the section specified in the key block.

This is what the student should expect to learn if taking this course. You can copy these objectives from the Course Catalog module if you choose. The learning objectives information is primarily for use in Self-Service.

Use the **Copy From Course** button to copy learning objectives by term. Use the Learning Objectives section to access this section of the page.

Fields/Buttons	Descriptions
Schedule Type	Code and description of the schedule type associated with the section. Display only.
Instructional Method	Code and description of the instructional method associated with the section. Display only.
Copy From Course	Used to copy learning objectives to a new term.
Learning Objectives (untitled)	Free form field for the text for the learning objectives. You can enter up to 32,760 characters. Text entered in this field automatically wraps at the end of the line. You can also edit existing text.

Required Materials

Updated: August 27, 2020

Use this section of the page to maintain required text, materials, and other course-related information for the section specified in the key block. You can copy this information from the Course Catalog module, if desired.

Use the **Copy From Course** button to copy required materials by term. Use the Required Materials section to access this section of the page.

Fields/Buttons	Descriptions
Schedule Type	Code and description of the schedule type associated with the section. Display only.
Instructional Method	Code and description of the instructional method associated with the section. Display only.
Copy From Course	Button used to copy required materials to a new term.
Required Materials (untitled)	Free form field for the text for the required materials. You can enter up to 32,760 characters. Text entered in this field automatically wraps at the end of the line. You can also edit existing text.

Technical Requirements

Updated: August 27, 2020

Use this section of the page to maintain technical requirements for the for the section specified in the key block. This includes information such as the minimum computer requirements the student must have to successfully complete the course. You can copy this information from the Course Catalog module, if desired.

Use the **Copy From Course** button to copy technical requirements by term. Use the Technical Requirements section to access this section of the page.

Fields/Buttons	Descriptions
Schedule Type	Code and description of the schedule type associated with the section. Display only.

Fields/Buttons	Descriptions
Instructional Method	Code and description of the instructional method associated with the section. Display only.
Copy From Course	Button used to copy technical requirements to a new term.
Technical Requirements (untitled)	Free form field for the text for the technical requirements. You can enter up to 32,760 characters. Text entered in this field automatically wraps at the end of the line. You can also edit existing text.

Section Comment (SSATEXT) page

Updated: August 27, 2020

Use the Section Comment (SSATEXT) page to enter or display short and long comments associated with a section. Comments entered here appear on the Class Schedule Report (SSRSECT).

A course must have been created on the Basic Course Information (SCACRSE) page. Sections of this course are then created using the Schedule (SSASECT) page. Only after both the course and section are created can comments for a section be entered and maintained.

The page is composed of the following sections:

- Key block
- Section Text
- Section Long Text

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to enter or display text. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term for which the text is in effect.
CRN	Course reference number.
Search	Button used to access SSASECQ and filter course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Course title assigned on the Schedule (SSASECT) page. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Section Text

Updated: August 27, 2020

Use this section of the page to enter comments (up to 60 characters per record) for the section specified in the key block. Use the Text section to access this section of the page.

Fields/Buttons	Descriptions
Text	Section text associated with the college (and department, if applicable), up to 60 characters. Text can be edited. Each line is an individual record, and an unlimited number of records can be maintained. No word processing functions are provided.
Re-sequence Text	Button used to re-sequence text records and save the changes.

Section Long Text

Updated: August 27, 2020

Use this section of the page to enter or cut and paste lengthy information about a section. Use the Narrative Text section to access this section of the page.

You can enter a long comment (up to 32K of data) for the section specified in the key block. Text entered here can be used exclusively or can supplement the existing 60-character records in the Section Text information. Long text information will be included on the SSRSECT and SSRTALY reports, based on parameter settings.

Fields	Descriptions
Section Long Text (untitled)	Free form field for the long text for the section. You can enter up to 32,760 characters per long comment. Comments entered in this field automatically wrap at the end of the line. You can also edit existing text.

Waitlist Automation Section Control (SSAWLSC) page

Updated: August 27, 2020

Use the Waitlist Automation Section Control (SSAWLSC) page to set up waitlist controls by term and CRN for automatic student notification, waitlist registration error checking, display of student waitlist queue position in Banner® Student Self-Service, and student notification deadline time period.

CRNs that are defined as open learning courses cannot be used with this page.

This page is composed of the following sections:

- Key block
- Waitlist Control

Key block

Updated: August 27, 2020

Use the key block to enter the term and CRN for which the waitlist controls are to be set. Use the **Process Default** button to copy the settings to a new term.

Fields/Buttons	Descriptions
Term	Code and description of the term used for waitlist controls.
CRN	Course reference number for the waitlist controls.

Fields/Buttons	Descriptions
Subject	Subject of the course.
Course	Number of the course.
Title	Course title assigned on the Schedule (SSASECT) page. Display only.
Process Default	Button used to copy waitlist controls for a new record to the CRN (based on SOAWLTC values) and then save the record.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on SCACRSE page.

Waitlist Control

Updated: August 27, 2020

This section of the page contains the controls you can set for a term and CRN for automated waitlist processing.

Records must exist on SOAWLTC in order for section term controls to be defined on SSAWLSC. If no records exist in the SSBWLSC table, values from the SOBWLTC table will be defaulted in.

- When the **Automatic Waitlist Notification** check box is cleared, automated waitlist notification processing will not be used for the CRN.
- When the **Use Waitlist Registration Error Checking** check box is cleared, waitlist registration checking from SOAWLTC will not be used, and no checking will take place for the CRN.

Fields	Descriptions
Automatic Waitlist Notification	Check box used to indicate that automated waitlist notification will be used for the CRN.
Use Waitlist Registration Error Checking	Check box used to indicate that waitlist registration error checking from SOAWLTC will be used for the CRN.
Show Waitlist Position on Student Self-Service	Check box used to indicate that the student's position in the waitlist queue will be displayed in Banner Self-Service.

Fields	Descriptions
Waitlist Notification Deadline Hours	Time period in hours by which the waitlisted student must register for the course after being notified of an available seat.
Resend Deadline Hours	Time period in hours for which the system will attempt to resend a failed email waitlist notification.

Section Web Controls (SSAWSEC) page

Updated: August 27, 2020

Use the Section Web Controls (SSAWSEC) page is used to enter or display the section Web controls for Banner Student Self-Service and Banner® Faculty and Advisor Self-Service.

This page is composed of the following sections.

- Key block
- Student Self-Service Display Controls
- Faculty Self-Service Display Controls

Key block

Updated: August 27, 2020

Use the key block to specify the term and CRN for which you want to enter or display section Web controls. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
CRN	Course reference number.
Search	Button used to access SSASECQ and filter on course sections.
Subject	Subject associated with the CRN. Display only.
Course	Course number associated with the CRN. Display only.
Title	Course title assigned on the Schedule (SSASECT) page. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the

Fields/Buttons	Descriptions
	field. The value gets populated if Course Alias is defined on SCACRSE page.

Student Self-Service Display Controls

Updated: August 27, 2020

Use this section of the page as a section level override of the term level values defined in the Term Control (SOATERM) page. This functionality is available for traditional sections and open learning sections.

Fields	Descriptions
Display Midterm Grades	Check box used to indicate whether midterm grades for this section should be displayed in Banner Student Self-Service.
Display Final Grades	Check box used to indicate whether final grades for this section should be displayed in Banner Student Self-Service.
Display Grade Detail	Check box used to indicate whether grade detail for this section should be displayed in Banner Student Self-Service.

Faculty Self-Service Display Controls

Updated: August 27, 2020

Use this section of the page as a section level override of the term level values defined in SOATERM for traditional courses. This functionality is available for traditional sections and replaces the information stored on the part of term record in SOATERM.

When an open learning section is created, these values are established for the section (default of selected) and constitute the only means of defining faculty access to the grades and waitlists.

Fields	Descriptions
Display Wait List	Check box used to indicate whether waitlist information for this section should be displayed in Banner Faculty and Advisor

Fields	Descriptions
	Self-Service.
Display Midterm Grades	Check box used to indicate whether midterm grades for this section should be displayed in Banner Faculty and Advisor Self-Service.
Display Final Grades	Check box used to indicate whether final grades for this section should be displayed in Banner Faculty and Advisor Self-Service.

Schedule Cross List Query (SSAXLSQ) page

Updated: August 27, 2020

Use the Schedule Cross List Query (SSAXLSQ) page to filter and display all of the sections associated with a specific cross list group identifier. All fields are display only.

This page uses advanced filtering for queries. You can filter data on the default **Term** field and add elements to the filter criteria as needed.

You can access this page from the Schedule Cross List Definition (SSAXLST) page and the Schedule (SSASECT) page. You can access the Cross List Meeting Time/Instructor Query (SSAXMTI) page from this page.

This page is composed of the following sections:

- Advanced Filter
- Query Results
- Cross List Section

Advanced Filter

Updated: August 27, 2020

Use this section of the page to specify the criteria for which you want to display cross listed groups of sections. You can add elements to the advanced filter criteria as needed to refine the query. Each element has an operator defined in the **Contains** field.

Use the **Delete** (-) button or the **Clear All** button to remove added fields from the filter or the **Go** button to view the results of the filter.

Fields	Descriptions
Term	Code and description of the term. The term is not required.
Contains	Displays a list of operators for each field in the advanced filter.
Add Another Field...	Displays a list of fields that can be added to the advanced filter.
Clear All	Button used to remove added fields. The advanced filter can then be re-entered.
Go	Button used to view the advanced filter results.

Query Results

Updated: August 27, 2020

Use this section of the page to display enrollment information about a cross list group returned for the criteria in the Advanced Filter section. The number of records found is displayed. You can sort on the fields in this section of the page.

Fields/Buttons	Descriptions
Filter Again	Button used to return to the Advanced Filter section to perform another filter.
The following fields are in the Query Results information.	
Term	Code of the term for the cross list group.
Cross List	Code for the cross list group identifier.
Maximum Enrollment	Maximum enrollment allowed for the cross list group.
Actual Enrollment	Actual enrollment in the cross list group.
Seats Available	Number of seats available for enrollment.

Cross List Section

Updated: August 27, 2020

Use this section of the page to display information about the sections in the cross list group selected in the Query Results section. The records in this section of the page are child records of the master records in the Query Results section of the page.

Fields	Descriptions
The following fields are in the Cross List Section information.	
Term	Term associated with the cross list group.
CRN	CRN of a section in the cross list group.
Block	Check box used to indicate whether a section has been assigned to a block schedule.
Reserved	Check box used to indicate whether seats have been reserved for a section.
Subject	Code of the subject associated with the CRN.
Course Number	Course number associated with the CRN.
Course Alias	The values in the Course Alias field are read-only and populated if Course Alias is defined on SCACRSE page for the appropriate Subject, Term and Course combination.
Section	Section number associated with the CRN.
Part of Term	Part of term code associated with the CRN.
Campus	Campus associated with the CRN.
The following fields are in the Credit Hours information.	
Low	Minimum number of credits for which the course can be offered.
Options	Relationship between low and high credit hours. None = no existing credit hours Or = Existing credit hours for two specific offerings To = Existing credit hours within a range
High	Maximum number of credits for which the course can be offered.
The following fields are in the Enrollment information.	

Fields	Descriptions
Maximum	Maximum enrollment for the cross listed section.
Actual	Actual enrollment for the cross listed section.
Remaining	Number of available seats for the cross listed section.
The following fields are in the Waitlist information.	
Maximum	Maximum waitlist for the cross listed section.
Actual	Actual waitlist for the cross listed section.
Remaining	Number of available waitlist seats for the cross listed section.
The following buttons are at the bottom of the page.	
Cancel	Button used to cancel the filter.
Select	Button used to return a selected record to the calling page.

Schedule Cross List Definition (SSAXLST) page

Updated: August 27, 2020

Use the Schedule Cross List Definition (SSAXLST) page to enter or display the cross list information associated with a group of sections. Cross listing is made possible by a cross list group identifier that you define.

Information maintained about a cross list includes:

- Maximum enrollment
- Actual enrollment
- Seats remaining for all sections which are cross listed together
- Whether or not the cross-listed sections are associated with block codes

A cross list identifier must be established on this page before being entered on the Schedule (SSASECT) page. The Cross List Query (SSAXLSQ) page can be accessed from SSASECT.

This page is composed of the following sections:

- Key block
- Cross List Enrollment

- Cross List Section

Key block

Updated: August 27, 2020

Use the key block to specify the term and cross list identifier for the group of sections. Use the **Search** button to access SSAXLSQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
Cross List Group Identifier	Code and description of the cross list group identifier.
Search	Button used to access SSAXLSQ and filter on cross listed sections.

Cross List Enrollment

Updated: August 27, 2020

Use this section of the page to enter or display enrollment figures for the cross listed group of sections specified in the key block.

Fields	Descriptions
Maximum Enrollment	Maximum enrollment allowed for the cross listed group.
Actual Enrollment	Actual enrollment in the cross listed group. Display only.
Seats Available	Number of seats available for enrollment. Display only.

Cross List Section

Updated: August 27, 2020

Use this section of the page to enter or display section-specific information about the cross listed group of sections specified in the key block.

The records in this section of the page are child records of the master records in the

Cross List Enrollment section of the page. Use the Cross List Section section to access this section of the page.

Fields	Descriptions
The following fields are in the Cross List Section information.	
CRN	CRN of a section in the cross list group.
Block	Indicator for whether the section has been assigned to a block schedule. Display only. Values are: `Y` - the section is assigned to a block schedule `Null` - the section is not assigned to a block schedule
Reserved	Check box used to indicate that reserved seats exist for the cross listed section. Display only.
Subject	Code of the subject associated with the CRN. Display only.
Course Number	Course number associated with the CRN. Display only.
Section	Section number associated with the CRN. Display only.
Part of Term	Part of term code associated with the CRN. Display only.
Campus	Campus associated with the CRN. Display only.
The following fields are in the Credit Hours information.	
Low	Minimum number of credits for which the course can be offered. Display only.
Options	Relationship between low and high credit hours. Display only. • None = No relationship exists • Or = Sets the credit hours at two specific offerings, such as 3 or 4 credit hours • To = Sets the credit hours within a range, such as 2 to 6 credit hours
High	Maximum number of credits for which the course can be offered. Display only.

Fields	Descriptions
The following fields are in the Enrollment information.	
Maximum	Maximum enrollment allowed for the CRN. Display only. When the **Capacity** option button in the Registration Error Checking information of the Term Control (SOATERM) page is set to `Fatal` or `Warning`, the system issues warnings when enrollment exceeds this number.
Actual	Actual enrollment for the CRN. Display only.
Remaining	Number of seats available for enrollment for the CRN. Display only.
The following fields are in the Waitlist information.	
Maximum	Maximum number of waitlist places for the CRN. Display only.
Actual	Actual number of waitlisted students for the CRN. Display only.
Remaining	Number of places available for waitlisting. Display only.

Cross List Meeting Time/Instructor Query (SSAXMTI) page

Updated: August 27, 2020

Use the Cross List Meeting Time/Instructor Query (SSAXMTI) page to display the meeting time and instructor information associated with a cross-listed group of courses. All information in this page is display only.

This page can be accessed directly or can be called from the Meeting Times section of the Schedule (SSASECT) page using the **Cross List Meeting Time/Instructor Query** button. This button is displayed when the section is cross-listed. (**Cross List** field on SSASECT is populated.). When called from SSASECT, the meeting time and instructor information is returned to the other sections that are cross-listed together.

This page is composed of the following sections:

- Key block
- Meeting Time
- Instructor

Key block

Updated: August 27, 2020

Use the key block to specify the term and cross list identifier on which you want to filter data. Use the **Search** button to access SSAXLSQ.

Fields/Buttons	Descriptions
Term	Code and description of the term.
Cross List Group Identifier	Code and description for the cross list group identifier.
Search	Button used to access SSAXLSQ and filter on cross listed sections.

Meeting Time

Updated: August 27, 2020

Use this section of the page to display meeting time information for the cross list group specified in the key block. When a meeting time record is selected, the instructor information for that record is displayed in the Instructor section of the page.

Fields	Descriptions
CRN	CRN of a section in the cross list group.
Start Date	First date on which the section meets.
End Date	Last date on which the section meets.
Meeting Type	Meeting type code assigned to this meeting time of the section.
Monday	Check box used to indicate that the section meets on Monday.
Tuesday	Check box used to indicate that the section meets on Tuesday.
Wednesday	Check box used to indicate that the section meets on Wednesday.
Thursday	Check box used to indicate that the section meets on Thursday.
Friday	Check box used to indicate that the section

Fields	Descriptions
	meets on Friday.
Saturday	Check box used to indicate that the section meets on Saturday.
Sunday	Check box used to indicate that the section meets on Sunday.
Begin Time	Begin time of day at which the section meets, in 24-hour time; for example, 10:30 AM would be displayed as `1030`, and 7:00 PM would be displayed as `1900`.
End Time	End time of day at which the section meets, in 24-hour time; for example, 11:00 AM would be displayed as `1100`, and 9:30 PM would be displayed as `2130`.
Building	Code of the building in which the section meets.
Room	Number of the room in which the section meets.
Schedule Type	Code of the schedule type of the section.
Override	Indicator for whether schedule conflict errors can be overridden. Values are: `O` - schedule conflict errors can be overridden `Null` - schedule conflict errors cannot be overridden
Session Credits	Number of credits associated with the section.
Session Indicator	User-defined identifier for the session, such as a session number.

Instructor

Updated: August 27, 2020

Use this section of the page to display instructor information for the section selected in the Meeting Time section of the page. The records in this section of the page are child records of the master records in the Meeting Time section of the page.

Fields	Descriptions
Session Indicator	Session indicator associated with the instructor assignment.
ID	User ID of the faculty member assigned to instruct the session/section.
Name (untitled)	Name associated with the ID.
Percent	Percentage of the instructional workload and session credits for which this instructor is responsible.
Primary Indicator	Check box used to indicate whether this instructor is the primary instructor for the section. • When selected, the instructor is the primary instructor. (This value is saved to the database as Y.) • When cleared, the instructor is not the primary instructor. (This value is saved to the database as Null.)
Override Indicator	Check box used to indicate whether the system should check the faculty member's schedule for conflicts. • When selected, the system overrides the conflicts. (This value is saved to the database as O.) • When cleared, the system only checks for conflicts. (This value is saved to the

Fields	Descriptions
	database as Null.)
Percent Session	Percentage of the session for which this instructor is responsible.

Reserved Seats Inquiry (SSIRESV) page

Updated: August 27, 2020

Use the Reserved Seats Inquiry (SSIRESV) page to filter data and review reserved seats rules for a term and CRN combination. This page can be accessed SSASECT.

This page is composed of the following sections:

- Key block
- Reserved Seats

Key block

Updated: August 27, 2020

Use the key block to enter the term and CRN and then filter data for reserved seats rules. Use the **Search** button to access SSASECQ.

Fields/Buttons	Descriptions
Term	Code and description of the term used to filter data for the reserved seats rule.
CRN	CRN used to filter data for the reserved seats rule.
Search	Button used to access SSASECQ and filter on course sections for reserved seats.
Subject	Subject of the CRN. Display only.
Course	Course of the CRN. Display only.
Title	Title of the selected course. Display only.
Course Alias	The Course Alias is a display only field, and you cannot edit the field. The value gets populated if Course Alias is defined on

Fields/Buttons	Descriptions
	SCACRSE page.

Reserved Seats

Updated: August 27, 2020

Use this section of the page to review the reserved seats rules for the term and CRN in the key block. Rule data elements are can be filtered. You can also view the reserved and waitlist totals for the section.

Fields	Descriptions
The following fields are in the Curriculum information.	
Level	Level for the reserved seats rule.
Campus	Campus for the reserved seats rule.
College	College for the reserved seats rule.
Degree	Degree for the reserved seats rule.
Program	Program for the reserved seats rule.
Field of Study Type	Learner field of study type for the reserved seats rule from GTVLFST.
Field of Study Code	Field of study code (major) for the reserved seats rule.
Department	Department for the reserved seats rule.
Curricula	Curriculum for the reserved seats rule. Valid values are Primary, Secondary, Any.
The following fields are in the Student information.	
Class	Class for the reserved seats rule.
Attribute	Student attribute for the reserved seats rule.
Cohort	Cohort for the reserved seats rule.
Admission Term	Admission term for the reserved seats rule.
Matriculation Term	Matriculation term for the reserved seats rule.

Fields	Descriptions
Graduation Term	Graduation term for the reserved seats rule.
The following fields are in the Enrollment information.	
Overflow	Check box used to indicate whether the overflow option is active. When this field is selected and reserved seats are not available, a student can register for an unreserved available seat. When this field is cleared, the process does not check for unreserved available seats.
Reserved Max	Maximum number of reserved seats for the rule.
Actual	Number of reserved seats taken for the rule.
Remaining	Number of reserved seats available for the rule.
Waitlist Max	Maximum number of waitlisted seats for the rule.
Waitlist Actual	Number of waitlisted seats taken for the rule.
Waitlist Remaining	Number of waitlisted seats available for the rule.
The following fields are below the Reserved Seats section of the page.	
Total Section Reserved Maximum	Maximum number of reserved seats in the section for the rule.
Total Section Reserved Actual	Number of reserved seats taken in the section for the rule.
Total Section Reserved Remaining	Number of reserved seats available in the section for the rule.
The following fields are in the Total Section Waitlist information.	
Total Section Waitlist Maximum	Maximum number of waitlisted seats in the section for the rule.
Total Section Waitlist Actual	Number of waitlisted seats taken in the section for the rule.
Total Section Waitlist Remaining	Number of waitlisted seats available in the

Fields	Descriptions
	section for the rule.

Section Seat Query (SSISEAT) page

Updated: October 21, 2021

Use the Section Seat Query (SSISEAT) page to query the status and number of seat assignments by term. You can also optionally query by CRN or Banner ID.

This page is composed of the following sections:

- Key block
- Seat Assignments
- Waitlist

Key block

Updated: October 21, 2021

Use the key block to enter the term, and optionally CRN or Banner ID, and then filter for seat assignment records.

Field	Description
Term	Code and description of the term used to filter the seat assignment and waitlist data.
CRN	CRN used to filter the seat assignment and waitlist data (optional).
Banner ID	Banner ID of the student used to filter the seat assignment and waitlist data (optional).

Seat Assignments

Updated: March 17, 2022

Use Seat Assignments to review the seat assignment records for the term, CRN, and Banner ID in the key block. You can filter the seat assignment data, and also view pending and confirmed open seats.

Fields/Buttons	Description
CRN	CRN associated with the seat assignment record.
Status	Status of the seat assignment record. Valid values are Pending and Registered.
ID	Banner ID of the student associated with the seat assignment record.
Name	Name of the student associated with the seat assignment record.
Assignment Date	Date and time stamp when student was associated with the seat assignment record.
Assignment User	ID or process responsible for associating student with the seat assignment record.
Capacity Override	Indication of whether a capacity override was used to associate student with the seat assignment record.
Registration Status	Registration status code associated with the seat assignment record.
Reserved Key	Student Course Registration Table Reserved Key that indicates which reserved seat rule the student met.

Waitlist

Updated: March 17, 2022

Use the Waitlist tab to review the waitlist seat assignment records for the term, CRN and Banner ID in the key block. You can filter the Waitlist seat assignment data, and also view pending Waitlist seat assignments.

Fields/Buttons	Description
CRN	CRN associated with the waitlist seat assignment record.
Status	Status of the seat assignment record. Valid values are Pending and W(aitlisted).
ID	Banner ID of the student associated with the seat assignment record.
Name	Name of the student associated with the waitlist seat assignment record.
Assignment Date	Date and time stamp when student gets associated with the

Fields/Buttons	Description
	waitlist seat assignment record.
Assignment User	ID or process responsible for associating student with the waitlist seat assignment record.
Capacity Override	Indication of whether a capacity override is used to associate student with the waitlist seat assignment record.
Registration Status	Registration status code associated with the waitlist seat assignment record.
Reserved Key	Student Course Registration Table Reserved Key that indicates which reserved seat rule student met.

Degree Award Category Code Validation (STVACAT) page

Updated: June 20, 2024

Use the Degree Award Category Code Validation (STVACAT) page to create, update, insert, and delete codes for degree award categories, such as Elementary School Program, High School Program, Baccalaureate Degree, or Masters Degree.

The Degree Code Validation (STVDEGC) page uses this page to validate degree award category codes, which you can create or update only from this page. The degree award category is also used in the production of the IPEDS reports.

Note: All appropriate IPEDS degree award categories are delivered as seed data. None should be deleted or changed in any way.

Please see the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student User* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the degree award category. After a degree award category code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the degree award category code record cannot be deleted.

Fields	Descriptions
Description	Description of the degree award category.
System Required	Check box is used to specify whether the code is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
NSC Credential Level Translation	Indicates the credential level assigned to the award category for use with the Clearinghouse Extract Report (SFRNSLC). Values are: • Associate's = Saved to the database as A • Bachelor's = Saved to the database as B • Certificate (Undergraduate) = Saved to the database as C • Master's = Saved to the database as M • Doctoral = Saved to the database as D • First Professional = Saved to the database as P • Credential = Saved to the database as R • Post baccalaureate certificate = Saved to the database as T • None = Saved to the database as N
NSLDS Credential Level Translation	Indicates the credential level assigned to the award category for use with the NSLDS SSCR Process (SFRSSCR). Values are: • Certificate (Undergraduate) = Saved to the database as 01 • Associate's = Saved to the database as 02 • Bachelor's = Saved to the database as 03 • Post baccalaureate certificate = Saved to the database as 04 • Master's = Saved to the database as 05 • Doctoral = Saved to the database as 06

Fields	Descriptions
	• First Professional = Saved to the database as 07 • None = Saved to the database as N
Activity Date	Date on which the record was last updated. Display only.

Activity Category Validation (STVACCG) page

Updated: August 27, 2020

Use the Activity Category Validation (STVACCG) page to create, update, insert, and delete activity category codes, such as Arts, Corporate, or Civic. These codes are then used on the Banner Student Activity Code Validation (STVACTC) page to further define activity codes.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the activity category. After an activity code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the activity code record cannot be deleted.
Description	Description of the activity category.
Activity Date	Date on which the record was last updated. Display only.

Academic Calendar Type Validation (STVACCL) page

Updated: August 27, 2020

Use the Academic Calendar Type Validation (STVACCL) page to create, update, insert, and delete codes for academic calendar types, such as Daily Contact, Weekly Contact, or Continuing Education.

This page is used by the Schedule Academic Calendar (SSAACCL) page to validate academic calendar type codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the academic calendar type. After an academic calendar type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the academic calendar type code record cannot be deleted.
Description	Description of the academic calendar type.
Activity Date	Date on which the record was last updated. Display only.

Attendance Accounting Method Validation (STVACCT) page (California Localization)

Updated: August 27, 2020

Use the Attendance Accounting Method Validation (STVACCT) page to create, update, insert, and delete codes for the attendance accounting methods to be associated with course sections, such as Telecourses, Independent Study, or Weekly.

This page is used by the Schedule (SSASECT) page to validate attendance accounting method codes.

Fields	Descriptions
Code	Code of the attendance accounting method. After an attendance accounting method code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the attendance accounting method code record cannot be deleted.
Description	Description of the attendance accounting method.
Weekly	Check box used to specify that the attendance accounting method for this code is weekly.
Daily	Check box used to specify that the attendance accounting method for this code is daily.

Fields	Descriptions
Independent Study	Check box used to specify that the attendance accounting method for this code is independent study.
Independent Study Lab	This field was added to support CALB localizations, but it should no longer be used and will be removed from the page in a future release. The calculation of contact hours and classification for attendance type still use this setting, but they will be updated in the future not to use it because more precise results can be obtained by using the **Weekly** check box in combination with `Independent Study` check box (with the appropriate meetings set up for lab as needed).
Actual	Check box used to specify that the attendance accounting method for this code is actual hours.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Only one of the boxes for the accounting method indicators (**Weekly**, **Daily**, **Independent Study**, **Actual**) can be selected for a code.

Fields	Descriptions
Independent Study	To support CALB localizations, if this check box is selected, either the **Weekly**, **Daily**, or **Actual** check box must also be selected. **Independent Study** cannot be the sole selection.
Independent Study Lab	This field was added to support CALB localizations, but it should no longer be used and will be removed from the page in a future release. The calculation of contact hours and classification for attendance type still use this setting, but they will be updated in the future not to use it because more precise results can be obtained by using the **Weekly** check box in combination with `Independent Study` check box (with the appropriate meetings set up for lab as needed).

Acceptance Practice Code Validation (STVACPR) page

Updated: August 27, 2020

Use the Acceptance Practice Code Validation (STVACPR) page to create, update, insert, and delete acceptance practice codes, such as Credit Generally Accepted or No Policy Determined.

The Transfer Articulation Institution (SOABGTA) page uses this page to validate acceptance practice codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the acceptance practice. After an acceptance practice code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the acceptance practice code record cannot be deleted.
Description	Description of the acceptance practice.
Activity Date	Date on which the record was last updated. Display only.

Institutional Accreditation Status Validation (STVACST) page

Updated: August 27, 2020

Use the Institutional Accreditation Status Validation (STVACST) page to create, update, insert, and delete the institutional accreditation status codes, such as Candidate for Accreditation or Southern Association of Schools.

This page is used by the Transfer Articulation Institution (SOABGTA) page to validate the accreditation status. You can create or update institutional accreditation status codes only from this page.

Fields	Descriptions
Code	Code of the institutional accreditation status. After an institutional accreditation status code record has been saved, the

Fields	Descriptions
	code entered in this field cannot be changed. After this code has been used in any other record, the institutional accreditation status code record cannot be deleted.
Description	Description of the institutional accreditation status.
Activity Date	Date on which the record was last updated. Display only.

Banner Student Activity Code Validation (STVACTC) page

Updated: August 27, 2020

Use the Banner Student Activity Code Validation (STVACTC) page to create, update, insert, and delete activity codes. This page is used by other forms to validate activity codes, such as Debate Club, Swim Team, ROTC, and so on. You can create or update activity codes only from this page.

All activity codes that are for sports and should be able to be added on the Athletic Compliance (SGASPRT) page *must* have a type code of `SPRTS`. This type code is a system-required code on the Activity Type Validation (STVACTP) page.

Use a code of `UNASSIGN` for collector table processing with the Print Detail Report Indicator parameter of the Student Right to Know Report (SGRKNOW).

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the activity. After an activity code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the activity code record cannot be deleted.
Description	Description of the activity.
Type	Code of the type of activity in which this activity can be grouped (for example, Sports, Cultural, or Volunteer).

Fields	Descriptions
	The activity type `SPRTS` should be assigned to any activity code representing a sports activity that must be reported in Student System Right-to-Know reporting. When the Right to Know Report (SGRKNOW) is run, selecting all values (using `%` as the value for the Sports Activity Code parameter), will cause all students with activity codes with a `SPRTS` type to be selected. Select the **Search** button for this field to access the Activity Type Validation (STVACTP) list. List Activity Type Validation (STVACTP)
Category	Code of the general category to which the activity belongs. Select the **Search** button for this field to access the Activity Category Validation (STVACCG) list. List Activity Category Validation (STVACCG)
Activity Date	Date on which the record was last updated. Display only.

Action Code Validation (STVACTN) page

Updated: August 27, 2020

Use the Action Code Validation (STVACTN) page to define codes, descriptions, and processing rules for actions that can be made in CAPP student adjustment processing.

An action code can be assigned to any student adjustment. The system uses action codes to determine how an adjustment should be handled by the compliance process.

Fields	Descriptions
Code	Action code assigned to the adjustment action. Required.
Description	Description of the action code. Required.
Action Indicator	Indicator to specify the way in which compliance should process an adjustment requirement. Waive is the default value.

Fields	Descriptions
	`Add` Indicates that the requirement is added specifically for the student. An added adjustment is an active requirement that must be satisfied. `Eliminate` Indicates that the requirement is one that the student is not required to satisfy. Action codes with an action indicator of `Eliminate` can be assigned to adjusted items that should not be considered by compliance. It tells the person who reviews compliance output that the requirement normally exists, but was not used for the student. An eliminated requirement never accumulates (counts) toward any compliance totals. `Substitute` Indicates that the original requirement will be satisfied by a different course. `Waive` Indicates that the requirement is one that the student is not required to satisfy. Action codes with an action indicator of `Waive` can be assigned to adjusted items that should not be considered by compliance. It tells the person who reviews the compliance output that a requirement normally exists, but was not used by compliance processing. Waived requirements are used by compliance similarly to eliminated requirements with one significant difference. A waived requirement can be flagged to count (by selecting the **Count** check box), which means that it accumulates credits or courses to the appropriate group, area, or program minimum credit/course totals. An eliminated requirement never counts toward compliance totals.
Count	Check box used to indicate whether a waived requirement should accumulate credits or courses toward group, area, or program credit and course totals. It can be selected only for actions with an action indicator of Waived. Compliance accumulates credits and courses toward group, area, or program totals based upon the action indicator.

Fields	Descriptions
	• When the action indicator is `Add` or `Substitute`, credits and courses always accumulate. • When the action indicator is `Eliminate`, the requirement is not being used, and no credits or courses accumulate. • When the action indicator is `Waived`, the **Count** check box controls whether credits and courses accumulate.
Activity Date	Date on which the record was last updated. Display only.

Create an action that can be taken in student adjustment processing

Updated: August 27, 2020

You can create an action while processing the adjustments for a student.

About this task

Procedure

1. Access the **Action Code Validation (STVACTN)** page.
2. Select Insert Record.
3. Enter the student adjustment action code.
4. Enter a brief description.
5. Select the setting for the **Action Indicator** (Add, Eliminate, Substitute, or Waive) from the drop-down list.
6. Check or clear the **Count** check box.
7. Save.

   Note: The **Activity Date** field is populated when you save the new record.

Change an action that can be taken in student adjustment processing

Updated: August 27, 2020

You can change an action while processing the adjustments for a student.

About this task

Procedure

1. Access the **Action Code Validation (STVACTN)** page.
2. Go to the **Code** field for the action code you want to modify.
3. Change the values for the **Description**, the **Action Indicator**, or the **Count** fields.
4. Save.

   Note: The **Activity Date** field is updated when you save the modified record.

Delete an action that can be taken in student adjustment processing

Updated: August 27, 2020

You can delete an action while processing the adjustments for a student.

About this task

Procedure

1. Access the **Action Code Validation (STVACTN)** page.
2. Go to the **Code** field for the action code you want to delete.
3. Select Remove Record.
4. Save.

Activity Type Validation (STVACTP) page

Updated: August 27, 2020

Use the Activity Type Validation (STVACTP) page to create, update, insert, and delete activity type codes, such as Academic, Music, or Athletics. These codes are then used on the Banner Student Activity Code Validation (STVACTC) page to further define activity codes.

The value `SPRTS` is a system-required value that is used on the Banner Student Activity Code Validation (STVACTC) page. This value is also listed in the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student Use* content.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Type	Code of the activity type. After an activity type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the activity type code record cannot be deleted.
Description	Description of the activity type.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Academic Year Validation (STVACYR) page

Updated: August 27, 2020

Use the Academic Year Validation (STVACYR) page to create, update, insert, and delete academic years. This page is used by other forms to validate academic years. You can create or update academic years only from this page.

The **Start Date** and **End Date** fields are used by integrated third party systems to store academic year start and end dates. The dates are used for transactions that occur within a date range rather than a term range. The fields can be Null. These fields support the Banner Intelligent Learning Plat(ILP) page integration and the Higher Education Data Model (HeDM) APIs. The HeDM schema requires the provision of start and end dates. The associated API exposes academic periods (terms, parts of term, and academic years) from Banner.

Please see the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Year	Code of the academic year. After an academic year code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the academic year code record cannot be deleted.
Description	Description of the academic year.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.
Start Date	Academic year start date for the academic year code.
End Date	Academic year end date for the academic year code.

Administrator Assignment Data Element Validation (STVADDA) page

Updated: August 27, 2020

Use the Administrator Assignment Data Element Validation (STVADDA) page to define the various data elements that can be used to assign administrators on the Administrator Role Rules (SOAADAS) page. The data for this table is provided by the company. Programming logic is built into each of the delivered data elements.

Note: If new data elements are needed, they will be inserted into this table, and the stored procedure to calculate the assignments will be modified to include the new data elements.

See the Required System Values for Validation Page section in *Banner Student Use* for a list of required system values for this validation page.

Fields	Descriptions
Base Table	Base table in which the data element originates.
Data Element	Code of the data element as defined on the Administrator Role Rules (SOAADAS) page.
Description	Description of the data element.
Validation Table	Seven-character name of the validation table against which the data element is validated.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Admission Request Checklist Code Validation (STVADMR) page

Updated: August 27, 2020

Use the Admission Request Checklist Code Validation (STVADMR) page to create, update, insert, and delete admission request checklist codes, such as High School Transcript, College Transcript, or SAT Scores. You can create or update the admission request checklist codes only from this page.

Other forms use this page to validate admission request checklist codes. Cross-referenced table names and descriptions can be entered on the following forms to provide further validation:

STVRESD	Residence Code Validation Page
STVSBGI	Source/Background Institution Code Validation Page
STVTESC	Test Code Validation Page
STVVTYP	Visa Type Code Validation Page

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Request Code	Code of the admission request checklist. After an admission

Fields	Descriptions
	request checklist code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the admission request checklist code record cannot be deleted.
Description	Description of the admission request checklist.
Cross Reference Table Name	Seven-character name of the validation table against which the admission request checklist item is validated. When a checklist item is placed on a cross-referenced validation page, it specifies that the checklist item will be expected or required in association with the cross-referenced code. The forms that can be entered are: • Source/Background Institution Validation (STVSBGI) page • Test Score Code Validation (STVTESC) page • Visa Type Validation (STVVTYP) page For example, an admission request checklist item that represents a college transcript will generally be expected or required from every college an applicant attends. College codes are defined on STVSBGI, so college transcripts should be cross-referenced to STVSBGI. High school transcript checklist items should also be cross-referenced to STVSBGI. Test score checklist items should be cross-referenced to STVTESC. Checklist items required for international students can be cross-referenced to specific visa types on STVVTYP.
Web Indicator	Check box used to indicate whether the admission checklist item can be displayed in the Admissions Self-Service module of Student Self-Service. This check box allows you to limit the checklist items that will be displayed to a subset of all valid items. The check box defaults to cleared or N when a new record is added, but you can change it at any time.
Voice Response Eligibility Indicator	Check box used to indicate whether the admission checklist item is to be available to Voice Response.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this admission checklist item.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Admission Type Code Validation (STVADMT) page

Updated: August 27, 2020

Use the Admission Type Code Validation (STVADMT) page to create, update, insert, and delete admission types such as New Applicant, Transfer, Early Admission, and so on. This page is used by other forms to validate admission types. You can create or update admission type codes only from this page.

Fields	Descriptions
Type	Code of the admission type. After an admission type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the admission type code record cannot be deleted.
Description	Description of the admission type.
Activity Date	Date on which the record was last updated. Display only.

Advisor Type Validation (STVADVR) page

Updated: August 27, 2020

Use the Advisor Type Validation (STVADVR) page to create, update, insert, and delete advisor type codes for students. Students may have multiple advisors, such as an academic advisor or an athletic advisor. You can create or update advisor type codes only from this page.

Fields	Descriptions
Code	Code of the advisor type. After an advisor type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other

Fields	Descriptions
	record, the advisor type code record cannot be deleted.
Description	Description of the advisor type.
Activity Date	Date on which the record was last updated. Display only.

Admissions Factor Code Validation (STVAFCT) page

Updated: August 27, 2020

Use the Admissions Factor Code Validation (STVAFCT) page to define the factor codes and their descriptions. Data also includes the user ID of the person creating the record and the activity date of the record.

Fields	Descriptions
Code	Code of the admissions factor. After an admissions factor code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the admissions factor code record cannot be deleted.
Description	Description of the admissions factor.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Student CARE AFDC Duration Validation (STVAFDC) page

Updated: August 27, 2020

Use the Student CARE AFDC Duration Validation (STVAFDC) page to create, update, insert, and delete CARE AFDC codes.

These codes indicate the length of time a CARE student has been on Aid to Families with Dependent Children (AFDC), at the time of enrollment for the current term. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the CARE AFDC duration. After a CARE AFDC code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the CARE AFDC code record cannot be deleted.
Description	Description of the CARE AFDC duration.
Activity Date	Date on which the record was last updated. Display only.

Admission Application Decision Code Validation (STVAPDC) page

Updated: August 27, 2020

Use the Admission Application Decision Code Validation (STVAPDC) page to create, update, insert, and delete admission application decision codes such as Pending Decision, Quick Admit, Applicant Withdrawal, and so on.

Other forms use this page to validate the admission application decision codes. You can create or update these codes only from this page.

Fields	Descriptions
Significant Decision	Check this box, and the system will update the I or C in the **Application Status** field on the Admissions Application (SAAADMS) page to a D, which shows that a significant decision has been made.
Institution Acceptance	Check this box to indicate that the student has been accepted by the institution or the institution has extended an offer to the applicant.
Applicant Acceptance	Check this box to indicate that the applicant has accepted the institution's

Fields	Descriptions
	offer of admission, and the system will then create a student record effective for the term of acceptance.
Inactive Application	Check this box to indicate that the application is inactivated, and if a general student record exists, the status is updated to IS (Inactive Student) if all the following conditions are true: • There are no registration records that depend on the existence of the general student record. • All the current/active curricula associated with the general student record match those associated with the application. • None of the current/active curricula associated with the general student record has been updated/changed because the general student record was created.
Institution Rejection	Check this box to indicate that the reject code is a rejection decision.
Display on Web	Used to indicate that the admission application decision can be displayed on the Web. If the student has more than one decision on an application, the most recent decision with the **Display on Web** check box and **Voice Response Eligible** check box selected will be displayed on the Web. If the **Voice Response Eligible** check box is not selected, the system displays the following message: `Please Contact Admissions Office.`
Voice Response Eligible	Check box used to indicate whether the

Fields	Descriptions
	request code item is to be available to Voice Response.
Voice Response Message	Voice Response Message Number. Number assigned to the Voice Response message assigned to this admission application decision code.
Curriculum Status	Curriculum status for the admissions decision code. List Curriculum Status (STVCSTS)

Admission Application Decision Reason (STVAPDR) page

Updated: August 17, 2023

Add reject codes for the Reject By Codes DfE decision that you use in the SAADCRV page.

Field	Description
Admission Application Decision Reason Code Validation section	
Code	Rejection code.
Description	Description of the rejection code.
Details	Details of the rejection code.
Source	Reject Reason Code source. **Note:** If the Source field value is DfE and the Details field is a mandatory entry.

EDI Application Source Code Validation (STVAPLS) page

Updated: August 27, 2020

Use the EDI Application Source Code Validation (STVAPLS) page to define codes and processing rules for admissions applications which will be received electronically, for example, through the Web or by EDI. These codes are used in the electronic application processing forms to identify the source of an electronic application.

Two values are required for system processing:

Value	Description
WEB	World Wide Web, is required to load applications received through the Self-Service.
EDI	Electronic Data Interchange, is required to load applications received by EDI.

These values are also listed in the Required System Values for Validation Pages section of the Validation Pages chapter in the *Banner Student Use* content.

Fields	Descriptions
Code	Code of the EDI application source. After an EDI application source code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the EDI application source code record cannot be deleted.
Description	Description of the EDI application source.
Active Ind	Check box used to indicate whether this code is active and valid. This field is required and defaults to selected when a new record is added, but you can change it.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Apprenticeship Validation (STVAPRN) page

Updated: August 27, 2020

Use the Apprenticeship Validation (STVAPRN) page to create, update, insert, and delete apprenticeship codes such as Registered with Dept. of Inds., Unapproved Apprenticeship, and so on. The General Student (SGASTDN) page uses this page to validate apprenticeship codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the apprenticeship. After an apprenticeship code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the apprenticeship code record cannot be deleted.
Description	Description of the apprenticeship.
Activity Date	Date on which the record was last updated. Display only.

Catalog Approval Code Validation (STVAPRV) page

Updated: August 27, 2020

Use the Catalog Approval Code Validation (STVAPRV) page to create, update, insert, and delete catalog approval codes such as Department, Curriculum Committee, or State Approved. The Basic Course Information (SCACRSE) page uses this page to validate catalog approval codes which you can create or update only from this page.

Fields	Descriptions
Code	Code of the catalog approval. After a catalog approval code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the catalog approval code record cannot be deleted.
Description	Description of the catalog approval.
Activity Date	Date on which the record was last updated. Display only.

Admission Application Status Code Validation (STVAPST) page

Updated: August 27, 2020

Use the Admission Application Status Code Validation (STVAPST) page to create, update, insert, and delete admission application status codes, such as Application Received, Decision Made, or Wait-listed Accepted, and so on.

This page is used by other forms to validate the admission application status codes. You can create or update these codes only from this page.

Please see the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the admission application status. After an admission application status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the admission application status code record cannot be deleted.
Description	Description of the admission application status.
VR Msg	Voice Response Message Number. Number assigned to the Voice Response message assigned to this admission application status.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Web Ind	Web Indicator. Check box used to indicate whether the admission application status can be displayed in the Admissions Self-Service module of Student Self-Service. This check box allows you to limit the applications which can be displayed to only those with approved statuses. For example, you might not want to display withdrawn applications in Web processing. The check box defaults to cleared or N when a new record is added, but you can change it at any time.
Activity Date	Date on which the record was last updated. Display only.

Room and Meal Application Type Validation (STVARTP) page

Updated: August 27, 2020

Use the Room and Meal Application Type Validation (STVARTP) page to create, update, insert, and delete codes for room and meal application types.

The Location Management and Housing module uses this page to validate the room and meal application types such as Housing Only or Meal Plan Only. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the room and meal application type. After a room and meal application type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the room and meal application type code record cannot be deleted.
Description	Description of the room and meal application type.
Room	Check box used to indicate that a housing assignment can be made on the Room Assignment (SLARASG) page.
Meal	Check box used to indicate that a meal assignment can be made on the Meal Assignment (SLAMASG) page.
Activity Date	Date on which the record was last updated. Display only.

Room Assignment Status Code Validation (STVASCD) page

Updated: August 27, 2020

Use the Room Assignment Status Code Validation (STVASCD) page to create, update, insert, and delete codes for room assignment statuses. This page is used by other forms to validate the room assignment statuses such as Active or Withdrawn. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the room assignment status. After a room assignment status code record has been saved, the code entered in this field

Fields	Descriptions
	cannot be changed. After this code has been used in any other record, the room assignment status code record cannot be deleted.
Description	Description of the room assignment status.
Count in Usage	Check box used to indicate whether the room assignment will affect room usage.
Activity Date	Date on which the record was last updated. Display only.

Address Source Validation (STVASRC) page

Updated: August 27, 2020

Use the Address Source Validation (STVASRC) page to maintain user-defined codes that identify address sources such as, Self-Reported, Post Office Change, or Electronic Data Interchange.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the address source. After an address source code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the address source code record cannot be deleted.
Description	Description of the address source.
Activity Date	Date on which the record was last updated. Display only.

Application Verification Steps Validation (STVASTA) page

Updated: August 27, 2020

Use the Application Verification Steps Validation (STVASTA) page to define codes, descriptions, and processing rules for manual verification steps which must be performed when processing electronic admissions applications.

At minimum, manual processing steps must include ID verification (either matching to an existing person or creating a new person). In addition, institutions can define any other manual verification steps desired.

Fields	Descriptions
Code	Applicant/Application Status Code. Used to define codes for manual verification steps which may need to be performed for admissions applications which are received manually. This field is required and cannot be changed after a record has been saved.
Active Ind	Active Indicator. Used to specify whether a verification step record is active or not. Inactive verification steps will not be assigned to new electronic applications. This is a required field which defaults to cleared or N when a new record is added, but may be changed to selected or Y at any time.
Priority	Used to specify the priority of a verification step in relation to other steps. Verification steps display on this page and on the Electronic Application Process (SAAEAPS) page in priority order and in code order within the same priority. This is a required field for adding a new record, but it can be changed at any time to change the display order of the manual verification steps.
Per Ind	Person Indicator. Used to specify that the verification step is related to person information, as opposed to application information.

Fields	Descriptions
	In electronic application processing, one person may submit many applications. Person-related verification steps will be required only one time for the person, not one time for each application. Person verification steps might be items like ID verification (which is required), address verification, or verification of name according to data entry standards. This is a required field when a new verification step is added. It defaults to cleared or N when a new verification step is added, but can be changed to selected or Y at any time.
Appl Ind	Application Indicator. Used to specify that the verification step is one which relates to application, rather than person, information. In electronic application processing, one person can submit many applications. Application verification steps would be required for each application, while person verification steps will only be required one time for the person. This is a required field when a new verification step is added. It defaults to cleared or N when a new verification step is added, but can be changed to selected or Y at any time.
Load Ind	Load Indicator. Used to specify that the verification step should be automatically assigned to each person or application (depending on the **Pers(on) Ind(icator)** and **Appl(ication) Ind(icator)**) when an

Fields	Descriptions
	application is received electronically. Verification steps with a **Load Ind(icator)** of selected or Y are automatically loaded and displayed on the Electronic Application Process (SAAEAPS) page. Verification steps with a **Load Ind(icator)** of cleared or N are not automatically loaded, but may still be manually assigned to a person or application. This is a required field which defaults to cleared or N when a new verification step is added, but it can be changed to selected or Y at any time.

Academic Standing Code Validation (STVASTD) page

Updated: December 01, 2020

Use the Academic Standing Code Validation (STVASTD) page to create, update, insert, and delete academic standing codes, such as Good Standing, Dean's List, or Suspension. Other forms use this page to validate these codes, which you can create or update only from this page.

See the *Required System Values for Validation Pages* in the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Description
Dean List	Dean's List Indicator. Select this check box to indicate that this is a Dean's List academic standing code.
Probation	Probation Indicator. Select this check box to indicate that this is a probation academic standing code.
Prohibit Registration	Prohibit Registration Indicator. Select this check box to indicate that this academic standing will not allow the student to continue to register.

Fields	Description
Minimum Hours	Minimum Hours. Used to limit the number of hours for which a student may enroll, when under an academic standing code.
Maximum Hours	Maximum Hours. Used to limit the number of hours for which a student may enroll, when under an academic standing code.
EDI Eqv	EDI Equivalent. Used to assign the EDI SPEEDE/ExPRESS academic standing code values to the institution's academic standing codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value will be used in the transmission of transcript information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ ExPRESS Implementation Guide* under data element #641.
Voice Msg	Voice Response Message Number. The number that is assigned to the Voice Response message to this academic standing code.
Sys Req	System Required. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.

Assignment Type Code Validation (STVASTY) page (California Localization)

Updated: August 27, 2020

Use the Assignment Type Code Validation (STVASTY) page to create, update, insert, and delete assignment type codes for use in Faculty Load for instructional and non-instructional assignments. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the assignment type. After an assignment type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the assignment type code record cannot be deleted.
Description	Description of the assignment type.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Subject to Faculty Load Limit	Check box used to specify whether the assignment type is subject to faculty load limit tracking. Any CRN assignment on the Faculty Assignment (SIAASGN) page that uses an assignment type code for which this check box is *not* selected will not be included in the load limit calculations.

Day Attribute One Validation (STVATRA) page

Updated: August 27, 2020

Use the Day Attribute One Validation (STVATRA) page to create, update, insert, and delete day attribute codes specific to an institution's needs for state or local reporting, for information required about a day for a particular year on a specific campus.

This page is one of five used in the Schedule module for this purpose. You can create or update values for day attribute one of the day attribute information on the Calendar Day Information (SOACALD) page only from this page. Examples of day attributes include whether or not the day is an instructional day, whether or not the day is a holiday, whether or not the day is an exam day, and so on.

Fields	Descriptions
Code	Code of the day one attribute. After a day one attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the day one attribute code record cannot be deleted.
Description	Description of the day one attribute.
Activity Date	Date on which the record was last updated.

Fields	Descriptions
	Display only.

Day Attribute Two Validation (STVATRB) page

Updated: August 27, 2020

Use the Day Attribute Two Validation (STVATRB) page to create, update, insert, and delete day attribute codes specific to an institution's needs for state or local reporting, for information required about a day for a particular year on a specific campus.

This page is one of five used in the Schedule module for this purpose. You can create or update values for day attribute two of the day attribute information on the Calendar Day Information (SOACALD) page only from this page. Examples of day attributes include whether or not the day is an instructional day, whether or not the day is a holiday, whether or not the day is an exam day, and so on.

Fields	Descriptions
Code	Code of the day two attribute. After a day two attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the day two attribute code record cannot be deleted.
Description	Description of the day two attribute.
Activity Date	Date on which the record was last updated. Display only.

Day Attribute Three Validation (STVATRC) page

Updated: August 27, 2020

Use the Day Attribute Three Validation (STVATRC) page to create, update, insert, and delete day attribute codes specific to an institution's needs for state or local reporting, for information required about a day for a particular year on a specific campus.

This page is one of five used in the Schedule module for this purpose. You can create or update values for day attribute three of the day attribute information on the Calendar Day

Information (SOACALD) page only from this page. Examples of day attributes include whether or not the day is an instructional day, whether or not the day is a holiday, whether or not the day is an exam day, and so on.

Fields	Descriptions
Code	Code of the day three attribute. After a day three attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the day three attribute code record cannot be deleted.
Description	Description of the day three attribute.
Activity Date	Date on which the record was last updated. Display only.

Day Attribute Four Validation (STVATRD) page

Updated: August 27, 2020

Use the Day Attribute Four Validation (STVATRD) page to create, update, insert, and delete day attribute codes specific to an institution's needs for state or local reporting, for information required about a day for a particular year on a specific campus.

This page is one of five used in the Schedule module for this purpose. You can create or update values for day attribute four of the day attribute information on the Calendar Day Information (SOACALD) page only from this page. Examples of day attributes include whether or not the day is an instructional day, whether or not the day is a holiday, whether or not the day is an exam day, and so on.

Fields	Descriptions
Code	Code of the day four attribute. After a day four attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the day four attribute code record cannot be deleted.
Description	Description of the day four attribute.
Activity Date	Date on which the record was last updated.

Fields	Descriptions
	Display only.

Day Attribute Five Validation (STVATRE) page

Updated: August 27, 2020

Use the Day Attribute Five Validation (STVATRE) page to create, update, insert, and delete day attribute codes specific to an institution's needs for state or local reporting, for information required about a day for a particular year on a specific campus.

This page is one of five used in the Schedule module for this purpose. You can create or update values for day attribute five of the day attribute information on the Calendar Day Information (SOACALD) page only from this page. Examples of day attributes include whether or not the day is an instructional day, whether or not the day is a holiday, whether or not the day is an exam day, and so on.

Fields	Descriptions
Code	Code of the day five attribute. After a day five attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the day five attribute code record cannot be deleted.
Description	Description of the day five attribute.
Activity Date	Date on which the record was last updated. Display only.

Attribute Validation (STVATTR) page (California Localization)

Updated: August 27, 2020

Use the Attribute Validation (STVATTR) page to create, update, insert, and delete degree attribute codes, such as Affiliated Teaching Requirement, Language Requirement, or Writing Intensive Requirement.

Other forms use this page to validate these codes, which you can create or update only from this page. You need to create an attribute code for Remedial Course Attribute, for use in IPEDS reporting.

Fields	Descriptions
Code	Code of the degree attribute. After a degree attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the degree attribute code record cannot be deleted.
Description	Description of the degree attribute.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Inmate CRN	Check box used to specify that the attribute is an inmates-only attribute.

Student Attribute Validation (STVATTS) page

Updated: August 27, 2020

Use the Student Attribute Validation (STVATTS) page to create, update, insert, and delete student attribute codes such as First Year Student, Achieved Senior Standing, or Non-degree Student. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the student attribute. After a student attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the student attribute code record cannot be deleted.
Description	Description of the student attribute.
Activity Date	Date on which the record was last updated. Display only.

Address Type Code Validation (STVATYP) page

Updated: August 27, 2020

Use the Address Type Code Validation (STVATYP) page to create, update, insert, and delete address type codes, such as Billing, Permanent, or Mailing. Other forms use this page to validate these codes, which You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

The following address types are system-required for specific tasks in Banner:

Address Type	Description	
MA	Mailing	MA is required for datal

Address Type	Description
	oadprocessingandisusedbytheBanner

Address Type	Description

XX	Accounts Payable	XX is reserved for use by TGRFEED.

These values are also listed in the Required System Values for Validation Pages section of the Validation Pages chapter of the *Banner Student Use* content.

Fields	Descriptions
Address Type	Code of the address type. After an address type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the address type code record cannot be deleted.
Description	Description of the address type.
Telephone Type	Code of the telephone type associated with the address type. Select the **Search** button for this field to access the Telephone Type Validation (STVTELE) list. List Telephone Type Validation (STVTELE)
Description	Description associated with the telephone type code, automatically displayed when a valid value is entered in the **Telephone Type** field. Display only.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Background Inst. Characteristic Code Validation (STVBCHR) page

Updated: August 27, 2020

Use the Background Inst. Characteristic Code Validation (STVBCHR) page to create, update, insert, and delete codes for background institution types, such as Public, Private, or Military. The Source/Background Institution Year (SOABGIY) page uses this page to validate these codes, which you can create or update only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the background institution type. After a background institution type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the background institution type code record cannot be deleted.
Description	Description of the background institution type.
Activity Date	Date on which the record was last updated. Display only.

Block Code Validation (STVBLCK) page

Updated: August 27, 2020

Use the Block Code Validation (STVBLCK) page to create, update, insert, and delete block codes which are used in Block Scheduling processing.

The block codes represent sets or groupings of sections to which students are assigned to be registered more efficiently. You can create or update these codes only from this page.

Fields	Descriptions
Block Code	Code of the block. After a block code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the block code record cannot be deleted.
Description	Description of the block.
Activity Date	Date on which the record was last updated. Display only.

Building Code Validation (STVBLDG) page

Updated: August 27, 2020

Use the Building Code Validation (STVBLDG) page to create, update, insert, and delete building codes such as Biology Building, Gymnasium, or Residence Hall. These codes, which describe the various buildings belonging to the institution, are used by other forms.

You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the building. After a building code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the building code record cannot be deleted.
Description	Description of the building.
VR Msg	Voice Response Message Number. Number assigned to the Voice Response message assigned to this building code.
Activity Date	Date on which the record was last updated. Display only.

Basic Skills Validation (STVBSKL) page

Updated: August 27, 2020

Use the Basic Skills Validation (STVBSKL) page to create, update, insert, and delete basic skills codes for use in the General Student and Academic History modules such as Developmental Math or Developmental English. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the basic skill. After a basic skills code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the basic skills code record cannot be deleted.
Description	Description of the basic skill.
Activity Date	Date on which the record was last updated. Display only.

Curriculum Activity Status Validation (STVCACT) page

Updated: August 27, 2020

Use the Curriculum Activity Status Validation (STVCACT) page to maintain curriculum activity status codes.

Please see the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: Please note that STVCACT does not contain a system-required indicator. The indicator resides in the Curriculum Activity Status Rules Table (SOBCACT). The specified values must exist in the table when using curriculum processing.

Fields	Descriptions
Activity Status Code	Code of the curriculum activity status, such as ACTIVE, INACTIVE, REMOVED. After a curriculum activity status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the curriculum activity status code record cannot be deleted.
Description	Description of the curriculum activity status.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Complementary Activities Document Type Validation (STVCADT) page

Updated: June 17, 2021

Create the Complementary Activities document type.

Field	Description
Document Type Validation block	
Code	The code that identifies the complementary activity document type.
Description	Description of the complementary activity document type

Field	Description
	code.

Calendar Type Code Validation (STVCALD) page

Updated: August 27, 2020

Use the Calendar Type Code Validation (STVCALD) page to create, update, insert, and delete calendar type codes.

These codes, which describe the types of academic calendars used by the institution such as Quarter to Semester or Straight Semester, are used by the Transfer Articulation Institution (SOABGTA) page. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the calendar type. After a calendar type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the calendar type code record cannot be deleted.
Description	Description of the calendar type.
Multiplier	Value to be used for calendar type credit hour conversion. This is the per-credit conversion value required to translate credits earned in the calendar type to their appropriate equivalent at your institution. For example, if the transferring institution is on a semester system and your institution is as well, the multiplier for a semester type would be `1.000`. This is a required value when adding a new calendar type record.
Activity Date	Date on which the record was last updated. Display only.

Campus Code Validation (STVCAMP) page (California Localization)

Updated: August 27, 2020

Use the Campus Code Validation (STVCAMP) page to create, update, insert, and delete campus codes, such as Main Campus, Downtown Campus, or Foreign Campus.

This page is used by other forms to validate the campus codes. You can create or update these codes only from this page. The **District** field is validated against the District/ Division Code Validation (GTVDICD) page.

The following campus codes should be created for IPEDS reporting:

- Foreign Campus Code
- Off Campus Code

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the campus. After a campus code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the campus code record cannot be deleted.
Description	Description of the campus.
District	Code of the district or division with which the campus is associated. Select the **Search** button for this field to access the District/ Division Code Validation (GTVDICD) list. List District/Division Code Validation (GTVDICD)
Coordinated Universal Time (UTC) Offset	This field enables Ellucian Ethos to add UTC offset support by campus on STVCAMP.
UTC with Offset	Displays the calculated time based on the value entered in the **UTC Offset** field.
Time Zone	Time zone of the campus.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
College	Code of the district or division with which the campus is associated. Select the **Search** button for this field to access the District/ Division Code Validation (GTVDICD) list. List District/Division Code Validation (GTVDICD)

Career Plan Code Validation (STVCAPL) page

Updated: August 27, 2020

Use the Career Plan Code Validation (STVCAPL) page to create, update, insert, and delete career plan codes, such as Auto Mechanic, Engineering, or Journalism, and so on.

The General Student (SGASTDN) page uses this page to validate career plan codes. You can create or update career plan codes only from this page.

Fields	Descriptions
Code	Code of the career plan. After a career plan code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the career plan code record cannot be deleted.
Description	Description of the career plan.
Activity Date	Date on which the record was last updated. Display only.

Combined Academic Standing Code Validation (STVCAST) page

Updated: August 27, 2020

Use the Combined Academic Standing Code Validation (STVCAST) page to create and define valid combined academic standing codes. The combined academic standing code is defined by a combination of an academic standing code and a progress evaluation code.

Please see the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the combined academic standing. After a combined academic standing code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the combined academic standing code record cannot be deleted.
Description	Description of the combined academic standing.
Prohibit Registration	Check box used to indicate whether the code is used to prevent registration. Selected will prevent registration. Cleared will allow registration.
Minimum Hours	Minimum number of hours a student with this combined academic standing code may register for. Use format `NN.NN`.
Maximum Hours	Maximum number of hours a student with this combined academic standing code may register for. Use format `NN.NN`.
Voice Message	Voice Response Message Number. Number assigned to the Voice Response message assigned to this academic standing code.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Classification Code Validation (STVCCSL) page

Updated: August 27, 2020

Use the Classification Code Validation (STVCCSL) page to create, update, insert, and delete classification codes, such as Community Civil Development or Parenting & Family

Support, and so on.

The Course Detail Information (SCADETL) page uses this page to validate classification codes. You can create or update classification codes only from this page.

Fields	Descriptions
Code	Code of the classification. After a classification code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the classification code record cannot be deleted.
Description	Description of the classification.
Activity Date	Date on which the record was last updated. Display only.

Ceremony Type Validation (STVCERT) page

Updated: August 27, 2020

Use the Ceremony Type Validation (STVCERT) page to create, update, insert, and delete ceremony type codes used in the graduation and ceremony processing in the Academic History module such as University Commencement, Nursing School Ceremony, or Student Presentation Weekend.

You can create or update ceremony type codes only from this page.

Fields	Descriptions
Type Code	Code of the ceremony type. After a ceremony type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the ceremony type code record cannot be deleted.
Description	Description of the ceremony type.
Activity Date	Date on which the record was last updated. Display only.

Communication Group Code Validation (STVCGRP) page

Updated: August 27, 2020

Use the Communication Group Code Validation (STVCGRP) page to create, update, insert, and delete communications group codes used in the communication plan processing for the Recruiting, Admissions, and General Student modules such as Athletic Group, College Night, or Campus Visit.

You can create or update communications group codes only from this page.

Fields	Descriptions
Code	Code of the communications group. After a communications group code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the communications group code record cannot be deleted.
Description	Description of the communications group.
Activity Date	Date on which the record was last updated. Display only.

Cohort Code Validation (STVCHRT) page

Updated: August 27, 2020

Use the Cohort Code Validation (STVCHRT) page to create, update, insert, and delete cohort codes used in the Recruiting, Admissions, General Student, and Academic History modules.

These codes represent a cohort grouping assigned to students based on user-defined criteria. These codes provide a tracking mechanism for Student Right to Know reporting. You can create or update cohort codes only from this page.

Fields	Descriptions
Cohort Code	Code of the cohort. After a cohort code record has been saved, the code entered in

Fields	Descriptions
	this field cannot be changed. After this code has been used in any other record, the cohort code record cannot be deleted.
Description	Description of the cohort.
Start Term	First term in which this cohort code is in effect. The **Term Start** and **Term End** fields are used in Student Right to Know reporting and both must exist for cohort codes that are used in Student Right to Know reporting. Select the **Search** button for this field to access the Term Code Validation (STVTERM) list. List Term Code Validation (STVTERM)
100% Term	Term for two-year institutions and less than two year institutions indicating the 100% completion term for a cohort. The 100% term is a term that is equal to or later than the Start Term and less than the End Term for the cohort.
End Term	Last term in which this cohort code is in effect. The **Term Start** and **Term End** fields are used in Student Right to Know reporting and both must exist when for cohort codes that are used in Student Right to Know reporting. Select the **Search** button for this field to access the Term Code Validation (STVTERM) list.

Fields	Descriptions
	List Term Code Validation (STVTERM)
Degree Level	Code of the degree level (such as associate, bachelors, and so on) associated with the cohort code. This is an optional field that is used for Student Right to Know reporting. Select the **Search** button for this field to access the Degree Level Code Validation (STVDLEV) list. List Degree Level Code Validation (STVDLEV)
Print Indicator	Check box used to indicate whether the cohort is to be included on the Student Right to Know Report (SGRKNOW) when all cohorts are requested by entering `%` in the Cohort Code parameter. A cohort code not having this check box selected will not be reported unless it is specifically entered in the Cohort Code parameter.
Activity Date	Date on which the record was last updated. Display only.

CIPC Code Validation (STVCIPC) page

Updated: August 27, 2020

Use the CIPC Code Validation (STVCIPC) page to create, update, insert, and delete CIPC codes such as codes for programs of study such as Medicine, Law, or Linguistics, and so on.

This page is used by other forms to validate the CIPC codes used in the Integrated Post-Secondary Education Data System (IPEDS) reports. You can create or update these codes only from this page.

This page is no longer used with Student IPEDS processing.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the Classification of Instructional Programs (CIP). After a CIP code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the CIP code record cannot be deleted.
Description	Description of the CIP.
Ind A	Check box used to indicate how the CIP code is to be reported on Part A, Part B, Part C, and Part D of the IPEDS Completion Report (SHRICIP). When the **(CIP) Ind(icator) A** check box is selected, this indicates that the CIP code is to be reported as a program completion below the Baccalaureate level.
Ind B	Check box used to indicate how the CIP code is to be reported on Part A, Part B, Part C, and Part D of the SHRICIP report. When the **(CIP) Ind(icator) B** check box is selected, this indicates that the CIP code is to be reported as a program completion at the Baccalaureate level.
Ind C	Check box used to indicate how the CIP code was to be reported on Part C the SHRICIP report. When the **(CIP) Ind(icator) C** check box is selected, this indicates that the CIP code is to be reported as a program completion at the First Professional level.
Co-Unique Code	Code of the co-unique program identifier or additional program identifiers as needed to further define the CIPC codes. This field is used to store the Student Program Co-Unique Code provided to each institution by the Chancellor's Office or the appropriate

Fields	Descriptions
	administrative office.
Activity Date	Date on which the record was last updated. Display only.
Publication Year	Used to report the publication year for 150 Percent Subsidized Stafford Usage Limit regulatory reporting. This field is populated with the value `2010` for existing CIPC records as part of the upgrade process.

Citizen Type Code Validation (STVCITZ) page

Updated: August 27, 2020

Use the Citizen Type Code Validation (STVCITZ) page to create, update, insert, and delete citizen type codes such as Canadian Citizen, Student Visa, and so on.

This page is used by the General Person (SPAPERS) page to validate the citizen type codes. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the citizen type. After a citizen type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the citizen type code record cannot be deleted.
Description	Description of the citizen type.
Citizen Indicator	Check box used to indicate whether the citizen type code represents a citizen of the country.
EDI Equivalent	Used to assign the EDI SPEEDE/ExPRESS citizen type code values to an institution's citizen type codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value is used in the transmission of transcript information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #1066.
Activity Date	Date on which the record was last updated. Display only.

Application Checklist Source Validation (STVCKSR) page

Updated: August 27, 2020

The Application Checklist Source Validation (STVCKSR) page is used to maintain application checklist item source/origination values, such as BASELINE, EXTERNAL, or INTERNAL.

Please see the *Required System Values for Validation Page* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Admissions Checklist Source Code	Admissions checklist item source code for the application. This code identifies the source or origin of the checklist item.
Description	Description of the admissions checklist item source code.
System Required	Check box is used to specify whether the code is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
User ID	ID of the person who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Application Checklist Status Validation (STVCKST) page

Updated: August 27, 2020

The Application Checklist Status Validation (STVCKST) page is used to maintain application checklist item status values, such as ACCEPTED or ACTIVE. These values can provide additional information about the checklist item status for the admissions staff and the applicant.

Fields	Descriptions
Admissions Checklist Status Code	Admissions item checklist status code for the application. This code identifies the status of the checklist item.

Fields	Descriptions
Description	Description of the admissions checklist item status code.
WEB Indicator	Check box used to indicate whether the admission checklist item status code can be displayed in the Admissions module of Student Self-Service. This check box allows you to limit the checklist item status codes that will be displayed to a subset of all valid status codes. The check box defaults to cleared or N when a new record is added, but you can change it at any time.
User ID	ID of the person who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Class Code Validation (STVCLAS) page

Updated: August 27, 2020

Use the Class Code Validation (STVCLAS) page to create, update, insert, and delete class codes such as Freshmen, Sophomore, First Year Law, Professional, and so on.

This page is used by pages in several modules to validate the class codes. You can create or update these codes only from this page.

Fields	Descriptions
Class Code	Code of the class, such as Freshmen, Sophomore, First Year Law, Professional, and so on. After a class code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the class code record cannot be deleted.
Description	Description of the class.
EDI Eqv	EDI Equivalent. Used to assign the EDI SPEEDE/ExPRESS class code values to the institution's class codes. When an institutional code is not equated with an EDI code, this field should be blank.

Fields	Descriptions
	The EDI equivalent value will be used in the transmission of transcript information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #1131.
LMS Eqv	LMS Equivalent Class Code. Used to display the IA-PLUS Loan Management System (LMS) class code values that are equivalent to the Banner® class codes. These codes are not validated. The translation to these LMS codes occurs during the LMS transaction feed interface from Banner Financial Aid. For more information, please refer to the *Banner Financial Aid Use* content or the *IA-PLUS Loan Management System User Manual*.
NSC Class Level Translation	National Student Clearinghouse class level translation code associated with the Banner class code for reporting. An NSC equivalent must be set up for each class level for reporting to the Clearinghouse. Valid values are: • Freshman • Sophomore • Junior • Senior • Certificate • Under Unspecified • Masters • Doctoral • Postdoctorate • First Professional • Grad Unspecified • Post baccalaureate certificate - saved to the database as T • Associate's - saved to the database as A

Fields	Descriptions
	• Bachelor's - saved to the database as B • None These hardcoded values come from the NSC and are converted to the EDI standards within the SFRNSLC process.
Activity Date	Date on which the record was last updated. Display only.

Comment Type Code Validation (STVCMTT) page

Updated: August 27, 2020

Use the Comment Type Code Validation (STVCMTT) page to create, update, insert, and delete comment types and their respective codes, such as General Comment, Special Needs, or Added by ACT Data Load).

This page is used by other pages to validate the comment types. You can create or update the comment types only from this page.

Fields	Descriptions
Code	Code of the comment type. After a comment type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the comment type code record cannot be deleted.
Description	Description of the comment type.
Activity Date	Date on which the record was last updated. Display only.

Contract Rules Validation (STVCNTR) page

Updated: August 27, 2020

Use the Contract Rules Validation (STVCNTR) page to create, update, insert, and delete contract rules. These contract rules are used in the Faculty Load module. This page is used by other pages to validate contract rules, and you can create or update these rules only from this page.

Fields	Descriptions
Code	Code of the contract rule. After a contract rule code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the contract rule code record cannot be deleted.
Description	Description of the contract rule.
Activity Date	Date on which the record was last updated. Display only.

County Code Validation (STVCNTY) page

Updated: August 27, 2020

Use the County Code Validation (STVCNTY) page to create, update, insert, and delete county codes such as Delaware, Polk, or Missoula.

This page is used by pages in several modules to validate the county codes. These codes can be created or updated only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Field	Description
Code	Code of the county. After a county code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the county code record cannot be deleted.
Description	Description of the county.
ISO Code	ISO Code of the county.
Activity Date	Date on which the record was last updated. Display only.

College Code Validation (STVCOLL) page (California Localization)

Updated: August 27, 2020

Use the College Code Validation (STVCOLL) page to create, update, insert, and delete college codes, such as College of Engineering, College of Law, College of Music, and so on. Several other forms use this page to validate college codes. You can create or update college codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the college. After a college code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the college code record cannot be deleted.
Description	Description of the college.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this college code.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Canadian Statistics Code	Five-digit code representing the college code that has been defined and used on the Annual University Full-Time Teaching Staff Survey. Enter the code that identifies the institution's college to Stats Canada.
MIS District	Code of the district/division associated with this college code. The MIS district code is used with the Banner Human Resources CA-MIS module for the Employee Assignment Extract Process (PEPAEXT) for the assignment information file. This field is for CA-MIS reporting purposes only. Valid values should be entered on the GTVDICD page. Select the **Search** button for this field to access the District/ Division Code Validation (GTVDICD) list. List District/Division Code Validation (GTVDICD)
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
District/College ID	Code of the district/division associated with this college code. Select the **Search** button for this field to access the District/ Division Code Validation (GTVDICD) list. List District/Division Code Validation (GTVDICD)

Committee Member Role/Function Validation (STVCOMF) page

Updated: August 27, 2020

Use the Committee Member Role/Function Validation (STVCOMF) page to create, update, insert, and delete function codes to designate the role or function of a committee member such as Chairperson, President, or Member Elect. You can create or update function codes only from this page.

Fields	Descriptions
Code	Code of the function. After a function code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the function code record cannot be deleted.
Description	Description of the function.
Activity Date	Date on which the record was last updated. Display only.

Committee/Service Status Validation (STVCOMS) page

Updated: August 27, 2020

Use the Committee/Service Status Validation (STVCOMS) page to create, update, insert, and delete status codes for committee members or for the committee/service itself such as Active or Inactive. You can create or update status codes only from this page.

Fields	Descriptions
Code	Code of the committee/service status. After a committee/service status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the committee/service status code record cannot be deleted.
Description	Description of the committee/service status.
Activity Date	Date on which the record was last updated. Display only.

Committee/Service Type Validation (STVCOMT) page

Updated: August 27, 2020

Use the Committee/Service Type Validation (STVCOMT) page to create, update, insert, and delete committee/service type codes such as Arts Review Committee, English Literature Committee, or Faculty Recruiting Committee. You can create or update committee/service type codes only from this page.

Fields	Descriptions
Code	Code of the committee/service type. After a committee/service type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the committee/service type code record cannot be deleted.

Fields	Descriptions
Description	Description of the committee/service type.
Transcript Print Switch	Check box used to indicate whether the committee/service type code can be printed on the transcript.
Activity Date	Date on which the record was last updated. Display only.

Cooperative Education Code Validation (STVCOPC) page

Updated: August 27, 2020

Use the Cooperative Education Code Validation (STVCOPC) page to create, update, insert, and delete cooperative education codes, such as Civil Engineering, Journalism, Student Teaching, and so on.

The Cooperative Education (SGACOOP) page uses this page to validate cooperative education codes. You can create or update cooperative education codes only from this page.

Fields	Descriptions
Code	Code of the cooperative education type. After a cooperative education code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the cooperative education code record cannot be deleted.
Description	Description of the cooperative education type.
Activity Date	Date on which the record was last updated. Display only.

Communication Plan Code Validation (STVCPLN) page

Updated: August 27, 2020

Use the Communication Plan Code Validation (STVCPLN) page to create, update, insert, and delete communication plan codes used in the Recruiting, Admissions, and General Student modules. You can create or update communication plan codes only from this page.

Fields	Descriptions
Code	Code of the communication plan. After a communication plan code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the communication plan code record cannot be deleted.
Description	Description of the communication plan.
Activity Date	Date on which the record was last updated. Display only.

Compliance Type Code Validation (STVCPRT) page

Updated: August 27, 2020

Use the Compliance Type Code Validation (STVCPRT) page to define and maintain codes, descriptions, and titles for different types of compliance hard copy output. You may define hard copy output for different types of users, such as advisors, students, reports of different length such as summary and detailed reports.

Fields	Descriptions
Type	Code of the compliance output report type. After a compliance output report type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the compliance output report type code record cannot be deleted.
Description	Description of the compliance output report type.
Report Title	Title to be printed on hard copy compliance output. This title can

Fields	Descriptions
	be overridden when the report is requested to be run in compliance.
Official	Check box used to indicate whether the compliance output report is official.
Activity Date	Date on which the record was last updated. Display only.

Create a type of compliance hard copy output

Updated: August 27, 2020

You can create a hard copy output for the compliance type.

About this task

Procedure

1. Access the **Compliance Type Code Validation (STVCPRT)** page.
2. Select Insert Record.
3. Enter the code for the compliance output report type.
4. Enter a brief description.
5. Save.

   Note: The **Activity Date** field is populated when you save the new record.

Change a type of compliance hard copy output

Updated: August 27, 2020

You can change a hard copy output for the compliance type.

About this task

Procedure

1. Access the **Compliance Type Code Validation (STVCPRT)** page.

2. Change the description for the output report type.
3. Save.

   Note: The **Activity Date** field is updated when you save the modified record.

Delete a type of compliance hard copy output

Updated: August 27, 2020

You can delete a hard copy output for the compliance type.

About this task

Procedure

1. Access the **Compliance Type Code Validation (STVCPRT)** page.
2. Go to the **Type** field for the compliance output report type you want to delete.
3. Select Remove Record.
4. Save.

Cohort Reason Code Validation (STVCREA) page

Updated: August 27, 2020

Use the Cohort Reason Code Validation (STVCREA) page to create, update, insert, and delete cohort reason codes such as Peace Corps, Church Mission, Military Assignment.

These codes are used in conjunction with an inactivation of a cohort for a student to identify the reason for the inactivation. You can create or update cohort reason codes only from this page.

Fields	Descriptions
Code	Code of the cohort reason. After a cohort reason code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the cohort reason code

Fields	Descriptions
	record cannot be deleted.
Description	Description of the cohort reason.
Activity Date	Date on which the record was last updated. Display only.

Applicant Course Summary Type Validation (STVCRSS) page

Updated: August 27, 2020

Use the Applicant Course Summary Type Validation (STVCRSS) page to define course summary types, which can be recorded on the Applicant Course Summaries (SOACRSS) page.

Fields	Descriptions
Course Summary Type	Code of the course summary type. After a course summary type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the course summary type code record cannot be deleted.
Description	Description of the course summary type.
Activity Date	Date on which the record was last updated. Display only.

Course Status Code Validation (STVCSTA) page

Updated: August 27, 2020

Use the Course Status Code Validation (STVCSTA) page to create, update, insert, and delete course status codes.

These codes show whether the course status is active or inactive. Other forms use this page to validate course status codes. You can create or update the course status codes only from this page.

Fields	Descriptions
Code	Code of the course status. After a course status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the course status code record cannot be deleted.
Description	Description of the course status.
Active	Check box used to specify whether this code is active.
Activity Date	Date on which the record was last updated. Display only.

Curriculum Status Validation (STVCSTS) page

Updated: August 27, 2020

Use the Curriculum Status Validation (STVCSTS) page to maintain curriculum status codes.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Curriculum Status Code	Code of the curriculum status for the learner, such as such as APPACCEPT, APPLIED, AWARDED, CHANGED, COMPLETED, DENIED, INPROGRESS, INSTACCEPT, OVERLOAD, PENDING, SOUGHT, and so on. After a curriculum status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the curriculum status code record cannot be deleted.
Description	Description of the curriculum status code.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.

Fields	Descriptions
	This indicator is set to Y for delivered values.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Contact Type Code Validation (STVCTYP) page

Updated: August 27, 2020

Use the Contact Type Code Validation (STVCTYP) page to create, update, insert, and delete recruiting contact type codes, such as Campus Visit, College Night, or Merit List Letter, and so on.

Several forms in the Recruiting module and the Interface Validation (STVINFC) page use this page to validate recruiting contact type codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the recruiting contact type. After a recruiting contact type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the recruiting contact type code record cannot be deleted.
Description	Description of the recruiting contact type.
Activity Date	Date on which the record was last updated. Display only.

Catalog Element One Validation (STVCUDA) page

Updated: August 27, 2020

Use the Catalog Element One Validation (STVCUDA) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs.

This page is one of six used in the Catalog module for this purpose. You can create or update values for Element 1 of the supplemental data on the Course Detail Information (SCADETL) page only from this page.

Fields	Descriptions
Code	Code of the institutional reporting element 1. After an institutional reporting element code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the institutional reporting element code record cannot be deleted.
Description	Description of the institutional reporting element 1.
Activity Date	Date on which the record was last updated. Display only.

Catalog Element Two Validation (STVCUDB) page

Updated: August 27, 2020

Use the Catalog Element Two Validation (STVCUDB) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs.

This page is one of six used in the Catalog module for this purpose. You can create or update values for Element 2 of the supplemental data on the Course Detail Information (SCADETL) page only from this page.

Fields	Descriptions
Code	Code of the institutional reporting element 2. After an institutional reporting element code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the institutional reporting element code record cannot be deleted.
Description	Description of the institutional reporting element 2.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Catalog Element Three Validation (STVCUDC) page

Updated: August 27, 2020

Use the Catalog Element Three Validation (STVCUDC) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs.

This page is one of six used in the Catalog module for this purpose. You can create or update values for Element 3 of the supplemental data on the Course Detail Information (SCADETL) page only from this page.

Fields	Descriptions
Code	Code of the institutional reporting element 3. After an institutional reporting element code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the institutional reporting element code record cannot be deleted.
Description	Description of the institutional reporting element 3.
Activity Date	Date on which the record was last updated. Display only.

Catalog Element Four Validation (STVCUDD) page

Updated: August 27, 2020

Use the Catalog Element Four Validation (STVCUDD) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs.

This page is one of six used in the Catalog module for this purpose. You can create or update values for Element 4 of the supplemental data on the Course Detail Information (SCADETL) page only from this page.

Fields	Descriptions
Code	Code of the institutional reporting element 4. After an institutional reporting element code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the institutional reporting element code record cannot be deleted.
Description	Description of the institutional reporting element 4.
Activity Date	Date on which the record was last updated. Display only.

Catalog Element Five Validation (STVCUDE) page

Updated: August 27, 2020

Use the Catalog Element Five Validation (STVCUDE) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs.

This page is one of six used in the Catalog module for this purpose. You can create or update values for Element 5 of the supplemental data on the Course Detail Information (SCADETL) page only from this page.

Fields	Descriptions
Code	Code of the institutional reporting element 5. After an institutional reporting element code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the institutional reporting element code record cannot be deleted.
Description	Description of the institutional reporting element 5.
Activity Date	Date on which the record was last updated. Display only.

Catalog Element Six Validation (STVCUDF) page

Updated: August 27, 2020

Use the Catalog Element Six Validation (STVCUDF) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs.

This page is one of six used in the Catalog module for this purpose. You can create or update values for Element 6 of the supplemental data on the Course Detail Information (SCADETL) page only from this page.

Fields	Descriptions
Code	Code of the institutional reporting element 6. After an institutional reporting element code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the institutional reporting element code record cannot be deleted.
Description	Description of the institutional reporting element 6.
Activity Date	Date on which the record was last updated. Display only.

Day of Week Validation (STVDAYS) page

Updated: August 27, 2020

Use the Day of Week Validation (STVDAYS) page page to create, update, insert, and delete the day of the week codes, such as Monday, Wednesday, Friday. .

Several forms in the Registration, Location Management and Housing, and Schedule modules use this page to validate the day of week codes. You can create or update the day of week codes from this page

Note: This validation table is case sensitive when used with Oracle. Code descriptions *must* be in mixed case, for example, Monday, Tuesday, Wednesday, and so on.

Please see the *Required System Values for Validation Pages* section in the *Validation*

Pages chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Day	Code of the day.
Description	Name of the day. This `must` be in mixed case, for example, Monday, Tuesday, Wednesday, and so on.
Number	Sequence number associated with the day.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Institutional Type of Day Validation (STVDAYT) page (California Localization)

Updated: August 27, 2020

Use the Institutional Type of Day Validation (STVDAYT) page to create, update, insert, and delete day type codes specific to an institution's needs for state or local reporting, for information required about a day and the term in which it falls on the Calendar Day Information (SOACALD) page.

This page is used in the Schedule module. Examples of a day type code are a holiday, a weekend, and so on. You can create or update values for day type codes only from this page.

Fields	Descriptions
Code	Code of the day type. After a day type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the day type code record cannot be deleted.
Description	Description of the day type.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Secondary Day Code	Check box used to specify whether the day code should be considered a secondary day code. Only codes with this selected will be available in the **Overlapping Intersession Term** field on the Calendar Day Information (SOACALD) page. (This field has no impact on the **Day Type** field on SAOCALD.)

Degree Code Validation (STVDEGC) page

Updated: August 27, 2020

Use the Degree Code Validation (STVDEGC) page to maintain the degree codes, such as Undeclared, Bachelor of Arts, Doctor of Education, and so on. This page is used by other pages to validate the degree codes.

You can create or update the degree codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Field	Description
Code	Code of the degree. After a degree code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the degree code record cannot be deleted.
Description	Description of the degree.
Count in Financial Aid	Check box used to specify whether the degree counts toward financial aid.

Field	Description
	This check box is not used for Banner Financial Aid, but can be used to interface data to other third-party financial aid software. **Note:** The **Financial Aid Eligibility** check box on the Major, Minor, Concentration Code Validation (STVMAJR) page is used to indicate aid-eligible programs for Banner Financial Aid.
Level	Code of the level associated with this degree code. This indicates whether the degree is undergraduate, graduate, and so on.
Award Category	Code of the degree award category associated with this degree code. This indicates how the degree is to be treated in the IPEDS reporting process. A degree will not be processed by IPEDS reporting unless a valid value is entered.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this degree code.
Web Indicator	Check box used to indicate whether the degree code can be displayed in the self-service applications. This check box allows you to limit the degree types that will be displayed to a subset of all valid degree types. The check box defaults to unchecked or N when a new record is added, but you can change it at any time. **Note:** The Web transcript will display information about awarded degrees only for Web-enabled degrees. The display of the college degree in Admissions self-service is controlled by the STVDEGC label on SOAXREF. If no records exist on SOAXREF, then all values from STVDEGC are displayed.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record

Field	Description
	cannot be deleted. When this check box is checked, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Degree Completion Change Reason Validation (STVDCPR) page

Updated: August 27, 2020

Use the Degree Completion Change Reason Validation (STVDCPR) page to create, update, insert, and delete codes for changes to degree completion, such as incorrect grades. These codes are used on SGAAPRG.

Fields	Descriptions
Code	Degree completion change reason code for the athlete. After a degree completion change reason code record has been saved, this code cannot be changed. After this code has been used in any other record, the degree completion change reason code record cannot be deleted.
Description	Description of the degree completion change reason code for the athlete.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Degree Status Code Validation (STVDEGS) page

Updated: August 27, 2020

Use the Degree Status Code Validation (STVDEGS) page to create, update, insert, and delete degree status codes, such as Certificate Awarded, Degree Sought, Undergraduate Awarded, and so on.

This page is used by other forms to validate degree status codes. You can create or update degree status codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Degree Status Code	Code of the degree status. After a degree status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the degree status code record cannot be deleted.
Description	Description of the degree status.
Awarded Indicator	Option group that indicates whether this status means that the degree is awarded. Valid values are: • Awarded (saved to the database as A) • Pending (saved to the database as P) • Sought (saved to the database as Null)
Next Degree Status	Indicator for the next step in degree status. For example, you might have a degree status `Pending` who next status would be `Awarded`. This field is used in conjunction with the **Update Next Degree Status** check box on the Graduation Status Validation (STVGRST) page. If the **Update Next Degree Status** check box on STVGRST is selected for the graduation status entered, then the current degree status code on the Degrees and Other Formal Awards (SHADEGR) page will be updated with the next degree status maintained on this validation page. For example, if the student's current degree status is Undergraduate Pending Award (UP), and the graduation status is being updated to Finalized, and the finalized graduation status code is selected in the **Update Next Degree Status** check box, then the degree status will automatically be set to Undergraduate Awarded (UA).

Fields	Descriptions
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Curriculum Status	Code of the curriculum status for this degree status code. When degree status codes are created on STVDEGS, a curriculum status code of Awarded cannot be entered if the row being created has the **Awarded Indicator** set to a value other than A. In addition, a curriculum status code of Pending can not be entered if the **Awarded Indicator** does not equal P. Select the **Search** button for this field to access the Curriculum Status (STVCSTS) list. List Curriculum Status (STVCSTS)
Activity Date	Date on which the record was last updated. Display only.

Student CARE Number of Dependents Validation (STVDEPS) page

Updated: August 27, 2020

Use the Student CARE Number of Dependents Validation (STVDEPS) page to create, update, insert, and delete codes which indicate a CARE student's number of dependent children. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the dependent-children number. After a dependent-children number code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the dependent-children number code record cannot be deleted.
Description	Description of the dependent-children

Fields	Descriptions
	number.
Activity Date	Date on which the record was last updated. Display only.

Department Code Validation (STVDEPT) page

Updated: August 27, 2020

Use the Department Code Validation (STVDEPT) page to maintain department codes such as History Department, Counseling Department, or Department Undeclared, and so on. Other forms use this page to validate the department codes, and You can create or update the department codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the department. After a department code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the department code record cannot be deleted.
Description	Description of the department.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
VR Msg No	Voice Response Message Number. Number assigned to the Voice Response message assigned to this department code.
Activity Date	Date on which the record was last updated. Display only.

Compliance Defaults Option Validation (STVDFLT) page

Updated: August 27, 2020

Use the Compliance Defaults Option Validation (STVDFLT) page to define compliance types to be used as optional default values for use in running batch compliance.

CAPP compliance evaluations are requested by creating a compliance request (SMARQCM) record. After a request has been saved, the evaluation can be performed on an individual basis or in batch for a number of people/requests. The full compliance request record includes a large number of fields. When using population selection in the Batch Compliance Process (SMRBCMP), a compliance request record is built for the evaluation it needs to perform. When these records are inserted, the process uses a set of hard-coded default values. This page allows you to build optional default values when running batch compliance.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Default Code	Code of the batch compliance default value. After a batch compliance default code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the batch compliance default code record cannot be deleted.
Description	Description of the batch compliance default value.
Sys Ind	System Required Indicator. Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Disability Type Code Validation (STVDISA) page

Updated: August 27, 2020

Use the Disability Type Code Validation (STVDISA) page to create, update, insert, and delete disability type codes, such as Blind, Multiple Sclerosis, Hearing Impaired, and so on.

The Medical Information (GOAMEDI) page uses this page to validate disability type codes. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the disability type. After a disability type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the disability type code record cannot be deleted.
Description	Description of the disability type.
Activity Date	Date on which the record was last updated. Display only.

Division Code Validation (STVDIVS) page

Updated: August 27, 2020

Use the Division Code Validation (STVDIVS) page to create, update, insert, and delete division codes, such as Division Not Declared, Division of Accounting, Division of Law, and so on. Several other forms use this page to validate division codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the division. After a division code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the division code record cannot be deleted.
Description	Description of the disability type.
Activity Date	Date on which the record was last updated. Display only.

Degree Level Code Validation (STVDLEV) page

Updated: August 27, 2020

Use the Degree Level Code Validation (STVDLEV) page to create, update, insert, and delete degree level codes (Associate, Bachelor, Master, and so on. Other forms use this page to validate the degree level codes. You can create or update degree level codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the degree level. After a degree level code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the degree level code record cannot be deleted.
Description	Description of the degree level.
Numeric Value	Value used to specify the ranking value for the degree level, which is used in the Cohorts and Student Right to Know tracking processes. The numeric value should be established with the lowest degree level having the lowest value and the highest degree level having the highest value.
Activity Date	Date on which the record was last updated. Display only.

Diploma Type Validation (STVDPLM) page

Updated: August 27, 2020

Use the Diploma Type Validation (STVDPLM) page to create, update, insert, and delete diploma type codes, such as College Preparatory or General Education. Other forms use this page to validate the diploma type. You can create or update the diploma type codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Diploma Type	Code of the diploma type. After a diploma type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the diploma type code record cannot be deleted.
Description	Description of the diploma type.
EDI Equivalent	Used to assign the EDI SPEEDE/ExPRESS diploma type code values to the institution's diploma type codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value will be used in the transmission of transcript information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #641.
Activity Date	Date on which the record was last updated. Display only.

Duplicate Material Code Validation (STVDPMR) page

Updated: August 27, 2020

Use the Duplicate Material Code Validation (STVDPMR) page to define and maintain the codes and descriptions for duplicate material rules.

You can create or update these codes only from this page. The **(Duplicate Material Rule) Code** field is a required item to add a duplicate material rule code record. Duplicate material rule codes must be defined before the rules for the code can be established or before a duplicate material rule can be assigned to a piece of material.

The rules for each rule code are defined and maintained on the Duplicate Material Rules (SOADPMR) page, and a duplicate material rule code may be associated with each material code on the Material (SOAMATL) page. Duplicate material rules will be checked by all communication plan processing to determine whether or not a piece of material which has already been assigned to a student can be assigned again. If duplicates of a material are never to be allowed in communication plan processing, no duplicate material rule should be associated with a material code.

Fields	Descriptions
Code	Code of the duplicate material rule. After a duplicate material rule code record has

Fields	Descriptions
	been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the duplicate material rule code record cannot be deleted.
Description	Description of the duplicate material rule.
Activity Date	Date on which the record was last updated. Display only.

Ceremony Dress Validation (STVDRES) page

Updated: August 27, 2020

Use the Ceremony Dress Validation (STVDRES) page to create, update, insert, and delete ceremony dress codes which indicate the valid codes for dress for a particular ceremony, for example, Graduation Attire. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the ceremony dress. After a ceremony dress code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the ceremony dress code record cannot be deleted.
Description	Description of the ceremony dress.
Activity Date	Date on which the record was last updated. Display only.

Electronic Document Status Code Validation (STVDSTS) page

Updated: August 27, 2020

Use the Electronic Document Status Code Validation (STVDSTS) page to define codes and descriptions that represent the typical actions and procedural steps which may apply to processing any transcript at your institution.

For example, an undergraduate transcript for a potential transfer student may need to be reviewed by the Admissions Office, the Student Records Office, the Financial Aid Office, and possibly the college or department that the transfer student is applying to. Some transcripts may need to be reviewed by specific departments or individuals.

You should define a code for each procedural step or action in transcript processing that may occur at your institution. Some of the processing codes will be assigned automatically to each transcript received, and others will be added directly by users as appropriate online. It is likely that a transcript will have many status codes assigned to it, indicating several tasks that need to be completed as part of the total process of the review of that transcript. Some processing codes must have indicators set in a specific way to allow the transcript to be uploaded into transfer articulation and to be eligible for removal from visual display from the Online Transcripts Activity List (SHAEDIS) page. Recommendations for establishing these transcript status codes and explanations of how priority code and the transfer articulation and archive indicators function are detailed as follows.

You must designate a priority for each code on STVDSTS. Priorities range from 1 to 99. The lower the value of the number, the higher the priority of the code. For example, a code with a priority of 5 is higher than a code with a priority of 20. More than one code may have the same priority. When a new EDI transcript is uploaded into Banner® Student (displayed on SHAEDIS), the upload process (SHREDIP) will automatically assign the status codes defined in STVDSTS with the highest priority. It is recommended that the highest priority status code be given to the task of performing an ID verification/matching process against the person associated with the transcript because this step must be performed for all transcripts received.

If you want to have additional procedural step(s) automatically assigned to all uploaded transcripts, assign the same priority to those status codes as has been assigned to the ID verification/matching status code. It is also recommended that the priority codes be assigned to indicate the relative importance of some tasks as compared to others. This, however, does not mean that a task (status code) with a priority of 20 must be completed before a task (status code) with a priority of 30. The only other functional consequence of the use of priorities is in controlling the sort order of the display of records on SHAEDIS. On SHAEDIS, the display will be sorted by priority of the pending status codes, and where many transcripts have the same pending status code, the display will be sorted alphabetically by the students' last names.

For example, a status code of VERF (Verify ID) has a priority of 1, and a status code of ADMR (Admissions Review) has a priority of 10. A status code of ARTC (Ready for Transfer Articulation) has a priority code of 80, and a status code of ARCH (Archive EDI

Transcript Data) has a priority code of 99. A student's transcript might currently have all of these pending status codes assigned to it. The first row displayed in SHAEDIS (in order from the top to the bottom of the block of records displayed) for the student is the row with a status code of VERF, because it has the highest priority code. After the status code of VERF has been completed, that record will no longer be displayed on SHAEDIS, and the row with a status code of ADMR will be the first row displayed, because it has the highest priority of the remaining status codes.

To be able to upload a transcript to transfer articulation, you must define one status code that has the **TA (Transfer Articulation Flag)** field set to Y and assign the status code to the transcript. Without one code with this flag, the Transfer Articulation (SHATAEQ) page will not recognize that an EDI transcript exists for upload.

After a transcript has been uploaded to transfer articulation, the status code that has the **TA (Transfer Articulation Flag)** field set to `Y` will be updated from `P` (Pending) to `C` (Complete) on SHAEDIS. In addition, the final step in the transfer articulation will be to add the status code that has the **ARC (Archive Status Flag)** field set to `Y` to that transcript. This archive status code will be inserted with a `P` (Pending) action. When you update the archive status code to `C` (Complete), the transcript will be excluded from display on SHAEDIS, even if other status codes exist with a P (Pending) action.

STVDSTS can be used with XML transcript processing. The user-defined extension indicators can be set by document status code for college, student, academic record, or course. Test scores and immunization data can also be included by document status code.

Note: Only the shell of the UDE functionality is delivered. You must create custom code at your institution to import data using user-defined extensions.

Fields	Descriptions
Status Code	Code of the electronic document status. After an electronic document status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the electronic document status code record cannot be deleted. This code reflects a step or status for the processing of a transcript at the institution, such as ADMR might be for Admissions Office Review. Multiple codes can be assigned to a

Fields	Descriptions
	transcript to indicate processing steps that are still incomplete.
Description	Description of the electronic document status.
Priority	Value of the priority assigned to this electronic document status. 1 = High, 99 = Low. This is the priority assigned to the status by SHREDIP when the transcript is uploaded for ID verification/ matching.
Transfer Articulation Indicator	Indicator for whether an electronic transcript with this electronic document status code should be included when transcripts are uploaded to transfer articulation.
Archive Status Indicator	Indicator for whether a transcript with this electronic document status code should be archived, not purged.
Tests	Check box used to indicate if the electronic document status code should process test score data for XML transcripts.
Immunization	Check box used to indicate if the electronic document status code should process immunization data for XML transcripts. When a status code is entered on SHAEDIS that has the **Immunization** indicator set to Y on STVDSTS and the **Pending or Complete Indicator** on SHAEDIS set to P, when the record is saved, the system will attempt to import all the immunization data that is present on the XML transcript.
User Defined Extensions: Main	Check box used to indicate if the electronic document status code should process XML transcript user-defined extensions on the college transcript.
User Defined Extensions: Student	Check box used to indicate if the electronic document status code should process XML transcript user-defined extensions on the student element.
User Defined Extensions: Academic Record	Check box used to indicate if the electronic document status code should process XML transcript user-defined extensions on the academic record element.
User Defined Extensions: Course	Check box used to indicate if the electronic document status code should process XML transcript user-defined extensions on the course element.

Electronic Application Status Validation (STVEAPL) page

Updated: August 27, 2020

Use the Electronic Application Status Validation (STVEAPL) page to define the status codes for the electronic application such as, suspended record, match error, verification error, admissions hold, and so on.

These codes will be viewable on SAAEAPS in the **Application Status** field. They provide you with information about why applications are not being completely processed by Quick Start. These codes are system-required and are delivered.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the electronic application status. After an electronic application status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the electronic application status code record cannot be deleted.
Description	Description of the electronic application status.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.
User ID	ID of the user who last updated the record. Display only.

Electronic Status Code Validation (STVEDIS) page

Updated: August 27, 2020

Use the Electronic Status Code Validation (STVEDIS) page to create, update, insert, and delete electronic status codes, such as Transcript Request Record Created, Batch ID Recorded, Download Completed, and so on.

You can create and update these codes only from this page. Electronic status codes are used with EDI and XML processing.

The EDI Reconciliation Process (SHREDIR) places these status codes on the student transcript requests, and they are displayed on the Transcript Request (SHARQTC) page to inform you of the status of the transcript request in the EDI electronic transcript process.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Electronic Status Code	Code of the electronic status. After an electronic status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the electronic status code record cannot be deleted.
Description	Description of the electronic status.
Activity Date	Date on which the record was last updated. Display only.

Education Level Code Validation (STVEDLV) page

Updated: August 27, 2020

Use the Education Level Code Validation (STVEDLV) page to create, update, insert, and delete education level codes, such as Completed High School, Completed 4 Year Degree, Completed Doctorate, and so on.

The Admissions module and the General Student (SGASTDN) page use this page to validate education level codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the education level. After an education level code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the education level code record cannot be deleted.
Description	Description of the education level.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Education Goal Validation (STVEGOL) page

Updated: August 27, 2020

Use the Education Goal Validation (STVEGOL) page to create, update, insert, and delete education goals, such as Obtain GED Certificate, Obtain Associate's Degree, Graduate Studies, and so on. The Admissions module uses this page to validate education goal codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the education goal. After an education goal code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the education goal code record cannot be deleted.
Description	Description of the education goal.
Activity Date	Date on which the record was last updated. Display only.

EDI Rule Group Validation (STVEGRP) page

Updated: August 27, 2020

Use the EDI Rule Group Validation (STVEGRP) page to display codes and descriptions for groups of EDI application processing rules.

Group codes are provided so that rules which apply to similar types of data can be easily queried on the Electronic Admissions Application Rules (SAAERUL) page. Values in this table are not intended to be maintained locally. All required values will be delivered and will be inserted during the install process or by update scripts.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for

this validation page.

Fields	Descriptions
Code	Code of the EDI rule group. After an EDI rule group code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the EDI rule group code record cannot be deleted.
Description	Description of the EDI rule group.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Eligibility Code Validation (STVELIG) page

Updated: August 27, 2020

Use the Eligibility Code Validation (STVELIG) page to create, update, insert, and delete eligibility codes. These codes are used in Student Right to Know tracking by the Athletic Compliance (SGASPRT) page in the General Student module. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the eligibility type. After an eligibility code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the eligibility code record cannot be deleted.
Description	Description of the eligibility type.
Activity Date	Date on which the record was last updated. Display only.

HTML Letter Module Validation (STVELMT) page

Updated: August 27, 2020

Use the HTML Letter Module Validation (STVELMT) page to record the modules and views used in the generation of email letters.

This determines the data columns that can be placed on the dynamic HTML letter. Default values are delivered which can be modified if you want a different view for the variables.

Please see the Required System Values for Validation Pages section in the Validation Pages chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Module	Code of the HTML letter data source. After an HTML letter data source code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the HTML letter data source code record cannot be deleted.
Description	Description of the HTML letter data source.
View	Banner® or Object:Access view or Banner table name for HTML letter module data source.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Employment Expectation Validation (STVEMEX) page

Updated: August 27, 2020

Use the Employment Expectation Validation (STVEMEX) page to create, update, insert, and delete employment expectation codes, such as Working 10 hours a week, Non-working Student, and so on.

The General Student (SGASTDN) page uses this page to validate employment expectation codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the employment expectation. After an employment expectation code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the employment expectation code record cannot be deleted.
Description	Description of the employment expectation.
Activity Date	Date on which the record was last updated. Display only.

Employer Code Validation (STVEMPL) page

Updated: August 27, 2020

Use the Employer Code Validation (STVEMPL) page to maintain employer codes which represent the employer's name, address, and phone number. Other forms use this page to validate this employer information. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the employer. After an employer code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the employer code record cannot be deleted.
Description (untitled)	Description of the employer.
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1	Four lines for the street address.

Fields	Descriptions
Street Line 2 Street Line 3 Street Line 4	
City	City for the address.
State or Province	Code for the state or province in which the address is located. Select the **Search** button for this field to access the State/Province Code Validation (STVATYP) list. List State/Province Code Validation (STVATYP)
ZIP or Postal Code	ZIP or postal code for the address. When a valid ZIP or postal code is selected from the ZIP/Postal Code Validation (GTVZIPC) page, the combination of city, state/province, and nation information that exists in GTVZIPC defaults into the appropriate fields. The related information does not default in when the ZIP/postal code is entered manually. Select the **Search** button for this field to access the ZIP/Postal Code Validation (GTVZIPC) page. List ZIP/Postal Code Validation (GTVZIPC) page
Nation	Nation for the address.

Fields	Descriptions
	Select the **Search** button for this field to access the Nation Validation (STVNATN) list. List Nation Validation (STVNATN)
Telephone	Telephone number. • The first field is for the country code. • The second field is for the area code. • The third field is for the telephone number (with no extra characters such as spaces or dashes). • The fourth field is for an extension, if applicable.
Activity Date	Date on which the record was last updated. Display only.

Employment Type Validation (STVEMPT) page

Updated: August 27, 2020

Use the Employment Type Validation (STVEMPT) page to create, update, insert, and delete employment types, such as Self-employed, Employer Sponsored, or No Employment on Record. This page is used by other forms to validate employment types. You can create or update employment types only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the employment type. After an employment type code record has been saved, the code entered in this field cannot

Fields	Descriptions
	be changed. After this code has been used in any other record, the employment type code record cannot be deleted.
Description	Description of the employment type.
Activity Date	Date on which the record was last updated. Display only.

Education Opportunity Prog/Serv Status Validation (STVEOPS) page (California Localization)

Updated: August 27, 2020

Use the Education Opportunity Prog/Serv Status Validation (STVEOPS) page to create, update, insert, and delete EOPS (Educational Opportunity Programs and Services) status codes, such as No Service, Student is Eligible, or Student is Not Eligible.

This page is used by the Educational Opportunity Programs and Services (SGAEOPS) page to validate the EOPS status codes. You can create or update these type codes only from this page.

Fields	Descriptions
Code	Code of the EOPS status. After an EOPS status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the EOPS status code record cannot be deleted.
Description	Description of the EOPS status.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
CARE Code Indicator	Check box used to specify whether the code should be considered a CARE code.

Enrollment Verification Type Code Validation (STVEPRT) page

Updated: August 27, 2020

Use the Enrollment Verification Type Code Validation (STVEPRT) page to create, update, insert, and delete enrollment verification type codes, such as codes used for business verification or full disclosure.

This page is used by other forms to validate the enrollment verification types. You can create or update these type codes only from this page.

Fields	Descriptions
Code	Code of the enrollment verification type. After an enrollment verification type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the enrollment verification type code record cannot be deleted.
Description	Description of the enrollment verification type.
Activity Date	Date on which the record was last updated. Display only.

Enrollment Planning Service Code Validation (STVEPSC) page

Updated: August 27, 2020

The Enrollment Planning Service Code Validation (STVEPSC) page can contain all 304 EPS Market codes created by the College Board along with their corresponding market names. This validation page must be populated by the institution with all the EPS codes and descriptions available from the College Board.

Fields	Descriptions
Code	Code of the enrollment planning service (EPS). After an EPS code record has been saved, the code entered in this field cannot be changed. After this code has been used

Fields	Descriptions
	in any other record, the EPS code record cannot be deleted.
Description	Description of the EPS.
Activity Date	Date on which the record was last updated. Display only.

Eligibility Factor Validation (STVESEL) page

Updated: August 27, 2020

Use the Eligibility Factor Validation (STVESEL) page to create, update, insert, and delete eligibility factor codes, such as Did not graduate HS NO GED, Financial Consideration, H.S. GPA below 2.5, and so on.

The Education Opportunity Programs and Services (SGAEOPS) page uses this page to validate eligibility factors. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the eligibility factor. After an eligibility factor code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the eligibility factor code record cannot be deleted.
Description	Description of the eligibility factor.
Activity Date	Date on which the record was last updated. Display only.

Enrollment Status Code Validation (STVESTS) page

Updated: December 16, 2021

Use the Enrollment Status Code Validation (STVESTS) page to manage enrollment status codes, such as Administratively Withdrawn, Eligible to Register, Pre-Registered, and so on. Several other forms use this page to validate enrollment status codes. You can create or update these codes only from the STVESTS page.

When enrollment status codes, registration status codes, and rules for enrollment and registration status processing are established, assigning an enrollment status code which affects courses will cause the same action to be applied to appropriate course registration records for the term. To have enrollment status changes affect courses, the following conditions must be true:

- An enrollment status is defined, and the **Affect Course** check box is selected.
- A course registration status is defined (on STVRSTS) using the same code as the enrollment status code which will affect courses. The **Allowed to Enter** check box for the registration status code must be cleared.
- The enrollment status code is authorized for use within a term (SFAESTS).
- The registration status code is authorized for use within a term and part-of-term (SFARSTS).
- All registration statuses which represent active registration records must have the **Affected by Student Status** check box selected on SFARSTS. (For example, if a student has already dropped a class and later withdraws from the term, only active registration records should be changed to a status of withdrawn from term. The class already dropped should not have its registration status changed.)
- When the enrollment status is changed (on SFAREGS) to one that affects courses, the registration status of all active registration records will be set to the same value as the enrollment status.
- Any study paths associated with the term enrollment will also have their enrollment status updated to reflect the term enrollment status.

Similarly, assigning a study path enrollment status code that affects courses will cause the same action to be applied to appropriate course registration records for the study path.

For more information about the *Required System Values for Validation Pages*, see the *Validation Pages* chapter in the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the enrollment status. After you save an enrollment status code record, you cannot change the code in this field. After you use this code in any other record, you cannot delete the enrollment

Fields	Descriptions
	status code record.
Description	Description of the enrollment status.
Withdrawal Code	Code of the withdrawal status associated with this enrollment status, if any. Select **Search** for this field to access the Withdrawal Status (STVWDRL) list. List Withdrawal Status (STVWDRL)
Withdrawal Indicator	Check box used to indicate whether this enrollment status code is a withdrawal code. If you select the check box, you can then select the records with this enrollment status code by using the batch Withdrawn Student Report (SFRWDRL) When you select this field (set to Y), the registration fee assessment processing checks SFAESTS for the associated code to see if any enrollment status refund rules in the key block of SFAREGS are in effect for that date.
Third Party Withdrawal Indicator	Check box used to report a student as withdrawn by the Clearinghouse Extract Report (SFRNSLC) and the NSLDS SSCR Process (SFRSSCR).
Affect Course	Check box used to indicate whether this enrollment status code affects either the course status or study path enrollment status unless otherwise prevented.
Prevent Registration	Check box is used to indicate whether this enrollment status code affects the student from registering for the same term only or allow registration activity for the term.
Affect Headcount	Check box used to indicate whether this enrollment status code affects the headcount as calculated on the Unduplicated Headcount Report (SFRHCNT).
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

IPEDS Ethnic Code Validation (STVETCT) page

Updated: August 27, 2020

Use the IPEDS Ethnic Code Validation (STVETCT) page to create, update, insert, and delete IPEDS ethnic codes, such as American Indian or Alaskan Native, Asian or Pacific Islander, Hispanic, and so on.

You can create or update these codes only from this page. The Ethnic Code Validation (STVETHN) page formerly used this page to validate IPEDS ethnic codes for IPEDS reporting.

This page is no longer used with Student IPEDS processing for new ethnicity and race reporting.

The Ethnic Code Rules (PTRETHN) page, the Race Rules (GORRACE) page, and the Ethnic Code Validation (STVETHN) page are used to report counts of individuals to the federal government based on ethnic background.

Please see the “Required System Values for Validation Pages” section in the “Validation Pages” chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the IPEDS ethnicity. After an IPEDS ethnic code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the IPEDS ethnic code record cannot be deleted.
Description	Description of the IPEDS ethnicity.
System Required	Check box used to specify whether this value is required by the system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Ethnic Code Validation (STVETHN) page

Updated: August 27, 2020

Use the Ethnic Code Validation (STVETHN) page to create, update, insert, and delete ethnic codes, such as Caucasian, Chinese, Cuban, and so on. This page is used by other forms to validate ethnic codes. You can create or update ethnic codes only from this page.

This page allows you to identify individuals at a low level ethnic value, i.e., breakdowns of ethnicity. Examples of this would be Apache, Blackfoot, and Sioux. The codes associated with these values are then cross-referenced into the Banner Human Resources and Banner Student Systems against the Ethnic Code Rules (PTRETHN) page and Race Rules (GORRACE) page respectively, for proper federal ethnic values. Therefore, each of the codes mentioned above would cross-reference to a code that indicates `Native American`.

With this methodology, it is then permissible to use low level university-specific descriptions on STVETHN, while maintaining the proper federal values on the Ethnic Code Rules (PTRETHN) page and the Race Rules (GORRACE) page.

Warning! Addition, deletions, and revisions to codes on the Ethnic Code Rule (PTRETHN) page in the Banner® Human Resources System appear on STVETHN.

Multiple race codes may be reported for an individual, and collected/reported information can be separated by race and ethnicity. Therefore, you can also use this page to establish crosswalk values so when an ethnicity code is entered, the ethnicity and race fields will be populated in the Banner Human Resources personal information forms, if the ethnicity and race codes do not already exist.

Race information can be collected for the following set of codes:

- White
- Black or African American
- Asian

- Native Hawaiian and Other Pacific Islander
- American Indian or Alaskan Native
- Other

Ethnicity information can be collected for the following set of codes:

- Hispanic
- Non-Hispanic
- Non-Resident Alien

Seed data for these values is delivered, along with scripts to convert existing data to the **Institution Race Code** and **New Ethnicity** fields. Two Banner General forms, the Race Validation (GTVRACE) page and the Race Rule (GORRACE) page are used to create and maintain race code information in addition to sub-groups of race categories. The codes on STVETHN are used in the conversion of the old ethnicity to the new ethnicity for the prospect and application loads.

Note: All Banner systems use this page. You should coordinate with other Banner systems at your institution about what codes to use on this page.

Fields	Descriptions
Ethnic Code	Code of the ethnicity. After an ethnic code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the ethnic code record cannot be deleted.
Description	Description of the ethnicity.
IPEDS Code	IPEDS ethnic code associated with this ethnic code, if applicable. Select the **Search** button for this field to access the IPEDS Ethnic Validation (STVETCT) list. List IPEDS Ethnic Validation (STVETCT)
EDI Equivalent	Used to assign the EDI SPEEDE/ExPRESS ethnic code values to an institution's ethnic codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value is used in the transmission of transcript

Fields	Descriptions
	information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #1109.
LMS Equivalent	LMS Equivalent Class Code. Used to display the IA-PLUS Loan Management System (LMS) ethnicity code values that are equivalent to the Banner ethnic codes. These codes are not validated. The translation to these LMS codes occurs during the LMS transaction feed interface from Banner Financial Aid. For more information, please refer to the *Banner Financial Aid Use* content or the *IA-PLUS Loan Management System User Manual*.
Institution Race Code	Regulatory race code associated with this ethnic code as defined by the institution. This field determines the race to be used for the crosswalk functionality and creates a crosswalk for values, so the old ethnicity values can be mapped to the new ethnicity and race values. If an ethnicity mapping code has been entered, this field is required, otherwise it can be null. Select the **Search** button for this field to access the Race Rules (GORRACE) list. List Race Rules (GORRACE)
New Ethnicity	Ethnicity as defined by the US government for this ethnic code, used for the crosswalk functionality. If a race code has been entered, this field is required; otherwise, it can be null. Values are: • None (default) • Hispanic or Latino • Not Hispanic or Latino
Activity Date	Date on which the record was last updated. Display only.

eTranscript Delivery Method Validation (STVETME) page

Updated: August 27, 2020

The eTranscript Delivery Method Validation (STVETME) page is used to create and maintain third party transcript delivery method values from PESC. These values are delivered and should not be changed. No user values should be entered.

Fields	Descriptions
Delivery Method Code	Delivery method code for eTranscripts, such as FAX, EXPRESS, MAIL, OVERNIGHT, ELECTRONIC.
Description	Delivery method code description.
User ID	ID of user that added or updated the record.
Activity Date	Date the record was added or updated.

eTranscript PESC Transcript Purpose Validation (STVETPU) page

Updated: August 27, 2020

The eTranscript PESC Transcript Purpose Validation (STVETPU) page is used to create and maintain third party transcript type purpose values from PESC. These values are delivered and should not be changed. No user values should be entered.

Fields	Descriptions
PESC Transcript Type Code	PESC transcript purpose code to be used with eTranscripts, such as TRANSFER, SCHOLAR, ADM, EMPLOYM.
Description	Transcript purpose code description.
User ID	ID of user that added or updated the record.
Activity Date	Date the record was added or updated.

eTranscript Electronic Transcript Status Validation (STVETST) page

Updated: August 27, 2020

The eTranscript Electronic Transcript Status Validation (STVETST) page is used to create and maintain transcript order status codes.

These values are delivered and should not be changed. No user values should be entered. The SHKEORS package uses the order status codes to drive the automated order processing and identify the processing stages of an order.

Fields	Descriptions
Order Status Code	Transcript order status code.
Description	Transcript order status code description.
Third Party Translation	Transcript order translation value to be sent for processing.
Send to Vendor	Check box used to indicate a transcript order with this status should be sent to the vendor for processing.
Send to Cloud	Check box used to indicate a transcript order with this status should be sent to the Ellucian Cloud for processing.
Activity Date	Date the record was added or updated.

eTranscript PESC Transcript Type Validation (STVETTP) page

Updated: August 27, 2020

The eTranscript PESC Transcript Type Validation (STVETTP) page is used to create and maintain third party transcript type values from PESC. These values are delivered and should not be changed. No user values should be entered.

Fields	Descriptions
PESC Transcript Type Code	PESC transcript type code to be used with eTranscripts, such as GRADUATE, LAW, UNDERGRADUATE, DENTAL.

Fields	Descriptions
Description	Transcript type code description.
User ID	ID of user that added or updated the record.
Activity Date	Date the record was added or updated.

Event/Function Type Code Validation (STVETYP) page

Updated: August 27, 2020

Use the Event/Function Type Code Validation (STVETYP) page to create, update, insert, and delete event type codes, such as Athletic Event, Lecture, Meeting, and so on.

The Event (SLAEVNT) page and the Event Query (SLQEVNT) page use this page to validate event and function type codes. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the event type. After an event type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the event type code record cannot be deleted.
Description	Description of the event type.
Activity Date	Date on which the record was last updated. Display only.

Evaluation Question Code Validation (STVEVAL) page

Updated: August 27, 2020

Use the Evaluation Question Code Validation (STVEVAL) page to create, update, insert, and delete evaluation question codes. This page is used by the Schedule Evaluation (SSAEVEL) page to specify evaluation questions. You can create or update evaluation question codes only from this page.

Fields	Descriptions
Code	Code of the evaluation question. After an evaluation question code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the evaluation question code record cannot be deleted.
Description	Description of the evaluation question.
Activity Date	Date on which the record was last updated. Display only.

Academic History Event Code Validation (STVEVEN) page

Updated: August 27, 2020

Use the Academic History Event Code Validation (STVEVEN) page to create, update, insert, and delete academic history event codes, such as Undergraduate Admissions, Graduate Candidacy, or Undergraduate Suspension, and so on.

The Transcript Events and Comments (SHATCMT) page uses this page to validate academic history event codes. You can create or update these codes only from this page.

Please see the Required System Values for Validation Pages section in the Validation Pages chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the academic history event. After an academic history event code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the academic history event code record cannot be deleted.
Description	Description of the academic history event.
Transcript Print	Check box used to specify that the event is to be printed on transcripts.
System Required	Check box used to specify whether this value is required by the

Fields	Descriptions
	system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.

Examination Code Validation (STVEXAM) page

Updated: August 27, 2020

Use the Examination Code Validation (STVEXAM) page to create, update, insert, and delete examination codes, such as Advanced Placement, Credit by Exam, Experiential Learning, and so on.

The Term Course Maintenance (SHAINST) page uses this page to validate examination codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the examination. After an examination code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the examination code record cannot be deleted.
Description	Description of the examination.
Activity Date	Date on which the record was last updated. Display only.

Faculty Member Attributes Code Validation (STVFATT) page

Updated: August 27, 2020

Use the Faculty Member Attributes Code Validation (STVFATT) page to create, update, insert, and delete faculty member attribute codes such as Certified to Teach English, Department Chairperson, or Full-time Coach.

This page is used by other forms to validate faculty member's attribute codes. You can create or update faculty member attribute codes only from this page.

Fields	Descriptions
Code	Code of the faculty member attribute. After a faculty member attribute code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the faculty member attribute code record cannot be deleted.
Description	Description of the faculty member attribute.
Activity Date	Date on which the record was last updated. Display only.

Faculty Contract Type Code Validation (STVFCNT) page

Updated: August 27, 2020

Use the Faculty Contract Type Code Validation (STVFCNT) page to create, update, insert, and delete faculty contract type codes.

The codes specify during which semesters the faculty member's contract runs. This page is used by other forms to validate the faculty members contract types. You can create and update faculty contract type codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the faculty contract type. After a faculty contract type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the faculty contract type code record cannot be deleted.
Description	Description of the faculty contract type.
Activity Date	Date on which the record was last updated. Display only.

Faculty Status Code Validation (STVFCST) page

Updated: August 27, 2020

Use the Faculty Status Code Validation (STVFCST) page to create, update, insert and delete faculty status codes.

These codes specify faculty member status, such as Active, Inactive, or On Sabbatical. This page is used by other forms to validate the faculty status codes. You can create or update faculty status codes only from this page.

Fields	Descriptions
Code	Code of the faculty status. After a faculty status code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the faculty status code record cannot be deleted.
Description	Description of the faculty status.
Active	Check box used to specify whether the faculty member is available for assignments.
Activity Date	Date on which the record was last updated. Display only.

Faculty Category Code Validation (STVFCTG) page

Updated: August 27, 2020

Use the Faculty Category Code Validation (STVFCTG) page to create, update, insert, and delete faculty member category codes.

The codes represent the category into which a faculty member is placed (Advisor, Full-time Professor, Part-time Professor, and so on), and may be used in calculating workload. This page is used by other forms to validate the faculty member category codes. You can create or update faculty category codes only from this page.

Fields	Descriptions
Code	Code of the faculty member category. After a faculty member category code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the faculty member category code record cannot be deleted.
Description	Description of the faculty member category.
Activity Date	Date on which the record was last updated. Display only.

Faculty Staff Type Code Validation (STVFSTP) page (California Localization)

Updated: August 27, 2020

Use the Faculty Staff Type Code Validation (STVFSTP) page to create, update, insert and delete faculty staff type codes.

These codes represent the different staff types (Evening Division, Full-Time, Part-Time, and so on. This page is used by other forms to validate the faculty staff type codes. You can create or update faculty staff types only from this page.

Fields	Descriptions
Code	Code of the faculty staff type. After a faculty staff type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the faculty staff type code record cannot be deleted.
Description	Description of the faculty staff type.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Subject to Faculty Load Limit	Check box used to specify whether this faculty staff type code is tracked for faculty load limits. If you check this check box, the **Type Load Limit (FTE)** and **Faculty Load Limits Error Handling** fields must be updated before you save the record.
Type Load Limit (FTE)	Maximum load allowed for a specific type of faculty member in any term. `1.000` represents 100.0%. After the type load limit is defined (that is, is not null), all IDs with this type will be tracked for the noted limit. When a faculty assignment is saved on the Faculty Assignment (SIAASGN) page or the Instructor section of the Meeting Times and Instructor window of the Schedule (SSASECT) page, if the term/faculty-ID's load exceeds this value (greater than, but not equal to), the load error logic will activate according to the setting for the **Faculty Load Limits Error Handling** option button. If you define load limit adjustments for a specific faculty member on the Faculty ID/Term-Specific Load Limits (SVALOLI) page, those limits take precedence (for the term) over the value entered here.
Faculty Load Limits Error Handling	Option group used to specify how the system is to handle records of this faculty staff type when a record is saved that would cause the faculty member to exceed the specified load limit. Choices are: `Warning Only` System issues a message after saving a new assignment if the saved record surpasses the load limit `User Override` System issues a message requiring a user override before the transaction can be saved `Administrative` System issues a message requiring an administrative

Fields	Descriptions
	`Override` override before the transaction can be saved; an assignment that passed the load limit cannot be saved until an administrative user increases the ID's limit on SVALOLI

Fee Type Validation (STVFTYP) page

Updated: August 27, 2020

Use the Fee Type Validation (STVFTYP) page to maintain fee types used in section level fee assessment calculations.

Four system-required fee types are used with this page: `FLAT` (Flat Fee), `BILL` (Per Bill Hour Fee), `CRED` (Per Credit Hour Fee), and `DURN` (Per Duration Unit). If additional fee types are required and added to this validation table, modifications will be required in the fee assessment logic to incorporate the required processing.

These fee types are used by the Course Detail Information (SCADETL) page, the Section Detail Information (SSADETL) page, the Section Fee Assessment Control (SSADFEE) page, the Default Extension Processing Rules section of the Open Learning Section Default Rules (SOAORUL) page, and the Section Extension Processing Rules section of the Schedule Processing Rules (SSARULE) page.

A conversion script is used to convert the existing fee types defined in SCADETL and SSADETL (`F` - Flat or `C` - Per Credit) to the enhanced fee type structure.

Please see the Required System Values for Validation Pages section in the Validation Pages chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the fee type. After a fee type code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the fee type code record cannot be deleted.
Description	Description of the fee type.
System Required	Check box used to specify whether this value is required by the

Fields	Descriptions
	system. If this check box is selected, the validation table record cannot be deleted. After this check box is selected, it cannot be cleared.
Activity Date	Date on which the record was last updated. Display only.
User ID	ID of the user who last updated the record. Display only.

Graduation Application Display Rule Code Validation (STVGADR) page

Updated: August 27, 2020

Use the Graduation Application Display Rule Code Validation (STVGADR) page to maintain graduation application display rule codes. These codes are used on the Self-Service Graduation Application Display Rules (SHAGADR) page to define which Banner® Student Self-Service graduation application pages are displayed and how the graduation application will function.

Some sample rule codes might be:

- UGASMSP - Undergraduate Arts Science Main Spring
- GRBUDFA - Graduate Business Downtown Fall
- UGBACHS - Undergraduate Bachelors Spring
- DEFAULT - Default Rule

Fields	Descriptions
Graduation Application Display Rule Code	Graduation application display rule code.
Description	Description of the graduation application display rule code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Gain Status Code Validation (STVGAIN) page

Updated: August 27, 2020

Use the Gain Status Code Validation (STVGAIN) page to create, update, insert, and delete GAIN status codes. The General Student (SGASTDN) page uses this page to validate GAIN status codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the GAIN status. After a GAIN status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the GAIN status code record cannot be deleted.
Description	Description of the GAIN status.
Activity Date	Date on which the record was last updated. Display only.

Graduation Application Status Validation (STVGAST) page

Updated: August 27, 2020

Use the Graduation Application Status Validation (STVGAST) page to maintain graduation application status codes. These codes indicate the status of the graduation application that is submitted through the Banner® Student Self-Service graduation application processing pages. The application is maintained on the Graduation Application (SHAGAPP) page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Graduation application status code.
Description	Description of the graduation application status code.
Active Indicator	Check box used to indicate if the graduation application with this status code is active or inactive.

Fields	Descriptions
Web Indicator	Check box used to indicate if the graduation application with this status code is available in self-service.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Goal Attribute Validation (STVGATT) page

Updated: August 27, 2020

Use the Goal Attribute Validation (STVGATT) page to create, update, insert, and delete goal attribute codes. The Support Services module uses this page to validate goal attribute codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the goal attribute. After a goal attribute code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the goal attribute code record cannot be deleted.
Description	Description of the goal attribute.
Activity Date	Date on which the record was last updated. Display only.

Grade Change Code Validation (STVGCHG) page (Electronic Grade Book)

Updated: August 27, 2020

Use the Grade Change Code Validation (STVGCHG) page to create, update, insert, and delete grade change codes.

A grade change will always be added as a new grade with a grade change reason code, with the original grade maintained as an audit trail. An incomplete or `I` grade would be maintained as the original grade, and the actual grade would then be added with a grade change reason code. For example, Original Entry, Entry Error, Substitute Grade, and so on. Several pages in the Academic History application use this page to validate grade change codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Grade change reason code. After a grade change reason record has been saved, the code entered in this field cannot be changed. After this grade change reason has been used in any other record, the record cannot be deleted. This is a mandatory field, and the grade change reason code must be unique.
Description	Description of the grade change reason. This is an optional field and can be updated for an existing record.
Attribute	Code and description of the change reason attributes required for electronic gradebook processing. These attributes are stored in the STVGCAT table. The grade change reason attribute must be assigned to the relevant grade change reason code.
Permit Duplicates	Check box used to specify whether this grade change code can be used more than one time for grading the same course. This is an optional field and can be updated for an existing record.
Definitive	Check box used to indicate whether a mark or grade change assigned this code should be overwritten by an automatic calculation. If this check box is selected, a mark or grade change assigned to this code will not be overwritten by an automatic calculation. If this check box is cleared, a mark or grade change assigned to this code will be overwritten by an automatic calculation.
Calculated	Check box used to indicate whether this code will be used to

Fields	Descriptions
	record the result of an automatic calculation of grades and marks. A reason with this indicator selected cannot be selected by users (in Banner 9.x or in Banner Faculty and Advisor Self-Service). If the **Calculated** check box is selected, the **Permit Duplicates** check box must also be selected. To clear the **Permit Duplicates** check box, the **Calculated** check box must be cleared first. If the **Calculated** check box is selected, the **Definitive** check box cannot be selected. If the **Definitive** check box is selected and then the **Calculated** check box is selected, the **Definitive Indicator** check box is cleared automatically.
Self Service	Check box used, in conjunction with the **Academic History** and **Reassessment** check boxes, to control whether the code will be available for assessment or reassessment in Self-Service. If this check box is selected and the **Academic History** check box is cleared, the grade change code is displayed for assessment. If this check box is selected and **Reassessment** check box is also selected, then the grade change code is displayed for reassessment. If this check box is cleared, the code will not be available on the web and it will be available only on the Course Maintenance (SHATCKN) page.
Academic History	Check box used to indicate whether this grade change code is to be used to record a grade or mark change in Academic History. If this check box is selected, the code will be available only for grade changes in Academic History in SHATCKN and, if the **Self Service** and **Reassessment** check boxes are selected, in electronic gradebook reassessment. If you want this code to be available for use in electronic gradebook assessment, this check box must be cleared and the

Fields	Descriptions
	Self Service check box must be selected.
Reassessment	Check box used to indicate this grade change code is to be available for reassessment. This check box can be selected only if the **Academic History** check box is selected. A grade change code with this check box selected is used to enter a reassessment grade or mark for a record in the Academic History. If the **Academic History** check box is cleared, the **Reassessment** check box must also be cleared. Only codes with this indicator and the **Self Service** indicator both selected will be available in electronic gradebook reassessment.
Exempt	Check box used to specify whether the mark entered has an exemption status for the grade change code. This is an optional field and can be updated for an existing record. To enter an exemption, the grader needs only to enter a grade change reason that has this indicator selected and is not required to enter a score or mark. The calculation process takes this into account when marks are rolled to the next level, adjusting the weightings accordingly and permitting the calculation to take place, even though there is a blank score present.
Resit	Check box used to specify whether the mark entered has a resit status for the grade change code. This is an optional field and can be updated for an existing record. The resit maximum values work in conjunction with the rules defined on SHAGRUL to calculate the maximum number of resits permitted for a component or sub-component. This value is used to validate additional mark entries for the sub-component or component in Self-Service.

Fields	Descriptions
	In Banner Faculty and Advisor Self-Service, if the maximum number of records with grade change codes marked as resit codes has been reached, graders are not allowed to enter any further records with a resit grade change code. Attempting to exceed this value produces a warning message: `*ERROR* Cannot exceed resit max`.
System Required	Check box used to specify whether the value is required by the system. If this check box is selected, the grade change reason record cannot be deleted. For existing records, if this check box is checked, it cannot be unchecked.

Electronic Grade Book

This section applies to Electronic Grade Book only.

Fields	Descriptions
Definitive Ind	Check box used to indicate whether a mark or grade change assigned this code should be overwritten by an automatic calculation. `Selected` A mark or grade change assigned this code should be *not* overwritten by an automatic calculation `Cleared` A mark or grade change assigned this code should be overwritten by an automatic calculation
Calculated Ind	Check box used to indicate whether this code will be used to record the result of an automatic calculation of grades and marks. A reason with this indicator selected cannot be selected by users (in Banner or in self-service).
SSB Ind	Check box used, in conjunction with the **Academic History** and **Reassess Ind** check boxes, to control whether the code will be available for use on assessment or reassessment pages in self-service.

Fields	Descriptions
	If this check box is selected and the **Academic History** is cleared, the code will be available in assessment pages. If this check box and the **Reassess Ind** check box are selected, the code will be available in reassessment pages. If this check box is cleared, the code will not be available on the web; it will be available only on the Course Maintenance (SHATCKN) page.
Academic History	Check box used to indicate whether this grade change code is to be used to record a grade or mark change in Academic History. If this check box is selected, the code will be available only for grade changes in Academic History in SHATCKN and, if the **SSB Ind** and **Reassess Ind** check boxes are selected, in EGB reassessment. If you want this code to be available for use in EGB assessment, this check box must be cleared and the **SSB Ind** check box must be selected.
Reassess Ind	Check box used to indicate this grade change code is to be available for use on reassessment pages. This check box can be selected only if the **Academic History** check box is selected.

Grade Comment Code Validation (STVGCMT) page

Updated: August 27, 2020

Use the Grade Comment Code Validation (STVGCMT) page to define institutional comments (result codes) that can be associated with a student's final mark. Codes entered on this page should not be deleted if they have been applied to any students (such as on SFASLST, SFAALST, or SHATCKN).

Fields	Descriptions
Code	Code of the grade comment. After a grade

Fields	Descriptions
	comment code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the grade comment code record cannot be deleted.
Description	Description of the grade comment.
Web Indicator	Check box used to indicate whether the comment for that code can be displayed to the student. This indicator can be used to provide a level of confidentiality for the academic staff. This indicator is not currently used with Self-Service.
Activity Date	Date on which the record was last updated. Display only.

Geographic Region Division Code Validation (STVGEOD) page

Updated: August 27, 2020

Use the Geographic Region Division Code Validation (STVGEOD) page to maintain user-defined codes that identify divisions to which regions belong.

Divisions are entered on the Geographic Region Rules (SOAGEOR) page and are displayed on the Geographic Region By ID Query (SOAIGEO) page, in addition to the Geographic Regions Query (SOAQGEO) page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the geographic region division. After a geographic region division code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the geographic region division code record cannot be

Fields	Descriptions
	deleted.
Description	Description of the geographic region division.
Activity Date	Date on which the record was last updated. Display only.

Geographic Region Code Validation (STVGEOR) page

Updated: August 27, 2020

Use the Geographic Region Code Validation (STVGEOR) page to maintain user-defined codes that identify geographic regions. Geographical region codes are entered on the Geographical Region Rules (SOAGEOR) page and can be viewed on the Geographic Region By ID Query (SOAIGEO) page, in addition to the Geographic Regions Query (SOAQGEO) page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the geographic region. After a geographic region code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the geographic region code record cannot be deleted.
Description	Description of the geographic region.
Activity Date	Date on which the record was last updated. Display only.

Grading Mode Code Validation (STVGMOD) page

Updated: August 27, 2020

Use the Grading Mode Code Validation (STVGMOD) page to create, update, insert, and delete grading mode codes. Several other forms use this page to validate grading mode codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the grading mode. After a grading mode code record has been saved, the

Fields	Descriptions
	code entered in this field cannot be changed. When this code has been used in any other record, the grading mode code record cannot be deleted.
Description	Description of the grading mode.
VR Msg	Voice Response Message Number. Number assigned to the Voice Response message assigned to this grading mode code.
Web Grade Mode Display	Indicator that determines whether to substitute the actual grade mode (selected by the student during registration) with one that will be displayed in Banner Faculty and Advisor Self-Service for faculty grading. When set to a grade mode, only grades with the substitute grade mode are displayed during faculty grading in Self-Service.
Activity Date	Date on which the record was last updated. Display only.

Goal Validation (STVGOAL) page

Updated: August 27, 2020

Use the Goal Validation (STVGOAL) page to create, update, insert, and delete goals codes, such as Employment Upgrade, English Competency Certificate, Transportation, and so on. The Support Services module uses this page to validate goals codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the goal. After a goal code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the goal code record cannot be deleted.

Fields	Descriptions
Description	Description of the goal.
Activity Date	Date on which the record was last updated. Display only.

Applicant GPA Type Validation (STVGPAT) page

Updated: August 27, 2020

Use the Applicant GPA Type Validation (STVGPAT) page to define GPA types, which can be recorded on the Applicant GPA Types (SOAGPAT) page.

Fields	Descriptions
GPA Type	Code of the GPA type. After a GPA type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the GPA type code record cannot be deleted.
Description	Description of the GPA type.
Activity Date	Date on which the record was last updated. Display only.

Graduation Status Validation (STVGRST) page

Updated: August 27, 2020

Use the Graduation Status Validation (STVGRST) page to create, update, insert, and delete graduation statuses.

The graduation processing in the Academic History module uses these statuses to update the student's degree record with any impediments to graduation, such as needed approval or monies owed. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the graduation status. When a graduation status code record has been

Fields	Descriptions
	saved, the code entered in this field cannot be changed. When this code has been used in any other record, the graduation status code record cannot be deleted.
Description	Description of the graduation status.
Update Next Degree Status	Check box used to specify whether the student's degree status is to be automatically updated when the graduation status is entered or modified. This field works in conjunction with the **Next Degree Status** field, which is maintained on the Degree Status Code Validation (STVDEGS) page. If the **Update Next Degree Status** check box is checked for the graduation status entered, then the current Degree Status Code on the Degrees and Other Formal Awards (SHADEGR) page will be updated with the next degree status maintained on STVDEGS. For example, if the student's current degree status is Undergraduate Pending Award (`UP`), and the graduation status is being updated to `Finalized`, and the `Finalized` graduation status code has the **Update Next Degree Status** check box checked, then the degree status will automatically be set to Undergraduate Awarded (`UA`).
Activity Date	Date on which the record was last updated. Display only.

A/F/I Status Validation (STVGSTA) page

Updated: August 27, 2020

Use the A/F/I Status Validation (STVGSTA) page to create, update, insert, and delete status codes for assistantships, fellowships, and internships. You can create or update status codes only from this page.

Fields	Descriptions
Code	Code of the assistantship, fellowship, or internship status. When an assistantship, fellowship, or internship status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the assistantship, fellowship, or internship status code record cannot be deleted.
Description	Description of the assistantship, fellowship, or internship status.
Activity Date	Date on which the record was last updated. Display only.

A/F/I Type Validation (STVGTYP) page

Updated: August 27, 2020

Use the A/F/I Type Validation (STVGTYP) page to create, update, insert, and delete type codes for assistantships, fellowships, and internships. You can create or update type codes only from this page.

Fields	Descriptions
Code	Code of the assistantship, fellowship, or internship type. When an assistantship, fellowship, or internship type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the assistantship, fellowship, or internship type

Fields	Descriptions
	code record cannot be deleted.
Description	Description of the assistantship, fellowship, or internship type.
Activity Date	Date on which the record was last updated. Display only.

Housing Application Status Code Validation (STVHAPS) page

Updated: August 27, 2020

Use the Housing Application Status Code Validation (STVHAPS) page to create, update, insert, and delete housing application status codes such as Active Application, Inactive Application, or Withdrawn Application.

The Dorm Room and Meal Application (SLARMAP) page and the Application Query (SLQRMAP) page use this page to validate housing application statuses. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the housing application status. When a housing application status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the housing application status code record cannot be deleted.
Description	Description of the housing application status.
Inactive	Check box used to specify whether a housing application with this status is inactive. Housing application status codes with this check box checked cannot be assigned to a dorm room, meal plan, or phone.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Hold Type Code Validation (STVHLDD) page

Updated: August 27, 2020

Use the Hold Type Code Validation (STVHLDD) page to create, update, insert, and delete hold type codes. This page is used by other forms to validate hold types. You can create or update hold type codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the hold type. When a hold type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the hold type code record cannot be deleted.
Description	Description of the hold type.
Registration	Check box used to specify whether this hold type will restrict registration.
Enrollment Verification	Check box used to specify whether this hold type will restrict enrollment verification.
Transcript	Check box used to specify whether this hold type will restrict transcripts.
Graduation	Check box used to specify whether this hold type will restrict graduation.
Grade	Check box used to specify whether this hold type will restrict the generation of grade reports.
A/R	Check box used to specify whether this hold type will restrict entry to a variety of Accounts Receivable module processing forms.
Application	Check box used to specify whether this hold type will restrict applications.
Compliance	Check box used to specify whether this hold type will restrict

Fields	Descriptions
	running compliance (or degree evaluations).
Voice Message	Voice Response Message Number. Number assigned to the Voice Response message assigned to this hold type code.
Web Indicator	Check box used to specify the hold types which can be displayed in Banner Self-Service applications. It allows an institution to limit the types of holds which will be displayed to a subset of all available holds. The check box defaults to unchecked or N when a new record is added, but you can change it at any time.
Activity Date	Date on which the record was last updated. Display only.

Highest Level of Work Validation (STVHLWK) page

Updated: August 27, 2020

Use the Highest Level of Work Validation (STVHLWK) page to create, update, insert, and delete highest level of work codes such as Unknown, Two Years (Associate Degree), or First Professional, and so on.

The Transfer Articulation Institution (SOABGTA) page uses this page to validate highest level of work codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the highest level of work. When a work level code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the work level code record cannot be deleted.
Description	Description of the highest level of work.
Activity Date	Date on which the record was last updated. Display only.

Departmental Honors Code Validation (STVHOND) page

Updated: August 27, 2020

Use the Departmental Honors Code Validation (STVHOND) page to create, update, insert, and delete departmental honors codes such as Drama Award, Humanities Honors, or Math Honors, and so on.

The Degrees and Other Formal Awards (SHADEGR) page uses this page to validate departmental honors codes. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the departmental honor. When a departmental honor code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the departmental honor code record cannot be deleted.
Description	Description of the departmental honor.
Transcript Print Indicator	Check box used to specify whether this honor will be printed on the student's transcript.
Commencement Print Indicator	Check box used to specify whether this honor will be printed on the student's commencement program.
Activity Date	Date on which the record was last updated. Display only.

Institutional Honors Code Validation (STVHONR) page

Updated: August 27, 2020

Use the Institutional Honors Code Validation (STVHONR) page to create, update, insert, and delete institutional honors codes such as Cum Laude, Magna Cum Laude, or Summa Cum Laude, and so on.

The Degrees and Other Formal Awards (SHADEGR) page uses this page to validate institutional honors codes. You can create or update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the institutional honor. When an institutional honor code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the institutional honor code record cannot be deleted.
Description	Description of the institutional honor.
Transcript Print Indicator	Check box used to specify whether this honor will be printed on the student's transcript.
Commencement Print Indicator	Check box used to specify whether this honor will be printed on the student's commencement program.
EDI Equiv (Equivalent)	EDI Equivalent. Used to assign the EDI SPEEDE/ExPRESS honors level code values to the institution's institutional honors codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value will be used in the transmission of transcript information electronically through EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #641.
Activity Date	Date on which the record was last updated. Display only.

Income Range Code Validation (STVINCM) page

Updated: August 27, 2020

Use the Income Range Code Validation (STVINCM) page to create, update, insert, and delete codes representing income ranges. This page is used by the General Student (SGASTDN) page to validate these codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the income range. When an income range code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the income range code record cannot be deleted.
Description	Description of the income range.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Interface Validation (STVINFC) page

Updated: August 27, 2020

Use the Interface Validation (STVINFC) page to create, update, insert, and delete interface codes, such as ACT, Financial Aid CSS, GRE, and so on. It is also used to assign a matching source code to the interface code to define the matching rules to be used with that interface code.

This page is used by the Electronic Prospect Validation (STVPREL) page to validate the interface code with the matching source codes from the Common Matching Source Code Validation (GTVCMSC) page. You can create or update these codes only from this page.

Note: For common matching processing, interface codes must be entered on STVINFC before entering information on the Common Matching Rules (GORCMRL) page. GORCMRL is used to set up the matching rules associated with the matching source codes.

Fields	Descriptions
Code	Code of the interface. When an interface code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the interface code record cannot be deleted.
Description	Description of the interface.
Test Source	Code of the test source for the data load interface. When a test score source is maintained, the system automatically updates the **Test Source** field on the Test Score Information (SOATEST) page when the scores are loaded. Select the **Search** button for this field to access the Admissions Test Score Source (STVTSRC) list. List Admissions Test Score Source (STVTSRC)

Fields	Descriptions
Source Code	Code of the source/background institution. When a source is maintained, the system automatically updates the **Source Code** field in the Source section of the Source/Interests window on the Prospect Information (SRARECR) page. Select the **Search** button for this field to access the Source/ Background Inst Validation (STVSBGI) list. List Source/Background Inst Validation (STVSBGI)
Contact Type	Code of the recruiting contact type. When a contact type is maintained, the system automatically updates the associated field in the following forms: • **Contact (Type)** field in the Contact section of the Contact/ Cohort/Attribute window on the Prospect Information (SRARECR) page • **Contact (Type)** field in the Contacts section of the main window on the Person Appointments/Contacts (SOAAPPT) page • **Contact Type** field in the Contact section of the Contact/ Application Cohort/Application Attribute window on the Admissions Application (SAAADMS) page Select the **Search** button for this field to access the Contact Code Validation (STVCTYP) list. List Contact Code Validation (STVCTYP)
Common Matching Source	Code of the source of data to by used by common matching processing. This field is used to map an interface code to a common matching source rule and allows you to link the student matching process with the match routine. Select the **Search** button for this field to access the Common Matching Source Code (GTVCMSC) list.

Fields	Descriptions
	List Common Matching Source Code (GTVCMSC)
Activity Date	Date on which the record was last updated. Display only.

Initials Code Validation (STVINIT) page

Updated: August 27, 2020

Use the Initials Code Validation (STVINIT) page to create, update, insert, and delete recruiting information. This page is used by the Material (SOAMATL) page and the Letter Generation process to validate this information. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Initials	Initials of the recruiter that will be used on the Recruiting Material Control (SRAMATL) page and the Prospect Information (SRARECR) page.
Full Name	Full name of the recruiter associated with the recruiter initials. This field is used to generate signature line for recruiting materials.
E-Mail	Email address of the recruiter.
Title Line One	First line of the title associated with the recruiter.
Title Line Two	Second line of the title associated with the recruiter.
Activity Date	Date on which the record was last updated. Display only.

Awarding Institution Validation (STVINNM) page

Updated: August 27, 2020

Use the Awarding Institution Validation (STVINNM) page to create, update, insert, and delete awarding institution codes. These codes represent the school, college, or institution which is awarding the degree. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the awarding institution. When an awarding institution code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the awarding institution code record cannot be deleted.
Description	Description of the awarding institution.
Activity Date	Date on which the record was last updated. Display only.

Outside Interest Code Validation (STVINTS) page

Updated: August 27, 2020

Use the Outside Interest Code Validation (STVINTS) page to create, update, insert, and delete codes representing outside interests, such as Vocal Music, Debate, Varsity Athletics, and so on.

This page is used by the Prospect Information (SRARECR) page and the Admissions Application (SAAADMS) page to validate these codes. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the outside interest. When an outside interest code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the outside interest code record cannot be deleted.
Description	Description of the outside interest.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be

Fields	Descriptions
	unchecked.
Activity Date	Date on which the record was last updated. Display only.

Interview Code Validation (STVINTV) page

Updated: August 27, 2020

Use the Interview Code Validation (STVINTV) page to create, update, insert, and delete interview codes such as Good Interview, Poor Interview, Undecided, and so on. This page is used by other forms to validate the interview codes. You can create or update interview codes only from this page.

Fields	Descriptions
Code	Code of the interview outcome. When an interview outcome code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the interview outcome code record cannot be deleted.
Description	Description of the interview outcome.
Activity Date	Date on which the record was last updated. Display only.

Language Code Validation (STVLANG) page

Updated: August 27, 2020

Use the Language Code Validation (STVLANG) page to create, update, insert, and delete language codes. These codes may refer to languages such as Chinese, English, or Spanish. This page is used by other forms to validate language codes. You can create or update language codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the language. When a language code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the language code record cannot be deleted.
Description	Description of the language.
Activity Date	Date on which the record was last updated. Display only.

Leadership Validation (STVLEAD) page

Updated: August 27, 2020

Use the Leadership Validation (STVLEAD) page to maintain user-defined codes that identify leadership codes such as Chairman, Coordinator, President.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page. Currently, this page is only used by Banner Advancement®.

Fields	Descriptions
Code	Code of the leadership type. When a leadership code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the leadership code record cannot be deleted.
Description	Description of the leadership type.
Activity Date	Date on which the record was last updated. Display only.

Leave of Absence Code Validation (STVLEAV) page

Updated: August 27, 2020

Use the Leave of Absence Code Validation (STVLEAV) page to maintain codes for leaves of absence such as Maternity, Illness, or Academic Research Leave of Absence.

The General Student (SGASTDN) page uses this page to validate the leave of absence codes. You can create or update the leave of absence codes only from this page.

Fields	Descriptions
Code	Code of the leave of absence type. When a leave of absence code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the leave of absence code record cannot be deleted.
Description	Description of the leave of absence type.
Third Party Report Indicator	Check box used to indicate that the leave of absence code from the general student record is to be used for the Clearinghouse Extract Report (SFRNSLC) and the NSLDS SSCR Process (SFRSSCR) when leaves are calculated.
Activity Date	Date on which the record was last updated. Display only.

Web Prospect How I Learned About Validation (STVLEND) page

Updated: August 27, 2020

Use the Web Prospect How I Learned About Validation (STVLEND) page to build Web for Prospects How I Learned About codes to designate how the prospect learned about the school.

These codes are entered by prospects on the Web for Prospects Web entry forms. The data is migrated to the Banner® production Recruiting module and is available on the Recruit Prospect Information (SRARECR) page.

Fields	Descriptions
Code	Code of the manner a prospect can learn about your institution. When a `How I Learned` code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the `How I Learned` code record cannot be deleted.
Description	Description of the `How I Learned` code.
Activity Date	Date on which the record was last updated. Display only.

Level Code Validation (STVLEVL) page

Updated: August 27, 2020

Use the Level Code Validation (STVLEVL) page to create, update, insert, and delete level codes, such as No Level Declared, Undergraduate, Non-Matriculated Graduate, and so on. Several forms in various modules use this page to validate the level codes. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Level Code	Code of the level. When a level code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the level code record cannot be deleted.
Description	Description of the level.
CEU Indicator	Continuing Education Indicator. Check box used to specify whether the level is a CEU level.
Voice Message	Voice Response Message Number. Number assigned to the Voice Response message assigned to this level code.
EDI Equivalent	EDI Equivalent. Used to assign the EDI SPEEDE/ExPRESS level code values to an institution's level codes for the level of coursework which is reflected in the GPA and hours. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value is used in the transmission of transcript information electronically through EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #1142 (Academic Grade or Course Level Code). These levels, if appropriate at your institution, should be mapped to only one STVLEVL code. Additional values exist for data element 1142, but are not relevant to this processing. G Graduate

Fields	Descriptions
	`P` Professional `U` Undergraduate
System Required	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Legacy Code Validation (STVLGCY) page

Updated: August 27, 2020

Use the Legacy Code Validation (STVLGCY) page to create, update, insert, and delete legacy codes to designate alumni relationships, such as Father, Mother, Brother, and so on.

Several forms in various modules use this page to validate the level codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the legacy type. When a legacy code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the legacy code record cannot be deleted.
Description	Description of the legacy type.
Activity Date	Date on which the record was last updated. Display only.

Learner Module Validation (STVLMOD) page

Updated: August 27, 2020

Use the Learner Module Validation (STVLMOD) page to maintain the codes for the Banner® modules in which the curriculum processing takes place.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: Please note that STVLMOD does not contain a system-required indicator. The indicator resides in the Learner Curriculum Frequency Rules Table (SOBLMOD). The specified values must exist in the table when using curriculum processing.

Fields	Descriptions
Module Code	Code of the module, such as RECRUIT, ADMISSIONS, LEARNER, OUTCOME. When a module code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the module code record cannot be deleted.
Description	Description of the module.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Major, Minor, Concentration Code Validation (STVMAJR) page

Updated: August 27, 2020

Use the Major, Minor, Concentration Code Validation (STVMAJR) page to create, update, insert, and delete major, minor, and concentration codes, such as Undeclared, Journalism, Music, Law, and so on.

Pages in several modules use this page to validate the major, minor, and concentration codes. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Field	Description
Major Code	Code of the major area of study. After a major code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the major code record cannot be deleted.
Description	Description of the major area of study.
CIPC	Code used to identify the Classification of Instructional Programs (CIP) code associated with the major area of study.
Major	Check box used to specify that this major code can be used anywhere in the system where a value for a major is entered.
Minor	Check box used to specify that this major code can be used anywhere in the system where a value for a minor is entered.
Concentration	Check box used to specify that this major code can be used anywhere in the system where a value for a concentration is entered.
Occupation	Check box used to specify that this major code can be designated as an occupationally specific major.
Financial Aid Eligibility	Check box used to specify that this major code is used for Banner Financial Aid. When this check box is checked, a student to whom this major code is assigned is eligible for financial aid. The financial aid record is tied to the major code in the Student System.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. After this check box is checked, it cannot be cleared.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this major code.
SEVIS Equivalent	SEVIS major code that corresponds to this major code. You must enter the new values before attempting to process records. Values for this field come from the INS's website. **Note:** Please refer to FAQ #13143, posted on the Support Center,

Field	Description
	for scripts you can run when you are ready to move from using CIPC codes to CIPC 2000 codes. The scripts will provide a list of expected changes and a list of errors, and will move the SEVIS equivalent values to the `STVMAJR_CIPC_CODE`.
Activity Date	Date on which the record was last updated. Display only.

Student CARE Marital Status Validation (STVMARS) page

Updated: August 27, 2020

Use the Student CARE Marital Status Validation (STVMARS) page to create, update, insert, and delete codes which indicate the marital status of a CARE student. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the marital status. When a marital status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the marital status code record cannot be deleted.
Description	Description of the marital status.
Activity Date	Date on which the record was last updated. Display only.

Material Code Validation (STVMATL) page

Updated: August 27, 2020

Use the Material Code Validation (STVMATL) page to create, update, insert, and delete material codes for use in communication plans and letter generation, such as President Greeting Letter, Campus Brochure, Course Schedule, and so on.

Pages related to communication plans and letter generation use this page to validate the material codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the material. When a material code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the material code record cannot be deleted.
Description	Description of the material.
Activity Date	Date on which the record was last updated. Display only.

Medical Equipment Code Validation (STVMDEQ) page

Updated: August 27, 2020

Use the Medical Equipment Code Validation (STVMDEQ) page to create, update, insert, and delete medical equipment codes, such as Leg Braces, Seeing Eye Dog, Hearing Aid, and so on.

The Medical Information (GOAMEDI) page uses this page to validate the medical equipment codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the medical equipment. When a medical equipment code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the medical equipment code record cannot be deleted.
Description	Description of the medical equipment.
Activity Date	Date on which the record was last updated. Display only.

Measurement Validation (STVMEAS) page

Updated: August 27, 2020

Use the Measurement Validation (STVMEAS) page to create, update, insert, and delete measurement codes for Graduation processing in the Academic History module for use in sizing and ordering caps and gowns. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the measurement. When a measurement code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the measurement code record cannot be deleted.
Description	Description of the measurement.
Activity Date	Date on which the record was last updated. Display only.

Mass Entry Column Validation (STVMECL) page

Updated: August 27, 2020

Use the Mass Entry Column Validation (STVMECL) page to create and update mass entry code column names that are used in mass entry processing. Mass entry processing is used in Admissions, Registration, General Student, and in Academic History for graduation.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Mass Entry Code	Mass entry code column name.
Description	Description of mass entry code column name.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Medical Code Validation (STVMEDI) page

Updated: August 27, 2020

Use the Medical Code Validation (STVMEDI) page to create, update, insert, and delete medical codes, such as Blind, Deaf, Prosthetic Limb, and so on. The Medical Information (GOAMEDI) page uses this page to validate the medical codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the type of disability. When a medical code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the medical code record cannot be deleted.
Description	Description of the type of disability.
Activity Date	Date on which the record was last updated. Display only.

Meeting Time Code Validation (STVMEET) page

Updated: August 27, 2020

Use the Meeting Time Code Validation (STVMEET) page to create, update, insert, and delete meeting time codes. These codes establish both the days of the week on which the meetings will take place and the begin and end times.

Check the check boxes for the days of the week on which the meetings will occur. This page is used by the Schedule (SSASECT) page to validate the meeting time codes. You can create or update meeting time codes only from this page.

Meeting time codes are used to assign sets of defined meeting days and times, such as the meeting times for schedules on SSASECT. These sets of values are created to facilitate data entry. When meeting times have been established using the meeting time codes from STVMEET, the selected meeting time is not stored on SSASECT (in the **Meeting Time** field) or in the meeting time record (SSRMEET), so no constraints exist on the values. Therefore, meeting time codes can be deleted from STVMEET. However, you should give careful consideration to deleting these values, as they will no longer be available for departments to use when assigning meeting times. If the values are deleted on STVMEET, meeting days and times will need to be entered manually.

Fields	Descriptions
Code	Code of the meeting days and times. Meeting time codes can be modified and deleted, as they are not stored in the meeting time record on SSRMEET. However, if the meeting time code is needed after it has been deleted, the meeting days and times used with that code will need to be entered manually.
Mon	Check box used to specify that the meeting time includes Mondays.
Tue	Check box used to specify that the meeting time includes Tuesdays.
Wed	Check box used to specify that the meeting time includes Wednesdays.
Thu	Check box used to specify that the meeting time includes Thursdays.
Fri	Check box used to specify that the meeting time includes Fridays.
Sat	Check box used to specify that the meeting time includes Saturdays.
Sun	Check box used to specify that the meeting time includes Sundays.
Begin Time	Time at which meetings with this meeting time code start.
End Time	Time at which meetings with this meeting time code end.
Activity Date	Date on which the record was last updated. Display only.

Meal Rate Code Validation (STVMRCD) page

Updated: August 27, 2020

Use the Meal Rate Code Validation (STVMRCD) page to create, update, insert, and delete meal rate codes, such as Breakfast Only, Lunch Only, Lunch and Dinner Only, and so on.

The Meal Assignment (SLAMASG) page uses this page to validate the meal rate codes.

You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the meal rate. When a meal rate code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the meal rate code record cannot be deleted.
Description	Description of the meal rate.
Month	Check box used to specify that the rate is to be assessed on a monthly basis.
Day	Check box used to specify that the rate is to be assessed on a daily basis.
Term	Check box used to specify that the rate is to be assessed on a term basis.
Activity Date	Date on which the record was last updated. Display only.

Marital Status Code Validation (STVMRTL) page

Updated: August 27, 2020

Use the Marital Status Code Validation (STVMRTL) page to create, update, insert, and delete marital status codes, such as Married, Single, Widowed, and so on. The General Person (SPAPERS) page uses this page to validate the marital status codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the marital status. When a marital status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the marital status code record cannot be deleted.
Description	Description of the marital status.

Fields	Descriptions
FA Equiv (Equivalent)	Financial aid marital status code associated with this marital status code.
EDI Equiv (Equivalent)	EDI Equivalent. Used to assign the EDI SPEEDE/ExPRESS marital status code values to an institution's marital status codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value is used in the transmission of transcript information electronically through EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #1067.
Activity Date	Date on which the record was last updated. Display only.

Meal Assignment Status Code Validation (STVMSCD) page

Updated: August 27, 2020

Use the Meal Assignment Status Code Validation (STVMSCD) page to create, update, insert, and delete meal assignment status codes such as Active, Inactive, or Withdrawn Assignments.

The Meal Assignment (SLAMASG) page uses this page to validate the meal assignment status codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the meal assignment status. When a meal assignment status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the meal assignment status code record cannot be deleted.
Description	Description of the meal assignment status.
Prevent Roll	Check box used to specify that this meal assignment status code is not to be rolled forward through the Assignment Roll Process (SLRROLL).
Activity Date	Date on which the record was last updated.

Fields	Descriptions
	Display only.

Nation Code Validation (STVNATN) page

Updated: August 27, 2020

Use the Nation Code Validation (STVNATN) page to create, update, insert, and delete nation codes, such as Australia, France, Iceland, and so on.

Pages in several modules use this page to validate the nation codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Described below are two potential sources for country code standards. These are by no means the only references available, and the company does not officially endorse them. These sources are merely suggested material.

For information on standards for country codes, you may refer to the book *Codes for Educational and Cultural Exchange* which is printed by the United States Information Agency. These codes are updated as countries change and are renamed, and the updates are supplied by the agency. To order the book, contact the agency at the following address.

Office of the General Counsel United States Information Agency Washington, DC 20547

Another publication of standards you may refer to is the *Federal Information Processing Standards Publication 10-3*, which is used by the U.S. Dept. of Commerce. The U.S. Dept. of Commerce uses a two (2) character code abbreviation for all nations. If you call and ask for FIPS Publication 10-3 and all change notices to date, they will send them to you free of charge and will also put you on a list to receive future revisions. You may contact the department at the following address.

Standards Processing Coordinator (ADP) Computer Systems Laboratory Building 225, Room B-64 National Institute of Standards and Technology Gaithersburg, MD 20899-0001 Phone: (301) 975-2000

Nation Code Validation (STANATN) fields

Updated: August 27, 2020

Use this page to create, update, insert, and delete nation codes, such as Australia, France, Iceland, and so on.

Field	Description
Nation Code	Code of the nation. After a nation code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the nation code record cannot be deleted.
Description	Description of the nation.
SEVIS Equivalent	SEVIS major code that corresponds to this nation code. You must enter the new values before attempting to process records. Values for this field come from the INS's website.
EDI Equivalent	Used to assign the EDI SPEEDE/ExPRESS country code values to the institution's nation codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value will be used in the transmission of transcript information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #26.
LMS Equivalent	LMS Equivalent Class Code. Used to display the IA-PLUS Loan Management System (LMS) country or nation code values that are equivalent to the Banner nation codes. These codes are not validated. The translation to these LMS codes occurs during the LMS transaction feed interface from Banner Financial Aid. For more information, please refer to the *Banner Financial Aid Use* content or the *IA-PLUS Loan Management System User Manual*.
ISO Code	International Standards Organization (ISO) nation code associated with this nation code. These codes are set by the ISO and are used internationally by countries for reporting requirements. While the nation code is still used for address information in Banner, the ISO code is used for specific reporting. **Note:** Use the ISO 3166-1 alpha-2 standard for codes. The codes are available at www.iso.org

Field	Description
	The **ISO Code** field will only allow the entry of a value from GTVSCOD where the Element field is 3166 and the Standard field is I (ISO Standard). Values come from the EDI/ISO Standard Code Validation (GTVSCOD) page.
Canadian Statistics Code	Five-digit code representing the nation code defined and used on the Annual University Full-Time Teaching Staff Survey associated with this nation code. Enter code that identifies the nation to Stats Canada.
MMREF Code	Optional field used by the Banner Human Resources System. Institutions using Banner Human Resources must populate this column with the MMREF-1 codes listed in the MMREF-1 format document published by the Social Security Administration (SSA) each year. In producing W-2 disc files, the W-2 MMREF-1 File (PXPW2MM) and the Puerto Rico W-2 MMREF-1 File (PXPW2MP) processes replace nation codes obtained from Banner pages with associated MMREF-1 codes from the MMREF Code column on STVNATN. The nation codes for employees are obtained from the Identification (PPAIDEN) page, and those for submitters, companies, and employers are obtained from the MMREF-1 Electronic Filing (PXAMMEF) page.
Activity Date	Date on which the record was last updated. Display only.

Non-Course Requirements Code Validation (STVNCRQ) page

Updated: August 27, 2020

Use the Non-Course Requirements Code Validation (STVNCRQ) page to create, update, insert, and delete non-course requirement codes, such as Interactive Qualifying Project, Senior Paper, Sufficiency, and so on.

The Academic Non-Course (SHANCRS) page uses this page to validate the non-course requirement codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the non-course requirement. When a non-course requirement code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the non-course requirement code record cannot be deleted.
Description	Description of the non-course requirement.
Activity Date	Date on which the record was last updated. Display only.

Non-Course Requirements Status Code Validation (STVNCST) page

Updated: August 27, 2020

Use the Non-Course Requirements Status Code Validation (STVNCST) page to create, update, insert, and delete non-course requirements status codes, such as Approved, Pending, Received but not Approved, and so on.

The Academic Non-Course (SHANCRS) page uses this page to validate non-course requirement status codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the non-course requirement status. When a non-course requirement status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the non-course requirement status code record cannot be deleted.
Description	Description of the non-course requirement status.

Fields	Descriptions
Satisfied	Check box used to specify that this status means that a non-course requirement to which it is applied is satisfied.
Activity Date	Date on which the record was last updated. Display only.

Need Referral Validation (STVNDRF) page

Updated: August 27, 2020

Use the Need Referral Validation (STVNDRF) page to create, update, insert, and delete need referral codes, such as Referred by counselor, Referred by instructor, Referred by Veterans Administration, and so on.

The Support Services module uses this page to validate need referral codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the need referral. When a need referral code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the need referral code record cannot be deleted.
Description	Description of the need referral.
Activity Date	Date on which the record was last updated. Display only.

Needs Validation (STVNEED) page

Updated: August 27, 2020

Use the Needs Validation (STVNEED) page to create, update, insert, and delete need codes, such as Health Services, Remedial Reading, Transportation, and so on. The Support Services module uses this page to validate need codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the need. When a need code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the need code record cannot be deleted.
Description	Description of the need.
Activity Date	Date on which the record was last updated. Display only.

Faculty Non-Instructional Type Code Validation (STVNIST) page (California Localization)

Updated: August 27, 2020

Use the Faculty Non-Instructional Type Code Validation (STVNIST) page to create, update, insert, and delete faculty non-instructional type codes. These codes describe the various types of non-instructional work that a faculty member might be involved in, such as Academic Committee, Coach, Department Chairperson, and so on.

These codes also list the minimum and maximum allowable workload for the positions. Other forms use this page to validate faculty non-instructional type codes. You can create or update faculty non-instructional type codes only from this page.

If minimum and or maximum workloads are specified, then the non-instructional assignments will be checked when entered on the Faculty Assignment (SIAASGN) page to verify that the non-instructional assignments fall within the range specified.

Fields	Descriptions
Code	Code of the non-instructional work type. When a non-instructional work type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the non-instructional work type code record cannot be deleted.
Description	Description of the non-instructional work type.
Minimum Workload	Minimum workload for the non-instructional assignment.
Maximum Workload	Maximum workload for the non-instructional assignment.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Subject to Faculty Load Limit	Check box used to specify whether the non-instructional work type is subject to faculty load limit tracking. Any CRN assignment on the Faculty Assignment (SIAASGN) page that uses an assignment type code for which this check box is not checked will not be included in the load limit calculations.

Student Note Category Validation (STVNTCG) page (California Localization)

Updated: August 27, 2020

The Student Note Category Validation (STVNTCG) page is used to create and maintain note category codes such as Academic Warning or General Note.

This page is used with the Banner Student Advising Student Profile application. It is not used with Banner Student 8.x processing.

Fields	Descriptions
Code	Student note category code.
Description	Student note category code description.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Subject to Faculty Load Limit	Check box used to specify whether the non-instructional work type is subject to faculty load limit tracking.

Fields	Descriptions
	Any CRN assignment on the Faculty Assignment (SIAASGN) page that uses an assignment type code for which this check box is not checked will not be included in the load limit calculations.

Student Note Interaction Type Validation (STVNTIN) page (California Localization)

Updated: August 27, 2020

The Student Note Interaction Type Validation (STVNTIN) page is used to create and maintain note contact or interaction type codes, such as Phone, Email, or Appointment.

This page is used with the Banner Student Advising Student Profile application. It is not used with Banner Student 8.x processing.

Fields	Descriptions
Code	Student note interaction type code.
Description	Student note interaction type code description.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
Subject to Faculty Load Limit	Check box used to specify whether the non-instructional work type is subject to faculty load limit tracking. Any CRN assignment on the Faculty Assignment (SIAASGN) page that uses an assignment type code for which this check box is not checked will not be included in the load limit calculations.

Occupational Course Code Validation (STVOCCS) page

Updated: August 27, 2020

Use the Occupational Course Code Validation (STVOCCS) page to create, update, insert, and delete occupational course codes, such as Apprenticeship Course, Consumer and Homemaker Course, Occupational Course, and so on.

The Course Detail Information (SCADETL) page uses this page to validate the occupational course codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the occupational course. When an occupational course code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the occupational course code record cannot be deleted.
Description	Description of the occupational course.
Activity Date	Date on which the record was last updated. Display only.

Originator Code Validation (STVORIG) page

Updated: August 27, 2020

Use the Originator Code Validation (STVORIG) page to create, update, insert, and delete originator codes, such as Student Accounts Office, Bursar's Office, Dean of Students, and so on.

Pages in several modules use this page to validate the originator codes. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Required Value for CAPP Processing

Updated: August 27, 2020

The value AUTO, for Generated Automatically, is a required value on this page when CAPP processing is in use.

To reduce the number of parameters required for batch compliance, some of the values used to create compliance requests are hard-coded and do not allow user options. For the most part, the hard-coded values are the same as the values that default when a new compliance request record is created using SMARQCM.

One value that does not default on SMARQCM is hard-coded in batch compliance. That value is the originator code, and AUTO is the hard-coded value. Therefore, the value AUTO (with any description you desire) must exist in STVORIG. (The value AUTO is also used in a number of other Banner processes to indicate that a record was created and updated automatically by a batch process.)

Warning! If the value AUTO does not exist on STVORIG, batch compliance will terminate unsuccessfully with the error: ORA-02291: integrity constraint (SATURN.FK1_SMRRQCM_INV_STVORIG_CODE) violated - parent key not found. If this error occurs, add AUTO to STVORIG to continue processing.

Fields	Descriptions
Code	Code of the originator. When an originator code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the originator code record cannot be deleted.
Description	Description of the originator.
Activity Date	Date on which the record was last updated. Display only.

Orientation Session Code Validation (STVORSN) page

Updated: August 27, 2020

Use the Orientation Session Code Validation (STVORSN) page to create, update, insert, and delete orientation session codes, such as New Freshman, Graduate, or Transfer Only, and so on.

This page is used by the General Student (SGASTDN) page to validate orientation session codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the orientation session. When an orientation session code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the orientation session code record cannot be deleted.
Description	Description of the orientation session.
Activity Date	Date on which the record was last updated. Display only.

Port of Entry Code Validation (STVPENT) page

Updated: August 27, 2020

Use the Port of Entry Code Validation (STVPENT) page to create, update, insert, and delete port of entry codes such as Miami Port Authority, New York City Port Authority, San Francisco Port Authority, and so on.

The International Information (GOAINTL) page uses this page to validate the port of entry codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the port of entry. When a port of entry code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the orientation session code record cannot be deleted.
Description	Description of the port of entry.

Fields	Descriptions
SEVIS Equivalent	SEVIS major code that corresponds to this port of entry code. You must enter the new values before attempting to process records. Values for this field come from the INS's website.
Activity Date	Date on which the record was last updated. Display only.

Persona Validation (STVPERS) page

Updated: August 27, 2020

The Persona Validation (STVPERS) page is used to create and maintain codes for personas used with Banner Student Self-Service Registration. Personas control what pages can be accessed in Self-Service by a user and what tasks can be performed.

Fields	Descriptions
Code	Persona code, such as REGISTRAR, STUDENT, FACULTYINSTRUCTOR, FACULTYADVISOR, FACULTYBOTH, PROXY.
Description	Persona code description.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.

Practical Training Code Validation (STVPRAC) page

Updated: August 27, 2020

Use the Practical Training Code Validation (STVPRAC) page to create, update, insert, and delete codes for practical training, such as Computer Programmer, Insurance Adjuster, Secondary School Teacher, and so on.

The General Student (SGASTDN) page uses this page to validate the practical training codes. You can create or update the practical training codes only from this page.

Fields	Descriptions
Code	Code of the practical training type. When a practical training code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the practical training code record cannot be deleted.
Description	Description of the practical training type.
Activity Date	Date on which the record was last updated. Display only.

Phone Rate Code Validation (STVPRCD) page

Updated: August 27, 2020

Use the Phone Rate Code Validation (STVPRCD) page to create, update, insert, and delete phone rate codes, such as Private Line - Monthly Rate, Shared Phone - Daily Rate, Phone Charge - Term Rate, and so on.

The Phone Assignment (SLAPASG) page, Building Definition (SLABLDG) page, and the Room Definition (SLARDEF) page use this page to validate the phone rate codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the phone rate. When a phone rate code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the phone rate code record cannot be deleted.
Description	Description of the phone rate.
Month	Check box used to specify that the rate is to be assessed on a monthly basis.
Day	Check box used to specify that the rate is to be assessed on a

Fields	Descriptions
	daily basis.
Term	Check box used to specify that the rate is to be assessed on a term basis.
Activity Date	Date on which the record was last updated. Display only.

Electronic Prospect Validation (STVPREL) page

Updated: August 27, 2020

Use the Electronic Prospect Validation (STVPREL) page to define the various types of search or test score data loads.

Fields	Descriptions
Prospect Code	Electronic prospect code associated with the search or test score data loaded into the search file temporary tables.
Description	Description of the electronic prospect code.
Interface Code	Interface code (and therefore matching rules) to be used when loading this search or test score data. The interface code also determines which conversion rules to use as defined on the Tape Code Conversion Rules (SOTCNVT) page. Select the **Search** button for this field to access the Interface Code Validation (STVINFC) list. List Interface Code Validation (STVINFC)
Tape Code	Code of the tape (data load) source of the electronic prospect. This field associates the tape field positions defined on the Tape Field Position Rule (SRATPFD) page with a specific prospect and interface code.

Fields	Descriptions
	For example, the Student Search file can provide different data depending on whether it contains PSAT or SAT1 data. The file layout is the same in either case, but the major codes have different meanings. So, the same tape code could be used with two different prospect and interface codes. The two interface codes allow you to set up the appropriate data conversions based on the two sets of input values for `Major`. Select the **Search** button for this field to access the Tape Code (STVTAPE) list. List Tape Code (STVTAPE)
Enter on WEB	Check box used to specify the prospect codes that can be displayed in the Web for Prospects module of Banner® Student Self-Service.
WEB Page ID	Free-format field for grouping prospects in Web for Prospects module of Banner Student Self-Service. For example, if your institution has several undergraduate programs, you may have different default values and require that different data be entered. Therefore, you would create separate prospect codes. You can key the selection of your undergraduate programs off one site by constructing a link using the **WEB Page ID** value.
Activity Date	Date on which the record was last updated. Display only.
Header Record Exists in Tape File	Check box to indicate whether a header record exists in the tape file.

Progress Evaluation Code Validation (STVPREV) page

Updated: August 27, 2020

Use the Progress Evaluation Code Validation (STVPREV) page to create and define valid progress evaluation codes.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the progress evaluation. When a progress evaluation code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the progress evaluation code record cannot be deleted.
Description	Description of the progress evaluation.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Voice Msg	Voice Response Message Number. Number assigned to the Voice Response message assigned to this progress evaluation code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Program Accreditation Code Validation (STVPRGA) page

Updated: August 27, 2020

Use the Program Accreditation Code Validation (STVPRGA) page to create, update, insert, and delete program accreditation codes, such as Allied Health, Business Administration, Journalism, and so on.

The Transfer Articulation Institution (SOABGTA) page uses this page to validate the program accreditation codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the program accreditation type. When a program accreditation code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the program accreditation code record cannot be deleted.
Description	Description of the program accreditation type.
Activity Date	Date on which the record was last updated. Display only.

Compliance Print Code Validation (STVPRNT) page

Updated: August 27, 2020

Use the Compliance Print Code Validation (STVPRNT) page to define and maintain compliance print codes. Print codes can be assigned to text for numerous data entities, such as programs, areas, groups, and various types of restrictions and requirements.

The print codes are then assigned to print on various types of compliance hard copy output depending on conditions, such as the data contained on the output and the results of the compliance test.

Fields	Descriptions
Code	Code of the compliance print type. When a compliance print code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the compliance print code record cannot be deleted.
Description	Description of the compliance print type.
Activity Date	Date on which the record was last updated. Display only.

Create a print code that links comments to compliance output types

Updated: August 27, 2020

You can print code that links comments for the compliance output types.

About this task

Procedure

1. Access the **Compliance Print Code Validation (STVPRNT)** page.
2. Select Insert Record.
3. Enter the code for the type of compliance print output in the **Print Code** field.
4. Enter a description for the print code.
5. Save.

   Note: The **Activity Date** field is populated when you save the new record.

Change a print code that links comments to compliance output types

Updated: August 27, 2020

You can change the print code that links comments for the compliance output types.

About this task

Procedure

1. Access the **Compliance Type Code Validation (STVCPRT)** page.
2. Enter a new description for the print code.
3. Save.

   Note: The **Activity Date** field is updated when you save the changed record.

Delete a print code that links comments to compliance output types

Updated: August 27, 2020

You can delete the print code that links comments for the compliance output types.

About this task

Procedure

1. Access the **Compliance Type Code Validation (STVCPRT)** page.
2. Go to the **Print Code** field for the code you want to delete.
3. Select Remove Record.
4. Save.

Process Control Code Validation (STVPROC) page

Updated: August 27, 2020

Use the Process Control Code Validation (STVPROC) page to create, update, insert, and delete the process codes used for the rules that allow faculty member or advisor access to student information by process or role in Self-Service.

The Faculty/Advisor Process Rules (SOAFACS) page is used to set up the process rules for faculty members and advisors.

The following values are required in Banner® Student for use in security processing in Banner Faculty and Advisors Self-Service:

- DISPLAYSCHEDULE - accessing student schedules
- DISPLAYTESTS - accessing student test scores
- DISPLAYGRADES - accessing student grades
- ENTERGRADES - entering student grades
- DISPLAYHOLDS - accessing student holds
- TRANSCRIPT - accessing student transcripts

The `COMPLIANCE` – value that is used for accessing student compliance information is required in Banner Student for use in security processing in Banner Student Self-Service for the Web for CAPP module.

These values are also listed in the *Required System Values for Validation Pages* section of the *Validation Pages* chapter in the *Banner Student Use* content.

Fields	Descriptions
Process	Process type code. When a process code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the process code record cannot be deleted.
Description	Description of the process.
Check Order	Used to indicate which SOAFACS rule will be considered for the process code if the person is a faculty member, an advisor, or both. Valid values are: Faculty, Advisor, Both. The ENTERGRADES rule only allows the entry of Faculty. While the field will still display the values for Faculty, Advisor, or Both, only the value of Faculty can be saved for the ENTERGRADES rule.
Activity Date	Date on which the record was last updated. Display only.
Enforce Check Order	Check box used to ensure the appropriate SOAFACS rule is used when a user is identified as a faculty member and an advisor on the Faculty/Advisor Information (SIAINST) page, and the user has a relationship to the student. This option is not valid for `ENTERGRADES` rule.
PIN Control Allowed	Check box used to indicate whether the PIN is enabled for the process code on SOAFACS.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.

Phone Assignment Status Code Validation (STVPSCD) page

Updated: August 27, 2020

Use the Phone Assignment Status Code Validation (STVPSCD) page to create, update, insert, and delete phone assignment status codes, such as Active, Inactive, Withdrawn, and so on.

The Phone Assignment (SLAPASG) page uses this page to validate the phone assignment status codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the phone assignment status. When a phone assignment status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the phone assignment status code record cannot be deleted.
Description	Description of the phone assignment status.
Prevent Roll	Check box used to specify that this phone assignment status code is not to be rolled forward through the Assignment Roll Process (SLRROLL).
Activity Date	Date on which the record was last updated. Display only.

Part of Term Code Validation (STVPTRM) page

Updated: August 27, 2020

Use the Part of Term Code Validation (STVPTRM) page to create, update, insert, and delete part of term codes, such as Full Term, Continuing Education, Second Half Term, and so on.

Pages in several modules, such as Schedule and Registration, use this page to validate the part of term codes. You can create and update these codes only from this page.

The value of C for Combined Sessions is used in registration fee assessment when assessing at the student level for those students who have courses for more than one part of term.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the part of term. When a part-of-term code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the part-of-term code record cannot be deleted.
Description	Description of the part of term.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Source Contact Person Type Code Validation (STVPTYP) page

Updated: August 27, 2020

Use the Source Contact Person Type Code Validation (STVPTYP) page to create, update, insert, and delete source contact person type codes, such as Asst. High School Principal, Coach, Teacher, and so on.

The Source or Background Institution Base (SOASBGI) page uses this page to validate the source contact person type codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the source contact person type. When a source contact person type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the source contact person type code record cannot be deleted.
Description	Description of the source contact person type.
Activity Date	Date on which the record was last updated. Display only.

Prerequisite Waiver Code Validation (STVPWAV) page

Updated: August 27, 2020

Use the Prerequisite Waiver Code Validation (STVPWAV) page to create, update, insert, and delete prerequisite waiver codes, such as Dean of Instruction, Faculty Advisor, Division Chairperson, and so on.

The Basic Course Information (SCACRSE) page uses this page to validate the prerequisite waiver codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the prerequisite waiver type. When a prerequisite waiver code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the prerequisite waiver code record cannot be deleted.
Description	Description of the prerequisite waiver type.
Activity Date	Date on which the record was last updated. Display only.

Qualifying Paper Type Code Validation (STVQPTP) page

Updated: August 27, 2020

Use the Qualifying Paper Type Code Validation (STVQPTP) page to create, update, insert, and delete qualifying paper type codes, such as Competency Exam, Honors Paper, Master's Thesis, and so on.

The Qualifying Papers (SHAQPNO) page and the Qualifying Papers by Person (SHQPPNM) page use this page to validate the qualifying paper type codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the qualifying paper type. When a qualifying paper type code record has been saved, the code entered in this field cannot

Fields	Descriptions
	be changed. When this code has been used in any other record, the qualifying paper type code record cannot be deleted.
Description	Description of the qualifying paper type.
Transcript Print	Check box used to specify whether this qualifying paper type is eligible to appear on the transcript.
Activity Date	Date on which the record was last updated. Display only.

Administrative Role Code Validation (STVRADM) page

Updated: August 27, 2020

Use the Administrative Role Code Validation (STVRADM) page to define various types of administrator roles to be used with regionalization processing. Examples of such roles are: Recruiter, Reader, Alumni Recruiter, and so on. These codes are used by the Administrator Role Rules (SOAADAS) page and the Administrator's Assignments (SOAAINF) page.

Fields	Descriptions
Code	Code of the administrator role. When a administrator role code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the administrator role code record cannot be deleted.
Description	Description of the administrator role.
Rater Indicator	Check box used to specify whether this administrator role can assign ratings on the Admissions Rating (SAARRAT) page and the Admissions Decision and Rating Batch Entry (SAADCBT) page.
Activity Date	Date on which the record was last updated. Display only.

Student Fee Assessment Code Validation (STVRATE) page

Updated: August 27, 2020

Use the Student Fee Assessment Code Validation (STVRATE) page to maintain the list of valid student registration fee assessment rate codes used as an identifier for assessing registration fees such as Local Resident, Senior Citizen, Staff, and so on.

Other forms use this page to validate student registration fee assessment rate codes. You can create or update student registration fee assessment rate codes only from this page.

Fields	Descriptions
Code	Code of the student registration fee assessment rate. When a student registration fee assessment rate code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student registration fee assessment rate code record cannot be deleted.
Description	Description of the student registration fee assessment rate.
Activity Date	Date on which the record was last updated. Display only.

Admissions Rating Type Validation (STVRATP) page

Updated: August 27, 2020

Use the Admissions Rating Type Validation (STVRATP) page to define codes that identify all the types of ratings an institution might use. Possible examples include ratings for different application forms, personal ratings, academic ratings, athletic ratings, art or music ratings, and so on.

The rating type `0000 - Admissions Rating` is system-required. This value is also listed in the *Required System Values for Validation Pages* section of the *Validation Pages* chapter in the *Banner Student Use* content.

Fields	Descriptions
Code	Code of the admissions rating type. When an admissions rating type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the admissions rating type code record cannot be deleted.
Description	Description of the admissions rating type.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Building/Room Attribute Code Validation (STVRDEF) page

Updated: August 27, 2020

Use the Building/Room Attribute Code Validation (STVRDEF) page to create, update, insert, and delete building/room attribute codes, such as Auditorium, Music Room, Chemistry Lab, and so on.

Several forms in the Location Management and Housing module use this page to validate the building/room attribute codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the building/room attribute. When a building/room attribute code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the building/room attribute code record cannot be deleted. Although this field is primarily for use with classroom requirements, it is also used to populate the Schedule25 files.
Description	Description of the building/room attribute.
Auto Schedule	Check box used to specify whether this building/room attribute is

Fields	Descriptions
	to be extracted for input into the Schedule25 process when the schedule type is assigned to a CRN. This check box also controls the operation of the **Scheduler Number** field.
Scheduler Number	If the **Auto Schedule** check box is checked, this field will be automatically populated with a unique one-up number, if the Schedule25 Code is null when the attribute record is saved. Of, if desired, you can enter a unique one-up number. If the **Auto Schedule** check box is unchecked, this field will be blank. Use the Resequence option on the Option Menu to resequence the value in the **Scheduler Number** field. This process will overwrite the existing code and replace it in sequence starting with a value of 01.
Activity Date	Date on which the record was last updated. Display only.

Recruiter Code Validation (STVRECR) page

Updated: August 27, 2020

Use the Recruiter Code Validation (STVRECR) page to create, update, insert, and delete recruiter codes, such as East Coast Recruiter, Central Recruiter, High School Recruiter, and so on. Several modules use this page to validate the recruiter codes. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the recruiter. When a recruiter code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the recruiter code record cannot be deleted.
Description	Description of the recruiter.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation

Fields	Descriptions
	table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Religion Code Validation (STVRELG) page

Updated: August 27, 2020

Use the Religion Code Validation (STVRELG) page to create, update, insert, and delete religion codes, such as Baptist, Hindu, Lutheran, and so on. The General Person (SPAPERS) page uses this page to validate the religion codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the religion. When a religion code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the religion code record cannot be deleted.
Description	Description of the religion.
Activity Date	Date on which the record was last updated. Display only.

Relation Code Validation (STVRELT) page

Updated: August 27, 2020

Use the Relation Code Validation (STVRELT) page to create, update, insert, and delete relation codes, such as Brother, Mother, Spouse, and so on.

The Emergency Contact (SPAEMRG) page and the Guardian Information (SOAFOLK) page use this page to validate the relation codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the relation type. When a relation code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the relation code record cannot be deleted.
Description	Description of the relation type.
SEVIS Equivalent	SEVIS major code that corresponds to this relation type code. You must enter the new values before attempting to process records. Values for this field come from the INS's website.
Activity Date	Date on which the record was last updated. Display only.

Repeat Status Code Validation (STVREPS) page

Updated: August 27, 2020

Use the Repeat Status Code Validation (STVREPS) page to create, update, insert, and delete repeat status codes, such as Course may be Repeated, Course may not be Repeated).

The Basic Course Information (SCACRSE) page uses this page to validate the repeat status codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the repeat status. When a repeat status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the repeat status code record cannot be deleted.
Description	Description of the repeat status.
Activity Date	Date on which the record was last updated. Display only.

Residence Code Validation (STVRESD) page

Updated: August 27, 2020

Use the Residence Code Validation (STVRESD) page to maintain codes for residency, such as Foreign, Out of State Resident, In State Resident, and so on. Other forms use this page to validate the residency codes. You can create or update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the residency type. When a residency code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the residency code record cannot be deleted.
Description	Description of the residency type.
In State/Prov	Check box used to specify whether a person with this residency code is a resident of the state or province.
EDI Equiv (Equivalent)	EDI Equivalent. Used to assign the EDI SPEEDE/ExPRESS residency code values to an institution's residency codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value is used in the transmission of transcript information electronically through EDI. These values are defined in the third party *EDI SPEEDE/ExPRESS Implementation Guide* under data element #1073.
VR Msg	Voice Response Message Number. Number assigned to the Voice Response message assigned to this residency code.
Sys Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
MIS Foreign	Check box used to specify whether this residence code signifies as foreign for MIS reporting purposes only. This has no impact on any functionality other than the MIS report.
BOGW Eligibility	Check box used to specify whether records with this residence code are eligible for BOG waivers.

External API Information Validation (STVREST) page

Updated: August 27, 2020

The External API Information Validation (STVREST) page is used to create and maintain codes for external APIs used to connect with third party products.

This page should be set up and monitored by technical administrators. A system-required code of RPL has been delivered for use with registration planning and connections to Degree Works.

This page is composed of the External API Information section.

External API Information

Updated: August 27, 2020

Use the External API Information section of the page to create and maintain the external API codes for use with third party products.

Fields	Descriptions
Code	External API information code.
Description	External API information code description.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be

Fields	Descriptions
	unchecked.

Registration Reason Code Validation (STVRGRE) page

Updated: August 27, 2020

Use the Registration Reason Code Validation (STVRGRE) page to create, update, insert, and delete registration reason codes, such as Academic, Continuing Education, Degree, and so on.

The Student Course Registration (SFAREGS) page uses this page to validate the registration reason codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the registration reason. When a registration reason code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the registration reason code record cannot be deleted.
Description	Description of the registration reason.
Activity Date	Date on which the record was last updated. Display only.

Room Status Code Validation (STVRMST) page

Updated: August 27, 2020

Use the Room Status Code Validation (STVRMST) page to create, update, insert, and delete room status codes, such as Active, Inactive, Room Being Repaired, and so on.

Several forms in the Location Management and Housing module use this page to validate the room status codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other

Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the room status. When a room status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the room status code record cannot be deleted.
Description	Description of the room status.
Inactive	Check box used to specify whether a room assigned this status is inactive.
Activity Date	Date on which the record was last updated. Display only.

Role Definition Validation (STVROLE) page

Updated: August 27, 2020

Use the Role Definition Validation (STVROLE) page to define the various roles inherent to your institution.

These roles, such as Faculty, Advisor, Teaching Assistant, Administrative Assistant, Dean) are assigned to an individual and subsequently used in the Role-Based Security checking to determine access privileges to gradebook information on the Web. You may not delete a role code, if the role has been assigned on SOAFAPC or SOAROLE.

The delivered role codes of F (Faculty Member) and A (Advisor) provide all users who are set up in SIAINST as faculty members and advisors with a role description on SOAFAPC.

Fields	Descriptions
Code	Code of the role. When a role code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the role code record cannot be deleted.
Description	Description of the role.
Activity Date	Date on which the record was last updated. Display only.

Registration Permit-Override Code Validation (STVROVR) page

Updated: August 27, 2020

Use the Registration Permit-Override Code Validation (STVROVR) page to define and maintain the codes and descriptions for assigning registration permit-override groups to individual students in the Student Permit-Overrides (SFASRPO) page for registration processing. Some examples are Degree, Level, Prerequisite, or Special Approval.

The rules for each registration permit-override group are defined on the Registration Permit-Overrides Control (SFAROVR) page on a term-by-term basis and must exist before they can be assigned to students.

Fields	Descriptions
Code	Code of the registration permit-override group. When a registration permit-override group code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the registration permit-override group code record cannot be deleted.
Description	Description of the registration permit-override group.
Activity Date	Date on which the record was last updated. Display only.

Room Rate Code Validation (STVRRCD) page

Updated: August 27, 2020

Use the Room Rate Code Validation (STVRRCD) page to create, update, insert, and delete room rate codes, such as Suite - Term Rate, Single Room - Daily Rate, Apartment - Monthly Rate, and so on.

Several forms in the Location Management and Housing module use this page to validate the room rate codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other

Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the room rate. When a room rate code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the room rate code record cannot be deleted.
Description	Description of the room rate.
Month	Check box used to specify that the rate is to be assessed on a monthly basis.
Day	Check box used to specify that the rate is to be assessed on a daily basis.
Term	Check box used to specify that the rate is to be assessed on a term basis.
Activity Date	Date on which the record was last updated. Display only.

Appointment Result Code Validation (STVRSLT) page

Updated: August 27, 2020

Use the Appointment Result Code Validation (STVRSLT) page to create, update, insert, and delete appointment result codes such as Attended Interview, Did Not Attend Interview, Late to Interview.

The Prospect Information (SRARECR) page and the Person Appointments/Contacts (SOAAPPT) page use this page to validate the recruiting appointment result codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the appointment result. When an appointment result code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the appointment result code record cannot be deleted.
Description	Description of the appointment result.
Generate Contact	Check box used to specify whether this

Fields	Descriptions
	code means that the appointment result generates follow-up contact material.
Activity Date	Date on which the record was last updated. Display only.

Recruiting Internal Status Code Validation (STVRSTA) page

Updated: August 27, 2020

Use the Recruiting Internal Status Code Validation (STVRSTA) page to create, update, insert, and delete recruiting status codes. This page is used by other forms to validate recruiting status codes. You can create or update recruiting status codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the recruiting status. When a recruiting status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the recruiting status code record cannot be deleted.
Description	Description of the recruiting status.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Course Registration Status Code Validation (STVRSTS) page (California Localization)

Updated: August 27, 2020

Use the Course Registration Status Code Validation (STVRSTS) page to create, update, insert, and delete course registration status codes such as Audit, Registered, Web Drop. Other pages use this page to validate course registration statuses.

You can set the check boxes to determine what the various status codes allow, such as count in enrollment, place on waitlist, whether the course is gradable, and so on. You may also specify an automatic grade which will be placed on the student's registration record when the status is entered. For example, a course registration status of WF, Withdraw Failing, can automatically place an F on the student registration record.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Status Code	Code of the course registration status. When a registration status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the registration status code record cannot be deleted.
Description	Description of the course registration status.
Action Description	Description of the course registration action. This description allows users to differentiate between the registration status code description and the action description that is associated with the status code. You can modify the text to display the description used by your institution. This text populates the **Action** field in Banner Student Self-Service Registration.
Allowed to Enter	Check box used to specify whether this status can be entered on an individual course. When this check box is unchecked, this indicates that you cannot enter this status on an individual course, as this status is associated with the student's entire enrollment.
Count in Enrollment	Check box used to specify whether a course with this status will be included in the enrollment counts displayed on various pages and reports.
Count in Assessment	Check box used to specify whether a course with this status will be included in the assessment process. When the check box is unchecked, a course with this status will be excluded from the assessment process

Fields	Descriptions
	A status of drop or withdrawal, with or without refund, should have this check box checked so that the status is assessed at the % refund or no refund.
Count in Attempted	Check box used to include the student's hours for this section in attempted hours. Clear the check box to default attempted hours to 0 for the registration record.
Count in Time Status	Check box used to include the registration hours in the student's time status calculation. Clear the check box to not include the registration hours in the student's time status calculation.
Withdrawal Indicator	Check box used to specify whether this course registration status code is used for a course withdrawal or a dropped course, which affects refunding and student fee assessment.
Waitlist Indicator	Check box used to specify whether a course with this status can have a waitlist.
Gradable Indicator	Check box used to specify whether a course with this status can have grades manually assigned, either online on the Class Attendance Roster (SFAALST) page or the Class Roster (SFASLST) page, or through the Web. (Autogrades can be assigned to courses with statuses which do not allow grading.) Until a course has a grade, the course will not be rolled to academic history. Therefore, courses which are not gradable will not be rolled to academic history unless an autograde has been assigned.
Auto Grade	If you enter an auto grade in this field, a course with this status will have this grade automatically assigned when the status is assigned to the course. If the **Gradable Indicator** check box is checked, the grade is a default only and can be overridden anywhere that grades can be assigned. If the **Gradable Indicator** check box is unchecked, the grade defaults to SFAALST, SFASLST, or the Web, and cannot be overridden.

Fields	Descriptions
Print on Schedule	Check box used to specify whether a course with this status will be printed on a student's schedule, schedule/bill, and so on.
Status Type	Code of the status type that describes the course registration status code for baseline, self-service, and telephone applications. Required. Valid values are: • Registered, saved to the database as R. • Dropped, saved to the database as D. • Waitlisted, saved to the database as L. • Withdrawn, saved to the database as W. This field must be populated for every course registration status code that is in use. If this field is Null or blank for a record, the value defaults to Registered.
Web Indicator	Check box used to specify whether this status is to be available for processing in Banner Web registration. For more information on the use of these statuses, please refer to the Registration procedures for Web set-up in the Registration chapter of the *Banner Student Use* content. In addition to the system-required statuses, other course registration status codes can be Web-enabled as desired. This check box defaults to unchecked or N when a record is added, but you can change it at any time.
Extension Indicator	Check box used to specify whether this status code can be used in conjunction with extension processing. When this check box is checked, the associated registration code can only be used when processing extensions for open learning registration sections. When this check box is unchecked, the code cannot be used when processing extensions.
System Required	Check box used to specify whether this value is required by the

Fields	Descriptions
	system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.

California Localization

Fields	Descriptions
Apportionment Indicator	Check box used to specify whether records with this course registration status code are to be used for CCFS-320 reporting (considering other criteria, such as the census date, where appropriate). This check box has no direct impact in registration functionality.
Audit Indicator	Check box used as an audit type status code and to specify whether audit registrations are to be excluded from CCFS-320 reporting. This check box has no direct impact in registration functionality.

Term Restriction Code Validation (STVRTRM) page

Updated: August 27, 2020

Use the Term Restriction Code Validation (STVRTRM) page to create, update, insert, and delete term restriction codes, such as Fall, Spring, Summer I, and so on.

The Course Schedule Restrictions (SCASRES) page uses this page to validate the term restriction codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the restriction. When a restriction code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the restriction code record cannot be deleted.
Description	Description of the restriction.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Recruit Type Validation (STVRTYP) page

Updated: August 27, 2020

Use the Recruit Type Validation (STVRTYP) page to create, update, insert, and delete recruit type codes for use in the communications plan in the Recruiting and Admissions modules. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the recruit type. When a recruit type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the recruit type code record cannot be deleted.
Description	Description of the recruit type.
Activity Date	Date on which the record was last updated. Display only.

Athletic Attribute Validation (STVSAAT) page

Updated: August 27, 2020

Use the Athletic Attribute Validation (STVSAAT) page to create, update, insert, and delete codes for athletic attributes, such as 4-2-4 Rule or Transfer GPA Met. These codes are used on SGASPRT.

Fields	Descriptions
Code	Athletic attribute code for the athlete. When an athletic attribute code record has been saved, this code cannot be changed. When this code has been used in any other record, the athletic attribute code record

Fields	Descriptions
	cannot be deleted.
Description	Description of the athletic attribute code for the athlete.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Athletic Academic Eligibility Validation (STVSAEL) page

Updated: August 27, 2020

Use the Athletic Academic Eligibility Validation (STVSAEL) page to create, update, insert, and delete codes for athletic academic eligibility, such as Eligible, Ineligible, or Pending. These codes are used on SGASPRT.

Fields	Descriptions
Code	Athletic academic eligibility code. When an athletic academic eligibility code record has been saved, this code cannot be changed. When this code has been used in any other record, the athletic academic eligibility code record cannot be deleted.
Description	Description of the athletic academic eligibility code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Athletic Qualifier Status Validation (STVSAQS) page

Updated: August 27, 2020

Use the Athletic Qualifier Status Validation (STVSAQS) page to create, update, insert, and delete codes for athletic qualifier status, such as Academic Probation, Override, or Qualified. These codes are used on SGAPSRT.

Fields	Descriptions
Code	Athletic qualifier status code, such as qualified or academic probation. When an athletic qualifier status code record has been saved, this code cannot be changed. When this code has been used in any other record, the athletic qualifier status code record cannot be deleted.
Description	Description of the athletic qualifier status code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Special Approval Code Validation (STVSAPR) page

Updated: August 27, 2020

Use the Special Approval Code Validation (STVSAPR) page to define codes and descriptions for types of special approvals and permissions, such as Instructor, Dean, Honor's Advisor, and so on which cannot be checked by system processing when a person attempts to register for a course.

One special approval type (or none) can be assigned to each section on the Schedule (SSASECT) page, and special approval checking is controlled for each term by the error checking indicators on the Term Control (SOATERM) page.

Fields	Descriptions
Code	Code of the special approval. When a special approval code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the special approval code record cannot be deleted.

Fields	Descriptions
Description	Description of the special approval.
Activity Date	Date on which the record was last updated. Display only.

Athletic Competition Reason Validation (STVSARE) page

Updated: August 27, 2020

Use the Athletic Competition Reason Validation (STVSARE) page to create, update, insert, and delete codes for athletic competition available reasons, such as Approved Leave of Absence, Family Leave, or Military Service.

These codes are used on SGASPRT to explain why the number of seasons of competition available has changed and to provide a history of those changes on the competition record.

Reason codes can also be used to describe a time lapse in competition or for other informational reasons defined by the institution, when the number of seasons of competition that are available has not been changed.

Fields	Descriptions
Code	Athletic competition reason code. When an athletic competition reason code record has been saved, this code cannot be changed. When this code has been used in any other record, the athletic competition reason code record cannot be deleted.
Description	Description of the athletic competition available reason code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Athletic Residency Exception Validation (STVSARX) page

Updated: August 27, 2020

Use the Athletic Residency Exception Validation (STVSARX) page to create, update, insert, and delete codes for athletic residency exceptions, such as Green Card or Student Visa. These codes are used on SGASPRT.

Fields	Descriptions
Code	Residency exception code for the athlete. When a residency exception code record has been saved, this code cannot be changed. When this code has been used in any other record, the residency exception code record cannot be deleted.
Description	Description of the residency exception code for the athlete.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Athlete Transfer Status Validation (STVSATR) page

Updated: August 27, 2020

Use the Athlete Transfer Status Validation (STVSATR) page to create, update, insert, and delete codes for athletic transfer status, such as Eligible or Probationary. These codes are used on SGASPRT.

Fields	Descriptions
Code	Athlete transfer status code. When an athlete transfer status code record has been saved, this code cannot be changed. When this code has been used in any other record, the athlete transfer status code record cannot be deleted.

Fields	Descriptions
Description	Description of the athlete transfer status code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Service Attribute Validation (STVSATT) page

Updated: August 27, 2020

Use the Service Attribute Validation (STVSATT) page to create, update, insert, and delete support service attributes such as Covered by Student Insurance, Federal Grant, or No Loans Available.

The Support Services module uses this page to validate support service attributes. You can create or update service attributes only from this page.

Fields	Descriptions
Code	Code of the support service attribute. When a support service attribute code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the support service attribute code record cannot be deleted.
Description	Description of the support service attribute.
Activity Date	Date on which the record was last updated. Display only.

Source/Background Institution Code Validation (STVSBGI) page

Updated: December 12, 2024

Use the Source/Background Institution Code Validation (STVSBGI) page to create, update, insert, and delete source/background institution codes, such as Harvard

University, Yale University, Bryn Mawr College, and so on.

Several forms in the Recruiting, Academic History, and Admissions modules use this page to validate the source/background institution codes. You can create and update these codes only from this page.

Use the Source Background Type section of the page to enter valid *Source Background Type* codes that are associated with specific *Source or Background Institution* codes and set the value for them, these codes cannot be maintained in this section, user must perform this action in the Source Background Type Validation (GTVSBGT) page. This section allows to associate multiple *Source Background Type* codes values to a specific *Source or Background Institution*.

Fields	Descriptions
Code	Valid "Source Background Type Validation" code from validation page GTVSBGT. This is required.
Description	Description for "Source Background Type Validation" code from validation page GTVSBGT. This will be auto populated with selected code description value.
Value	The value of the "Source Background Type". Allowed values are alphanumeric, this is required field and the number of characters allowed are up to 20 char.

This page is entered in filter mode. Enter and execute a filter in the **Source or Background Institution** field to populate the page.

See the Required System Values for Validation Pages section in the Validation Pages chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Required Value for Transfer Course and AMCAS Processing

Updated: August 27, 2020

The value 999999 - Miscellaneous Institution is used in transfer course and AMCAS processing.

- The value 999999 - Miscellaneous Institution must be defined if you want to use this code on the Transfer Course (SHATRNS) page. The existence of this code in the Transfer Institution information of SHATRNS allows you to enter a name for the institution when you are entering transfer work for a person.
- The value 999999 - Miscellaneous Institution must be defined for AMCAS processing in the Person Course Summary Types Table (SORCRSS) and the Person GPA Types Table (SORGPAT) for use with the SAVAMCT Banner view. If this value does not exist, processing may not run successfully.

Fields	Descriptions
Source or Background Institution	Code of the source/background institution. When a source/ background institution code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the source/background institution code record cannot be deleted.
Description	Description of the source/background institution.
Type	Identifier for the type of institution. Valid values are: `H` high school `C` college or university `S` source-only
Source Indicator	Check box used to specify whether an institution with this source/ background institution code is for a recruiting source.
Admissions Request	Code of the admission request checklist item associated with the source/background institution. Select the **Search** button for this field to access the Admission Request Code Validation (STVADMR) list.

Fields	Descriptions
	List Admission Request Code Validation (STVADMR)
Admissions Request Description (untitled)	Description associated with the admission request checklist item code, automatically displayed when a valid value is entered in the **Admissions Request** field. Display only.
Electronic	Indicator used for each record to specify whether the institution can receive electronic transcripts or not, and if so, whether they should be sent in EDI or XML format. Valid values are: PESC/XML (P), EDI (E), No, (Print paper transcript - N), or Null.
FICE	Federal Interagency Commission on Education (FICE) number assigned to the institution. If the FICE code is used as the source/background institution code, it does not need to be entered in this field. A valid FICE code is required to send transcripts electronically through EDI to those institutions which are capable of receiving them. If a value exists in this field, then this number will be used in the EDI process.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this source/background institution code.

High School Subject Validation (STVSBJC) page

Updated: August 27, 2020

Use the High School Subject Validation (STVSBJC) page to create, update, insert, and delete high school subject codes, such as English, History, Mathematics, and so on.

The Admissions Decision (SAADCRV) page and the Admissions Decision Rules (SAADCSN) page use this page to validate the high school subject codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the high school subject. When a high school subject code record has been

Fields	Descriptions
	saved, the code entered in this field cannot be changed. When this code has been used in any other record, the high school subject code record cannot be deleted.
Description	Description of the high school subject.
Activity Date	Date on which the record was last updated. Display only.

Schedule Contract Code Validation (STVSCCD) page

Updated: August 27, 2020

Use the Schedule Contract Code Validation (STVSCCD) page to create, update, insert, and delete schedule contract codes, such as Military Sponsored, State Services Sponsored, Company Sponsored, and so on.

The Schedule Detail (SSADETL) page uses this page to validate the schedule contract codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the schedule contract type. When a schedule contract code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the schedule contract code record cannot be deleted.
Description	Description of the schedule contract type.
Activity Date	Date on which the record was last updated. Display only.

Schedule Type Code Validation (STVSCHD) page

Updated: August 27, 2020

Use the Schedule Type Code Validation (STVSCHD) page to create, update, insert, and delete schedule type codes, such as Lecture, Lab, Self-paced, Seminar, and so on.

Pages in the Catalog, Class Schedule, and Registration modules use this page to validate the schedule type codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the schedule type. When a schedule type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the schedule type code record cannot be deleted.
Description	Description of the schedule type.
Instructional Method	Code of the course content delivery method. This field is used to create a relationship between a schedule type and an instructional method. Select the **Search** button for this field to access the Instructional Method Validation (GTVINSM) list. List Instructional Method Validation (GTVINSM)
Auto Scheduler	Check box used to specify whether this schedule type is to be extracted for input into the Schedule25 process when the schedule type is assigned to a CRN. When this indicator is checked, only sections with a schedule type defined to have classes automatically scheduled will be extracted.
Co-op Assignment Allowed	Check box used to specify whether this schedule type is allowed to be assigned for a section to a co-op on SGACOOP.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this schedule type.
Activity Date	Date on which the record was last updated. Display only.

Student Centric Period Cycle Validation (STVSCPC) page

Updated: August 27, 2020

Use Student Centric Period Cycle Validation (STVSCPC) page to create, update, insert, and delete codes for student centric period cycles, such as CYCLE1, CYCLE2, or CYCLE3.

Field	Description
Cycle Code	Student centric period cycle code. This is the code for the cycle the student starts in. When a student centric period cycle code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student centric period cycle code record cannot be deleted.
Description	Description of the student centric period cycle code.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Services Provided Validation (STVSEPR) page

Updated: August 27, 2020

Use the Services Provided Validation (STVSEPR) page to create, update, insert, and delete support services provided codes, such as Services Accepted, Services Provided, or Services Rejected).

The Support Services module uses this page to validate the support services provided codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the support service. When a support service code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the support service code record cannot be deleted.
Description	Description of the support service.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Session Code Validation (STVSESS) page

Updated: August 27, 2020

Use the Session Code Validation (STVSESS) page to create, update, insert, and delete session codes, such as Afternoon & Evening, Day, Weekend, and so on. Pages in several modules use this page to validate the session codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the session. When a session code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the session code record cannot be deleted.
Description	Description of the session.
Activity Date	Date on which the record was last updated. Display only.

State F/A Eligibility Validation (STVSFAE) page

Updated: August 27, 2020

Use the State F/A Eligibility Validation (STVSFAE) page to create, update, insert, and delete State F/A Eligibility codes.

These codes, which describe the manner in which a student was accepted into the EOPS (Educational Opportunity Programs and Services) program, are used by the Educational Opportunity Programs and Services (SGAEOPS) page for validation. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the State F/A Eligibility. When a

Fields	Descriptions
	State F/A Eligibility code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the State F/A Eligibility code record cannot be deleted.
Description	Description of the State F/A Eligibility.
Activity Date	Date on which the record was last updated. Display only.

Site Code Validation (STVSITE) page

Updated: August 27, 2020

Use the Site Code Validation (STVSITE) page to maintain information for sites, including name of the site and the address. Other forms use this page to validate the site codes, which you can create or update only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Site Code	Code of the site. When a site code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the site code record cannot be deleted.
Description (untitled)	Description of the site.
House Number	Unique number assigned to each building on a street or in an area and used as part of the postal address in some countries.
Street Line 1 Street Line 2 Street Line 3	Four lines for the street address.

Fields	Descriptions
Street Line 4	
City	City for the address.
State or Province	Code for the state or province in which the address is located. Select the **Search** button for this field to access the State/Province Code Validation (STVATYP) list. List State/Province Code Validation (STVATYP)
ZIP or Postal Code	ZIP or postal code for the address. When a valid ZIP or postal code is selected from the ZIP/Postal Code Validation (GTVZIPC) page, the combination of city, state/province, and nation information that exists in GTVZIPC defaults into the appropriate fields. The related information does not default in when the ZIP/postal code is entered manually. Select the **Search** button for this field to access the ZIP/Postal Code Validation (GTVZIPC) page. List ZIP/Postal Code Validation (GTVZIPC) page
Nation	Nation for the address. Select the **Search** button for this field to access the Nation Validation (STVNATN) list.

Fields	Descriptions
	List Nation Validation (STVNATN)
Other Description	Name of the foreign country in which the site is locate, if applicable.
Activity Date	Date on which the record was last updated. Display only.

Academic Dress Size Validation (STVSIZE) page

Updated: August 27, 2020

Use the Academic Dress Size Validation (STVSIZE) page to create, update, insert, and delete academic dress size codes which are used in graduation processing in the Academic History module for ordering and tracking of caps and gowns. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the academic dress size. When a size code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the size code record cannot be deleted.
Description	Description of the size.
Activity Date	Date on which the record was last updated. Display only.

A/F/I Fund Source Validation (STVSOFF) page

Updated: August 27, 2020

Use the A/F/I Fund Source Validation (STVSOFF) page to create, update, insert, and delete source of funds codes for assistantships, fellowships, and internships. You can create or update source of funds codes only from this page.

Fields	Descriptions
Code	Code of the source of funds. When a source of funds code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the source of funds code record cannot be deleted.
Description	Description of the source of funds.
Activity Date	Date on which the record was last updated. Display only.

International Student Sponsor Code Validation (STVSPON) page

Updated: August 27, 2020

Use the International Student Sponsor Code Validation (STVSPON) page to create, update, insert, and delete sponsor codes, such as Bnai Brith, Knights of Columbus, Sunshine Foundation, and so on.

The International Information (GOAINTL) page uses this page to validate the sponsor codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the sponsor. When a sponsor code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the sponsor code record cannot be deleted.
Description	Description of the sponsor.
Activity Date	Date on which the record was last updated. Display only.

Service Provider Validation (STVSPRV) page

Updated: August 27, 2020

Use the Service Provider Validation (STVSPRV) page to create, update, and delete the service provider codes, such as Training Center, Counseling Center, Learning Center). The Support Services module uses this page to validate the support services provider codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the service provider. When a service provider code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the service provider code record cannot be deleted.
Description	Description of the service provider.
Activity Date	Date on which the record was last updated. Display only.

Disability Service Code Validation (STVSPSR) page

Updated: August 27, 2020

Use the Disability Service Code Validation (STVSPSR) page to create, update, insert, and delete disability service codes, such as County Paratransit Service, Hearing Aid Required, Disabled Student Services, and so on.

The Medical Information (GOAMEDI) page uses this page to validate the disability service codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the disability service. When a disability service code record has been saved, the code entered in this field cannot

Fields	Descriptions
	be changed. When this code has been used in any other record, the disability service code record cannot be deleted.
Description	Description of the disability service.
Activity Date	Date on which the record was last updated. Display only.

Sport Status Code Validation (STVSPST) page

Updated: August 27, 2020

Use the Sport Status Code Validation (STVSPST) page to create, update, insert, and delete sport status codes used in the General Student module. The Athletic Compliance (SGASPRT) page uses this page to validate the sport status codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the sport status. When a sport status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the sport status code record cannot be deleted.
Active Indicator	Check box used to indicate whether the sports status code is active or inactive.
Description	Description of the sport status.
Activity Date	Date on which the record was last updated. Display only.

Scheduling Region Code Validation (STVSRGN) page

Updated: August 27, 2020

Use the Scheduling Region Code Validation (STVSRGN) page to set up data used in the Plan Ahead option to display course sections based on the location associated with a student’s primary program of study or study path.

About this task

By default, students will be able to select from all of the course sections your institution offers. If you have multiple campus locations, this includes the sections at each location. You have the option to limit the sections displayed to the student by the geographic region associated with their primary program of study or their selected study path. When you do this, students will see the sections offered at the location you've defined for the area they are in and all online courses. If a student wants to see sections offered at another location, they can do so by selecting the specific Campus Code for that location.

To enable this functionality, complete these steps.

Procedure

1. On the Scheduling Region Code Validation (STVSRGN) page, define a code for each region that your institution covers. For example, if your institution has city and suburb campuses, you could create the following.

Code	Description
CITY	The campuses in the city proper.
SBRB	The campuses located outside of the city.

2. On the Scheduling Region Code Rules (SSASRGN) page, associate a region to every campus associated with your institution. Do not assign online courses to a region. For example, if your institution has multiple courses in the CITY region, your SSASRGN entry would be similar to the following.

Campus Code	Campus Description	Scheduling Region	Scheduling Region Description
MHT	Manhattan	CITY	The campuses in the city proper.
BKLN	Brooklyn	CITY	The campuses in the city proper.
QNS	Queens	CITY	The campuses in the city proper
WEST	Westchester	SBRB	The campuses located outside of the city.

Warning! Every physical campus must be assigned to a region. If a campus is not assigned to a region, all courses will be displayed.

3. On the Crosswalk Validation (GTVSDAX) page, set the External Code for CAMPCODE to Y.

Services Exemption Validation (STVSSEP) page

Updated: August 27, 2020

Use the Services Exemption Validation (STVSSEP) page to create, update, insert, and delete the services exemption codes, such as Process of Transferring, Outside Tutoring Obtained, Obtained Own Provider).

The Support Services module uses this page to validate the services exemption codes. You can create or update services exemption codes only from this page.

Fields	Descriptions
Code	Code of the services exemption. When a services exemption code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the services exemption code record cannot be deleted.
Description	Description of the services exemption.
Activity Date	Date on which the record was last updated. Display only.

Service Code Validation (STVSSER) page

Updated: August 27, 2020

Use the Service Code Validation (STVSSER) page to create, update, insert, and delete service codes such as Day Care, Career Planning, Transportation. The Support Services module uses this page to validate service codes. You can create or update services only from this page.

Fields	Descriptions
Code	Code of the service. When a service code record has been saved, the code entered in this field cannot be changed. When this

Fields	Descriptions
	code has been used in any other record, the service code record cannot be deleted.
Description	Description of the service.
Service Type	Free-format field you can use to further define the service code.
Activity Date	Date on which the record was last updated. Display only.

Service Group Validation (STVSSGP) page

Updated: August 27, 2020

Use the Service Group Validation (STVSSGP) page to create, update, insert, and delete service groups such as Disabled Student Group, English Tutoring Group, or Foreign Student Group. The Support Services module uses this page to validate service groups. You can create or update service groups only from this page.

Fields	Descriptions
Code	Code of the service group. When a service group code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the service group code record cannot be deleted.
Description	Description of the service group.
Activity Date	Date on which the record was last updated. Display only.

Service Result Validation (STVSSRS) page

Updated: August 27, 2020

Use the Service Result Validation (STVSSRS) page to create, update, insert, and delete student service result codes, such as Promotion Obtained, Job Obtained, Goal Not Met, and so on.

The Support Services module uses this page to validate service result codes. You can create or update service result codes only from this page.

Fields	Descriptions
Code	Code of the student service result. When a student service result code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student service result code record cannot be deleted.
Description	Description of the student service result.
Activity Date	Date on which the record was last updated. Display only.

Services Status Validation (STVSSST) page

Updated: August 27, 2020

Use the Services Status Validation (STVSSST) page to create, update, insert, and delete services status codes, such as In Progress, Service Refused, Referred to Provider). The Support Services module uses this page to validate service status codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the services status. When a services status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the services status code record cannot be deleted.
Description	Description of the services status.
Activity Date	Date on which the record was last updated. Display only.

Section Status Code Validation (STVSSTS) page

Updated: August 27, 2020

Use the Section Status Code Validation (STVSSTS) page to create, update, insert, and delete section status codes such as Active, Inactive, Reserved, and so on. This page is used by other forms to validate section statuses. You can create or update section status codes only from this page.

Fields	Descriptions
Code	Code of the section status. When a section status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the section status code record cannot be deleted.
Description	Description of the section status.
Allow Registration	Check box used to specify whether students are allowed to register in a section with this section status.
Active/Inactive	Check box used to specify whether a section with this section status is activate.
Activity Date	Date on which the record was last updated. Display only.

State/Province Code Validation (STVSTAT) page

Updated: August 27, 2020

Use the State/Province Code Validation (STVSTAT) page to create, update, insert, and delete state and province codes, such as Delaware, British Columbia, New South Wales, and so on.

Pages in several modules use this page to validate the state and province codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Field	Description
Code	Code of the state or province. After a state or province code record has been saved, the code entered in this field cannot be changed. After this code has been used in any other record, the state or province code record cannot be deleted.
Description	Description of the state or province.
EDI Equivalent	Used to assign the EDI SPEEDE/ExPRESS state and province code values to the institution's state and province codes. When an institutional code is not equated with an EDI code, this field should be blank. The EDI equivalent value will be used in the transmission of transcript information electronically by EDI. These values are defined in the third party *EDI SPEEDE/ ExPRESS Implementation Guide* under data element #156.
IPEDS State Code	Free-format student IPEDS reporting code. This field is used in the production of the IPEDS First Time Residency Report (SHRIRES) Web upload file, which is produced in conjunction with the report output.
ISO Code	ISO code of the state or province.
Canadian Statistics Code	Five-digit code representing the state or province code defined and used on the Annual University Full-Time Teaching Staff Survey associated. Enter the code that identifies the state/ province for the state or province to Stats Canada.
Activity Date	Date on which the record was last updated. Display only.

Study Path Status Code Validation (STVSTSP) page

Updated: August 27, 2020

Use the Study Path Status Code Validation (STVSTSP) page to create, update, insert, and delete codes for study path statuses, such as Active or Inactive. You can create and update these codes only from this page.

Field	Description
Status Code	Study path status code. When a study path status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the study path status code record cannot be deleted.

Field	Description
Description	Description of study path status code.
Active and Allow Registration	Check box used to indicate whether the study path status code is active and registration is allowed for that study path status.
System Required	Check box is used to specify whether the code is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Student Status Code Validation (STVSTST) page

Updated: August 27, 2020

Use the Student Status Code Validation (STVSTST) page to create, update, insert, and delete student status codes, such as Active, Withdrawn, Inactive Due to Graduation, and so on.

Pages in several modules use this page to validate the student status codes. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Status Code	Code of the student status. When a student status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student status code record cannot be deleted.
Description	Description of the student status.
Allow Registration	Check box used to specify whether the student status code can

Fields	Descriptions
	register in classes for students.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Curriculum Status	Code of the curriculum status for this student status code. Select the **Search** button for this field to access the Curriculum Status (STVCSTS) list. List Curriculum Status (STVCSTS)
Activity Date	Date on which the record was last updated. Display only.

Student Type Code Validation (STVSTYP) page

Updated: August 27, 2020

Use the Student Type Code Validation (STVSTYP) page to create, update, insert, and delete student type codes, such as Returning Freshman, Continuing, Transfer, and so on.

Several forms in various modules use this page to validate the student type codes. You can create and update these codes only from this page.

The following student type codes should be created for IPEDS reporting:

- `Freshman`
- `First Time Freshman`
- `Unclassified`
- `Continuing`
- `First Time Graduate`
- `First Time Professional`

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for

this validation page.

Fields	Descriptions
Code	Code of the student type. When a student type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student type code record cannot be deleted.
Description	Description of the student type.
Next Student Type	Code of the student type that should be assigned to a student record when the Student Type Update Process (SHRTYPE) is run, based on the student type in the existing effective student record. For example, `New Freshman` and `New Transfer` types should have a next student type of `Continuing`, while `Continuing` students will remain `Continuing`.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Subject Code Validation (STVSUBJ) page

Updated: August 27, 2020

Use the Subject Code Validation (STVSUBJ) page to create, update, insert, and delete subject codes, such as Accounting, Botany, Economics, and so on.

Several forms in the Catalog, Registration, and Academic History modules use this page to validate the subject codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the subject. When a subject code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the subject code record cannot be deleted.
Description	Description of the subject.
VR Msg	Voice Response Message Number. Number assigned to the Voice Response message assigned to this schedule type.
Web Ind	Web Indicator. Check box used to specify whether this subject is to be available in the Banner Self-Service applications when a list of valid subjects is requested. It allows you to limit the subjects available for Web processing to a subset of all valid subjects. This check box defaults to checked or Y when a new subject code is added, but you can change it at any time. Please note that the default setting for this indicator is the opposite of the other Web indicators on Banner Student System validation forms.
Activity Date	Date on which the record was last updated. Display only.

Student Element One Validation (STVSUDA) page

Updated: August 27, 2020

Use the Student Element One Validation (STVSUDA) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 1 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 1. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 1.
Activity Date	Date on which the record was last updated. Display only.

Student Element Two Validation (STVSUDB) page

Updated: August 27, 2020

Use the Student Element Two Validation (STVSUDB) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 2 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 2. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.

Fields	Descriptions
Description	Description of the student institutional reporting element 2.
Activity Date	Date on which the record was last updated. Display only.

Student Element Three Validation (STVSUDC) page

Updated: August 27, 2020

Use the Student Element Three Validation (STVSUDC) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 3 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 3. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 3.
Activity Date	Date on which the record was last updated. Display only.

Student Element Four Validation (STVSUDD) page

Updated: August 27, 2020

Use the Student Element Four Validation (STVSUDD) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 4 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 4. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 4.
Activity Date	Date on which the record was last updated. Display only.

Student Element Five Validation (STVSUDE) page

Updated: August 27, 2020

Use the Student Element Five Validation (STVSUDE) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 5 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 5. When a student institutional reporting element code record has been saved, the code entered in this field cannot

Fields	Descriptions
	be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 5.
Activity Date	Date on which the record was last updated. Display only.

Student Element Six Validation (STVSUDF) page

Updated: August 27, 2020

Use the Student Element Six Validation (STVSUDF) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 6 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 6. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 6.
Activity Date	Date on which the record was last updated. Display only.

Student Element Seven Validation (STVSUDG) page

Updated: August 27, 2020

Use the Student Element Seven Validation (STVSUDG) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 7 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 7. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 7.
Activity Date	Date on which the record was last updated. Display only.

Student Element Eight Validation (STVSUDH) page

Updated: August 27, 2020

Use the Student Element Eight Validation (STVSUDH) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 8 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 8. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 8.
Activity Date	Date on which the record was last updated. Display only.

Student Element Nine Validation (STVSUDI) page

Updated: August 27, 2020

Use the Student Element Nine Validation (STVSUDI) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 9 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 9. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 9.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Student Element Ten Validation (STVSUDJ) page

Updated: August 27, 2020

Use the Student Element Ten Validation (STVSUDJ) page to create, update, insert, and delete institutional reporting data elements specific to an institution's needs for state or local reporting for a student.

This page is one of ten used in the General Student module for this purpose. You can create or update values for Element 10 on the Student Institutional Reporting Requirements (SGAUSDF) page from this validation page.

Fields	Descriptions
Code	Code of the student institutional reporting element 10. When a student institutional reporting element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the student institutional reporting element code record cannot be deleted.
Description	Description of the student institutional reporting element 10.
Activity Date	Date on which the record was last updated. Display only.

SUSI Award Code Validation (STVSURT) Page

Updated: August 27, 2020

Use this page to define the SUSI award rate codes.

SUSI Award Code Validation section

Updated: August 27, 2020

Use the SUSI Award Code Validation section to define the SUSI award rate code.

Field	Description
Grant Award Code	Enter the SUSI award rate code
Description	Provide a description of the award rate code.
Active	Check box used to indicate whether the SUSI Grant Award Code is active. By default, the check box is selected for you.

Acceptance Authority Code Validation (STVTAAU) page

Updated: August 27, 2020

Use the Acceptance Authority Code Validation (STVTAAU) page to create, update, insert, and delete acceptance authority codes such as Office of the Dean, Office of the Registrar, or Director of Admissions.

Other forms use this page to validate acceptance authority codes. You can create or update acceptance authority codes only from this page.

Fields	Descriptions
Code	Code of the acceptance authority. When an acceptance authority code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the acceptance authority code record cannot be deleted.
Description	Description of the acceptance authority.
Activity Date	Date on which the record was last updated. Display only.

Test Score Administration Type Code Validation (STVTADM) page

Updated: August 27, 2020

Use the Test Score Administration Type Code Validation (STVTADM) page to create, update, insert, and delete codes for test score administration types, such as Local, National, or Residual.

The Test Score Information (SOATEST) page uses this page to validate the test score administration types. You can create or update the test score administration type codes only from this page.

Fields	Descriptions
Code	Code of the test score administration type. When a test score administration type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the test score administration type code record cannot be deleted.
Description	Description of the test score administration type.
Activity Date	Date on which the record was last updated. Display only.

Electronic Data File and Tape Validation (STVTAPE) page

Updated: August 27, 2020

Use the Electronic Data File and Tape Validation (STVTAPE) page to define the unique types of search or test score data loads that a school will use. These codes are associated with the field positions of each file on the Tape Field Position Rule (SRATPFD) page.

Fields	Descriptions
Tape Code	Code of the electronic prospect tape (data load) source. When an electronic prospect

Fields	Descriptions
	tape source code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the electronic prospect tape source code record cannot be deleted.
Description	Description of the electronic prospect tape source.
Activity Date	Date on which the record was last updated. Display only.

A/F/I Task Validation (STVTASK) page

Updated: August 27, 2020

Use the A/F/I Task Validation (STVTASK) page to create, update, insert, and delete task codes for tasks or duties associated with assistantships, fellowships, and internships. You can create or update task codes only from this page.

Fields	Descriptions
Code	Code of the task. When a task code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the task code record cannot be deleted.
Description	Description of the task.
Activity Date	Date on which the record was last updated. Display only.

Transfer Articulation Course Status Validation (STVTAST) page

Updated: August 27, 2020

Use the Transfer Articulation Course Status Validation (STVTAST) page to create, update, insert, and delete transfer articulation course status codes.

The Transfer Institution Catalog Entry (SHATATC) page, Transfer Course Articulation

(SHATATR) page, and the Transfer Course Query (SHQTATC) page use this page to validate the transfer articulation course status codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the transfer articulation course status. When a transfer articulation course status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the transfer articulation course status code record cannot be deleted.
Description	Description of the transfer articulation course status.
Status	Check box used to specify that a transfer course with this status is active.
Activity Date	Date on which the record was last updated. Display only.

Test Accommodation Validation (STVTEAC) page

Updated: August 27, 2020

Use the Test Accommodation Validation (STVTEAC) page to create, update, insert, and delete test accommodation codes, such as Assistance by Translator, Extended Time Allowed, Full Accommodation, and so on.

The Test Score Information (SOATEST) page uses this page to validate the test accommodation codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the test accommodation. When a test accommodation code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the test accommodation code record cannot be

Fields	Descriptions
	deleted.
Description	Description of the test accommodation.
Activity Date	Date on which the record was last updated. Display only.

Test Page Validation (STVTEFR) page

Updated: August 27, 2020

Use the Test Page Validation (STVTEFR) page to create, update, insert, and delete test page codes, such as Standard Page, Series 01, Test Page A, and so on.

The Test Score Information (SOATEST) page uses this page to validate the test page codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the test page. When a test page code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the test page code record cannot be deleted.
Description	Description of the test page.
Activity Date	Date on which the record was last updated. Display only.

Test Instrument Validation (STVTEIN) page

Updated: August 27, 2020

Use the Test Instrument Validation (STVTEIN) page to create, update, insert, and delete test instrument codes, such as Standard Test, Oral Test Format, Form 011, and so on.

The Test Score Information (SOATEST) page uses this page to validate the test instrument codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the test instrument. When a test instrument code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the test instrument code record cannot be deleted.
Description	Description of the test instrument.
Activity Date	Date on which the record was last updated. Display only.

Telephone Type Validation (STVTELE) page

Updated: August 27, 2020

Use the Telephone Type Validation (STVTELE) page to create, update, insert, and delete telephone types such as Car, Residence Hall, Business, and so on. Several forms in various modules use this page to validate telephone types. You can create and update these types only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the telephone type. When a telephone type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the telephone type code record cannot be deleted.
Description	Description of the telephone type.
Activity Date	Date on which the record was last updated. Display only.

Test Purpose Validation (STVTEPR) page

Updated: August 27, 2020

Use the Test Purpose Validation (STVTEPR) page to create, update, insert, and delete test purpose codes, such as Initial Placement, Career Planning, and so on.

The Test Score Information (SOATEST) page uses this page to validate the test purpose codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the test purpose. When a test purpose code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the test purpose code record cannot be deleted.
Description	Description of the test purpose.
Activity Date	Date on which the record was last updated. Display only.

Term Code Validation (STVTERM) page

Updated: August 27, 2020

Use the Term Code Validation (STVTERM) page to create, update, insert, and delete term codes, such as 999999 The End of Time, 200010 Fall 1999, 200020 Spring 2000, and so on.

Pages throughout the Student System use this page to validate the term codes. You can create and update these codes only from this page.

Note: STVTERM is a common page that defaults the start and end term dates to the start and end housing dates if Banner Human Resources is installed and Banner Student is not installed.

Term codes should be numeric, in the format YYYYTT, and the codes must be constructed so that they maintain the appropriate sequence of terms. On this page, term codes display in descending order, with the highest term first.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the term. When a term code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the term code record cannot be deleted.
Description	Description of the term.
Start Date	First date on which classes in this term meet. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
End Date	Last date on which classes in this term meet. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
Term Type	EDI SPEEDE/ExPRESS session code (type of session) associated with this term code. The value will default from the Academic History Control (SHACTRL) page and can be overridden. Type codes are used in transmission of transcript information electronically through EDI. Select the **Search** button for this field to access the Term Type Validation (STVTRMT) list. List Term Type Validation (STVTRMT)
Academic Year	Code of the academic year to which this term code is assigned. Select the **Search** button for this field to access the Academic Year Validation (STVACYR) list.

Fields	Descriptions
	List Academic Year Validation (STVACYR)
Housing Start Date	First date for housing, meal plan, and phone assignments associated with this term. This field is used in the Location Management and Housing module. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
Housing End Date	Last date for housing, meal plan, and phone assignments associated with this term. This field is used in the Location Management and Housing module. Double-click in the field or select the **Calendar** button for this field to display a calendar that can be used to select the date.
Financial Aid Process Year	Code of the aid year with which this term is associated. Because financial aid is processed by aid year, institutional terms must be associated with a value in this field.
Summer	Check box used to indicate that the term is a summer term for interfacing with a third-party financial aid system, if applicable. This field is not required for Banner Financial Aid. The default is unchecked or N.
(Financial Aid) Term	Code of the term for interfacing with a third-party financial aid system, if applicable. This field is not required for Banner Financial Aid. Valid values are 1 - 6.
(Financial Aid) Period (Beginning)	Code of the beginning period for interfacing with a third-party financial aid system, if applicable. This field is not required for Banner Financial Aid. Valid values are 1 - 12.
(Financial Aid Period Ending) untitled	Code of the ending period for interfacing with a third-party financial aid system, if applicable. This field is not required for Banner Financial Aid. Valid values are 1 - 12.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record

Fields	Descriptions
	cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

California Localization

Fields	Descriptions
MIS Term Identifier	Identifier to be used in most MIS reports for the term. This is the CCCCO coding for the term. When you run an MIS report, the report will convert the Banner term to this code for reporting in the GI03 field.
Apportionment Category	Category assigned to the term for apportionment reporting and calculation of FTES. Choices are: `Not Reported` This term is skipped on apportionment reports. (default) `First Primary` This term is listed in the first primary term bucket for weekly census on apportionment reports. `Second Primary` This term is listed in the "second primary term" bucket for weekly census on apportionment reports. `Third Primary` This term is listed in the "third primary term" bucket for weekly census on apportionment reports. (Used with quarters.) `Intersession` This term is an intersession.
Term Length Multiplier	Term length multiplier for weekly census apportionment reporting and calculation of FTES. If the value in this field is changed and SSRMEET records exist for the term, the system displays the following message: `*WARNING* CRN meetings exist for this term; total contact hours will not recalculate for weekly type CRNs`.

Fields	Descriptions
IS Term Length Multiplier	Independent study term length multiplier for apportionment reporting and calculation of FTES. The value entered in this field is used to calculate FTES for independent study weekly CRNs in this term. This is null if the **Apportionment Category** field is null. If the **Apportionment Category** field contains any other value, this field is required. If the value in this field is changed and SSRMEET records exist for the term, the system displays the following message: `*WARNING* CRN meetings exist for this term; total contact hours will not recalculate for independent study type CRNs.`

Test Code Validation (STVTESC) page

Updated: August 27, 2020

Use the Test Code Validation (STVTESC) page to create, update, insert, and delete codes for test types (ACT Math, GRE French, Law School Admission, or SAT Verbal, and so on.

Other forms use this page to validate the test codes. You can create or update the test codes only from this page.

You can either use letter X or Z as the first letter of custom Test Codes on this page because Banner Student will not deliver any baseline Test Codes where the first letter is X or Z.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Test Code	Code of the test type. When a test type code record has been saved, the code entered in this field cannot be changed. When this

Fields	Descriptions
	code has been used in any other record, the test type code record cannot be deleted.
Description	Description of the test type.
Maximum Number of Positions	Maximum number of positions required for each test score. Valid values whole numbers from `1` to `15`.
Data Type	Check box used to specify the data type of the test score. When the check box is checked, numeric test scores are used. When the **c**heckbox is unchecked, alphanumeric test scores are used.
Minimum Score	Minimum test score value for the test code.
Maximum Score	Maximum test score value for the test code.
Admissions Checklist Request Item	Code of the admission request checklist item associated with the test. Select the **Search** button for this field to access the Admission Request Code Validation (STVADMR) list. List Admission Request Code Validation (STVADMR)
Activity Date	Date on which the record was last updated. Display only.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
MIS	Free-format field in which you can enter an associated management information systems code, if desired.
Assessment Data	Assessment instrument data code associated with this test code.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this schedule type.

Transfer Level Code Validation (STVTLVL) page

Updated: August 27, 2020

Use the Transfer Level Code Validation (STVTLVL) page to create, update, insert, and delete transfer level codes, such as Undergraduate Transfer, Graduate Transfer, Adult

Education Transfer, and so on.

Several forms in Transfer Articulation processing and the Academic History module use this page to validate the transfer level codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the transfer level. When a transfer level code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the transfer level code record cannot be deleted.
Description	Description of the transfer level.
Activity Date	Date on which the record was last updated. Display only.

Time Status Code Validation (STVTMST) page

Updated: August 27, 2020

Use the Time Status Code Validation (STVTMST) page to create, update, insert, and delete time status codes for enrollment verification. These codes are used on the Time Status Rules (SFATMST) page in the Registration module. You can create and update these codes only from this page.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the time status. When a time status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the time status code record cannot be deleted.
Description	Description of the time status.
NSLC Equivalent	National Student Clearinghouse equivalent value for an institutionally defined time status code. These values are used in

Fields	Descriptions
	NSC reporting. Valid NSC values are: F full-time H half-time L less than half-time Q three quarter time An exception to these values is a code on STVTMST and a rule on SFATMST, which must be built for `0.00` minimum and `0.00` maximum credit hours applicable to each student level and a system-required code of 99 (Error Calculating Time Status). The value of Q can be used with three quarter time status for 150 Percent Subsidized Stafford Usage Limit regulatory reporting.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Taxonomy of Program Code Validation (STVTOPS) page

Updated: August 27, 2020

Use the Taxonomy of Program Code Validation (STVTOPS) page to create, update, insert, and delete taxonomy of program codes.

These codes specify the taxonomy of the program, such as English, Biology, or History. This page is used by other forms to validate the program taxonomy. You can create or update taxonomy of program codes only from this page.

Fields	Descriptions
Code	Code of the taxonomy of program. When a taxonomy of program code record has

Fields	Descriptions
	been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the taxonomy of program code record cannot be deleted.
Description	Description of the taxonomy of program.
Activity Date	Date on which the record was last updated. Display only.

Tape Field Names Validation (STVTPFD) page

Updated: August 27, 2020

Use the Tape Field Names Validation (STVTPFD) page to define all the possible field names into which search or test score data might be loaded.

It may also be used to define all possible field names into which data from other sources might be loaded. The fields defined in this table are delivered.

Please see the Required System *Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Field Name	Name of the field on the electronic prospect data load. Field names are delivered and cannot be changed.
Description	Description of the field.
System Ind	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Transcript Type Code Validation (STVTPRT) page

Updated: August 27, 2020

Use the Transcript Type Code Validation (STVTPRT) page to create, update, insert, and delete codes for transcript types, such as Official, Internal, Advising, and so on. This page is used by other forms to validate transcript type codes. You can create or update transcript type codes only from this page.

Fields	Descriptions
Code	Code of the transcript type. When a transcript type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the transcript type code record cannot be deleted.
Description	Description of the transcript type.
Web Indicator	Check box used to specify whether this transcript type can be displayed in Banner® Self-Service applications. It allows you to limit the types of transcripts that can be requested through the Web to a subset of all transcript types. This check box defaults to unchecked or N when a new record is added, but you can change it at any time.
Web Request Indicator	Check box used to specify whether this transcript type can be used by learners when creating transcript requests through Banner Student Self-Service. This field maps to `STVTPRT_WEB_RQST_IND`.
Activity Date	Date on which the record was last updated. Display only.

Acceptance Reason Validation (STVTRAC) page

Updated: August 27, 2020

Use the Acceptance Reason Validation (STVTRAC) page to create, update, insert, an

EOPS (Educational Opportunity Programs and Services) reason of acceptance codes for use in the General Student module. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the EOPS acceptance reason. When an EOPS acceptance reason code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the EOPS acceptance reason code record cannot be deleted.
Description	Description of the EOPS acceptance reason.
Activity Date	Date on which the record was last updated. Display only.

Transfer Center Code Validation (STVTRCN) page

Updated: August 27, 2020

Use the Transfer Center Code Validation (STVTRCN) page to create, update, insert, and delete codes for transfer centers, such as District Transfer Center Used, State Transfer Center Used, No formal transfer center used, and so on.

This page is used by the General Student (SGASTDN) page to validate transfer center codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the transfer center. When a transfer center code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the transfer center code record cannot be deleted.
Description	Description of the transfer center.
Activity Date	Date on which the record was last updated. Display only.

Time Required Validation (STVTREQ) page

Updated: August 27, 2020

Use the Time Required Validation (STVTREQ) page to create, update, insert, and delete codes for the time requirement codes which are used in the Support Services module such as One Semester, Two Years, Indefinite, and so on. You can create and update codes only from this page.

Fields	Descriptions
Code	Code of the time requirement. When a time requirement code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the time requirement code record cannot be deleted.
Description	Description of the time requirement.
Activity Date	Date on which the record was last updated. Display only.

Term Type Validation (STVTRMT) page

Updated: August 27, 2020

Use the Term Type Validation (STVTRMT) page to create, update, insert, and delete term type codes, such as Standard Semester, Quarter, Extended Term, and so on.

The Academic History Control (SHACTRL) page and the Term Code Validation (STVTERM) page use this page to validate term type codes. You can create and update these codes only from this page.

Warning! Term type is needed by the EDI electronic transcript process, and STVTRMT must contain the full set of valid EDI term types as defined in the third party *EDI SPEEDE/ ExPRESS Implementation Guide* (Data Element 1139 - Session Code).

These required codes and descriptions are listed below:

Code	Description
1	Full Year

Code	Description
2	Semester
3	Trimester
4	Quarter
5	Quinmester
6	Mini--term
7	Summer
8	Intersession
9	Long Session

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Term Type	Code of the term type. When a term type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the term type code record cannot be deleted.
Description	Description of the term type.
Activity Date	Date on which the record was last updated. Display only.

Transcript Name Source Code Validation (STVTRNS) page

Updated: August 27, 2020

Use the Transcript Name Source Code Validation (STVTRNS) page to create and maintain transcript name source codes. A student's name source could be the diploma name, the legal name, or the identification name from the general person record.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the transcript name source, such as IDEN, DIPLOMA, or LEGAL. When a transcript name source code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the transcript name source code record cannot be deleted.
Description	Description of the transcript name source code.
User ID	ID of the person who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Test Score Percentile Type Validation (STVTSPT) page

Updated: August 27, 2020

Use the Test Score Percentile Type Validation (STVTSPT) page to create and maintain percentile type codes for use on SOATEST.

Currently, SAT and GRE files that are loaded through SRTLOAD/baseline data load processing use delivered, system-required values on STVTSPT for percentile types. It is suggested when manual SAT or GRE percentiles are inserted on SOATEST that these percentile types be used.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the test score percentile. When a test score percentile code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the test score percentile code record cannot be deleted.
Description	Description of test score percentile code.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
User ID	ID of the person who last updated the record. Display only.

Fields	Descriptions
Activity Date	Date on which the record was last updated. Display only.

Admission Test Score Source Code Validation (STVTSRC) page

Updated: August 27, 2020

Use the Admission Test Score Source Code Validation (STVTSRC) page to maintain admission test score sources such as High School Transcript, College Transcript, or Test Score File, and so on.

Other forms use this page to validate the test score sources. You can create or update the admission test score sources only from this page.

Fields	Descriptions
Code	Code of the admission test score source. When an admission test score source code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the admission test score source code record cannot be deleted.
Description	Description of the admission test score source.
Activity Date	Date on which the record was last updated. Display only.

Academic Dress Type Validation (STVTYPE) page

Updated: August 27, 2020

Use the Academic Dress Type Validation (STVTYPE) page to create, update, insert, and delete academic dress type codes such as Black Gown, Scholar's Hood, Formal Dress Required. and so on.

This page is used in Graduation processing in the Academic History module to validate types of caps and gowns worn for various institution ceremonies. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the academic dress type. When an academic dress type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the academic dress type code record cannot be deleted.
Description	Description of the academic dress type.
Activity Date	Date on which the record was last updated. Display only.

Veteran Type Code Validation (STVVETC) page

Updated: August 27, 2020

Use the Veteran Type Code Validation (STVVETC) page to create, update, insert, and delete veteran type codes, such as Chapter 32 Post Vietnam Vet, Other Veteran, ROTC, and so on.

The General Student (SGASTDN) page uses this page to validate the veteran type codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the veteran type. When a veteran type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the veteran type code record cannot be deleted.
Description	Description of the veteran type.
Activity Date	Date on which the record was last updated. Display only.

Vocational Education Code Validation (STVVOED) page

Updated: August 27, 2020

Use the Vocational Education Code Validation (STVVOED) page to create, update, insert, and delete vocational education codes such as Vocational Education Program. The General Student (SGASTDN) page uses this page to validate the vocational education codes. You can create and update these codes only from this page.

Fields	Descriptions
Code	Code of the vocational education type. When a vocational education code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the vocational education code record cannot be deleted.
Description	Description of the vocational education.
Activity Date	Date on which the record was last updated. Display only.

Web Display Tables Validation (STVVTAB) page

Updated: August 27, 2020

Use the Web Display Tables Validation (STVVTAB) page to provide a list of applicable validation tables when the Lookup button is displayed from the **Validation Table Name** field in the key block of the Web Display List Customization (SOAWDSP) page.

Users can then customize the Web display of the validation table code values on SOAWDSP.

Please see the Required System *Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Table Name	Seven letter validation table name, such as STVATTR, STVCAMP,

Fields	Descriptions
	and so on. The validation table name listed here can be selected on SOAWDSP, and the codes from the selected validation table can be customized to be displayed on the Web.
Sys Req	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.
User	ID of the user who last updated the record. Display only.

Visa Type Code Validation (STVVTYP) page

Updated: August 27, 2020

Use the Visa Type Code Validation (STVVTYP) page to create, update, insert, and delete visa type codes, such as Tourist, Student Visa, Exchange Scholar, and so on.

The International Information (GOAINTL) page uses this page to validate the visa type codes. You can create and update these codes only from this page.

Note: All Banner® systems share this validation page. You should coordinate with other Banner system users at your institution when deciding what codes are used on this page.

Fields	Descriptions
Code	Code of the visa type. When a visa type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the visa type code record cannot be deleted.
Description	Description of the visa type.
Admission Request Code	Code of the required admission request checklist item associated with the visa type. Select the **Search** button for this field to

Fields	Descriptions
	access the Admission Request Code Validation (STVADMR) list. List Admission Request Code Validation (STVADMR)
Description	Description associated with the admission request checklist item code, automatically displayed when a valid value is entered in the **Admissions Request** field. Display only.
Non-Resident	Check box used to specify that a student with this visa type is a non-resident alien.
Voice Response Message Number	Number assigned to the Voice Response message assigned to this visa type.
Canadian Statistics Code	Five-digit code representing the immigration status code defined and used on the Annual University Full-Time Teaching Staff Survey associated. Enter the code that identifies the immigration status for the visa to Stats Canada.
SEVIS Code	SEVIS visa type code associated with this visa type. You must enter the new values before attempting to process records. Values for this field come from the INS's website.
Activity Date	Date on which the record was last updated. Display only.

Web Acknowledgement Validation (STVWACK) page

Updated: August 27, 2020

Use the Web Acknowledgement Validation (STVWACK) page to build Web for Prospects acknowledgement codes for data elements from the Electronic Prospect System. The values delivered with Web for Prospects are system required.

These codes are used on the Web for Prospects Acknowledgement Letter (SRAWACK) page for placing Electronic Prospect data elements on the Web acknowledgment letter. The acknowledgment letter appears on the Web after the prospect presses the **Submit** button.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the prospect self-service acknowledgement data element. When an acknowledgement data element code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the acknowledgement data element code record cannot be deleted.
Description	Description of the acknowledgement data element.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Application Waiver Reason Code Validation (STVWAIV) page

Updated: August 27, 2020

Use the Application Waiver Reason Code Validation (STVWAIV) page to enter codes describing application fee waivers and associated discounts. The discount amount is subtracted from the specified application fee.

These codes are entered on SAAADMS in the **Waiver** field and on the Credit Card Waiver page in the Admissions module of Banner Student Self-Service using a pull-down list. The applicant selects a waiver reason if they are allowed to waive all or part of the fee. Waiver reasons may be specific to application types.

The STVWAIV table is part of the seed data for the EDI Verification Label Validation (STVXLBL) page. STVXLBL lists the valid labels used in the cross-references on the EDI Cross Reference Rules (SOAXREF) page.

The institution can customize which waiver codes display on the Web waiver page by application type using the Web Application Customized Lists (SAAWADP) page.

Fields	Descriptions
Code	Code of the application waiver reason. When an application waiver reason code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the application waiver reason code record cannot be deleted.
Description	Description of the application waiver reason.
Discount Amount	Monetary amount to be subtracted from the associated application fee.
Activity Date	Date on which the record was last updated. Display only.

Application Type Code Validation (STVWAPP) page

Updated: August 27, 2021

Use the Application Type Code Validation (STVWAPP) page to define the types of applications which you want to receive electronically and also to define the values for several required data elements for each application type. Ensure that you have created all possible application types in STVWAPP.

Note: You can define new codes for additional applications.

Copy procedures or routines from default application (delivered) in SAAECRL to new application code.

Copy *Web Sections* and *Elements* in SAAWAPP.

Each application type to be used in Student Self-Service processing must be defined. In addition, the student level, student type, and admission type associated with each application type will be defined. When a Web application is loaded into Banner®, the values specified for these fields will be used in the created applications.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the electronic admissions application type. When an admissions application type code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the admissions application type code record cannot be deleted.
Description	Description of the electronic admissions application type.
Level	Code of the student level that will be assigned to all Banner admissions applications created through the Web for this admissions application type. Select the **Search** button for this field to access the Level Code Validation (STVLEVL) list. List Level Code Validation (STVLEVL)
Student Type	Code of the student type that will be assigned to all Banner admissions applications created through the Web for this admissions application type. Select the **Search** button for this field to access the Student Type Code Validation (STVSTYP) list. List Student Type Code Validation (STVSTYP)
Admissions Type	Code of the admissions type that will be assigned to all Banner admissions applications created through the Web for this admissions application type. Select the **Search** button for this field to access the Admission Type Validation (STVADMT) list. List Admission Type Validation (STVADMT)
Web Indicator	Check box used to specify whether this admissions application

Fields	Descriptions
	type can be displayed in Banner Self-Service applications. It allows you to limit the types of admissions applications that can be requested through the Web to a subset of all admissions application types. This check box defaults to unchecked or N when a new record is added, but you can change it at any time.
System Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Student Withdrawal Status Code Validation (STVWDRL) page

Updated: August 27, 2020

Use the Student Withdrawal Status Code Validation (STVWDRL) page to define Title IV withdrawal status codes.

Fields	Descriptions
Code	Code of the Title IV withdrawal status. When a Title IV withdrawal status code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the Title IV withdrawal status code record cannot be deleted.
Description	Description of the Title IV withdrawal status.
TIV Update Ind	Title IV Aid Recalculation Indicator. This check box is used to specify whether records with this status will cause financial aid records to be updated (as opposed to allowing recalculation in audit mode only). Check this check box to process Title IV recalculation.

Fields	Descriptions
	An optional crosswalk column exists on STVESTS referencing these codes if desired so that the SFAWDRL withdrawal code will be automatically updated/created upon withdrawing a student through the batch process or online with the code. However, the **TIV Record (Indicator)** will not be automatically checked on SFAWDRL. This must be performed manually, directly on the page.
Period Midpoint Ind	Title IV Period Midpoint Indicator. This check box is used to specify whether records with this status will generate a 50% refund for a student who has withdrawn, but has no withdrawal date from which to figure the refund amount. When a student leaves without notice and does not return, the refund is based on the date at which half the semester has been completed or 50%. Check this check box to process the refund at 50%.
Activity Date	Date on which the record was last updated. Display only.

Term Workload Rules Code Validation (STVWKLD) page

Updated: August 27, 2020

Use the Term Workload Rules Code Validation (STVWKLD) page to create, update, insert, and delete term workload rules codes, such as Full Time, Evening Division, Part Time - Business, and so on.

Other forms in the Faculty Load module use this page to validate the term workload rules codes. You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the term workload rule. When a term workload rule code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the term workload rule code record cannot be deleted.
Description	Description of the term workload rule.
Activity Date	Date on which the record was last updated. Display only.

Web Application Customized Letter Types Validation (STVWLTT) page

Updated: August 27, 2020

Use the Web Application Customized Letter Types Validation (STVWLTT) page to define letter codes for the different types of letters that may be displayed on the Student Self-Service Signature Page. The entries on this page are system-required and are delivered.

Use the Web Signature Letters window on SAAWADF to assign customized letters to these letter types. These will determine which letters will display, depending on the various circumstances (such as standard customized letter for non-Quick Start Web applicants, letter if Quick Start is suspended, letter for successful Quick Start, letter for applicant who is currently enrolled, and so on).

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Code	Code of the letter type. When a letter type rule code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the letter type rule code record cannot be deleted.
Description	Description of the letter type.
Module	Code of the Banner® module for which this letter is used. This

Fields	Descriptions
	associates a view with a letter code (from SOAELTR), thereby identifying the columns that are available for the customized letter to use. The module codes are pre-defined but are updatable by your institution. List Module Code for HTML Letter (STVELMT)
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
User ID	ID of the user who last updated the record. Display only.
Activity Date	Date on which the record was last updated. Display only.

Web Prospect Information Selection Validation (STVWPIC) page

Updated: August 27, 2020

Use the Web Prospect Information Selection Validation (STVWPIC) page to build Web for Prospects information selection codes for Web data entry sections. The values delivered with Web for Prospects are system required.

These codes are entered on the Web for Prospects Selection Rules (SRAWPRO) page to control order and data entry requirements for the Web for Prospects Web entry forms.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Selection Code	Code of the prospect self-service information selection. When an information selection code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the information selection code record cannot be deleted.
Description	Description of the prospect self-service information selection.
System Req	System Required. Check box used to specify whether this value is

Fields	Descriptions
	required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Web Payment Options Validation (STVWPYO) page

Updated: August 27, 2020

Use the Web Payment Options Validation (STVWPYO) page to create and update the Web payment option codes for use with Web transcript requests.

Fields	Descriptions
Code	Code of the Web payment option. When a Web payment option code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the Web payment option code record cannot be deleted. This field maps to `STVWPYO_CODE`. This is a required field.
Description	Description of the Web payment option. This field maps to `STVWPYO_DESC`. This is a required field.
For Credit Card	Check box used to specify that the use of this Web payment option will invoke the Web credit card payment process. This field maps to `STVWPYO_CREDIT_CARD_IND`.
Detail Code	Charge detail code to be used in billing for the transcript request. This field maps to `STVWPYO_DETC_CODE`. It is a required field.

Fields	Descriptions
	Values are validated against the Detail Code Control (TSADETC) page for detail codes with a detail category of TRN. Accounts Receivable charges will be posted only when the **Billing Term** (if being posted to the learner's account), **Detail Code**, and **Amount** fields are all populated and valid. Select the **Search** button for this field to access the Detail Code Control (TSADETC) page. List Detail Code Control (TSADETC) page
User ID	ID of the user who last updated the record. This field maps to `STVWPYO_USER_ID` and is automatically updated anytime the **(Web Payment Option) Code**, **Description**, and **Detail Code** fields are entered or updated. Display only.
Activity Date	Date on which the record was last updated. This field maps to `STVWPYO_ACTIVITY_DATE` and is automatically updated anytime the **(Web Payment Option) Code**, **Description**, and **Detail Code** fields are entered or updated. Display only.

Withdrawal Reason Code Validation (STVWRSN) page

Updated: August 27, 2020

Use the Withdrawal Reason Code Validation (STVWRSN) page to create, update, insert, and delete codes for withdrawal reasons, such as Personal, Left for Job in Related Field of Study, or Transferring to Another Institution.

The codes for transfer to another institution may be used for the IPEDS Graduation Rate Survey Report (SHRIGRS). Please see the IPEDS procedure information in the Academic History procedures section of the manual for more information.

The Admissions Application (SAAADMS) page uses this page to validate the application withdrawal reason. You can create or update the application withdrawal reason codes from this page.

Fields	Descriptions
Code	Code of the withdrawal reason. When a withdrawal reason code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the withdrawal reason code record cannot be deleted.
Description	Description of the withdrawal reason.
Activity Date	Date on which the record was last updated. Display only.

Web Application Elements Validation (STVWSCF) page

Updated: August 27, 2020

Use the Web Application Elements Validation (STVWSCF) page to define the data elements that can be used on a Web application.

It is also used to define within which section that data element will display. These values are delivered and are not meant to be updated. This validation page is used by the Web Application Section Rules (SAAWAPP) page to create Web applications.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
Element Code	Code of the element name from the column on the table being referenced. When an element name code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the element name code record

Fields	Descriptions
	cannot be deleted.
Description	Default label that will appear on the Web page. For example, you might enter LAST_NAME in the Element Code field, as this is the table column being referenced, and enter Surname in this field as the description, so that Surname appears on the Web page.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Web Section	Code of the Web section in which the data element exists. All data elements, excluding the questions, exist on a fixed data section on the Web. This minimizes the Web page load time and the Oracle database interaction time at any one time. Select the **Search** button for this field to access the Web Application Sections (STVWSCT) list. List Web Application Sections (STVWSCT)
Activity Date	Date on which the record was last updated. Display only.

Web Application Section Validation (STVWSCT) page

Updated: August 27, 2020

Use the Web Application Section Validation (STVWSCT) page to define Web application section codes and descriptions and to specify basic processing rules for each section of the Web page.

Information maintained on this page is used only in Student Self-Service admissions application processing. All data required to support the Banner® Web admissions application is delivered.

Please see the *Required System Values for Validation Pages* section in the *Validation Pages* chapter of the *Banner Student Use* content for a list of required system values for

this validation page.

Fields	Descriptions
Section Code	Code of the Web application section. This is the section of the Web page that will be available in your Banner Self-Service processing. When a Web application section code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the Web application section code record cannot be deleted. This is a required field. It is not validated in any way.
Description	Description of the Web application section.
Sys Req	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Image	Pathname for a graphics image or picture to be displayed in the section of the Web page. This field is optional and is not validated in any way. However, if the image label is not entered, no image will display within the associated section of the Web page.
Procedure	Label of the procedure that will be invoked when the associated section of a Banner Self-Service page is requested. This is a required field and is not validated in any way. However, if the procedure label entered does not represent a valid procedure, errors and other unpredictable results may occur.
Activity Date	Date on which the record was last updated. Display only.

Overall Configurable Page Field Validation (STVWSFD) page

Updated: August 27, 2020

The Overall Configurable Page Field Validation (STVWSFD) page is used to define the fields that can be configured on the Self-Service Registration pages. This validation page is used with the Overall Page and Field Configuration (SOAWSCR) page.

Field	Description
Code	Field code for the field item on the configurable Self-Service Registration page.
Description	Description of the field on the Self-Service Registration page.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the record cannot be deleted. When this check box is checked, it cannot be unchecked.

Overall Configurable Page Validation (STVWSPG) page

Updated: August 27, 2020

The Overall Configurable Page Validation (STVWSPG) page is used to define Self-Service Registration pages, sections of pages, and page panels that can be configured. This validation page is used with the Overall Page and Field Configuration (SOAWSCR) page.

Field	Description
Code	Page code (number) for the configurable Self-Service Registration page.
Description	Description of the Self-Service Registration page.
System Required	Check box used to specify whether this value is required by the system. If this check box is checked, the record cannot be deleted. When this check box is checked, it cannot be unchecked.

Web Self Service Options Validation (STVWSSO) page

Updated: August 27, 2020

Use the Web Self Service Options Validation (STVWSSO) page to create and update the self-service option codes for use with self-service transcript and enrollment verification requests.

Fields	Descriptions
Code	Code of the self-service option. When a self-service option code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the self-service option code record cannot be deleted. This field maps to `STVWSSO_CODE`. This is a required field.
Description	Description of the self-service option. This field maps to `STVWSSO_DESC`. This is a required field.
Charge	Monetary amount associated with the self-service option code. Valid values are any number from `00.00` to `9999999999.99`. This field maps to `STVWSSO_CHRG`. This is an optional field.
Issued To	Text to be inserted into the Issued To line on the paper transcript or the enrollment verification for this self-service option. For example, you might want the comment Hold for pickup to be printed in the Issued To line on the transcript or enrollment verification when the `HOLD` code is selected by the learner. This field maps to `STVWSSO_ISSUE_TO_COMMENT`. It is optional and defaults to null.
Printer Code	ID of the printer to be associated with any self-service transcript (SHRTRTC) or

Fields	Descriptions
	enrollment verification (SFRENRL) requests created using this self-service option. You can run the Academic Transcript Process (SHRTRTC) in sleep/wake mode, or run the Enrollment Verification Report (SFRENRL), specify this printer code in the appropriate parameter, and have all requests printed automatically on a designated printer. This field maps to `STVWSSO_PRNT_CODE`. It is an optional field. It is validated against GTVPRNT and defaults to null. Select the **Search** button for this field to access the Printer Validation (GTVPRNT) list. List Printer Validation (GTVPRNT)
User	ID of the user who last updated the record. This field maps to `STVWSSO_USER_ID` and is automatically updated anytime the **(Web Self-Service Option) Code**, **Description**, **Charge**, **Issued To**, and **Printer Code** fields are entered or updated. Display only.
Activity Date	Date on which the record was last updated. This field maps to `STVWSSO_ACTIVITY_DATE` and is automatically updated anytime the **(Web Self-Service Option) Code**, **Description**, **Charge**, **Issued To**, and **Printer Code** fields are entered or updated. Display only.

Student EOPS/CARE Withdrawal Reason Validation (STVWTHD) page

Updated: August 27, 2020

Use the Student EOPS/CARE Withdrawal Reason Validation (STVWTHD) page to create, update, insert, and delete codes which indicate a student's reason for withdrawing from the EOPS (Educational Opportunity Programs and Services) and CARE programs for the following term, as of the end of the reporting term.

Examples are Lack of Resources, Student or Family Problems, Discontinued (Academic Reasons). You can create or update these codes only from this page.

Fields	Descriptions
Code	Code of the EOPS/CARE withdrawal reason. When an EOPS/CARE withdrawal reason code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the EOPS/CARE withdrawal reason code record cannot be deleted.
Description	Description of the EOPS/CARE withdrawal reason.
Activity Date	Date on which the record was last updated. Display only.

EDI Verification Label Validation (STVXLBL) page

Updated: August 27, 2020

Use the EDI Verification Label Validation (STVXLBL) page to display codes and descriptions for EDI data verification labels which will be used when processing a variety of incoming EDI data.

Values in this table are not intended to be maintained locally. All required values will be delivered and will be inserted during the install process and through update scripts.

Please see the *Required System Values for Validation Pages* section in the *Validation*

Pages chapter of the *Banner Student Use* content for a list of required system values for this validation page.

Fields	Descriptions
EDI Label Code	Code of the EDI data verification label. This is used when validating and translating EDI data values to their equivalent Banner® codes. When an EDI data verification label code record has been saved, the code entered in this field cannot be changed. When this code has been used in any other record, the EDI data verification label code record cannot be deleted.
Description	Description of the EDI data verification label.
Sys Required	System Required. Check box used to specify whether this value is required by the system. If this check box is checked, the validation table record cannot be deleted. When this check box is checked, it cannot be unchecked.
Activity Date	Date on which the record was last updated. Display only.

Student Mail (SUAMAIL) page

Updated: August 27, 2020

This page is used to display and maintain details about correspondence with a person.

Correspondence may be entered directly on this page or this page may be updated through the Recruit Prospect Information (SRARECR) page, the Admissions Application (SAAADMS) page, the Admissions Decision (SAADCRV) page, the Quick Recruit (SRAQUIK) page, and the Quick Entry (SAAQUIK) page.

A person must first be added to the system through the Identification Page on any Banner® product. This page may be called from the Admissions Module forms SAAADMS, SAADCRV, and SAAQUIK, and from the Recruiting Module forms SRARECR and SRAQUIK.

Main window

Updated: August 27, 2020

The main window contains the key block and the Student Mail section.

Key block

Updated: August 27, 2020

Use this section to enter the ID of the student for whom you want to filter mail records.

Student Mail section

Updated: August 27, 2020

Use this section to view details about the student mail records. Use a Go button from the key block to access this section, and then use Go in Filter window to populate the section.

Fields	Descriptions
Admin ID	Administrative identifier, used for either the admissions application number for the applicant or the sequence number for the recruit, depending on the setting of the **Module** field. Use the **Search** button to display the application or recruiting summary information and return the administrative ID and term. When the **Module** field is set to Admissions, SAASUMI is displayed. When the **Module** field is set to Recruit, SRASUMI is displayed. If the **Module** field is set to another value, a Enter, Tab or Mouse function will take the user to the **Material** field, and will skip over the **Admin ID** field. List Admissions Application Summary (SAASUMI) page List Prospect Summary (SRASUMI) page

Global - SKAATSU

Updated: August 27, 2020

Attendance Tracking Setup (SKAATSU) page

Updated: August 27, 2020

Use this page to set up attendance tracking for CRNs, placements, and events.

There is a separate tab for each type of entity. You cannot navigate from tab to tab but must return to the key block to change entity type. When you save a record on this page, the system creates an SKRATTR record for each meeting for each individual associated with the entity. The SKRATTR records hold the attendance data entered using Self-Service or data load.

For CRNs only, if the CRN does not yet have meeting times or does not yet have registered students, when you save a record the system creates an SKBATTR record for the CRN.

Key block

Updated: August 27, 2020

Use this block to specify the type of entity for which you want to enter or display attendance tracking setup information.

Field	Description
Entity	Type of entity. Choices are *CRN*, *Placement*, and *Event*.

CRN section

Updated: August 27, 2020

This section is composed of the Selection block and the CRN Attendance Record Creation block.

Selection block

Updated: August 27, 2020

Use this block to specify the CRN(s) for the attendance tracking setup information you want to enter or display.

You can specify the CRN(s) based on one of the following:

- Subject only
- Subject and course
- Subject and term
- CRN and term
- Term only

Field	Description
Subject	Subject code.
Course Number	Course number.
Term	Term code.
CRN	Course reference number.

CRN Attendance Record Creation block

Updated: August 27, 2020

Use this block to enter or display attendance tracking setup information for the CRN(s) specified in the Selection block.

Field	Description
Term Code	Term code. Display only.
CRN	Course reference number. Display only.
Subject Code	Subject code. Display only.
Course Number	Course number. Display only.
Track Attendance	Check box used to specify whether attendance is to be tracked for this CRN and term combination. This defaults to cleared when a CRN and term combination is first accessed using this page.

Field	Description
	If the Track Attendance indicator is selected but the Attendance Records Exist check box is cleared, this indicates that only SKBATTR records exist for a CRN and term combination. If SKRATTR records already exist for a CRN and term combination (that is, the **Attendance Records Exist** check box is selected), the **Track Attendance** check box is selected. If the check box is cleared when records exist, the records in SKRATTR and SKBATTR will be deleted when you save the change.
Recording Method	Method by which attendance is to be tracked for this CRN and term combination. Values are the following: • `Default` Only exceptions (that is, absences) need to be entered, and data is entered at the hour level • `Manual` All attendance and absence is to be manually entered, and data is entered at the hour level • `Load` Attendance data will be loaded from a third-party application • `Yes/No` Attendance is entered on a yes/no basis • A value defaults into this field from the Default CRN Recording Method system parameter on the System Parameter (GKAKSYS) page.
Attendance Records Exist	Check box used to indicate whether SKRATTR records for this CRN and term combination exist. Display only.
Attendance Records Retention Date	Date on and after which the attendance records are not to be deleted when the student has a 'drop' registration status on the CRN. When a drop registration is used before this date, all attendance records are deleted for that student on that CRN. When a drop registration is used on or after this date, the attendance records

Field	Description
	for meetings on and after the drop date are not deleted unless the CRN is removed from a student's record.
Check All button	Select this button to select the **Track Attendance** check box for all CRN and term combinations displayed in the CRN Attendance Record Creation block.
Uncheck All button	Select this button to clear the **Track Attendance** check box for all CRN and term combinations displayed in the CRN Attendance Record Creation block.

Placement section

Updated: August 27, 2020

This section is composed of the Selection block and the Placement Attendance Record Creation block.

Selection block

Updated: August 27, 2020

Use this block to specify the placement(s) for the attendance tracking setup information.

You can specify the CRN(s) based on one of the following:

- Term only
- Placement only
- Term and Placement
- Term, placement, and number

Field	Description
Term	Term code.
Placement	Placement title.
Number	Placement number.

Placement Attendance Record Creation block

Updated: August 27, 2020

Use this block to enter or display attendance tracking setup information for the placement(s) specified in the Selection block.

Field	Description
Placement	Placement title. Display only.
Description	Description associated with the placement. Display only.
Term Code	Term code. Display only.
Number	Placement number. Display only.
Track Attendance	Check box used to specify whether attendance is to be tracked for this placement and term combination. This defaults to cleared when a placement and term combination is first accessed using this page. If SKRATTR records already exist for a placement and term combination (that is, the **Attendance Records Exist** check box is selected), the **Track Attendance** check box is selected. If the check box is cleared when records exist, the records will be deleted when you save the change.
Recording Method	Method by which attendance is to be tracked for this placement and term combination. Values are the following: • *`Default`* Only exceptions (that is, absences) need to be entered, and data is entered at the hour level • *`Manual`* All attendance and absence is to be manually entered, and data is entered at the hour level • *`Load`* Attendance data will be loaded from a third-party application • *`Yes/No`* Attendance is entered on a yes/no basis A value defaults into this field from the Default Placement Recording Method system parameter on the System Parameter

Field	Description
	(GKAKSYS) page.
Attendance Records Exist	Check box used to indicate whether SKRATTR records for this placement and term combination exist. Display only.
Check All button	Select this button to select the **Track Attendance** check box for all placement and term combinations displayed in the Placement Attendance Record Creation block.
Uncheck All button	Select this button to clear the **Track Attendance** check box for all placement and term combinations displayed in the Placement Attendance Record Creation block.

Event section

Updated: August 27, 2020

Use this section to enter or display attendance tracking setup information for events. This section displays all events set up in Banner.

Field	Description
Event Code	Event code. Display only.
Description	Description associated with the event code. Display only.
Track Attendance	Check box used to specify whether attendance is to be tracked for this event. This defaults to cleared when an event is first accessed using this page. If SKRATTR records already exist for an event (that is, the **Attendance Records Exist** check box is selected), the **Track Attendance** check box is selected. If the check box is cleared after records exist, the records will be deleted when you save the change.
Recording Method	Method by which attendance is to be tracked for this event. Values are the following: • `Default` Only exceptions (that is, absences) need to be

Field	Description
	entered, and data is entered at the hour level • *Manual* All attendance and absence is to be manually entered, and data is entered at the hour level • `Load` Attendance data will be loaded from a third-party application • `Yes/No` Attendance is entered on a yes/no basis A value defaults into this field from the Default Event Recording Method system parameter on the System Parameter (GKAKSYS) page.
Attendance Records Exist	Check box used to indicate whether SKRATTR records exist for the event. Display only.
Check All button	Select this button to select the **Track Attendance** check box for all.
Uncheck All button	Select this button to clear the **Track Attendance** check box for all.
